that had gone into liquidation, and erroneously included the Brokers' Banking Company, the Bombay Presidency Bank, the Royal Bank of India, and the Indian Peninsular Bank. None of these banks have either failed or gone into liquidation.

The amount of bullion by the P. and O. Company's steamer *China*, from Southampton on the 20th inst., was, in gold, to Alexandria, £71,500; to Madras, £45. In silver, to Calcutta, £15,000; to Yokohama, £330. Total in gold, £71,545; in silver, £15,330.

ARTICLES OF IMPORT.

TEA.—During the past week our market has been very dull, and it has been difficult to effect sales by private contract, whilst at the public auctions prices have in nearly all instances ruled in favour of buyers. The Moning and Wopaks of this season have been placed on the market, and a fair amount has found buyers at from 1s. 11½d. to 2s. 5d. per lb., the latter price being for export for a small quantity. The quality has proved very unsatisfactory. Fair to good Kaisows have sold at a decided fall at the public sales, prices ranging from 1s. 3d. to 1s. 8d. per lb.; fine have also been less readily saleable, and prices about ½d. to 1d. per lb. lower; finest have been exceptionally well maintained. In Pak Lings there is no change to notice. Common to fair black-leaf kinds remain as before, with a fair demand for export; old season's good to fine show no alteration. Of the new teas, good to fine have sold from 1s. 11½d. to 2s. 2d., and finest from 2s. 3d. to 2s. 5d. per lb. In new-make Cantons there is no new feature. Common to fair Oolongs remain as before; those of new import are not so readily saleable, and prices must be quoted about 1d. per lb. lower for good to fine qualities. Souchongs show no quotable alteration. In Flowery Pekoes there is no improvement. Scented teas have been very difficult to sell, and importers, finding this, offered them freely at public sale without reserve, and the prices obtained were about 3d. per lb. below those nominally quoted by private contract for good to fine Orange Pekoes, and about 1d. to 2d. per lb. for Capers, good to fine Orange Pekoes selling from 1s. 5d. to 1s. 10d., and Capers from 1s. 5d. to 1s. 6d. per lb. Foochow kinds of medium quality have also sold lower. In Uncoloured Japans there have been no transactions in the absence of fresh supplies. Green Teas continue to be firmly supported, but the amount of business done has been limited. Moyune kinds of Gunpowder and Young Hyson are most in demand, common to fair kinds being relatively difficult of sale. In Canton Greens there is no change. The circular of Messrs. James Steains and Co. on the quality, says:—"Each Kisow cargo comprises a few chops of fine tea, but as a whole, the crop is far below the average quality, excepting the Paklings, many of which are choice in flavour. The Monings, judged by the cargoes Min and Eliza Shaw, are as inferior as the Kisows, and are destitute of the usual ripe, brisk, full Pekoe flavour, and, like most of the Kisows, will be found to deteriorate rapidly from being so imperfectly cured."

SILK.—The market continues rather flat, at say 32s. 6d. for No. 3 Tsatlees, 37s. for best Japan, and 30s to 31s. for best Bengal Filatures; deliveries, however, are still small, showing that high prices such as are now ruling tell most unmistakably on consumption. The last advices from Shanghai are by telegram via Kiachta, to 3rd Oct., reportingsales of only 700 bales in fortnight. Stock on market 7,000 bales, and No. 3 Tsatlees cost 33s. 6d. laid down in London. The periodical public sales commenced on the 24th and are concluded. The quantity offered was 1,000 bales Bengal, 3,000 bales China, 800 bales Japan, and 800 bales Canton. The amount sold was not large, but some few parcels found buyers. The only new feature was the putting up about 200 bales of the Bengal silk at "tax prices, about 5 to 7½ per cent. below the nominal market value, with the declaration that they were to be sold without reserve, subject only to the "tax." This seemed to draw attention, and the whole were taken at more or less satisfactory prices. In the general market the currency of business had been disturbed by telegraphic news from China, quoting prices nearly 10 per cent. lower without assigning any especial cause. This was received on the 15th inst., and was sufficient to stop proceedings, and a large unloading taking place at the same moment induced sales here at a reduction of 6d. to 1s. per lb. in Tsatlee, until the telegram of 3rd Oct. arrived on 24th. Delivered from 1st to 24th are 2,269 bales China and 436 Japan.

COTTON.—Up to the 19th inst. an active demand was experienced in this market, and an advance of ¼d. to ½d. per lb. was generally established, 10¾d. being paid for China. On the 20th inst., chiefly owing to a want of response in the Manchester market, the demand became limited, and fully ¼d. per lb. of the advance was lost. The market closed on the 20th inst. heavily, with a tendency in prices to decline, which was afterwards confirmed. The closing quotation for China was 10¾d., for Dhollerah 11¼d. In the existing market there is up to the present time (25th inst.) but little change to report. The following are the latest quotations as given by the London Cotton Brokers' Association: Dhollerah, midding fair, 11d.; fair 11½d.; good fair 12d.; Tinnivelly, middling fair 10¼d.; fair 11d.; good fair 11½d. China, fully fair 10¾d. It will be seen that prices are about ¼d. per lb. in advance of our last report, with the exception of China, in which there is no alteration. The tone of the Liverpool market is quiet, and Fair Dhollerah is quoted at 11½d., Middling Orleans 15¾d. There are advices from New York per Atlantic Telegraph up to the 23rd inst.; Middling Upland is quoted at 41 cents.

COIR YARN.—At the sales 337 bales sound Cochin realised £35, and a parcel sea-damaged, first-class, £32 to £38; second, £30 to £33. Of Ceylon 180 bales sold, fine £50 to £57; good, £42 5s. to £43 5s. Of the same description 81 tons also sold as follows:—Good, £40 to £41 15s.; medium to good medium, £35 to £38 10s.; common to good common, £30 to £33 15s.

COFFEE.—The demand continues large, and there is a fair business doing. Plantation has receded in price from 6d. to 1s. per cwt., the better sorts showing the least reduction. There is also a slight reduction in Native, but not to any extent. The public sales of Plantation Ceylon have reached 750 casks, 1,140 barrels and bags, which are quoted as follows:—Fine ordinary to low middling, 74s. to 80s.; middling to good middling, 81s. to 84s. Of Native Ceylon, 124 casks, 1,698 barrels and bags sold, common to real good ordinary, 63s. to 66s. 6d.; bold, 72s. 6d. to 73s. Later, 320 casks, 330 barrels and bags Plantation, and 95 casks, 380 bags Native were taken off at the same rates. The only private transaction reported is a sale of 17 bags Penang at 63s. 6d. per cwt.

SUGAR.—This market is totally devoid of animation, the demand being of a most limited character. A small quantity of Manila, Clayed and Unclayed, has been offered at auction and all withdrawn. There has been a desire on the part of holders to realise, but few sales have taken place. The only sale of Foreign reported is of 566 bags low Singapore, at first retired, but afterwards taken at 22s. Of Mauritius a small quantity low brown sold at 25s. 6d. Of 6,061 bags Madras Jaggery a small portion sold; low quality, 21s. 9d. to 22s.; fair to good, 22s. 6d. to 23s. 6d. Afterwards there was a further small sale of Mauritius,—low and middling, brown, 25s. 6d. to 27s.; middling yellow grainy, 35s. No private sales reported.

RICE.—There is at length a slight improvement in the state of this market. At present, little business is reported, but there is more inclination to purchase, and the bids for floating cargoes show much improvement. Madras and Java descriptions are still entirely absent, and the only sales are of small quantities of Nekranzie at 11s. to 11s. 3d., and Rangoon at 11s. 9d. to 12s. per cwt. Privately, 2,600 bags fair Nekranzie have realised 11s. 4½d. per cwt.

PEPPER.—All kinds still remain flat, and prices are the same as at last report. The sales are as follows:—Of 3982 bags Black Singapore at auction three-fourths sold at 3¼d. to 3⅜d. per lb.; and of 4817 bags Black Penang two-thirds sold at 3⅛d. to 3¼d., and 3⅛d. for Trang. For White the prices are rather lower. Of 809 bags Singapore, and 83 bags Penang, about one-half sold at 6¼d. to 6⅜d. middling to fair. Private trade limited, and nothing reported.

SAGO, &C.—The market continues steady, and there is a very slight advance affecting only the lower qualities. Of 2562 packages at auction three-fourths sold, realising 18s. to 19s. per cwt. for good to fine small, and 16s. 6d. to 17s. 6d. middling to fair large. Tapioca: 60 bags Penang sold at 4½d., and 38 cases Singapore at 2¼d. Arrowroot: Little business doing, and no quotations given.

TERRA JAPONICA.—There is a good supply of Cutch Pegue, and of 2214 bags at auction about half sold at 32s. to 33s. 6d. per cwt., fair to fine. Privately there has been a sale of 200 boxes of same quality at 33s. per cwt. Gambier is very flat, and only one-fourth of 2808 bales at auction was sold at 23s. 6d. for good, and 32s. 3d. to 32s. 6d. cubes. Arrivals are expected.

HEMP (MANILA).—The supply still continues very short, and the demand has increased. Consequently there is an advance of £1 to £2 per ton, good qualities realising £49 to £53.

HORNS.—All kinds are firm. At auction 19 tons Madras, 4 tons Rangoon, and 3 tons Singapore, sold at 48s. to 50s. per cwt. for 3 to 3½ lbs. average, and 29s. to 36s. for 1⅛ to 1½ lbs. average. Also 4 tons Calcutta, and 3 tons Singapore Deer Horns at 45s. to 49s. per cwt. for 2¼ to 2 lbs. average.

Digitized by Google

Spices.—Cloves: Very quiet, everything at auction retired. Cinnamon: A small quantity has sold as follows:—1st quality 1s. 9d. to 2s. 8d.; 2nd, 1s. 8d. to 2s. 5d.; 3rd, 1s. 3d. to 2s. 1d.; the quarterly sales commence on the 29th inst. Nutmegs: Prices rather lower; 49 cases Penang and 15 cases Singapore at auction sold at 1s. 1d. to 2s. 4d. per lb. for ordinary small to fine medium. Ginger: Prices more in favour of buyers; 117 cases Cochin sold, rather bold, 81s. to 95s., low middling 66s. to 67s., small 58s. to 62s. Mace: Good qualities alone maintain their value, all inferior descriptions being lower; a small portion of Penang and Batavia sold at 3s. 6d. per lb. good palish, and 1s. 6d. to 2s. 1d. ordinary to good reddish; 13 cases dull broken Singapore were withdrawn at 1s. 5d.

Cocoa-nut Oil.—This market is firm, with a good demand. Prices remain within a fraction of those of our last report, viz., for Cochin, £59 to £60 per ton, and for Ceylon, £48 10s. to £49. At auction, 167 casks Cochin, and 125 casks Ceylon were taken.

Oils.—Anniseed: very quiet, with limited business at 9s. 3d. per lb. Cinnamon: steady, 3 cases at auction sold at 2s. 10d. to 3s. 3d. per oz. fair to good. Citronelle: 9 cases at auction realised 3¼d. to 3½d. per oz. Lemon Grass: no sales.

Japan Wax.—Good qualities are still unobtainable. Out of 148 boxes offered at auction 28 sold, good yellow lump 87s. 6d. per cwt.

India Rubber.—Supply very short, and holders continue to ask high prices. The only offer at auction was 64 baskets Siam, which was all retired. Arrivals expected.

Gutta Percha.—Very flat, and the only sale reported is of 10 tons ordinary reboiled, which realised 6d. to 6¼d. per lb.

Gums.—Benjamin, the auctions include the following:—58 cases Siam at £26 to £37s. per cwt. for 4th to 1st size tear; £14 to £24 dust and seed in block; £17 to £19 5s. dark rough; also 55 cases Sumatra, of which a few only sold at £10 10s. for false-packed second, and £6 7s. 6d. for third quality. Copal: 68 cases Manila sold, middling mixed, 34s.; ordinary soft, 27s.; 37 cases Singapore from the wreck of the Golconda sold at 31s. to 32s. Damer: Very scarce, nothing doing. Gamboge has more than doubled its recent value, and attained a rate unprecedented, 8 cases of recent arrival having sold at £50 to £52 10s. per cwt.

Tin.—This market has been without animation, and a very limited business has been transacted at £79 10s. to £80 per ton for Banca, and £78 to £79 for Straits, cash prices.

Miscellaneous.—Blacklead: Steady, and of 617 barrels at auction, one third sold at 12s. 6d. to 18s. 3d. per cwt., for middling to good lump, and 9s. 6d. to 10s. dust. Ebony Wood: 832 logs (64 tons) Ceylon offered and withdrawn. Galls: quiet, and a few boxes China sold at 64s. per cwt., for good quality; also 135 boxes Japan at 64s. to 64s. 6d. Musk: nothing doing. Soy: very flat, with scarcely anything doing; no quotations. Tortoise-shell: arrivals expected; nothing doing at present. Tumeric: none offering, either China or Java. Vermilion: materially reduced in price; about 150 boxes China having sold at 2s. 6d. to 2s. 8d. per lb. chiefly at former rate. Mother-o'Pearl Shells: all sorts scarce and eagerly inquired for. Rattans: steady, and 18,448 bundles Penang, and 9,495 bundles Singapore have been sold at 2s. 9d. to 6s. 4d. per hundred canes. Japan Cassia: 15 cases sold at 46s. Preserved Ginger: 100 casks China realised 10d½. per lb.

ARTICLES OF EXPORT.

Iron.—The quotations in London are for Welsh bars £6s. 5s. to £6 10.; nail rod, £8 10s. to £8 15s.; hoops, £9 10s. to £10; sheets, single, £10 10s. to £10 15s.; Staffordshire bars, £8 10s. to £8 15s.; rails, £6 5s. to £6 10s.

Steel.—Swedish keg, £15 15s. to £16.

Copper.—Sheet and Sheathing, £88 to £93 per ton; yellow metal, 7½d. to 7¼d per lb.

Tin.—£83 to £84 for block; £84 to £86 for common bars. Tin plates, best charcoal I.C., 33s. to 34s.

Lead, &c.—English pig, W.B., £22 15s.; shot, patent, £23 10s. to £24; sheet, £21 5s.; spelter, £20 5s. to £20 10s.; zinc, English sheet, £28; quicksilver, £6 18s. to £7.

The following is from the Circular of Messrs. French and Smith:—The market continues inactive. Iron is in moderate demand. Copper is very dull. Tin, notwithstanding good deliveries, continues to flag. Banca has declined to 45¼ guilders in Holland. Tin Plates much in demand, and makers have great difficulty in making delivery. Lead steady.

FREIGHTS AND CHARTERS.

We cannot note the slightest animation in outward berth freights to the East, nor have we heard of any transactions in homeward charters. Coal freights remain unaltered.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 40s. weight, 50s. meast. To Nagasaki: 50s. weight or mea. To Shanghai: 45s. weight, 45s. to 47s. 6d. meast. To Hong Kong: 40s. weight or meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Ceylon: 25s. to 30s. weight, 35s. meas.

The current quotations for coal, &c., are as follow:—From Wear or Tyne per keel. For Hong Kong: £41. For Singapore: £32. For Shanghai: £50. For Saigon: £50. For Yokohama: £51. From Newport, Cardiff or Swansea, per ton. For Hong Kong: £2. For Singapore, £1 9s. For Shanghai: £2 10s. For Saigon: £2 8s. For Yokohama: £2 7s. 6d. Batavia: £1 6s.

The Admiralty have invited tenders for the conveyance from the River Thames to Hong Kong of 13 tons naval stores, and for the supplying and delivering into store, or on board Her Majesty's steamships and vessels at Hong Kong, of 5,000 tons of coals, also for the conveyance of 8 tons medical stores, &c., from Woolwich to Colombo.

CASUALTIES.

Accounts from Mauritius, dated September 6, state that the cargo of the Cezard, condemned there on her voyage from Java to Boston, was being shipped on board the Ellen Morrison.

The Belle of Southesk, Mackenzie, from Foo-chow-Foo, which arrived at London Oct. 19, reports having experienced on June 9 and the two following days, a strong typhoon which blew the storm sails to pieces, and otherwise disabled the ship very much.

The Deerfoot, Carlin, from Canton to London, which arrived at Plymouth Oct. 17, had put back from off Portland Bill, in consequence of its blowing heavy, and her foretopmast being sprung and part of the crew disabled. She reports that on July 5, in lat. 2° 58′ N., lon. 109° 71 E., she struck on a coral reef and remained upwards of two hours, when she came off with the loss of a good deal of her copper.

The Frances, Hill, from London to Colombo, while in charge of a pilot, touched the ground and has put back to the River Thames.

The Constantia, Wilcock, which sailed for Liverpool Oct. 16 for Yokohama, struck on Arklow bank, Oct. 19, was abandoned with 10 feet of water in her hold, and has since sunk in deep water; crew saved.

The Susanna Johanna, Pieters, from Batavia to Rotterdam, which put into St. Helena Sept. 6, with loss of fore and main topmasts and other spars, sails, bulwarks, stanchions, &c., had been repaired, and would proceed on her voyage Sept. 27.

A small quantity of the cargo and rigging of the Star of Ceylon, from London to Ceylon, sunk off the South Foreland, has been landed at Dover.

The Hoang Ho, Carrington, from Shanghai, which arrived at London Oct. 24, reports having been fired at by two Chinese piratical junks when off the north end of the Island of Formosa.

The Falcon, for Shanghai, has had to discharge owing to the discovery of dry rot.

MISCELLANEOUS.

At Ascension.—Sept. 12, Cape City, Bowden, from Colombo, and sailed 14th for London; 21 0826 (2nd d.p.), from Foo-chow-Foo, and sailed for London.

Off Ascension.—Sept. 6, H.F.M.L from Foo-chow-Foo; 24, Lochiel from Colombo.

At St. Helena.—Sept. 13, Marianne, Ugler, from Yloilo, and sailed 14th for Falmouth; Eidsvold, Olsen, from Penang, &c., and sailed 15th for Falmouth; Presto, Bonjer, from Batavia, and Bernard and Agnes, Ordeman, from Batavia, and both sailed 14th for Amsterdam; 15, Grenada, Herd, from Singapore, and sailed for Liverpool; Machtilda and Simonetta, from Batavia, and sailed 17th for Rotterdam; 21, N. B. Palmer, Steele, from Hong Kong, and sailed 22nd for New York; 22, Lennox Castle, Dobbie, from Foo-chow-Foo, and sailed for London; Henrietta Visser, from Padang, and sailed for Amsterdam; Laurel, Moodie, from Foo-chow-Foo, and sailed 23rd for London; 25th, Kosmpoliet II., Boukn, from Batavia, and sailed for Dordt.

At Teneriffe.—Oct. 12, Agamemnon (s.s.), Middleton, from China, and left on the evening of the 13, for Madeira, not having been allowed to coal, owing to the quarantine regulations.

At Mauritius.—September 10, Falcon, Laws, from Singapore; 12, Jeanne Meyer, Loesewitz, sailed for Singapore; 13, Sumatra, Beyser, sailed for Singapore.

At Bahia.—Sept. 21, Duguay Trouin, Jeanne, sailed for China.

At Mauritius.—Aug. 20, Omer and Julie, Fourmier, from Singapore; Sep. 2, Quintol, Jarvis, from Singapore; 4, Malta, London, from Singapore; 2, St. Philbert, Bernier, from Batavia; Aug. 17, Garibaldi, Dahlstedt, and sailed for Batavia.

At Callao.—Aug. 28, Amalia, Bollo, from Macao; Sept. 5, Dolores Ugarte, da Silva, from Macao; 11, Colombo, Chiaparra, from Macao: Aug. 28, Providencia, Natini, sailed for Macao.

On the 24th inst. Messrs. Charles Connell and Co. launched from their east shipbuilding-yard, on the Clyde, a composite sailing ship, of 700 tons register, classed 14 years A 1 at Lloyd's. She was named the Wemyss Castle by Miss Skinner. This is another addition to the fleet of packets forming the Castle Line, trading from Glasgow to Singapore, &c., and forms the tenth of the fleet. Immediately after launch the vessel was towed up to berth to take in cargo for Singapore.

The P. and O. Company's new steamer Surat will make another voyage to Alexandria previous to proceeding to the Indian station. She has proved a very satisfactory vessel during her last trip.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

DR. J. COLLIS BROWNE'S CHLORODYNE. Vice-Chancellor Sir W. Page Wood stated publicly in Court that Dr. J. Collis Browne was undoubtedly the Inventor of Chlorodyne; that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See *The Times*, July 13, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of any service in Cholera was Chlorodyne.—See *Lancet*, Dec. 31, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. Extract from *Medical Times*, Jan. 12, 1866.—"Is prescribed by scores of orthodox medical practitioners. Of course it would not be thus singularly popular did it not supply a want and fill a place.'"

DR. J. COLLIS BROWNE'S CHLORODYNE is the best and most certain remedy in Coughs, Colds, Asthma, Consumption, Neuralgia, Rheumatism, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE is a certain cure in Cholera, Dysentery, Diarrhœa, Colics, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE. Extract *from the* General Board of Health, *London, as to its efficacy in Cholera*—"so strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. Montgomery, Esq., *late Inspector of Hospitals, Bombay*.—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health after eighteen months' severe suffering, and when all other remedies had failed."

DR. J. COLLIS BROWNE'S CHLORODYNE. Caution.—None genuine without the words "Dr. J. Collis Browne's Chlorodyne" on the Government Stamp. Overwhelming medical testimony accompanies each bottle. Sole Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury, London. The immense demand enables the proprietors to reduce the price; it is now sold in bottles, 1s. 1½d., 2s. 9d., 4s. 6d., and 11s.

AGENT: Hong Kong, Mr. A. S. WATSON.

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor.

CHARTERED BANK of INDIA, AUSTRALIA, and CHINA.

MINUTES of an EXTRAORDINARY GENERAL MEETING of the Shareholders, held the London Tavern, WEDNESDAY, the 17th day of October, 1866:

THOMAS A. MITCHELL, Esq., M.P., in the Chair.

The advertisement convening the meeting having been read, the following Resolution, after some introductory observations, was moved by the Chairman, and being seconded by William Macnaughtan, Esq., was carried unanimously:—

"That an interim dividend at the rate of 5 per cent. per annum (free of income-tax) be now declared for the half-year ended 30th June last, payable on and after the 24th inst."

With a vote of thanks to the Chairman and Directors, moved by William Henry Mann, Esq., and seconded by Hugh Oxenham, Esq., and carried unanimously, the proceedings terminated.

T. A. MITCHELL, Chairman.

Warrants for the Dividend above declared, payable at "The City Bank, Threadneedle-street, London," on and after the 24th inst., will be issued forthwith to all the Shareholders.

PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power, ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer and a Blacksmith. Dry, Godowns for the reception of vessels, stores, &c., when requiring to discharge them.

Hong Kong, May 17, 1866.

HOLLOWAY'S OINTMENT and PILLS.—Effectual Aid.—In the sad time of sickness it is cheering to know that a remedy does exist, and that it can be procured at a little cost. Holloway's Ointment and Pills are always useful in relieving pain, in reducing inflammations, and regulating disordered actions. They never can be misapplied, nor can they, under any circumstances, cause mischief. They are a blessing to the rich when tormented by indigestion, gout, skin diseases, &c., and a precious boon to the poor when struck down by illness. Holloway's medicines should be in the possession of all soldiers, sailors, and emigrants, who will then be in a position to ease pain and cure disease when medical assistance cannot be obtained.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's.

Regular Line of Packet Ship.

To sail punctually on the 5th November.

FOR HONG KONG and WHAMPOA, the well-known clipper BELTED WILL, A 1 fourteen years, 812 tons register, A. LOCKE, Commander; lying in the London Dock. Has excellent accommodation for passengers.

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

Has a large portion of her Cargo already engaged, and will meet with quick despatch.

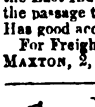
FOR HONG KONG and WHAMPOA. the beautiful British clipper ship DORA, A 1 ten years, 379 tons register, ELIJAH BROWN, Commander; loading in the West India Docks. This fine vessel, well known for her fast-sailing qualities (having made her last passage home from Colombo in 94 days), offers a favourable opportunity to shippers.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's. Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's Bishopsgate-street, E.C.

Regular Line of Packet Ship.—To follow the Belted Will.

FOR HONG KONG AND WHAMPOA, the very fast, new clipper JOHN MILTON, A 1, 14 years, 618 tons register, A. PIROUET, Commander; lying in the East India Docks. This ship, built last year, made the passage to China against the Monsoon in 104 days. Has good accommodation for passengers.

For Freight or Passage apply to SHAW, LOWTHER, AND MAXTON, 2, Royal Exchange-buildings, London E.C.



FOR SHANGHAI, (to sail positively on the 8th November, in lieu of the Falcon), the splendid new clipper ship MAITLAND, A 1 twelve years, 799 tons register, WILLIAM COULSON, Commander; lying in the East India Docks. This ship has proved herself to be one of the fastest afloat, having just made the passage from Foo Choo in ninety-eight days, and from Anjer in the extraordinary short time of sixty-seven days.

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

FOR SHANGHAI, to sail on the 25th November, the celebrated clipp ship SIR LANCELOT, A 1 14 years, 886 tons register, RICHARD ROBINSON, Commander; to load in the East India Docks. This beautiful ship was built last year, on the lines of the Ariel, by Messrs. Robert Steele and Co., of Greenock. Has superior accommodation for passengers.

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, E.C.

COLOMBO Direct (first ship), the clipper PALESTINE, AA 1, 608 tons register, Captain T. PARK; loading in the West India Docks. This vessel has superb accommodation for passengers.

For passage apply to W. H. TINDALL, 5, Tokenhouse yard; and for freight of passage apply to F. TALLACK 23, Birchin-lane, E.C.

COLOMBO (CEYLON) Direct (to follow the Palestine), having all her dead weight engaged, and only room for light measurement goods, the new clipper ship BOYNE, AA 1, 618 tons register, R. P. JONES, Commander; loading in the West India Docks. This splendid vessel has a full poop, with magnificent accommodation for the comfort and convenience of passengers.

For passage apply to the owner, W. H. TINDALL, 5 Tokenhouse-yard, E.C.; or for freight or passage to F. TALLACK, 23, Birchin-lane, Cornhill, E.C.

FOR COLOMBO and COCONADA (under engagement to H.M. Council for India, to sail on the 5th November), the splendid clipper ship BROCKHAM A 1 twelve years, 1,048 tons register, R. J. BARROW, Commander; lying in the East India Docks. Has excellent accommodation for passengers.

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings.

To follow the FRANCES.

And will meet with the usual quick despatch.

DIRECT for COLOMBO, the beautiful fast-sailing ship AROYNE, A 1 ten years, 444 tons register, JAMES GRANT. Commander; lying in the London Docks. This splendid clipper ship, built in 1864, offers a first-rate opportunity to shippers of fine goods.

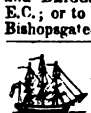
For Freight or Passage, apply to JOHN C. CAMPBELL 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

To follow the FRANCES.

Will meet with the usual quick despatch.

DIRECT for COLOMBO, the well-known fast-sailing ship, ABDUL MEDJID, AA 1, (owned by Messrs. Vanner Prest, and Lyth), 400 tons register. J. PITON Commander, West India Docks. This magnificent vessel offers a first-rate opportunity to shippers of fine goods Has elegant accommodation for passengers.

For freight or passage apply to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's. Bishopsgate-street. E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street. E.C.



DIRECT for BOMBAY, the fine fast-sailing ship JOHN BRIGHT, A 1 twelve years, 541 tons register, N. T. MARQUAND, Commander, loading in the London Docks. (Owned by Messrs. Marquand and Co., Guernsey.) This splendid ship has a large portion of her cargo engaged, and offers a first-rate opportunity to shippers.

For Freight or Passage apply to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

Will meet with very quick despatch.

FOR SADASHIGUR, CANNANORE, BEYPORE, and COCHIN.—The beautiful clipper ship, MILBROOK, A 1 9 years; 328 tons register, JOHN BARRON, Commander; West India Docks This fine little vessel has been especially selected to take the place of the Star of Ceylon—lately lost.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

Per P. and O. steamer, from Southampton, Nov. 27.—To Hong Kong, via Bombay, Capt. Edmonds.

Summary of News from the Far East.

WAR WITH THE KOREANS.

We have received the following telegram from Tientsin *via* Kiachta:—

"War declared by France in Korea. The American schooner "*General Sherman* ran ashore on 5th Oct.; forty persons murdered by Koreans." This vessel was announced as having left Chefoo for Korea, with a large crew and heavily armed, in the *London and China Telegraph* of the 6th Oct. The above intelligence confirms the announcement made in a previous issue that the French Admiral would act entirely on his own responsibility, and without the special instructions of his Government. He has probably precipitated a second Cochin China conflict, for which the Emperor will not thank him.

The advices by this mail from Shanghai 19th September report the French Admiral at Chefoo on the point of starting for the Korea. The English Admiral was at Tientsin, and consequently has not joined the French in this expedition.

JAPAN.

YOKOHAMA.

From Yokohama we have news to the 13th September. The French mail of 17th July was delivered on the 7th September.

Our advices tend to a certain extent to confirm the report of the Tycoon's death. The *Japan Herald* first announced on good authority his serious illness, and then his rumoured decease. The *Japan Times* says:—"It is now almost beyond a doubt that something has happened to the Tycoon. It is a well known custom among most Easterns to conceal the death or abdication of a prince as long as possible, to avoid the disturbances which factious men or pretenders to the vacant throne might create, and to give time to the new monarch to fix himself firmly in his seat. Thus it was at the death of the last Tycoon, which happened when Lord Elgin and Baron Gros were here in 1858 arranging the treaties—the ambassadors were informed that he was 'sick,' which was given as a reason for his not receiving them. Now, the same report is industriously spread regarding his successor, but we believe the truth to be that he is either dead or has abdicated. We have reliable information that, finding the affair of Chosiu too much for him, he had expressed a wish to retire into private life, but that the Mikado would not permit this, on account of his having recently become his son-in-law. Since this he has been officially reported sick, while the rumour of his death gains ground daily among the common people. Whatever has happened to him, the recent and sudden impulse given to the prosecution of the war would seem to indicate that a more powerful mind was directing affairs. The chartering of the *Fusiyama* and the purchase of the *Dumbarton* are evidence of this. 'Stotsbashi, for some time his Prime Minister, is thought by some to have succeeded to the Tycoonate, but this we think highly improbable. Though a talented man, he has not the requisite landed property, and consequent influence, which would enable him to hold such a position."

We have further particulars of the operations at the seat of war in the South which we published in our last. The *Kestrel* formerly a gunboat in H.M.'s navy, but lately purchased and refitted by a mercantile firm, happened to be at Simonoseki when the attack on Kokura took place, and the burning of that town and destruction of the Tycoon's arsenal was witnessed from her deck. The *Kestrel* entered Simonoseki to procure coals on the evening of the 10th of August. The *Olentosama* was lying in the harbour, and some little distance from the town the *Fusiyama* and three other steamers of the Tycoon

Digitized by Google

apparently blockading the entrance of the Straits at the Nagasaki end. Just before midnight the *Otentosama* was observed to get up steam and cross the straits towing a Japanese built ship full of soldiers. She returned and towed over a second body of troops and an attack was then made upon the town of Kokura; successfully, for by 4 A.M. the whole place was on fire and the batteries there silenced and Chosiu's people returned to their own side with seven new Blakely field pieces as the trophies of their victory. When the firing had ceased, the *Kestrel* once more started for Nagasaki, and it was when she had got a little below the burning town of Kokura and nearly approached the Tycoon's ships that a shell was fired at her frem the Kokura side. This fell short and then six solid shot were fired at her in rapid succession from the battery, but happily without effect, though two of them passed through the rigging and close to the mainmast. Coming out of Simonoseki harbour, it is very likely that, in spite of her flag, the Kokura gunners believed her to be one of Chosiu's ships. We have not heard whether it is intended to take any notice of this insult to the British flag by the Tycoon, but the explanation we have given of the shots having been fired at her under *the* impression that she belonged to Chosiu, being probably the true one, would doubtless be readily received. For the protection of British commerce, however, we should be glad to hear that a gunboat had been stationed in the Straits. The *Chusan* was, also fired at once from the Simonoseki side, but this shot appears to have been, in the opinion of most of those on board of her, intended for a signal.

Sir Harry Parkes has very properly issued notifications forbidding ships to carry Japanese troops, arms or munitions, through or into the Straits, or, indeed, to stop there at all in making the passage, and a British ship of war will probably be stationed in the Inland Sea to see these regulations carried out.

Apropos of the *Pelorus* ichibou transation (a notice of which will be found in our leading columns), the *Japan Herald* publishes the following slight amendment to the account given last mail:—"The amount actually exchanged by the *Pelorus* is less than is generally asserted. The claim put in was for 85 days, viz., from 29th May to 21st August—but there were not enough bous at the Custom-house. All they obtained, therefore, was for 20 days, from 29th May to 17th June, $9,000 exchanged for 27,990 bous, the lack of bous alone preventing their exchanging the balance of amount claimed, $28,965. It will thus be seen that although the amount they succeeded in obtaining was not so large as generally supposed, the claim was for even a larger sum. These facts being made public may have the effect of preventing any further attempts at back exchange." This correction, it will be seen, in no way extenuates the case against the officers of the *Pelorus*, but rather aggravates it.

A singular occurrence is reported regarding the *Fusiyama*, chartered, as we informed our readers last mail, at the rate of $20,000 per month by the Japanese Government. She made one trip to Hiogo, successfully carrying men and munitions of war as reinforcements for the army of the Tycoon. She returned, and on the 6th September, started again taking a number of soldiers and towing a Japanese ship full of ammunition, &c. But when she had got out of the harbour and well on her way to Hiogo, a dispute appears to have arisen among the passengers and the majority insisted on returning; whether because they did not like the look of the sea before them or were disinclined for their work in the south, has not transpired. This much is certain that, under compulsion, the captain put the vessel into Simoda and then returned to Yokohama. The excuse now made to the Japanese Government by his passengers is that some of their number were "very sick"—the usual feint of a native of this country when some duty is demanded of him which he does not care to fulfil.

Universal satisfaction is expressed at the removal of the notorious Colonel Fisher, U.S. Consul, whose conduct in the Glackmeyer case in the American Court last year excited universal censure, and who has been recalled by his Government in accordance with general expectation. His successor, General Stahl, has been gazetted, and is on his way out.

The official trading question has become a controversy, in which the *Japan Times* strongly condemns the French Minister and others who act like him, while the *Herald* attempts their defence. *The Times* says:—

"The fact is that the system of official trading is indefensible, and as every new order of any magnitude of which we hear is put for execution into the hands of one official or another, take for instance the sale of the *Dumbarton*, through Mr. Kroes, Dutch Consul at Shanghai, we can only consider each instance as a new proof of the truth of our argument that the Japanese think no private merchant capable of undertaking an important operation. We cannot too often or too strongly urge upon those in power, the necessity of teaching the Governments of this country what is the real *status* of European merchants. And this can only be done by Ministers referring them to the merchants here, when they bring their orders for ships, docks, machinery, arms, &c.—instead of undertaking them on their own account as did General Pruyn, or introducing them to their home bankers, as does M. Roches. We are aware that, when the country is fully opened to trade and the Japanese learn to know us better, these things will no longer be; but meanwhile we suffer—the development of our commerce is checked; merchants on the spot are discouraged, and others deterred from coming by seeing half the business in official hands. While, as for the foreign Ministers themselves, it cannot but happen that in thus going out of their legitimate province, they lower their character (and lessen their influence in consequence) in the eyes of the haughty official classes of Japan."

Considerable reduction in the number of men-of-war in harbour has taken place. H.B.M.S. *Salamis*, *Cormorant*, and *Adventure* had left for Hong Kong, Amoy, and Tientsin respectively—the Admiral going in the *Adventure* on his way to Peking to consult with Sir Rutherford Alcock upon the best means of repressing the piracy which is again so disastrously rife in China waters. H.R.H. le Duc d'Alencon and staff went as guests of the Admiral to visit with him the capital of China. H.M.S. *Hesper* had left for Shanghai, and H.M.S. *Barossa* started on her voyage home. The Italian frigate the *Magenta* left on the 1st Sept. for Shanghai. Her commander, Captain Armignon, being also Pleniotentiary, had succeeded, as stated in our last, in obtaining the signature of a treaty with the Tycoon, and now proceeds to Peking, to make a similar compact with the Emperor of China. The Russian ship *Askold*, after a visit to Yedo, was believed to have left for the Inland Sea, whither part of the American squadron would follow her. The French naval force, and two hundred of the men on shore, had been ordered up the Corea.

No other diplomatic movements worthy of record had occurred. The new race-course had been commenced. The health of the settlement had not improved, diarrhœa and English cholera being still prevalent, though no fatal cases had occurred.

The newly granted permission for Japanese to travel abroad does not seem to work freely yet. The *Herald* says:—"The *Clara Sutil*, which left for San Francisco on the 12th August, took away a rather distinguished passenger; one of the Prince of Satsuma's confidential karoos or chief retainers, who has lately been his agent in Yedo. He was got away with great secrecy, for we are sorry to say that the recent proclamation of the Gorogio, allowing Japanese to travel abroad, is at present made a dead letter, and was apparently always intended to be such. Mrs. Fisher, wife of the American Consul, who left Yokohama some little time ago, took with her a servant, but this is a solitary instance, and Col. Fisher had great trouble in arranging the matter. But, on the other hand, an English merchant who left by the previous French mail, was refused the privilege of taking a Japanese servant to Europe, on the pretext that "the seal was not ready." The fact is, this great innovation, which we all hailed as such a great step in advance was nothing, in reality, but a mere sop thrown to foreign Ministers, a promise the Gorogio never meant to keep to us—a privilege which to their own people they never intended to grant. The officer of Satsuma, who left by the *Clara Sutil*, intends to spend two years in America and Europe. He is well supplied with money, and will meet in New York with four other of Satsuma's retainers who leave from the South.

Arrivals of silk, says the *Japan Times*, have been very much freer; indeed during the last two or three days produce has come down in such quantities as to induce us to think that any restrictions which may have operated hitherto to cramp arrivals have been removed. Of the probable out-turn of the crop we will not, at present, hazard any opinion; one point is worth noticing, however, that the native manufactories of silk being chiefly situated near the seat of the present war in the South, their looms run a chance of being ill supplied, and what silk is produced this season we shall probably see the bulk. The character of

Digitized by Google

the arrivals continues much as at last writing; of the 600 or 700 piculs at which we estimate arrivals, a fair portion has been good and medium hanks, with a few lots of really best and a sprinkling of Oshiu, Koshiu, Hatchogee and Atchezan. Prices have risen, the usual competition for best hanks having been displayed and from $920, paid just before the last steamer left, rates have successively risen to $930, 940 and 960 (equal to 40s. in London). Medium and good qualities have not shared in the rise. Stocks we estimate at about 200 piculs and purchases at 360. In tea hardly any business has been done, owing to the high prices asked. Imports generally were in better demand. Ichibous 295 to 296 per $100. Exchanges on London Bank, 4s. 7¼d. to 4s. 7½d. Private, 4s. 8¼d. to 4s. 8½d. The *Dumbarton* has been sold to the Japanese Government for $180,000, 300,000 lous being deposited as security. The *Ta-pang-nyo* is also reported to be sold.

NAGASAKI.

Our correspondent mentions several further sales of steamers to the Japanese. The Prince of Higo has purchased the *Fairy* through Messrs. Glover and Co., for $23,000; Messrs. Alt and Co. have sold the *Japan* to the Prince of Aki for $110,000, and the Government have bought the *Mercury* from Messrs. Glover and Co. for $30,000. The late gunboat *Kestrel*, belonging to the same firm, has also been sold to the Government, which has chartered the steamer *Hiogo* for Osaka and Yedo. Dr. Bauduin is reported to have gone in her to see the Tycoon. The nibbles made at the *Chusan* have again resulted in disappointment to the owners, and she left for Yokohama on the 29th, *via* the Inland Sea. The Japanese steamer *Yangtse* is now lying at Nagasaki repairing injuries caused by a shell from one of Chosiu's batteries. The *Eagle* has left for the war, but the Japanese are said to be disappointed in their purchase. Ichibou exchange has gone up to 317 per $100, and no dollars on the market.

The following is from Alt and Co.'s Circular:—Imports.—The past month has been one of unprecedented dulness; the further depreciation of ichibous, combined with the dulness which usually prevails at this season, and the political causes above referred to, have produced an almost complete stagnation of trade in manufactures. Business has been confined to small sales of Grey Shirtings and Turkey Red Cambrics, and the former is at the moment almost the only article for which an inquiry exists. Stocks of most goods are light, however, and we therefore look for an early improvement. Metals continue very dull, very fine Nail Rods and Pig Iron only being wanted. Coal is in less demand, and with heavier stocks and lower prices in Shanghai late rates could not now be realised. Produce has been in fair demand during the month. Vegetable Wax and Tobacco continue to be wanted, and large settlements of the latter have been effected at rather advanced rates. Gall Nuts are also inquired for, but supplies are very small. In Camphor and Cotton nothing has been done. Tea: a good demand has set in for this staple, and settlements for the month are estimated at 2,800 piculs, chiefly for the American market. Supplies of good medium leaf arrive pretty freely, but fine to finest kinds are very scarce, and dealers say very little will come down until the Straits of Simonoseki are again opened. Freights to London £3. Exchange 4s. 5d.

CHINA.

HANKOW.

Mr. Medhurst, H.B.M.'s Consul, has issued a notification stating that as he has been unable to induce the Chinese Superintendent of Trade to place the rate of duty upon tea dust from 2.5 to 1.2.5 taels, to which figure it was formerly unconditionally reduced, he intends to refer the matter to Sir Rutherford Alcock, recommending him to procure a permanent reduction of the duty from the supreme authorities at Peking. An attempt at burglary on the premises of Messrs. Townsend and Co. was made on the night of the 26th inst., but was frustrated by the Chinese watchman giving an alarm, the burglars making off after having endeavoured by sundry stabs to dispatch the watchman.

Three men, William Langham, Thomas Jones, and Edward Bolson, have been tried at the Consular Court on a charge of wilful and indecent exposure of their persons and using obscene language. William Langham, who had been bathing while in an intoxicated state and used foul language was fined $5; and Thomas Jones, who walked deliberately up the bund naked, when some ladies were passing, was sentenced to a week's hard labour. The other prisoner, against whom the charge was not substantiated, was acquitted. A letter has been addressed to the *Hankow Times* strenuously urging the duty of taking some steps towards building a church, and pointing out that the residents are not justified in abstaining from building a church because they have not the means to do so on an extensive scale, but that they should do their best according to their means.

The river had fallen 4ft. 3in., leaving the bund and the greater part of the streets dry.

SHANGHAI.

Dates are to the 19th September. The P. and O. mail of 26th July arrived out on 8th Sept. Our files of papers contain no items of any importance; they are chiefly filled with Hong Kong and English news.

HONG KONG.

We (*China Mail*) are indebted to the kindness of a friend for permission to inspect a manuscript and drawings setting forth the estimates, particulars, and plans of a railway between Shanghai and Soochow, proposed to be constructed under the auspices of the China Railway Company (Limited). As this subject of railway communication between various points in China is of great importance to both natives and foreigners, our readers will doubtless be glad to learn a few particulars of the projected line and the report of its practicability upon which the proposition to construct it is based. We have ourselves advocated and still advocate the construction of the experimental line in the Pei-chi li province between Tientsin and Peking. It is unnecessary here to recapitulate the reasons which have led us to this conclusion, they having been given at length in former articles, and we therefore proceed to give a sketch of the prospectus now under remark. The prospectus commences by stating the opinion of the projectors that Shanghai, from its position near the mouth of Yangtze, and as the emporium of foreign trade for the greater portion of the rich province of Kiangsu, is the most suitable terminus of the system of railways to open up the central and seaboard districts of China. No other district offers such great facilities for the introduction of railways into China. The country is level and presents no difficulties to the practical engineer, while the events of the last four years have induced the natives of the province to look with more favour than formerly on the introduction of foreign inventions and improvements. In no other part of China are found so many great and flourishing cities, nor is there elsewhere so dense a population. The whole province is traversed and cut by innumerable canals, forming a perfect water communication, and having their main outlets into the Yangtsze, while that river is itself the main channel of communication with the cities of the interior, and on its broad bosom most of the staple commodities in which trade is carried on are transported. It leads to the silk and tea districts, which are the most important to foreigners in China and the seat of a most extensive trade, to which a railway would afford immense facilities. The proposed line is to start from the foreign settlements of Shanghai leading past the west gate of the city and following nearly the present line of the Sik-ku-wei road by Tsi-pu and Sy-king to Sung-kiang; thence one line might lead direct to Soochow and the north-western districts, and a branch by the important city of Kia-hing-fu, through the head of the silk districts to Hangchow the capital of Chekiang, and from this city a new system of lines might diverge to the great cities of the South.

A public meeting, convened by the Anti-Stamp-Act memorial committee, was held in the Supreme Court room, for the purpose of receiving his Excellency's reply to the memorial, and for taking such steps in relation thereto as might be deemed expedient. About twenty persons were present at the time of meeting; at the close of the proceedings that number had increased to about 120. Mr. Maclean presided, and having read his Excellency's reply, called on the meeting to submit a motion. After a pause, Mr. Sharp, rose and well ridiculed the "unworthy apprehensions" that had been expressed by the memorialists, and generally spoke in favour of the Stamp Act, arguing that as it stood there was no substantial injustice in it at all.

Mr. C. R. Bosman then moved—That a committee be elected to frame a memorial to the Secretary of State in answer to the reply. Mr. Bernard, after another pause, expressed his approval of the Act, and informed the meeting that Messrs. Whittall and Dent had both told him that they did not object to the principle of the Act, but they did not want it as they would be obliged to employ one or two more clerks, which

Digitized by Google

they said were very expensive articles in this community—a statement which elicited much laughter. The chairman then asked if any one would second the resolution, and Mr. Ryrie did so in just so many words as were necessary to state why he rose. Mr. Story followed, commending the Governor for the course he had taken, approving of the Stamp Act, as being the fairest mode of taxation, and warning the meeting against wasting their time by an appeal to the Secretary of State. The motion was then put. Half the persons present held up their hands for it; of the other moiety eight declared themselves against it. The chairman, amidst some laughter, declared the motion carried, and the meeting broke up.

The meeting of the Hotel Company, alluded to in our last, has been held. Mr. Overbeck commenced by saying that in order to give a clear idea of the present position of the company he would state the measures which had been taken by the directors since its formation.

The company was formed in September last. In February last one of the directors gave notice of resignation, and repudiated the shares for which he had signed, his partners refusing to have anything to do with them. At this others took the alarm and refused their shares. The directors had tried every means in their power to get this gentleman to take the shares for which he is responsible, but without success. The consequence is that the matter has been taken into court, but the legal adviser of the company having been absent at Shanghai until very recently, and the Supreme Court being now in vacation, it would be impossible to have the case come on until the re-assembling of the Court in October next. Thus the valuable property of the company had been lying idle, very much to the embarrassment of the directors, and interest had been accumulating. Schedules of the assets and liabilities of the company had been prepared, and he wished the gentlemen would look over them and ask him any questions they might desire.

The number of shares originally subscribed for was 2,075; of these the representatives of 231 shares have either left the colony or failed, leaving 1,949 shares; 755 shares are not paid up, and 75 are held by the legal advisers of the company who have a claim against it; 280 have been transferred to the owners of the Oriental Hotel which it was originally intended to lease and refit.

A shareholder asked what the directors intended to do? So much delay had occurred that the shareholders were anxious to know what was to be done.

The Chairman replied that as soon as the Supreme Court was opened Mr. Pollard, the legal adviser of the company, had been instructed to bring the case on immediately.

He also stated that the directors had written to Mr. Pollard urging him to use every possible expedition in getting the case disposed of. A gentleman suggested that perhaps Mr. Pollard might go to the next Shanghai races, and then what would become of their case? Should not another legal adviser be employed?

The Chairman stated that the directors had every reason to believe that the case would be settled as soon as the Court re-opened, and expressed his opinion that a favourable decision for the company would be given. When this was done the company could begin work in earnest. The meeting then adjourned. The accounts show that on 839 shares all the calls due were paid up in full. On 755 shares the three calls have not been paid, 400 of them having been repudiated.

The following items we find in the file of the *Evening Mail*:—

The coolie trade at Macao is flourishing. The baracoons, by special permission of the Government of that port, have been opened sooner this season than on previous occasions. There are probably not less than fourteen to fifteen hundred coolies on board different vessels by this time, but none of these crafts, according to a law existing thereanent, can leave before the north-east monsoon is supposed to have set in, say about the 1st proximo.

"Rumours are afloat that a Hong Kong cricket eleven will this year visit Shanghai in return for the visit paid to the colony some time since by a Shanghai eleven. A meeting is to take place on the 17th of September, which all members of the club are particularly invited to attend. Of course, with such an object in view as the maintenance of the credit of our colonial cricketers, a pretty full attendance may be anticipated.

"From late private advices from Shanghai we learn that the *Emperor* (Messrs. Jardine, Matheson and Co.'s steamer) had returned from Corea, but the news brought by her is kept rather secret. She herself, however, does not seem to have made a particularly satisfactory trip, at least as far as the venture by her was concerned. It is stated that the King of Corea is friendly in his demeanour to strangers, but withal not quite desirous of too great an intimacy with them. When the French and British men-of-war, now *en route* to the dominions of his Highness have duly reached, a thorough understanding in all likelihood will be come to.

"Close upon the heels of the projected Shanghai and Soochow Railway another scheme is being put forth by an American company. This, hitherto known as the "East India Telegraph Company" and hereafter to be called the "Eastern Asia Telegraph company," is, we learn by files of the *Alta California* received yesterday, proposing to introduce telegraphs into China. In a letter to the editor of the above named journal from D. J. Macgowan, Esq., a gentleman formerly of the colony, we find the following remarks:—'Although this company owes its existence to an Act of the Legislature of the State of New York, yet it is designed to be cosmopolitan and international, provision being made for an apportionment of stock among Europeans generally, and for a directorship at Shanghai, which shall be representative of various nationalities. At the next session of the Legislature "Eastern Asia" will be substituted for the misnomer "East India" as the designation of the company. Whether the telegraph company purposes to work in union with the railway direction, so far as the proposed line should extend, we are not informed, but our readers will learn from our extract columns the comprehensive nature of the proposed scheme. We do not as yet see any probability of its being carried out in its integrity for many years at least; but knowing what Yankee "go aheadiveness" has already achieved we take by no means a despondent view of the eventual success of the scheme.'

"We hear it rumoured that F. W. Mitchell, Esq., the present Postmaster-General, is likely to be appointed 'Commissioner of Stamps' or 'Stamp duty,' whichever may be the correct title. Mr. Mitchell appears to be used by the Government as a sort of hack pony. If the Auditor-General goes away—Mr. Mitchell is appointed to do his work. If a commission on anything from drains to postage stamps be appointed—Mr Mitchell is sure to be on it, and now he is to be Commissioner of (duty) stamps. Does he do all the work for nothing, or does the Government pay him? We suppose he will get something for stamping upon people's feelings, and must do him the justice to say that the Government is likely to obtain a most zealous and uncompromising commissioner should he be appointed."

The Lenton troop gave their entertainment to a very full house, in which the Indian element was strongly represented. The programme was gone through in a most successful manner, Professor Lenton and the two boys, little Frank and John, coming in as usual for a large share of the applause. The Governor and Lady MacDonnell were present.

On the morning of the 19th September, as the steamer *Glengyle* was leaving Shanghai she ran into the American ship *Golden State*, cutting through the outer stern, through two of the beams of her quarter deck, and starting the stern planks down to her main deck.

AMOY.

The following memorial respecting the Stamp Act has been presented to his Excellency the Governor from the undermentioned firms and residents at Amoy:—

To his Excellency Sir Richard Graves MacDonnell, Knight, C.B., Governor and Commander-in-Chief of the colony of Hong Kong. The memorial of the undersigned merchants and inhabitants of the Port of Amoy.

Humbly sheweth:—

That your memorialists have seen with extreme regret your Excellency's proposed Stamp Act for the colony of Hong Kong, which they are of opinion is calculated to inflict great injury not only on the trade but also on the vested interests of that port. That your memorialists are many of them directly interested in the prosperity of trade at Hong Kong inasmuch as they are holders of bank, dock, and assurance company shares, all which must suffer should the Stamp Act come in force. That independently of the above consideration, your memorialists would draw your Excellency's attention to the fact that the trade of Amoy is most intimately connected with that of Hong Kong, and anything which interferes with the trade of the latter must have an injurious effect upon that of the former; for example, all the exchange business of this port is done through Hong Kong, and nearly all the manufactured goods, foreign cotton, opium &c., which are consumed here are received via Hong Kong, and they would respectfully state that the proposed Stamp Act will certainly prove a serious burthen and obstacle to the continuance of such trade.

That your memorialists would for the reasons set forth as above, as well as for those more fully and emphatically expressed in the memorial

Digitized by Google

of the Hong Kong community, in which they cordially coincide, respectfully beg of your Excellency to abandon the Stamp Act in favour of some other mode of taxation less likely to press so grievously and vexatiously upon the trade of Hong Kong, as well as on that of Amoy and the other coast ports in the South of China.

Dated at Amoy, Sept. 6, 1866.

H. D. Brown and Co., Dauver and Co., Amoy Dock Company, per J. J. Cass, secretary; Robert Craig, W. Cunningham Johnston, D. Munro, F. Meyer, Tait and Co., Elles and Co., p.p. J. Foster and Co.; E. M. Sibbald, H. B. Witt, R. Kaiser, Zachariah, Geo. Rapp, A. Leigh, W. Donaldson, Aug Muller, H. A. Peterson and Co., C. Gerard and Co., p.p. Bellamy and Co.; C. A. S. Ayres, Wilson, Nicholls and Co., Giles and Co.

MALACCA STR ITS.

SINGAPORE.

Dates hence are to the 3rd October. The English mail of 27th August arrived out on the 28th September.

The British barque *Ellen Lewis* had arrived from Delhi, the capital of Timor, and reported the entire destruction of that town by a terrible fire, which consumed every building except the Custom-house.

The Governor-General of the Philippines had arrived at Singapore with a suite of twenty-five persons by the M. I. steamer *Tyre*, and was staying at the Hotel de l'Europe.

A new weekly journal, to be called *The Transcript*, is announced, and is expected to be well supported.

Births, Marriages, and Deaths.

(Announcements for subscribers are made free of charge.)

BIRTHS.

McMURDO—On the 17th Sept., at Hong Kong, the wife of Captain R. McMurdo, of a daughter.

MARKHAM—On the 6th Sept., at the British Consulate, Shanghai, the wife of J. Markham, H.B.M. Vice-Consul, of a son, stillborn.

STOREY—On the 10th Sept., at No. 2, Bay View, Hong Kong, the wife of Charles Storey, of a daughter.

MARRIAGES.

HAY—METCALFE.—On the 21st June, at Grace Cathedral, San Francisco, by the Rev. H. Goodwine, Dr. William G. Hay, late U.S. Navy, and recently of Shanghai, to Miss Emma Y., youngest daughter of the late A. Baldwin Metcalfe, M.D., of Adams county Mississippi.

MARSHALL—BETTS.—On the 8th Sept., at Trinity Church, by the Rev. Charles H. Butcher, M.A., John Marshall, Esq., to Annie, second daughter of Thomas K. Betts, Esq., of Newcastle-on-Tyne.

MACKENZIE—GIBSON.—On the 1st Nov., at the manse of Avoch, by the Rev. John Gibson, A.M., Minister of Avoch, and brother of the bride, assisted by the Rev. Roderick Nicolson, Minister of Applecross, Donald W. Mackenzie, Esq., late of Hong Kong, to Jemima Margaret, youngest daughter of the late Rev. James Gibson, D.D., Minister of the parish of Avoch. No cards.

DEATHS.

EVANS—On the 22nd Aug., at Hankow, China, Ethel Constance, the infant daughter of Matthew Pennefather Evans, Esq., aged eleven months.

GREY—At Shanghai, Sept. 12, Mr Charles Grey, aged 50 years.

HARPER—At Hong Kong, Sept. 17, J. C. Harper, late physician, Whampoa, aged 45 years.

KIRKALDY—At the Seaman's Hospital, Hong Kong, Sept. 13, James Kirkaldy, seaman, late ship *Harkaway*.

KING—At Hong Kong, Sept. 16, William King, late H.M. Military Store Department, aged 44 years and 6 months.

KING—On the 13th Sept., in the Shanghai Hospital, John King, of New Jersey, U.S.A.

LANGAN—At Shanghai, Sept. 14, Mark, commonly called John Langan, aged 35.

NORRIS—At the Government Civil Hospital, Kong Kong, Sept. 17, John Norris, Seaman.

O'NEIL—At the Military Hospital, Hong Kong, Sept. 11, Sergeant Thomas O'Neil 20th Regt., aged 36 years.

SMITH—On the 6th Sept., at Hong Kong, Reginald Vincent Clements Smith, fifth son of the Rev. John Smith, rector of St. John's, Buckhurst-hill, N.E.

SHIPPING INTELLIGENCE.

ARRIVALS.

At SHANGHAI.—From Liverpool, Sept. 10, Queen of England; from Sunderland, 11, Sooloo; from New York, 8, Queen of the East; 6, America.

At HONG KONG.—From Liverpool, Sept. 15, Patna; from Cardiff, 18, Richard III.; from Rotterdam, Krimpen Van de Lek; from New York, Gamecock.

DEPARTURES.

From NAGASAKI.—For London, Aug. 25, George.

From SHANGHAI.—For London, Aug. 7, Wild Deer, Queen of the East; 5, Antipodes; 14, Helen Nicholson.

From HONG KONG.—None.

CASUALTIES.

The British barque May Queen has been dismasted.

VESSELS EXPECTED.

From YOKOHAMA.—Thomas Dryden, Conference.

From HANKOW.—Gossamer, Napoleon III., Highflyer, Fire Queen, Lauderdale.

From SHANGHAI.—City of Aberdeen, Burdwan, Pakwan, Coulnakyle, Cinderella, Fusiyama, Vigil, Star of China, Peterborough, Coral Nymph, Blencathra, Nelly, Illimani, Lansdowne, William Melhuish, Charlgrove, Challenger, John Paul, Knight of Snowdon, Marquis of Argyle, Trebolgan.

From FOOCHOW.—Tamana, Feronia, Laurel, Lennox Castle, Amber Witch, Zingra, Devana, Everest, Ornate, Philomela, Dewa Gungadhur, Marion, Monarchy, Naomi, Veronica.

From CANTON.—Alma, Island Queen, Taymouth Castle, Victoria, Melbreck, Valdivia, The Cedars.

COMMERCIAL POSTSCRIPT.

TEA.—The market during the past week has been further depressed, and a sale from first hands to dealers is almost impossible, and there is no resource but so realise at public sales. The sale commencing to-morrow will be very heavy, chiefly without reserve. The late sales of new Kaisows and Monings show a loss of 4d. to 9d. The export from China has slackened.

SILK.—The market is not quite so good, but the export from China and Japan it is now believed will not reach 40 000 bales.

The present mail (French) brings 1,978 bales of silk for Marseilles and 387 for London. This includes a small quantity of Bengal as well as China and Japan.

NEW YORK SHIPPING.—ARRIVED.—October 22, Industry, from Padang; Castlehow, from Yokohama.

FRENCH TRADE WITH CHINA.—In France the commercial world is occupying itself more and more every day with China, as a great market in which the French can buy articles they want, and to which they can send large quantities of their own productions. Recent letters from that country dwell on the commercial importance which the port of Chefoo is capable of taking. The French have established a naval station there, and also a coal depot—the coal coming from the north of China. Chefoo is the nearest port to Peking, and is never shut up by ice. It is by it that, during the winter, commercial correspondence is despatched to Peking and Tientsin. In the vicinity of the town silk is produced in considerable quantities. This silk is chiefly employed by the natives in fabrics for local consumption; but if Europeans were to go there they might easily monopolise the market. Strange to say, they have not yet turned serious attention to it. The idea has been started, that the English, French, and other European Governments in communication with China would do well to press the Chinese Government to make Chefoo a free port. If it were, European commerce would undoubtedly attain great extension.

THE "HONG KONG" COOLIE TRAGEDY.—The case of the French barque *Hong Kong* has been the theme of comment in the French papers. It will be remembered that after the mutiny of the coolies the vessel was picked up at sea by the steamer *Feiseen*, and claimed as a derelict. The Admiralty Court of Hong Kong however did not take this view of the case, and simply awarded a proportionate sum as salvage. The French papers praise the high sense of justice evidenced by this decision, as it would be a hard case if a vessel found under such exceptional circumstances as these were to be considered as abandoned.

CONSULAR REPORTS ON COTTON.—Consular reports on the cultivation of cotton have been received at the Foreign-office from Swatow and Bangkok. The acting British Consul at Swatow states that cotton is not grown in his consular district. Her Majesty's Consul at Bangkok, in Siam, reports that at least 2,500 acres were planted in 1863 and 1864, and 3,000 acres in 1865 for the crop of 1866. Some damage was occasioned by a heavy fall of rain whilst the cotton was in pod, and the out-turn was expected to be between 17,000 and 18,000 piculs. More than 500 acres of waste land were last year cleared for cotton planting, and there is a large extent which might be made available.

SIR HARRY PARKES' VISIT TO KAGOSIMA.

The following interesting account of the late visit of the British Minister to Kagosima is given by a correspondent of the *Japan Times*:—

The *Princess Royal* and the *Serpent* left Nagasaki on the 25th July, the *Salamis* with Sir Harry and Lady Parkes following next day. On the afternoon of the 26th we anchored within eight or nine miles of Kagosima. At 2 P.M. we steamed up in line, and anchored close to the batteries. No sooner had the anchors been let go, than up went the English flag on a staff in the principal battery, and a splendid salute was fired of fifteen guns. This was at once returned by the *Princess Royal*. After a short time we in like manner saluted the Japanese national flag, giving it nineteen guns, which Prince Satsuma at once returned gun for gun. This thunder of artillery, with visits from the Prince's karoos (chief servants) finished the first day on board. A large party landed late in the afternoon, including Sir Harry and the Admiral, and with a strong guard of the Prince's officials, we went for a walk through the town, which is in no way very remarkable or different from other Japanese cities. The only difference which we observed was that, instead of the scowling looks and rude cries of Yedo, in Kagosima we met with nothing but smiles, kindly greetings, and pleasant speech. Some champagne and other refreshments were provided for us midway in our long walk, and all returned to the ships at the close of the day rather tired, but well pleased with our first day's reception in the capital of the great Southern Prince. We then found that his Highness had sent on board during our absence to say that he wished to entertain fifteen or twenty of the English gentlemen during their stay, and that he would pay a visit the next morning to the Minister and Admiral and would conduct them on shore. When one considers the rank of Satsuma, one cannot but consider this a high mark of consideration on his part, which contrasts forcibly with the insolvent demeanour of the Tycoon, who is indeed a complete contrast, both in mind and body, to the nobler potentate in the South.

At about eleven A.M. on the next morning, the Prince's state barge came alongside of us and Satsuma came on board the *Princess Royal*. He was received with yards manned, guard of honour and the band; shook hands with the swells and then came up on the poop, where he watched the salute which was being fired in his honour. In appearance the Prince is one of the most "princely" men I ever saw—tall and well-built and carrying himself with a dignity which I have only seen among the Rohillas of India and the Arabs. He has the cast of features, purely Japanese, which we see in their paintings, with the long slanting eyeline; this trait is so distinct, indeed, as almost to give the effect of a cast in the eyes. Shimadzu Saburo (who is the father of the Prince, by the way, not his uncle, as generally supposed) is a shorter man and more thick-set, not so urbane in his bearing, with more signs of excessive pride—but still with the same regal port. He is reckoned one of the most talented statesmen in Japan. Immediately the firing ceased, the young Prince crossed over a

Digitized by Google

turned with a smile to the side of the vessel to look at his own battery, where a smart and splendidly timed return was being made. After this expenditure of powder, of which I dare say you think we had quite enough, Satsuma descended to the Admiral's cabin, where he spent a few minutes and then returned to his palace on shore, whither a party of seventeen of us followed him.

We landed and found his (summer) palace facing the bay, the bund in front of it being lined with ten or twelve pounder brass field-guns, and as Sir Harry came up from his boats, another thundering welcome of fifteen guns was fired in his honour. There was a slight mistake made here, the white ensign being hoisted instead of the Consular flag, the blue. We then proceeded to the palace and Sir Harry and the Admiral, with Mr. Siebold as interpreter, were ushered into an inner chamber, where Shim-adzu-Saburo (now by the way, Osoomi-no kami) and the Prince made a speech expressive of their hope that bygones would be allowed to be bygones, and that for the future, nothing but goodwill and friendship might exist between the two Powers.

During this interview the rest of our party were being entertained in a sort of a state summer-house or pavilion by the Prince's karoos, and in about half an hour we were summoned into the palace where we met Satsuma and his guests coming out of the private room, and we all sat down together to a tremendous banquet of forty-five covers of the most delicate Japanese *cuisine*; native wine, as well as champagne, sherry, and beer, being served with the feast. The English party sat on one side of the long table, Shimadzu, the Prince, and two karoos on the other side. Komats, one of Satsuma's most confidential retainers, at the top and his guardian at the bottom. And there we sat for five mortal hours eating and drinking, pledging each other and talking and laughing in the most friendly manner possible, a native band playing and singing for about an hour during the repast.

At last, as a special favour, Sir Harry Parkes asked that the bill of fare might be cut down, or we should have sat there until dark, and we We wanted to see the gardens of the palace; so quickly finished our dessert, and were then taken out into the grounds, of which all I can tell you is that they are so beautiful as to make one wish to spend a year or two there instead of a few minutes. Here we smoked, of course, and were then invited by our hosts to go to the front of the palace, where, on a parade ground about 200 yards by 60, some native troops were being drilled. They were armed with short Enfields and went through their work very well indeed. I recognised their commander as being an old pupil of a friend of mine. We watched their manœuvres from highly ornamented tents which had been pitched for us, where wines and fruits were again provided, our hosts seeming always to fear lest we should not have our fill of good things. We were then entertained with some artillery drill and target practice with shot and shell at 500 yards' range with 10 pound field pieces; the practice was astonishingly good, and after about a dozen rounds from each gun, as the night was closing in, we bade farewell to our kind hosts and returned on board.

The next day we went over the factory, where is the ordinary machinery, and at 4 P.M. sat down to an European dinner given by the five brothers of Satsuma the youngest of whom is 10 years of age; they are all singularly engaging boys. The most remarkable feature of this entertainment was the presence at one time on the table of three sucking-pigs. It was 8 P.M. before we could get away and even then with great difficulty.

3rd Day.—This was given up to showing the Princes—Satsuma and his five brothers—the exercise and firing of the *Princess Royal's* men. Shimadzu excused himself on account of weakness. The vessel was swung round broadside on to the bay, and for three or four hours we fired shot and shell, making splendid practice at targets placed at distances ranging from 300 to 1,800 yards. Many of the targets were very soon shot away, to the no small astonishment of our Japanese friends, both on board and on shore. After the gun practice we showed them three twenty-four pound rockets, and the distance these projectiles flew opened their eyes not a little. After the Admiral had entertained his guests, we arranged a landing for the following day of five or six hundred marines and blue jackets, to show the Princes how our men drilled. But it was found that the drill ground was only large enough for about 150 marines and a couple of field-pieces with their crews. They fired blank cartridge and went through all sorts of manœuvres until nearly dark, when the *Salamis* steamed up close to the drill-ground to take away Sir Harry, who wished to return to Nagasaki. At departing, Shimadza Saburo, it was remarked, showed considerable emotion, shaking Sir Harry Parkes' hands with great empressment, wishing him a pleasant voyage back, and expressing the hope of soon seeing him again. Lady Parkes shook hands with the party of Princes, and then the *Salamis* departed with the English Minister under a salute of fifteen guns.

The last day's amusement was certainly not the least. We had a grand hunt, commencing at 3 A.M., when our party of about twenty, with nearly double that number of Japanese, rowed about six miles up the bay, where we landed in a country very like that near Yokohama, but perhaps a little more wooded, The forest was full of deer, boar, and monkies. The game was driven by packs of hounds and beaters and after two drives, our bag showed the respectable load of seven fine deer and four boar. Two of the deer had four points each and were fine noble animals. The Karoos of the Prince entertained us this day—and the next, after saying good bye to all, whom we had, even in so short a space, learnt to look on as kind friends, we left Kagosima under another heavy salute to the Admiral's flag, which he returned by saluting the Prince's family ensign. I omit detail of the handsome presents that were given to all, and doubtless from other sources you will receive fuller particulars of what was to be seen in the town and batteries by the curious, to whom every facility was given to examine whatever they liked. The feeling of regret at parting was, I am sure, reciprocated by our Japanese friends, and I conclude this letter with expressing my conviction that Sir Harry Parkes did a wise thing in going to Kagosima, and I believe he left it with a very different opinion of Satsuma to that which he held before. This Prince is decidedly among the most enlightened and liberal-minded Japanese now living, and his intelligence and the good use he has lately been making of his resources will most certainly soon place him (and the sooner the better for all mercantile men) in a distinctly leading position among the nobles of Japan.

A POLICE-GUARD FOR SIR HARRY PARKES.—Sir Rishard Mayne has just issued an order to the superintendents of the various divisions of Metropolitan police requiring them to send in, by Thursday next, the 8th inst, the names of constables willing to proceed to Japan to form a mounted escort to Her Majesty's Minister at the British Legation at Yedo.

THE MUNICIPAL GOVERNMENT OF SHANGHAI.

THE question which now takes precedence of all others pending between natives and foreigners at the settlements in China is that of the jurisdiction under which the mixed populations are for the future to exist. At each of the more important treaty ports municipalities have been formed under the sanction of the Consular authorities, and to these elective bodies the internal economy of the respective foreign communities has been entrusted. But within these settlements are numbers of Chinese residents who share in all the advantages enjoyed by their foreign compeers, and who, to do them justice, have never objected to contribute a very large share to the public exchequer. Englishmen, Americans, and Germans have united to elaborate schemes of municipal jurisdiction which have hitherto in each case worked well and harmoniously. The Chinese, however, have been totally unrepresented, save in so far as the *bona fide* native owners of property registered in foreign names may have exerted an influence upon their property representatives. Of this condition of affairs the Chinese themselves have not complained, and indeed they are ready to admit the advisability of keeping the local governments in purely European hands. For, it may be almost unnecessary to remark, the natives are to the full as suspicious of Mandarin interference as are foreigners, and gladly adopt any system which promises to free them in part or altogether from the daily exactions of rapacious officers. So far the municipal corporations would appear to be built upon a solid foundation, namely, the goodwill and mutual interest of all parties concerned. But the provincial governments are loth to lose the contributions which they consider themselves entitled to levy upon their own subjects, whether those subjects elect to live within the boundaries of the foreign settlements or in the native towns. While the Taiping rebels hung about the provinces, and rendered the co-operation of foreigners absolutely essential to the Chinese authorities, things were allowed to go on in a tolerably satisfactory manner. Levies were made, it is true, upon such men as YANG TAKEE, the eminent Ningpo banker, who had taken up his residence in the English settlement at Shanghai, but he and such as he led to a certain extent two lives, one independent of the Mandarins, and connected only with foreigners, and the other purely Chinese, in virtue of which latter, with all its interests and responsibilities, they were fair game for extortion. Moreover, with such men a system was adopted which worked very well. They received a *quid pro quo* in the shape of decorations, titles, etcetera, which reconciled them to the constant assaults upon their purses, while at the same time the officials who "squeezed" them had it frequently in their power to throw good things in the shape of contracts or Government loans in their way. But during the continuance of the rebel disturbances the Chinese residents in the settlements were as a class unmolested, and paid no taxes beyond those levied by the Custom-house and Municipal Council, and perhaps, incidentally, a squeeze or two of insignificant amount whereof some inferior official reaped the advantage, but which was not important enough to call for complaint. Perhaps, indeed, the fact that a large proportion of the native traders contrived either directly or indirectly to derive a little profit from the rebels laid them open to occasional demands for hush-money, and even the threat of denouncement for a real or imaginary contravention of the law prohibiting assistance to the insurgents kept secret certain sources whence native constables and yamên followers derived supplies. However this may have been, it was not until after the pacification of the empire that the authorities began openly to issue warrants for the arrest of the Chinese residents in the settlements who had neglected or refused to pay imposts on goods or property held within foreign limits.

The Municipal Council of Shanghai (for Shanghai as the most important post may be taken as the type of the rest) had up to that time made the natives pay dearly for the protection they enjoyed: but when, in addition to the recognised taxes of certain amount, other taxes of unbearable weight and of ever-varying amount began to be levied, the Chinese merchants and shopkeepers remonstrated, and pleaded now with one party now with another for forbearance. The Council took the part of the complainants, and having lightened the burdens imposed by foreigners endeavoured to obtain a mitigation of

Digitized by Google

those enforced by the Mandarins. Such a step was indeed necessary, for the population which remained in Shanghai after the ancient haunts of the people had been rendered again accessible by the expulsion of the rebels, was swiftly diminishing under the enormous taxation which native and foreign authorities seemed to have combined to levy. Immediate action was resolved upon, and certain native runners charged with the collection of a new tax were arrested. Protests of course followed. The men were released, and a promise given that pending an arrangement of some kind the levy of taxes by the native Mandarins should cease. This promise was not kept, and irregular exactions continued to be enforced. It was manifest that while on the one hand the Council had no right, and indeed no desire, to interfere with Imperial taxes, they had in the interests of the settlement every right to protest against arbitrary and illegal exactions which by grievously burdening the native residents rendered them unable or unwilling to contribute to the foreign municipal taxes, and in effect drove them from the settlement. The ground adopted was the injustice of collecting "local taxes" save for local requirements, and as the Chinese official chest contributed nothing to the expenses of the settlement, the settlement in turn should be free from exactions levied for the benefit of the Mandarin Exchequer. To render this position altogether unassailable it would, however, be necessary that all the property interests in the settlement should be represented at the administrative board, and this, as we have shown, was not the case. The suggestion that the Chinese should be represented had often been mooted, and had never met serious opposition. All acknowledged that such a right if claimed by the Chinese would be just, but until they should claim it, it was deemed inexpedient to introduce so radical an alteration in a system which seemed in all respects to work satisfactorily. Such then was the state of feeling with regard to Chinese property-owners, a class, by the way, utterly unrecognised by the *Land Regulations*, which assumed that no native could hold real property within the settlement. These *Land Regulations*, which were compiled in 1854 under the superintendence of Mr. ALCOCK, now H.B.M. Minister at Peking, provided in brief for the election of councillors or representatives, for the calling of public meetings, for the franchise, for the levy of taxation, the issue of licences, and in fine for the settlement of all questions not directly demanding consular interference. So far they were considered the law of the place, and so long as the interests of all or nearly all were indentical they proved perfectly satisfactory, being based on the common rights of the landed proprietors. Another class was, however, soon to spring up. The interests of new arrivals did not always lead to the purchase of land, and thus "rate-payers" began to be distinguished from "land-renters." But until the non-renters of land became important by numbers, the land regulations continued unquestioned, although a conviction gradually gained ground that their authority depended solely on the goodwill of the community. It was evident, however, that a time would come when the ratepayers would claim to be represented in the municipality, and to obtain a voice in the levy and application of the revenue to which they largely contributed. No doubt the advent of several members of the legal profession hastened this crisis, for shortly after their appearance the technical rights of the Municipal Government came under discussion, and the rival interests of land-renters and ratepayers gave rise to much litigation. Fortunately for all parties the Supreme Court for China and Japan was established, and various cases tried therein before Sir EDMOND HORNBY established the right of the land-renters to levy taxation for public purposes, and of the Council to apply the same. Here then was the assertion of a legal status enjoyable by the Council independent of any charter of incorporation from the Chinese Government or foreign Governments, and the decision was based on the clause in the *Order of Council* of 13th June, 1853, whereby Her MAJESTY'S representative is endowed with power and authority to make and enforce rules for the peace, good order, and government of British subjects in China. Theoretically, this affected British subjects only, but practically the settlement of so knotty a point could not be without effect upon the other courts sitting at Shanghai. Having gained this step the Council suggested the assemblage of the land-renters with a view to remodelling the local constitution, and to giving the ratepayers a voice in all municipal matters. This project has lately been elaborated, and it has been proposed to extend the franchise to persons paying a certain annual modicum of taxation. As yet however no step has been taken to secure the additional element of harmony and strength which would be in the admission to the franchise of duly qualified natives, and hence there is still a certain amount of injustice in the class legislation of Europeans for a population composed of Europeans and Chinese. It is a matter for regret that while doing an act of justice to the hitherto unrepresented ratepayers the equally unrepresented native merchants and householders are carefully kept beyond the elective pale.

But the agitation of the proposed new regulations, their submission to the board of foreign Ministers at Peking, and the remonstrances addressed to the native officials at the capital regarding illegal exactions within the settlement and irregular arrests under native warrants, have combined to draw the full and careful consideration of the English Minister on the subject, and the fruit of that consideration is now before us in the shape of an elaborate memorandum upon the Municipal Government of the Settlement. Sir RUTHERFORD ALCOCK surveys the entire position, admits the iniquity and corruption probably hidden under the "irregular warrants," but denies the power of the Consul, or of any body (the Council) working under consular sanction to interfere with the administration of Chinese law or local regulation upon Chinese subjects. That it is desirable to bring the native and foreign residents in the settlement under one uniform jurisdiction is not for a moment doubted, but the protection from external taxation implied in such a measure can only be gained by a cession from the Chinese Crown of, at least partial, territorial jurisdiction. If this can be gained the difficulty will at once be met, but the cession must evidently take the form of a charter recognising the supremacy of the Chinese Crown, emanating from that Crown and implying the extinction to a certain limited extent of the exclusive rights conferred on foreigners by the exterritorialising clauses in the treaties. For such a charter should provide for the government of *all*, both natives and foreigners, in municipal matters; but we can hardly conceive any code of regulations in the framing of which the Chinese Government must have the chief part, proving acceptable to foreigners. We have had too much reason to fear that the rights of foreigners—of the mercantile communities—may occasionally be sacrificed to technical interpretations of the treaty, and we are therefore disposed to believe that for the present difficulties should be met as they arise, and no cumbrous edifice of mixed legislation be erected which may after the lapse of a few years prove an incubus upon the material interests of the settlement. The uncertainty at present is no doubt unpleasant, but we are not sanguine as to the result of either applying for or obtaining such a charter as can alone be expected. If, on the other hand, a charter be applied for and be refused, the exactions of the local Mandarins will become more unbearable than ever, and practically the native residents will be forced to quit the foreign settlements. Sir RUTHERFORD ALCOCK considers that the removal of all Chinese from the settlement would not perhaps be an unmixed evil, save in so far as the interests of those who have entered into extensive speculations in land and houses are concerned. To these latter it would in some instances be ruin, and to some of the banks who hold heavy mortgages on landed property it would be little better. The principle of referring everything to Peking may we fear be carried too far, just as the principle, so often advocated, of treating the Chinese as though they were a Western nation, has in many cases brought about its own confutation. We ought to have learned before now that the Chinese system of government is essentially different from our own, and that the Peking Cabinet take little interest in legislating for the provinces, and indeed are almost powerless to enforce their decrees. Nor under the existing system is it fair that the central authorities should interfere in minutiæ with the provincial administration. A governor or Taotai, as the case may be, is placed in a responsible situation on his own responsibility. He has certain duties to perform, and he is not directed how to perform them, nor is he expected to be answerable for the measures he deems advisable unless he outruns all temperance and discretion. We have ignored this fact, and although in obtaining a basis of trade with several parts of the Empire it was necessary to negotiate with the central authorities, many minor details, whereof this question of the Shanghai Municipality is we believe one, might better have been left unagitated beyond the provincial circle. The hope which Sir RUTHERFORD ALCOCK now holds out is based on obtaining a *charter*, a boon which, if ever obtained (a point open to grave doubt), may prove a blessing but will more probably prove the reverse.

THE ICHIBOU QUESTION AGAIN.

How long must the despicable cupidity of certain "officers "and gentlemen" in Her Majesty's service remain unchecked by any wholesome measure of restraint, and consequently continue to be a standing reproach to us in the eyes of the Japanese? Not very long, we trust; for it was Lord Stanley, who now holds the responsible post of Foreign Secretary, who first called the attention of the House of Commons to these disgraceful malpractices, and he cannot surely forget the indignation with which he condemned them before his accession to office. Eight months ago Lord Stanley could only point out the discreditable transactions arising out of the monstrously unjust system then in force, and demand an inquiry into it; now he is in a position to apply the remedy—which we trust, not only for the credit of the nation but for the sake of his Lordship's own character for consistency, will be prompt and decisive. It is about a year since certain grave abuses of the "Ichibou Ex- "change" system—which have been so often dwelt on that we need not again particularise them—were exposed by the *Japan Herald*. In February last the results of there evils—more especially their demoralising effect on the naval and military services—were commented on in these columns, and a degree of publicity thus given to the question that rendered it impossible any longer to ignore it. Accordingly, on the 27th Feb. last, Lord Stanley called the attention of the then Chancellor of the Exchequer to certain statements made in the *London and China Telegraph* of the 5th of that month. Mr. Gladstone could not meet them with either denial or justification, unless the humiliating and discreditable avowal that the profit in the exchange was availed of by Government to eke out the insufficient pay of officers on that station, can be called a justification; but he distinctly promised that thenceforward all such profits should be carried direct to Government account, and that Mr. Arbuthnot's report on the system should be produced. For the time, therefore, we allowed the discussion to drop; believing, as in duty bound, that Mr. Gladstone's promises were in course of fulfilment. Ere long, however, we discovered that we had been the dupes of a dishonest subterfuge. With characteristic duplicity the Arbuthnot papers were suppressed until public interest in the matter had greatly diminished, and recent events show that, although four clear months elapsed between the dates of Mr. Gladstone's promise and that of his resignation of office, no instructions were ever sent to Japan for the purpose of in any way checking the progress of the exchange swindle. Was it that too many "vested interests" stood in the way? Or was not Mr. Gladstone's zeal for the rights of the Great Unfranchised equalled by his solicitude for the reputation of his Government, and the integrity of its representatives? At all events, the pledge thus publicly given was deliberately left unfulfilled; and the credit of having given the deathblow to this crying evil was one of the laurels upon which Mr. Gladstone did *not* repose on his retirement from office.

As might have been expected, this gross neglect of public duty has borne unsavory fruit. Not only have our officers—who are fairly entitled to such pay as would both ensure their comfort and maintain their dignity—had their insufficient salaries eked out by exchange profits; not only have officers of regiments quartered in Japan enjoyed an unfair advantage over those detained in more expensive and unhealthy quarters in China; not only have our ships of war, which ought to have been cruizing elsewhere, been laid up at Yokohama for the sake of the profits there obtained; but, as a climax to all this, an act has been perpetrated which the local press justly characterises as "a deliberate swindle on the Japanese Government, an injustice to the foreign community, and a disgrace to the (naval) service." H.M.S. *Pelorus* had been several months at Yokohama. During the first portion of this time the ichibou exchange continued, as it had previously done, to yield a handsome profit; and accordingly the officers drew their ichibous from the Custom-house as usual. Latterly, however, exchange took an unfavourable course, and they ceased to avail themselves of their privilege; there was nothing to be made by it, and the ship would undoubtedly have left the port without making any further claim; but on the eve of her departure a monetary improvement in the value of the ichibou took place, and the paymaster forthwith rushed to the Custom-house, claimed ichibous for the whole period since the last exchange they had taken, and obtained them. It was notorious that at least a portion of the dollars required for the operation had to be borrowed, and that as soon as it was effected, the native coin was immediately resold, giving a handsomer profit to the 'cute speculators. What, we should like to know, could have a more direct tendency than this to inspire the Japanese mind with contempt and aversion? From time immemorial they have regarded trade as being necessarily associated with chicanery and fraud, and therefore to be held as mean and despicable. One of the most deeply rooted of their national prejudices is that which has always kept the trading class at the very bottom of the social scale. If, then, trading operations are regarded with such aversion, even when openly practised as a means of livelihood, what must they think of persons claiming to be "officers and gentlemen" who condescend to gratify their cupidity by such unworthy trickery as practised in this instance? "Exchange operations," properly so called—conducted in the open market by banks and mercantile firms, form a recognised and necessary part of the vast fabric of our foreign commerce; but this *Pelorus* operation is a different thing altogether. After the scandal that had already arisen out of the system we should have thought that for very shame, officers wearing Her Majesty's uniform would have refrained from using such a mean device for filling their pockets; but since this is not the case, we must look to Lord Stanley for some measure of reform. It may be urged that the approaching change in the Japanese currency renders any present action unnecessary. But to this we reply, that a year has yet to elapse before such change will come into effect; that many fluctuations in the value of native coin may occur in the meanwhile; and that even the new order of things when established may afford an opportunity for some similar abuse unless steps are taken to put a stop, once for all, to the possibility of any juggling transactions, by which our officers can largely increase their emoluments at the expense of the Japanese Government, and to the detriment of legitimate trade.

POSTAL SERVICE WITH CHINA VIA RUSSIA.

Considering the extent of its widely ramifying branches, the postal service of Great Britain is on the whole very well managed; but incidents occasionally transpire which show that there is too often a tendency to pay more attention to the profit to be made out of the department than to the convenience of the public or the interests of commerce. It will be remembered that, when a few years since the obvious advantages attending the use of the Messageries Imperiale China line were represented to the Postmaster-General, that astute dignitary could not for a long time be brought to see the necessity for placing our postal service in connection with it; and for some eighteen months outward letters by the French mails had to be sent to special agents at Marseilles to be forwarded. In like manner our repeated efforts to induce the Postmaster-General to make use of the regular weekly mail between St. Petersburg and Peking, *via* Siberia, have hitherto been unsuccessful. By taking measures to arrive at an understanding with the Russian Government this line might easily be brought into connection with our Post-office, thus giving us the highly desirable accommodation of a weekly communication in addition to, and independent of, both the existing lines. But the Duke of Montrose cannot be brought to see this. By what official traditions his vision is obscured we know not, but our last representation on the matter is met with this very unsatis-

Digitized by Google

factory reply: "In his Grace's opinion, the arrangements for "the conveyance of correspondence to China, overland by way "of St. Petersburg, are not yet sufficiently matured to render "it advisable to forward letters from England by that route."

THE EUROPEAN TREATIES WITH SIAM.

We learn that Sir JOHN BOWRING, who in 1855 concluded so satisfactorily the Treaty with Siam on behalf of the English Government, has been appointed by the King of SIAM to be his Minister Plenipotentiary and Envoy Extraordinary to the European Courts, more especially those of France, Holland, and Prussia. The chief object of Sir JOHN'S mission will be to procure a partial revision of the Siamese treaties of commerce with these countries, all of which were based on the English treaty. Experience has shown that certain modifications, or rather explanations, are desirable, and it was naturally felt by his Siamese MAJESTY that no one could be so well qualified to settle questions arising out of them as the author of the original. One of the principal points requiring adjustment is the duty on spirituous liquors, which were admitted by an oversight at the same rate as ordinary articles of merchandise without proper guarantees as to the introduction of drinks dangerous to the public health. Moreover, the duty on such articles has always been farmed out, and has been one of the principal sources of revenue. In our own treaty arrangements have been made for the revision of this item on the representation of D. K. MASON, Esq., his Siamese Majesty's Consul here; with whose position, we may mention, Sir JOHN BOWRING'S appointment does not in any way interfere. It is not perhaps generally known that Sir John has lately been engaged in similar negotiations as the Minister Plenipotentiary of the Hawaiian Islands, on behalf of whose King he has concluded most satisfactory and liberal commercial treaties with Belgium, Holland, Italy, Spain and Switzerland.

THE KIACHTA COURIER LINE.

To old residents in China, who remember the dreary delays attending the transmission of letters by sailing vessels; and even to those of later date, when the establishment of one regular monthly mail was hailed as a great boon, the almost inconceivable rapidity with which news can now be transmitted *via* Kiachta presents itself in the light of a startling revolution. Practically, China has now a line of telegraph to itself; not a feeble, disconnected series of links, subject to constant interruption, but as we have reason to believe a thoroughly reliable medium of communication; while as to its rapidity, the receipt of a message from Tientsin just thirteen days old bears ample testimony. The scheme of establishing a line of couriers through Mongolia from Kiachta to Tienstin, originated by Mr. GRANT, was warmly supported by the Shanghai merchants, who advanced the necessary capital to carry it out; and since the service has been got into thorough working order they have with unexampled liberality handed over the proprietorship of it to Mr. GRANT for his exclusive benefit, giving him a fair time to repay the capital, and demanding no interest. So long as the service is maintained with its present precision and a moderate tariff adhered to, it will continue to form a most valuable connecting link between us and the Far East.

SIAM.

It will be remembered that when, eleven years ago, Sir JOHN BOWRING succeeded, after many vain attempts by the East India Company and the Americans, to open the trade of Siam, the treaty concluded was of the most liberal and comprehensive character. The influence of Great Britain was not employed to obtain any preferential advantages—which might easily have been secured; nothing was asked in an exclusive or narrow national interest, and the door was opened for the admission of every friendly Power. A succession of treaties, all based upon that negotiated by Sir JOHN BOWRING, have been made with the principal commercial Powers; and the trade, notwithstanding the vicissitudes to which all trade is exposed, has gone on increasing in magnitude and value. The results are less seen in direct intercourse with Great Britain and her colonies than in the relations of Siam with China, where it may be truly said that famine and starvation have been arrested by the enormous supplies of rice—the ordinary food of the Chinese. France, however, which in political diplomacy is never behind other nations, has seldom managed to promote her *commercial* interests by the action of her Consuls; who, having little trade to care for or protect, are frequently too busied in Court and personal intrigues to look after the more substantial advantages which commerce brings. Siam is afflicted with one of those bustling gentlemen in the person of M. AUBARET, who fancies he is to make capital out of a domineering and dictatorial tone, which those who know the sagacious policy of the Emperor and his Ministers are persuaded would never be approved, still less suggested by them. "Fantastic tricks" are often played by those invested with "a little brief authority," and in no localities so much as where the distance shields these actors from observation, and where it is supposed that dogmatism and despotism represent the remote but supreme and overwhelming Power behind it. This is a sort of game of chances—that fear may induce concessions and the concessions being obtained, a triumph is won for the hazardous players, and weak States are often thus wronged from a dread of interference, the menace of which has never been authorised by the proper authorities at home. The complaints that reach us from Bangkok appear to us to warrant and to urge this expression of our sentiments.

It is stated that the Prussian corvette *Vineta*, which recently sailed for the Chinese seas, carries instructions to purchase from the Chinese Government the western part of the island of Formosa, where the Cabinet of Berlin intends forming an establishment. We cannot, however, believe that any such intentions are likely to be asked or conceded.

NEW STEAMERS FOR CHINA AND JAPAN.

The trial of a screw steamer recently took place on the Clyde, built by Messrs. Henderson, Coulbourn, and Co., named the *Courier*, of about 600 tons register, and intended for despatch to Japan. She was built to realise a guaranteed average speed of eight knots per hour, on a very small consumption of fuel; but on a recent preliminary trial the builder (on the stipulated consumption) obtained the very satisfactory result of eleven knots per hour. The machinery is of the most simple and substantial construction, and during the trial worked very smoothly and gave the greatest satisfaction.

Two other screws are building intended for China and Japan. The steamer building at Aberdeen is, we hear, to be commanded by Captain Roger, lately returned from China.

SINGAPORE GAS MEETING.

An extraordinary general meeting of the shareholders of the Singapore Gas Company was held on the 30th October at the London Tavern, H. P. STEPHENSON, Esq., in the chair.

The CHAIRMAN opened the proceedings by moving the adoption of the report, by which a dividend was declared at the rate of 7½ per cent. per annum on the preference shares, and 3½ per cent. on the ordinary shares of the company. In the course of his remarks the Chairman observed that the town of Singapore was extending and improving in every way, and in a year or two he hoped to be able to inform the shareholders that the company was earning a handsome profit. They would in future obtain their chief supply of coal from Australia, as they could have coal delivered from there at Singapore for 38s. per ton. while from England the cost would be 50s. The consumption of gas during the month of August amounted to over half a million cubic feet, and the fort, which had been recently lighted, is consuming at the rate of £650 per year. The Chairman concluded by proposing a vote of thanks to Mr. Wells, the company's manager at Singapore. This was carried unanimously, as was also the motion for the adoption of the report and the declaring of a dividend. A vote of thanks was then proposed to the Chairman and directors and the proceedings terminated.

Monetary and Commercial.

The statement of liabilities and assets of the Bank of Hindustan, China and Japan will be issued in a few days, preparatory to the meeting of the shareholders called for the 19th inst. Several letters have appeared from shareholders who seem to have a distinct desire to run the bank and its directors down as much as possible. In most cases the writers know nothing of the nature of the bank's business.

The business of the bank should have been confined to the exchange operations of India, China and Japan, experience having most clearly demonstrated that the mischief which caused the failure of the Commercial Bank, the Asiatic, and the present condition of the Hindustan has been owing to local loans on land, &c., &c., in Bombay, Calcutta, and Shanghai. These transactions were never intended when the banks were established, and are quite incompatible with proper exchange operations. The directors are scarcely responsible for these local loans which have been entered into by the managers without their sanction. Notwithstanding all this the directors of the Hindustan have managed to keep the institution on its legs while three Indian banks of much greater standing have succumbed. This fact should have weight with shareholders, but when some men have lost money their reason goes with it.

Digitized by Google

Of course this class forms only one section, and no doubt there are shareholders who do not disparage the efforts of the directors during the disastrous times of the present year. With the want of confidence that exists it is quite impossible that the bank can continue on its present footing. Should the Hindustan drop out the India and China banks will be reduced to the Oriental, the Chartered Mercantile, the Chartered of India, and the Comptoir d'Escompte. We do not include the recently-formed banks in Bombay, as they are, in many cases closed up, and the only one which assumed any position in the India and China exchange business—the Central of India—has gone into liquidation. If the directors of the Hindustan can succeed in putting their bank on a new basis, they may yet be able to make it a most successful concern, seeing that there is ample scope for them in the legitimate trade of India and China by the reduced number of banks. They have paid for their footing in India and China since 1862, and very dearly, but considering the amount of opposition that always attends such attempts, we doubt if any other establishment could have done better. Having paid for such experience and introduction, it is a pity that the clamour of a portion of the shareholders should debar the others from reaping an advantage so dearly purchased.

Mr. F. W. Lawrence has been appointed liquidator of the Bombay branch of the Asiatic Bank, and proceeded by the mail of the 3rd.

The Comptoir d'Escompte has resolved on doubling its capital, and the Government appears disposed to offer no objection. The present capital is 50,000,000f., represented by 80,000 shares issued at 500f. each, and 10,000,000f. of reserve; and it is proposed to raise an equal sum by the issue of 80,000 new shares at 625f. (£25), the subscription to which is to be reserved to existing shareholders. With the enlarged capital the Comptoir would be able to extend its business in India and China, which has of late years assumed considerable importance.

A project is on foot for establishing a company for the purpose of trading with different countries in Asia, and several eminent bankers have promised to support it. The belief is that French commerce is capable of great extension in that part of the world.

The rumours of difficulties in the China trade are now carried to a most injurious pitch, and the names of houses are freely mentioned as having practically succumbed. The arrangement made by Messrs. Robert Smith and Co., with their creditors, for an extension of time, has given a certain amount of strength to the rumours, but in many cases they are unwarrantably mischievous and in advance of the facts. It was current in Mincing-lane that Messrs. Dent and Co. had succumbed to the losses of the past few years, but we are able to give the most distinct contradiction to this statement. The bills of the firm have all been duly honoured. The rumour is partly owing to the fact that the drafts of Mr. John Dent, on account of the Blakely Ordnance Company, have been dishonoured and have been sent to Hong Kong for recovery. The amount involved is not large, and has nothing to do with the firm's business. It is so reprehensible that the "bears" in Mincing-lane should propagate these stories that we deem it best to state the facts of the case. That the present year's losses on teas will be the means of extinguishing some firms in the China trade is highly probable, and it is to be hoped for the good of the trade generally, which has been of late years most sorely abused by traders, that the spirit of accommodation will not be carried to an unwholesome extent by banks and other creditors; where it can be seen that firms or individuals have conducted their business similarly to that of Messrs. Fletcher and Co. or Lindsay and Co., anything like extension of time is to be strongly deprecated. Better that the China trade should be cleared of such firms, who are dishonourably living on the prestige of its former partners. It is of great importance for the well-being of the future that the losses of 1866 should have their full weight *at once*, and not drag into a new year. In times like the late panic it was the bounden duty of bankers and others to extend accommodation to parties known to be prudent and responsible. Let it not, however, be felt that "arrangements" for compromising or carrying over engagements can be easily and lightly made, or we shall never restore the prestige of the China trade.

The steamer *Costa Rica*, intended for the branch line of the San Francisco and China service, left New York on the 10th Oct. for Hong Kong and Shanghai. She is intended to run between Shanghai and Yokohama.

We have before us the Board of Trade Returns for the month of September, 1866, and also for the nine months ended 30th of that month, as compared with the same periods of 1865 and 1864. The exports in the month of September of this year amounted in value to £16,671,078, against £17,316,681 for the same month of 1865, and for 1864, £14,687,942. For the nine months ended 30th September, the value of the exports from this country was as follows:—For 1866, £141 936,898; for 1865, £119,717,377; and for 1864, £123,404,161. This shows an increase for 1866 over 1865 of £22,219, 521, and over 1864 of £18,532,737. Of the enumerated imports we have returns up to the 31st August, their value during that month of 1866 being £20,940,303, against £20,997,691 in the corresponding month of 1865, and £21,944,048 during August 1864. The total value of the imports for the eight months ended August 31st, 1866, was £155,811,590, against £115,302,753 during the same period of 1865, and £141,012,477 in 1864, showing an increase for 1866 over 1865 of £40,508,837, and over 1864 of £14,799,113. The following figures relate specially to our trade with the ports and countries in the Far East:—

EXPORTS TO CHINA AND HONG KONG.

	1864.	1865.	1866.

Of Hemp from the Philippine Islands the quantity for the nine months and the value for the eight months were as follows:—

	1864.	1865.	1866.
Quantity to 30th Sept. (cwts.)	119.812	165.757	36 980
Value to 31st Aug.	£202.466	£243,101	£61,684

The total quantity of the several articles named imported into this country from all parts during the nine months ended 30th September, and their value up to 31st August of this year is shown thus:—

	Quantity.	Value.
Unrefined sugar	8 657 255 cwts.	£7.724 094
Tea	87,305.533 lbs.	6 090.721
Coffee	87.164 963 „	2,456 773
Silk (Raw)	3,405.615 „	3 564.726

The following quantities of the articles named remained in the bonded warehouses of the United Kingdom on the 30th September, 1866, and two previous years:—

	1864.	1865.	1866.
Coffee (lbs.)	35.638.750	37,021.994	33 807,553
Unrefined Sugar (cwts.)	3,829.144	3 678.243	4.186.330
Tea (lbs.)	86,274,583	81,639,089	83,862,890

Literature.

—o—

Medical Report of the Campaign carried on by Gordon's Anglo-Chinese Contingent against the Taipings in the Province of Kiangsu in 1863 *and* 1864. By Assistant-Surgeon MOFFITT, 67th Regt. Newcastle-upon-Tyne, 1866.—In this little pamphlet Doctor Moffitt has resumed in brief all the more important events of the Taiping campaign, laying especial stress on those which bore most forcibly upon the medical history wherewith he was chiefly concerned. The history of the events themselves has yet to be chronicled, but we eagerly welcome this first contribution to a methodical account of the most important era that has yet arisen in the intercourse of China with foreign nations. With the circumstances which led to the organisation of Gordon's force all are tolerably familiar. The death of Ward, the episode which determined the fate of Burgevine, Holland's failure, and subsequently Gordon's investiture with the command, are to readers of contemporary Chinese history as detailed in our columns familiar as household words. It is only necessary for us to recall one fact, namely that the force was under Gordon's command from April 1863 to June 1864, or about fourteen months, during which time it was engaged twenty-eight times in different parts of the province of Kiangsu The hospital accompanied head-quarters, and was consequently first established at Sung-Kiang, but was thence transferred to Quinsan, when the latter city was captured from the rebels and made the centre of military operations against the remaining insurgent strongholds. The peculiar nature of the country—cut up by creeks and canals in every direction, while it facilitated the execution of Gordon's strategic measures was equally favourable to the medical officers. Water communication between the scene of a battle and the depot was always available, and thus the wounded, so soon as their wounds were dressed or the necessary operation performed, were transferred to boats kept in readiness for the purpose, and were carried without disturbance of any kind to the shelter of the hospital. The result was, of course, a far lower rate of mortality than must inevitably have occurred had there been any of the shaking and knocking-about of an overland transport. The natural features of the country thus played a part in the experiences of the surgeon, and we find another important element introduced into his calculations in the moral and mental characteristics of the Chinese considered as patients. A Chinaman is naturally of the lymphatic temperament, and being free from any liability to nervous depression or mental exaltation as dependent upon physical causes, has little to fear from inflammatory action which in so many cases steps in and robs the surgeon of his greatest triumphs. In habit temperate and even abstemious, a Chinese patient has no predisposition to disease, and therefore the shock produced by a severe wound or surgical operation leads to none of the appalling effects to which Europeans under similar circumstances are liable. Of this we have abundant proof in the tabular statements which accompany Dr. Moffitt's report, but even independently of the corroboration we might reason *a priori* that such would be the fact. It is to be regretted that the pressure of constant and absorbing work prevented the preparation of elaborate reports regarding each remarkable case, as Dr. Moffitt's experience would have been valuable in the highest degree to the medical profession. Sufficient, however, has been done to show that in the writer of the pamphlet before us the Chinese Government had a faithful and untiring officer, and the English army medical service a worthy representative in whose hands the honour of the British army and that of the medical profession were alike safe. We abstain from quoting details which would prove uninteresting to the general reader. The work itself will amply repay perusal, and may be obtained from the publisher.

THE TEA TRADE

(PRODUCE MARKETS REVIEW, 3RD NOVEMBER.)

It has always been considered difficult to ascertain the value of tea; and although no exact standard of comparison has yet been obtained, it is evident that the trade will now accept nothing but the result of the public sales as a true criterion of the price they ought to give. When no sales are held, the market becomes torpid, and brokers complain of the great difficulty of selling goods. It is therefore hard to understand why the

Digitized by Google

usual series of sales was omitted this week. The reason assigned—that there were five Tuesdays in the month—seems to us to render the subject more difficult of comprehension than before, and we are certainly quite at a loss to explain why it was not held. Whatever the cause may be the usual results have followed. The trade have reduced their purchases to the lowest possible ebb, and a very large sale, representing the unsold accumulation of three weeks, is announced for next Tuesday. So large a quantity as 40,000 packages put upon the market, principally without reserve, will it is thought afford a conclusive test of the probable course of price, and the transactions pending the sales have been almost nominal.

Immunity from prejudice is no more characteristic of the tea market than of any other branch of trade; and in this, as in other things, the habit of judging from appearances is sometimes carried to an excess. Not that the habit of so judging necessarily leads to erroneous conclusions, but articles should not be condemned for their looks alone when other tests can be applied. The value of a tea is determined not only by the liquor which is produced by infusion, but also in a great measure by the appearance of the leaf previously—that is, its size, form, and colour. Experience teaches that these three are generally associated more or less with the quality of the tea itself; and hence it comes that the value of the article is determined almost as much by these three incidental considerations as by the quality of the tea after infusion, which is after all the most essential of any. Retail tea-dealers are apt to lay a great deal of stress on the secondary qualifications, because the public, as a rule, will not buy tea with ill-formed leaves, or containing much dust. We make these remarks because we think that if grocers drew their customers' attention to the fact that teas of an unprepossessing appearance were not necessarily bad in quality, there would be no great disinclination to give those kinds a trial, the lessened value of which is caused by a defect in the appearance of the sample. At the present moment there is on the market a quantity of Broken Leaf, or Dust, which retailers might be inclined to overlook simply on account of its appearance, but which is to bo obtained of a quality, in many instances, of the finest description, although sold at less than the price of common Congou. That this is the case with a great proportion of the Broken Leaf Tea on offer we are not prepared to assert; but in several instances they have come under our notice not only is the quality better and the flavour more agreeable than that of many other teas, for which three times as much money has been paid, but the second liquor is almost, if not quite, as good as the first. And the reason of this is obvious. The boiling water acts directly upon the small fragments of leaves, instead of being retarded (as is the case with larger leaves) in its action by first unfolding the leaf, and then extracting the theine from it. By the time that the leaf in ordinary samples of tea is fully unrolled and capable of being submitted to the action of the hot water, the liquid has lost a considerable amount of its heat, and the essence of the tea-leaf is consequently but imperfectly extracted.

The gradual decline in stocks from 107,379,611 lbs. in June, the maximum point which they have reached during the present year, to 83,862,890 lbs. on the last day of September, unless counterbalanced by some overwhelming increase in exports or decrease in imports, points to an increase in the consuming power, and consequently in the general prosperity of the country. Taking the period of nine months for 1866 and 1865, we find from the Board of Trade Returns that the imports for that portion of the present year are more than 11,000,000 lbs. in excess of last year; there is also a deficiency of more than 4,500,000 lbs. in our exports; and an increase of about 3 000,000 lbs. in the deliveries for home consumption. No reliable conclusions can be drawn from the comparison of single months in the same year with each other; and we should not therefore be justified in assuming a decrease in consumption because there is a falling off in the deliveries for September as compared with those of August and July in the same year. But, taking the corresponding month in the three successive years 1864, 1865, 1866, we find that the deliveries for consumption have increased in each year for that particular month by more than 500,000 lbs. There has also been a marked increase for the nine months in the deliveries, the figures for the three years being in round numbers 66,000,000 lbs., 73,000,000 lbs., and 76,000,000 lbs. respectively.

FRAUD ON UNDERWRITERS BY SCUTTLING THE SHIP "SEVERN."

On the 2nd inst. an examination took place before Alderman Finnis, of parties implicated in a charge of scuttling the ship *Severn*, near Cape de Verde Islands, on the 16th June last, with intent to defraud the London and Caledonian Marine Insurance Company and the underwriters at Lloyds. The prisoners, Thomas Berwick, master mariner and shipowner, of The Willows, Brockland, Liverpool; Chas. W. L. Webb, late mate of the *Severn*; and Joseph Frederick, commission agent, alias "Allsopp and Co.," having been placed at the bar, Mr. Buchanan informed the Court that he defended the prisoner Berwick, and Mr. Wontner said he appeared for Deans.

Mr. Lewis, who prosecuted, commenced by a very long statement of the facts. He said there was a fourth party implicated in the frauds—Lionel Holdsworth—who was not yet in custody, but he hoped that ere long he would also be brought to justice, as he would appear to be the prime mover in the whole of these fraudulent transactions. The *Severn* formerly belonged to a person of the name of Sweet, who, after doing sundry repairs to her, sold her for £6,000 or £7,000 to Holdsworth and Berwick. The latter prisoner would be shown to have found the money paid at the time, about £500, and the remainder was subsequently raised by Berwick and Holdsworth, by means of bills of exchange and mortgages. Obtaining possession of the vessel they at once took steps to send her to Newport to take in coals for Shanghai; and placed the prisoner Webb in her as mate. Mr. Lewis here read some correspondence which the police had found in prisoner's (Berwick's) possession in reference to Webb, from which it appeared that he had acted as mate in another of Berwick's vessels, the *Jane Brown*, which had also foundered, and upon which large claims had been paid by the underwriters. This vessel, Mr. Lewis said, had been wilfully scuttled, and he intended to prefer a charge against them to that effect. References were also made in these letters to Berwick's connection with Ruxton, who was tried a few years since for scuttling ships. The *Severn* was chartered for Shanghai, and proof would be given in evidence that Berwick and Holdsworth effected insurances upon the ship and freight for £17,000, treble her actual value. The master appointed was Captain H. T. Leyland, who would be examined as a witness, and would state distinctly that the *Severn* was scuttled by the mate, Webb; that Berwick and Holdsworth arranged with him (Leyland) that he was not to interfere with the mate at all on his voyage in the plan of destroying the vessel, holding out an inducement that £700 would be given him if he acquiesced in all that was done. Witness would also prove that Deane got a man named Ward, for a consideration of £50, to register himself as the owner of the *Severn*. Papers on Deane's writing established that fact, and Ward would be called to give evidence. Mr. Lewis explained that as Berwick and Holdsworth had so recently lost the *Jane Brown*, they knew perfectly well they would be unable to effect insurances on another ship; so they determined to create a fictitious owner by putting Ward forward. Already evidence had been adduced at a former hearing criminating Deane in insuring twelve cases of firearms for £1,500, consigned to the care of the captain of the *Severn*, which were proved to be only certain jars of salt.

Hugh Thomas Leyland: I have been a master mariner since 1838. I took command of the *Severn* at Newport in March, 1866, at the request of Holdsworth, whom I had known many years. [A model of the vessel was produced in court.] I have known the prisoner Berwick 12 years as a master mariner. In March, 1865, I received a letter from Holdsworth, which I have since destroyed. He asked in that to come to London, and I came at once. I saw him at his office in Fenchurch-street, in company with Deane, who was acting as his clerk. He asked Deane to leave the room, and he did so. He said that his friends were about buying the *Severn*, which was on her passage to Newport, and bound for Shanghai, and that I was to be the master. I returned to Liverpool, and a few days afterwards I had a letter from Holdsworth, asking me to go to Newport and join the ship. I went to Newport accordingly, and there met Holdsworth and Berwick at the King's Head. They told me they had a mate there in Newport who was to go in the ship, who was a trustworthy man, and well known to Berwick. Holdsworth said the mate was an eccentric character, but that I should have to bear with him, and that he was to go the voyage for a special purpose, but that I was to keep aloof from, and not interfere with him, as it was only for the passage out, and he thought the ship would never reach her destination. Holdsworth said it would take £7,000 to get the ship away from Newport, and that it would be £700 in my pocket if the ship did not arrive out. Berwick said Webb was put on board for a certain purpose, but he did not say the purpose. Holdsworth said he intended to insure her for £8,000 or £9,000. Holdsworth later in the day told me that he should advise me to insure my effects for £200. I told him I had not that value on board, but I should insure effects for £100 and my life for £100, as usual. Berwick told me all the money he possessed was in the ship. Webb was the same night introduced to me as the chief officer of the ship. Holdsworth said then that the Messrs. Allsopp would send out some cases of revolvers as cabin freight, and I was to have £10 for carrying them. He also made me a present of a pair of sample revolvers, saying they were the same as were in the case. A day or two after Holdsworth came to clear the ship, and he then said that Webb had his orders and the ship would never reach China. Soon after the ship sailed Webb asked if he should get the ship's boats in order, I told him he might, and sails were made to them. One day Webb was storing the ship's stores and he told me he had opened one of the cases. He said it contained salt, and he expected as much. On the 14th of June the ship sprung a leak, and the men, after being at the pumps longer than their time, could not throw the water, I charged Webb with tampering with the ship, but he declared that he had done nothing with her. After a time he came to me on the poop, and I said to him "What have you done?" He had proposed to get out the boats, and when he answered me he said he had bored a hole in her bottom, and that it could not be undone. I told him it was a mad transaction to do such a thing so far from land—that we were 1,400 miles from the Brazilian coast, and that the nearest land was 250 miles, and that he had better stop the hole. He said it was impossible to do so, as he had broken the plug in driving into the inner skin. I then gave directions to the prisoner Webb to get the tackle up and to provision and water the boats for 20 days. The "breakers" for water were ordered at Newport, at Webb's suggestion, and each held 10 gallons. When the ship had made 10 feet of water in the hold I called Webb and took him into the cabin. I told him he had ruined all of us, for the merest child could see the ship had been tampered with. I told him I would not leave the ship, but would go down with her sooner than face this exposure, and I wish I had gone down with her. It was about seven o'clock at night when I got into the boat, and I never saw her again, I do not think it was possible for her to have floated for more than half an hour longer. The whole of the ship's company were contained in three boats. Three days after leaving the ship we were picked up by the *Arequipa*, bound for Pernambuco, and were carried to that port. Webb and I came home together in the same vessel to Southampton. We occupied the same cabin, and Webb then told me he had bored seven holes in the run of the ship, and that he had plugs which he could remove at his pleasure. When he told me this I told him it was safe to be found out, it was done so glaringly, and would transport everyone connected with it. He said that it had been done before, for he had done the trick for the *Jane Brown*. The "trick" was boring and sinking her. I did not know the ship was insured for so much as £16,000, or I should have had nothing to do with it. The case was then adjourned. A reward of £100 is offered for the capture of Holdsworth.

THE NEW DOCK AT SUEZ.—A letter from Suez, of the 12th says:—"The new careening dock constructed by the Viceroy, Ismail Pacha, near this town, was inaugurated yesterday in presence of the Consuls of England, Italy and France, and numerous Egyptian dignitaries. It is about 425 feet long, nearly 100 feet wide, and more than 31 feet deep. It is in advance of Suez, in face of the mountains of Attaka, and has the desert to the left. At a given signal water was admitted from the sea, and the dock was filled. Then the steamer *Taka*, belonging to the Viceroy, entered amidst shouts from the people. The *Taka* was afterwards removed, and the dock was emptied—an operation which lasted six hours. The dock has been executed by French and Egyptian engineers."

THE TOBACCO TRADE.—In the city of Hamburg the manufacture of tobacco gives employment to over 10,000 persons, who turn out 150,000,000 cigars a year, valued at $2,000,000. From Havana and Manila, Hamburg imports 18,000.000 cigars a year, making an aggregate, including its own production, of 168,000,000 cigars, 153,000,000 of which are exported, leaving 15,000,000 for home consumption—allowing 40,000 cigars a day to an adult male population of 45 000. In England, with a population of 21,000.000 in 1821, the consumption of tobacco was 15,598.152lb., an average of 12 ounces per head for the entire population; in 1831, with a population of 24,410,439, the consumption reached 19.533,841lb., or 13 ounces per head; in 1841, population 27,019,672, consumption 22.309,360lb., or 13½ ounces per head; and in 1851, population 27,452,692, the consumption was 28,062.841lb., or 17 ounces of tobacco per head, showing a steady increase. In France the consumption of tobacco is 18½ ounces per head, nearly half of which is snuffed; in Denmark, in 1848, it was 70 ounces per head; and in Belgium it averages about 73½ ounces per head. A popular writer sets down the consumption of tobacco by the whole human family, annually, at 2,000,000 tons, or 4,480,000.000 lb., or 70 ounces per head; and he adds that "the annual tobacco crop of the world weighs as much as the wheat consumed by 10,000,000 of Englishmen, with a money value equal to all the wheat consumed in Great Britain." Next to the United States, the principal tobacco-producing countries are some of the West India Islands, the States of Central and South America, Cuba, Hayti, Brazil, Peru, &c., in the East Indies, Manila, Java, China, &c.; Asia Minor, Egypt, Turkey, Greece, Hungary, the southern parts of Russia, Holland, Belgium, the States of Germany, many of the departments of France, Algeria, Corsica, and Upper Savoy, are all noted for the culture of tobacco. The total production of the world is estimated as follows:—Asia, 399,900,000 lb.; Europe, 281,844,500 lb.; America, 248,280.500; Africa, 24,300,000; Australia, 714,000, making in all 995,039.000 lb.

SHIPWRECK NEAR THE COAST OF CHINA.—The Board of Trade have received from Sir Richard Graves MacDonnell, C.B., Governor of Hong Kong, a report of an inquiry by a Marine Court into the circumstances connected with the total loss of the British ship *Fairlight*, Captain Bush, commander, owned by Messrs. Redfern, Alexander, and Co., of London. It took place on the night of the 12th of June last, on a reef to the eastward of the island of Formosa. 184 Chinese emigrants were drowned. The *Fairlight* was laden with oil, opium, and other merchandise of Hong Kong, which port she left on the 29th of May, for California, carrying about 360 Chinese emigrants. The captain was not on deck at the time she struck. He had gone below to dress a wound in his leg, leaving his second mate on deck in charge, and had not been below ten minutes when he heard the look-out man call out "Breakers ahead," and almost immediately she ran upon a reef in what is termed Meiaco-Sima Group, to the eastward of the island of Formosa. The decision the court of inquiry came to was as follows:—"1. That the *Fairlight* was lost on the night of the 12th of June last on a reef between Rough Island and Broughton's Bay, in the Meiaco-Sima Group, and that 184 Chinese and one European passenger were drowned. 2. That, seeing the state of the weather, and the well-known dangerous nature of the group, the master acted with great imprudence, on sighting the island Kie-Kienson at 5 P.M., and subsequently other islands on the bow, in not altering her course so as to insure the ship passing well to the southward of them. 3. That after the ship was on the reef the master used every exertion to save the lives of those on board, and that the loss of life among the Chinese was in a great measure the result of their own folly in endeavouring to save their personal property. The Court therefore adjudged the certificate of competency of William Bush to be suspended for six months." The inhabitants of the Meiaco-Sima Islands, as soon as they became aware of the wreck, lent what aid they could towards saving life, and had they not been prevented by the dangerous state of the weather they would probably have succeeded in rescuing everybody. When those who were saved reached the shore the islanders evinced the greatest hospitality towards both Europeans and Chinese, giving them the best food and accommodation they could afford, and they not only refused any direct remuneration but gave up a large quantity of opium and oil washed ashore from the wreck without showing the least desire to appropriate any portion to themselves. Such disinterestedness and humanity are unfortunately too rare in this part of the world for conduct such as that of the Meiaco-Sima islanders to pass without special approbation, and the Court has suggested that the matter be brought to the knowledge of the chief naval officer of the station, in the hope that he may see fit to direct some expression of thanks to be made to the islanders by any of Her Majesty's naval officers who may visit the scene of the shipwreck.

ARRIVAL OF JAPANESE IN AMERICA.—Among the arrivals in this city from Europe (says the *New York Herald*) are two Japanese, accompanied by Mr. J. Oliphant as their friend and interpreter. The party took quarters at the St. James Hotel, where they were represented as Japanese princes. They remained in this city until last Monday, when they took their departure for Washington via the Camden and Amboy Railroad. There is something a little problematical to the outside world in regard to the object of the visit of these distinguished foreigners to this country. They may possibly be veritable princes *incognito*, of whose mission we have had no intimation—secrecy and despatch being a national trait with the Japanese—or they may be commercial agents, when the following facts are considered: The representatives of the United States, England, France and Holland serving in Yokohama concluded a commercial treaty some short time since with the Emperor of Japan, by virtue of which the people of those countries were guaranteed a more free and unembarrassed trade with the Imperial ports. It was remarked at the time that the action of the Emperor in perfecting this treaty was very distasteful to the Japanese nobles or native "protectionists," who are always strongly opposed to any innovations tending to introduce foreigners or foreign influence into the country, other than the establishments permitted under the old laws to Holland. Since the promulgation of the new treaty there have been serious internal troubles in the empire, the aristocrats opposing the Royal executive on some leading questions of State—probably the working of the new trade treaty. This difficulty is most likely connected in some manner with the present visit of the princes to Washington.

FREIGHTS AND CHARTERS

The same inactivity as noticed in our last issue still rules in outward berth freights; coal freights from the northern ports are slightly improved.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 40s. weight, 50s. meast. To Nagasaki: 50s. weight or mea. To Shanghai: 45s. weight, 45s. to 47s. 6d. meast. To Hong Kong: 40s. weight or meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Ceylon: 25s. to 30s. weight, 35s. meas.

The current quotations for coal, &c., are as follow:—From Wear or Tyne per keel. For Hong Kong: £41. For Singapore: £31. For Shanghai: £50. For Saigon: £50. For Yokohama: £51. From Newport, Cardiff or Swansea, per ton. For Hong Kong: £2. For Singapore, £1 9s. For Shanghai: £2 10s. For Saigon: £2 8s. For Yokohama: £2 7s. 6d. Batavia: £1 6s.

CASUALTIES.

The Costa Rica (steamer), which left New York on 10th of October for Hong Kong, was obliged to put back to New York, leaky, and disabled.

The Senior, Bakker, from Batavia to Amsterdam, has twice been collision in the Great North Holland Canal.

HOLLOWAY'S OINTMENT. — THROAT AFFECTIONS.—All the varieties of these distressing complaints may be readily and effectively treated by rubbing this Ointment twice a day upon the neck and chest, and supporting the strength by suitable nourishment. By this simple means diphtheria, ulcerated and relaxed throat, irritation of the windpipe, quinsey, and all glandular enlargements, will have their progress arrested, and the destruction they have caused repaired. Holloway's Ointment is the most trustworthy remedy for all internal and external throat ailments, and may be safely and effectively employed in every case, without regard to season, sex, age, or constitution. It is highly extolled for its ready cures of spasmodic coughs, chronic hoarseness, and all disagreeable discharges from the throat and nose.

PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power, ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz. a Shipwright, an Engineer and a Blacksmith. Dry Godowns for the reception of vessels, stores, &c., when requiring to discharge them.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's.

Regular Line of Packet Ship.

To sail punctually on the 10th November.

FOR HONG KONG and WHAMPOA, the well known clipper BELTED WILL, A 1 fourteen years, 812 tons register, A. LOCKE, Commander; lying in the London Dock. Has excellent accommodation for passengers.

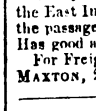
For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

Has a large portion of her Cargo already engaged, and will meet with quick despatch.

FOR HONG KONG and WHAMPOA, the beautiful British clipper ship DORA, A1 ten years, 379 tons register, ELIJAH BROWN, Commander; loading in the West India Docks. This fine vessel, well known for her fast-sailing qualities (having made her last passage home from Colombo in 94 days), offers a favourable opportunity to shippers.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's Bishopsgate-street, E.C.

Regular Line of Packet Ship.—To follow the Belted Will.



FOR HONG KONG AND WHAMPOA, the very fast, new clipper JOHN MILTON, A 1, 14 years, 618 tons register, A. PIROUET, Commander; lying in the East India Docks. This ship, built last year, made the passage to China against the Monsoon in 104 days. Has good accommodation for passengers.

For Freight or Passage apply to SHAW, LOWTHER, AND MAXTON, 2, Royal Exchange-buildings, London E.C.

FOR SHANGHAI, (to sail positively on the 8th November, in lieu of the Falcon), the splendid new clipper ship MAITLAND, A 1 twelve years, 799 tons register, WILLIAM COULSON, Commander; lying in the East India Docks. This ship has proved herself to be one of the fastest afloat, having just made the passage from Foo Choo in ninety-eight days, and from Anjer in the extraordinary short time of sixty-seven days.

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

FOR SHANGHAI, to follow the MAITLAND, the celebrated clipper ship SIR LANCELOT, A 1 14 years, 886 tons register, RICHARD ROBINSON, Commander; to load in the East India Docks. This beautiful ship was built last year, on the lines of the Ariel, by Messrs. Robert Steele and Co., of Greenock. Has superior accommodation for passengers.

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, E.C.

Last Shipping Day the 24th November.

DIRECT for SHANGHAI, the magnificent Clyde-built clipper ship HOANGHO, A 1 fifteen years, 565 tons register, J. CARRINGTON, Commander; loading in the East India Docks. This splendid high-classed ship, built in 1864, is strongly recommended to shippers of fine goods.

For Freight apply to GELLATLY, HANKEY, SEWELL, and Co., 27, Leadenhall-street, E.C.

COLOMBO (CEYLON) Direct (to follow the Palestine), having all her dead weight engaged, and only room for light measurement goods, the new clipper ship BOYNE, AA 1, 618 tons register, R. P. JONES, Commander; loading in the West India Docks. This splendid vessel has a full poop, with magnificent accommodation for the comfort and convenience of passengers.

For passage apply to the owner, W. H. TINDALL, 5 Tokenhouse-yard, E.C.; or for freight or passage to F. TALLACK, 23, Birchin-lane, Cornhill, E.C.

COLOMBO Direct (first ship), the clipper PALESTINE, AA 1, 606 tons register. Captain T. PARK; loading in the West India Docks. This vessel has superb accommodation for passengers.

For passage apply to W. H. TINDALL, 5, Tokenhouse-yard; and for freight of passage apply to F. TALLACK, 23, Birchin-lane, E.C.

FOR COLOMBO and COCONADA (under engagement to H.M. Council for India, will have quick despatch), the splendid clipper ship BROCKHAM, A 1 twelve years, 1,048 tons register, R. J. BARROW, Commander; lying in the East India Docks. Has excellent accommodation for passengers.

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings.

FOR COLOMBO Direct (under engagement to Colonial Government), to sail on the 23rd November, the fine British-built ship MEDWAY, A 1 12 years, 612 tons register, T. GRIEVES, Commander; loading in the Victoria Docks. This fine vessel is strongly recommended to shippers. Has splendid cabin accommodation.

For Freight or Passage apply to the owner, GEORGE MARSHALL, 3, Cross-lane, St. Mary-at-Hill.

To follow the FRANCES.

And will meet with the usual quick despatch.

DIRECT for COLOMBO, the beautiful fast-sailing ship ABOYNE, A 1 ten years, 444 tons register, JAMES GRANT, Commander; lying in the London Docks. This splendid clipper ship, built in 1864, offers a first rate opportunity to shippers of fine goods.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

Steam to Calcutta.

Leaving the East India Docks Nov. 24, last Shipping Day 22nd.

Outward Passage Last Year 6¼ Days.

DIRECT FOR CALCUTTA, the splendid River-built Twin Screw Steam Ship, "FAR EAST," A 1 12 Years, 1,200 Tons Register, horse power—150 nominal, 600 indicated, HENRY JONES, Commander. This magnificent Ship, built in 1864 by Messrs J. and W. Dudgeon, of Millwall, has a full poop, and her Cabin Accommodation cannot be surpassed.

For Freight or Passage, apply to Captain HENRY JONES, on board; or to GELLATLY, HANKEY, SEWELL and Co., 27, Leadenhall-street, E.C.

Bills of Lading to be had on application to Messrs. Smith, Elder and Co., Cornhill.

To follow the FRANCES.

Will meet with the usual quick despatch.

DIRECT for COLOMBO, the well-known fast-sailing ship, ABDUL MEDJID, AA 1, (owned by Messrs. Vanner Prest, and Lyth), 400 tons register, J. PITON Commander, West India Docks. This magnificent vessel offers a first-rate opportunity to shippers of fine goods Has elegant accommodation for passengers.

For freight or passage apply to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's. Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

Will meet with very quick despatch.

FOR SADASHIGUR, CANNANORE, BEYPORE, and COCHIN.—The beautiful clipper ship, MILBROOK, A 1 9 years; 328 tons register, JOHN BARRON, Commander; West India Docks. This fine little vessel has been especially selected to take the place of the Star of Ceylon—lately lost.

The present mail has not brought any later news.

NAGASAKI.

Under date the 10th Sept. we hear that the steamer *Eagle*, lately purchased by the Tycoon, had returned from the Straits of Simonoseki, having attacked a fort and two steamers of Prince Choshiu, in which engagement she received a shot on the port bow, near the water line, without doing much injury. On entering the harbour she fired a salute of 26 guns. Her officers and crew comprise about 300 men, entirely Japanese. The captain and officers have expressed great satisfaction at the vessel's performance.

HAKODADI.

The high rate of exchange complained of at the other Japanese ports has caused great inconvenience here also, completely checking business in imports. The export trade is more flourishing, especially in seaweed and *biche-de-mer*.

CHINA.

PEKING.

Dates are down to September 6, but there was nothing current of any importance. The English Admiral was expected on a visit to the Minister, Sir R. Alcock.

We learn from Peking that the mother of the Emperor's tutor has recently died. The Emperor insists that the usual custom of a three years' retirement by the latter shall be dispensed with, and that he shall resume his duties after a retreat of one hundred days. The Emperor has given 2,000 taels towards the funeral expenses.

TIENTSIN.

The following is from Messrs. Platt and Co.'s circular of 7th September:—

Our market for manufactures generally has been in a most depressed state. At the early part of the month the want of demand was in some measure attributable to the extremely high temperature, and the large quantities of goods previously imported by natives from Shanghai to a great extent still remain in stock, and, as many of them are advanced upon by native banks, holders are frequently anxious to realise. These circumstances occasioned a fall in price, which, however, has been recovered with the cooler weather, and prices are now steady.

The fall trade, although hardly commenced, has shown signs of doing so, by an increased inquiry, which has been noticeable

Digitized by Google

since the 1st inst., and we anticipate that the more peaceful European advices looked for by each succeeding mail will further stimulate demand.

Grey Shirtings: From the continued supplies which come forward, and the large stocks held here, we do not expect an early improvement in price, more particularly as accounts from the interior markets are very indifferent. Judging from past years, and taking 8¼lbs. grey shirtings at a value of 3 taels per picul or over, natives have already imported an average year's consumption, say over 550,000 pieces.

Raw Cotton: 13.8.0 to 14.8.0 tales per picul of 133⅓lbs.

SHANGHAI.

Dates are down to the 21st Sept. The mail of 26th July arrived out on the 8th Sept. The following items are from the *North China Herald*:—

The discussion which has so long been dragging on, regarding the status of the Shanghai Gas Company, has at length been brought to a close by a letter from Mr. Myburgh, whose opinion that the so-called company was a copartnership Mr. Mitchell assailed, and a reply by the latter. The result of the controversy is, that it seems very doubtful whether commercial companies in Shanghai have any legal existence at all, especially as they comprise members of divers nationalities to whom of course different laws apply. The American Court has, however, recognised the existence of the Dock Company in a manner it could well have dispensed with; a claim brought by it against Messrs. Fogg and Co., for docking the steamer *Enterprise*, having been given against them; and a counter claim for delay decided in favour of the claimants.

Further proceedings have been taken in the bankruptcy of J. H. Wignall and Co., and J. P. Jordan.

The Taotai has consented to raise his contribution to the Municipal Exchequer under the head of wharfage dues to $14,000. It has been suggested that a plan of the settlement be drawn up, with the numbers of lots and the names of owners depicted on it, as considerable difficulty is frequently found at present in identifying property.

The official liquidator of the Agra Bank has announced that a dividend of 5s. in the pound will be shortly paid to local creditors.

The Taotai has been induced to issue a proclamation prohibiting the sale of game within the precincts of the foreign settlement during the close season.

Another proof of the inconvenience of the present system of transit dues on produce coming down from the interior has occurred in the case of some un-fired green teas, which were detained for six weeks at a Customs barrier above Hangchow, and when eventually released were so damaged that they were resold on the spot. The Customs authorities refused to take the transit certificates tendered as genuine proof of foreign ownership, and declined even to accept the usual native duty if paid in the foreign name until the owner himself went up. The same inconvenience experienced here in the case of tea is felt on the Canton river in the case of imports. Evidently, the system of inland transit dues will require attention at the revision of the treaty, in 1868. The rumour to which we alluded in our last issue of another irruption of the Yellow River is confirmed, so far at least as regards the fact of an inundation. The fact, however, that the locality indicated as that which has suffered is situated to the south of the line indicated on the maps as the old channel of the Yellow River, brings back all the haziness which had so long surrounded the course of this stream, but which appeared to have been partially dispelled by the recent accounts of Messrs. Martin and Williamson before the Asiatic Society. These gentlemen expressed their assurance that the Yellow River now ran into the Gulf of Pecheli, and had deserted its southern bed; whereas we now have it bursting its banks at a point still further south. It may be a question whether the inundation be attributable to the actual body of the Yellow River, or to an affluent, or to the overflow of the lakes which lie to the north of Yangchow. But as to the damage caused there appears to be no question. Numbers of the inhabitants of the flooded districts have sought refuge in Nanking, and the Chinese assert the loss of life and the destruction of property to have been fearful.

The steamer *Ajax* arrived from Hong Kong on the 19th Sept.

The number of cases decided before the Mixed Court sufficiently illustrate the value of that institution, and the large amount of business it despatches. Five criminal and five civil cases—the latter of varied character, and involving sums amounting in the aggregate to some tls. 15,000—form a list that few English Courts would dispose of in a single day. The absence, however, of the cumbrous technical formalities which impede the working of the latter enables the Mixed Court to get through its business with more than ordinary quickness. There is a primitive simplicity in the promptness with which facts are elicited, that contrasts refreshingly with the circumlocutory process of examination and cross-examination prevailing in our own courts.

The following is in reference to the proposed railway from Shanghai to Soochow:—The line of railway is to unite, in the first instance, Shanghai and Soochow. A great portion of this route has been surveyed, and a temporary terminus might be erected at a point on the Soochow creek near the present Soochow bridge. It is proposed that a single line be built at first, making the bridges, however, wide enough to allow of a second track being laid whenever it became advisable. The probable cost of the railway including rolling stock &c., &c., is estimated at tls. 28,400.00, or say for the 62 miles taels 760,800.00. To this sum must be added for termini, stations, iron bridges, &c., 380,000.00, making a total of taels 2,140.300.00. The estimated receipts of such a line per year are put down at tls. 282,510.00, and the total amount of expenses for a year at tls. 107,400.00, giving a net gain per annum of tls. 179,110.00 or about 7½ per cent.

It is with regret that we have to record the melancholy suicide of Mr. C. Grey, commission agent. He had for some time been suffering very severely from large boils, which had depressed his spirits and affected his mind. An inquest was held and a verdict of temporary insanity returned.

His Excellency the Hon. Anson Burlinghame, Minister for the United States, has arrived *en route* to Peking from San Francisco and Yokohama. The return of Mr. Burlinghame is generally regarded with satisfaction, as his conciliatory spirit and moderate views have always been of great advantage in the adjustment of diplomatic difficulties.

A meeting of Consuls, at which were present those for the United States, Great Britain, France, Prussia, Denmark and Austria, took place on the 15th Sept. A draft of pilot regulations was laid upon the table by Mr. Seward, Consul-General for the United States, and after a short discussion, was passed, subject to confirmation at Peking. It is proposed in the regulations to establish a pilot board at Shanghai, under the presidency of the harbour master; and that licences shall be granted to duly qualified pilots, those not so qualified being subject to fine if foreigners, and if natives to prosecution in the Mixed Court. The rules, as proposed, are to establish the rates of pilotage as under:—

From Gutzlaaf, steamers, and sailing vessels towed by steamers	Tls. 4.00	per foot.
Sailing vessels without a tug	5.00	,,
From Lightship, steamers, and sailing vessels towed by steamers	4.00	,,
Sailing vessels without a tug	4.50	,,
From Woosung, sailing vessels towed by steamers ...	4.00	,,
Steamers	3.50	,,

vessels from outside proceeding not further than Woosung to pay two-thirds of above rates.

Compensation will be provided for pilots detained more than forty-eight hours at the bar.

HONG KONG.

(FROM OUR OWN CORRESPONDENT.)

HONG KONG, Sept. 26.

This mail will take home, unless some unforeseen delay interposes, the memorial which has been got up here for transmission to the Secretary of State for the Colonies as an appeal against the Stamp Act. It will show numerous signatures; but, notwithstanding the agitation that has been fomented against the proposed introduction of this form of tax by the wealthy merchants, the longer the discussions on the subject continue the more clearly does it appear that a very strong and important party in the colony is in favour of the measure. Hong Kong is no longer the purely trading depot it was so lately as even five years ago. There are now large numbers of residents totally unconnected with trade—lawyers, physicians, engineers, commanders of vessels, &c., who are householders in Hong Kong, and who view with disfavour the proposals to impose double rates of house tax. It has recently been ascertained that, against 102 mercantile houses in Hong Kong, there are some 900 and odd householders; and it may safely be presumed that at least two-thirds of the latter class will highly applaud the determined action of

Digitized by Google

Sir Richard MacDonnell in putting the load of extra taxation on the shoulders that are best able to bear it. Strong efforts have been made by the opponents of the measure to inflame the minds of the Chinese population by exaggerated statements respecting the operation of the Act, and this course has notably been pursued in the Chinese issue of the *Daily Press*, a sheet in which imaginativeness (to say the least of it) is allowed the fullest scope. These Chinese newspapers, both here and at the ports, are conducted with none of that reserve which a salutary dread of libel penalties imposes for the most part on editors writing in the English language; and they are constantly made the vehicle of misrepresentation of matters foreign and Chinese. Quite recently a weekly Chinese newspaper published by some missionaries at Canton was threatened with a prosecution by a Chinese mandarin who had been grossly (and it appeared unfoundedly) libelled in one of its numbers. It is, in fact, as a *chronique scandaleuse* respecting the native officials in general that these journals are prized by the Chinese who buy them; and the insertion of libels for a "consideration" is said to be one of the main sources of revenue of these newspapers. The journal published here takes the lead in piquancy in this respect, I have been informed, and its statements with regard to the probable effects of the Stamp Act are said to be thoroughly exaggerated.

Another horrible tale of piracy goes home by this steamer; indeed, it is perhaps the most fearful tragedy of the kind that has ever been narrated. You will receive in the overland papers full details (already published here) of the attack on the *Lubra*, and the murder of the captain and others; but I may add a fact which is as yet kept concealed from publication, with a view to faciliting the efforts of the police—viz., that a clue has been obtained to the perpetrators, who beyond a doubt sailed from Hong Kong waters with the design of overhauling this vessel. If anything could be wanted for the purpose of convincing the Colonial-office as to the necessity of speedily sanctioning Sir R. MacDonnell's Harbour and Junk Ordinance, it would doubtless be supplied by the intelligence of this lamentable affair.

Many of your readers will doubtless be interested by the intelligence that a publication to be called "Notes and Queries for China and Japan" is projected by Messrs. A. Shortrede and Co., the publishers of the *China Mail* and *Evening Mail* here, on the model of the original "Notes and Queries" which is so popular a serial at home. The first number is intended to appear about the beginning of 1867, and, if well conducted, the work will constitute a useful repository for much floating information.

Another item of literary intelligence I should have mentioned before, but will doubtless be new to nearly all your readers, is that a fortnightly journal in the German language, with the title of "Der Omnibus," has been lately set on foot by a party of German gentlemen in Hong Kong, and is conducted with much ability. Attention has recently been drawn to some of its strictures on the coolie trade at Macao, elicited by the fact that some North German shipping is engaged in this infamous traffic. No less than *thirty-nine* barracoons are known to be in active operation at present, and it is reported that no less than 80,000 coolies are "ordered" by the Havana speculators. The Emigration Convention entered into at Peking last March has turned out, as prophesied at the time, a complete failure. Whilst removing all the guarantees against kidnapping which were acknowledged to be necessary for the prevention of a revival of the slave trade under a garb of legality, the Convention has rendered legitimate emigration, as conducted for the British West Indian Colonies, impossible, by instituting the strange proviso that the coolies must be returned to China at the end of five years at the Government expense; this clause is believed to have been introduced at the instance of Mr. Hart, with the view of ultimately inducing the Chinese Government to despatch European subordinates of his own to Havana and Demerara, on the plea of supervising the due execution of contracts containing this agreement. The scheme would doubtless have extended the influence of the Foreign Customs with the Chinese Government, but it has defeated itself by rendering emigration from China too expensive to be resorted to by the West Indian colonies of Great Britain. The French authorities, however, announce with confidence that their Government will refuse ratification to the Convention, as it equally attacks the profits of the Havana speculators.

The firm of Messrs. Severs and Co., of Hong Kong, is winding up under liquidation. The firm was originally Severs, Dims, and Co., and their transactions were small and prudent.

The following is the petition of the Chinese to his Excellency the Governor :—

TRANSLATION.

The humble petition of the residents of the colony, the dealers of gold and silver, of rice, opium, piece goods, general merchandise, and others, sheweth:

That in consequence of the injurious state of the recent ordinances, they pray that his Excellency would favourably permit the same to be abolished and other steps adopted for raising revenue, so that your petitioners' emotions may be pacified and the trade be facilitated. We are in receipt of ordinances for levying stamp-tax on deeds, orders and receipts for payments, agreements for selling and buying, bills of exchange, promissory notes, &c., according to the amounts. We find that the trade of this colony is carried on by people from all quarters and of numerous classes, amongst them there are some thriving and some not. Of late the profits have been so small that many of them do not make even their expenses; it is because that they have been here for years that they cannot stop suddenly; they therefore exerted themselves at oftentimes to uphold their business; consequently, in drafts, bills of exchange, cash payments, &c., we have found it more difficult to meet with than former times, and if the stamp-tax was added on us our strength would be more reduced. Moreover, the tax on the payments and receipts of money, &c., are what we have to make daily; constant difficulties will be thrown in our way, and from these injuries will emerge, and the merchants will inevitably hesitate and retire from business. This would be disastrous to the trader. As regards the reporting of householders, the furnishing of particulars as names, &c., it is a mode of extirpating thieves and robbers, but the requiring of them (the householders) to give bonds and be fined in default would be a thing hard to do, forced on them, for all those in trade are honest men of lawful business, expecting to attend to their own callings and be unwilling to be sureties for others. The place can surely be quieted by strict watchfulness. We find also that in the new ordinances it is provided that servants in the employ of Englishmen (this word means any person other than a Chinese) must procure a certificate, &c., and according to different sections subjected to fines, &c. Those employes have all masters, if there is anything wrong they can just as well be proceeded with case by case as required.

If the said servants have to be thus fined, what earnings would there be left for them? They would be unable to comply with the different requirements, and the consequence would only be that a great many will be imprisoned. What benefit would that be to the revenue? Furthermore, the money changers have to obtain licences for their business. It is known that the money changers have not more than one hundred taels for their capital each, and what they make barely pays for their food, and therefore with such an insignificant income they cannot likely afford to contribute towards so great a purpose. With regard to the keeping of pigs and other animals, they are articles of food for both Chinese and foreign people. If they are to be taxed, (this is a mistake in the Chinese version, it should be, if embarrassment were thrown in the way), the prices for such food would be raised, and there would be some kind of inconveniences—the inspecting of houses by medical inspector, the summoning of the householders, and the fining and imprisonment of them for disobedience. The reporting of the cargoes, and passengers of vessels (junks) on arrival and departure—the former many are private residents of respectable traders, they will each attend, themselves, from time to time to the protection of their own lives and property, and would be afraid to have their houses in a filthy and unwholesome state. The frequenting of the medical inspector would be received with awe by the residents and the female members would be frightened. Touching the latter the frequenting of junks or Chinese boats are not rare both day and night, and if they have to be reported they require time to wait for a correct account. These junks have their fixed periods daily for leaving, and such restraint would greatly injure their business. All these would cause trouble and no benefit to the revenue. We are aware that the principle of your Excellency's rule over the people on behalf of your Government, is to protect the law-abiding subjects and extirpating the thieves. If the proposed taxes are all enforced, difficulties will arise and the people being unable to forbear the same will refrain from resorting to the colony. This we suppose was not the intent of your Honourable Government in establishing colonies.

If exigencies arise which require the raising of yearly revenue they should be contemplated and provided for, but we find that ground rent and assessment on rental of houses can be made use of. We beg therefore to crave your Excellency would kindly consider our difficulties and annul the recent ordinances which have been passed, for which we will be exceedingly grateful and unitedly ever pray. As to whether or not the deficit in the revenue should or not be raised from the ground and house rents, we leave it to your Excellency's decision.—SIGNED BY SEVERAL HUNDRED PRINCIPAL CHINESE MERCANTILE HOUSES.

The following items are from the *China Mail* :—

There were rumours at Macao of a demonstration on the part of the Chinese against a fort on the point opposite the city. The real particulars, so far as we can learn, however, seem to be of a far more pacific nature. It is very likely that the Chinese are highly dissatisfied with "the bold stroke of policy" the Portuguese have been guilty of in erecting a fort at the entrance of the bay for the purpose of levying a tax upon every Chinese junk that passes it. Thus far, however, no hostile or aggressive demonstration against this act has been adopted. The dozen war junks are merely rendezvousing in the Macao Roads, preparatory to a cruise against the pirates on the western coast. Some time last week a number of the crews of these junks had a run on shore, and in all likelihood

Digitized by Google

fell into the hands of some of the crimps attached to a baracoon; they were induced to gamble, lost all they had, received hand-money from their cicerones, and were then marched off—in order to be shipped off to Peru or Havana. The Chinese authorities applied to those of Macao for the restitutio n their kidnapped countrymen, seven of whom were returned, four of the men being still missing. This, we believe, is the true version of the affair.

The recent typhoons did less damage here than was expected. It was here simply a gale, which blew more or less all day on the 12th Sept. until past midnight, commencing from the south-west, and veering round to the north-east, whence the heaviest gusts came. It is supposed by seafaring men that this typhoon, if one it was, originated in the south-western part of the China Sea and travelling to the north, probably expended itself between Swatow and Formosa. The *Dwina*, Russian three masted schooner, had to put into this port on account of the heavy weather experienced to the northward of this island. The mail steamer *Behar* must have been just on the circumference of the cyclone. It is to be hoped she got off scathless.

On the 14th the *Dupleix* Messageries Imperiales steamer encountered a terrific typhoon, on her passage from Japan to Shanghai. Every moveable article on deck was washed overboard; life boats were blown away, &c. The passengers, amongst whom were the American Minister and the Governor of Macao, presented a written testimonial to Captain Noel expressive of their admiration at the courage and skill desplayed by himself and his officers. The French crew, however, we hear, behaved very indifferently, while the firemen absolutely turned tail and were almost useless from fright. The P. and O. ship *Niphon* also experienced the same typhoon, but proved herself a very superior sea boat.

We learn upon good authority that the Hong Kong, Canton, and Macao Steam Boat Company's vessel *Feiseen* has been sold for $50,000 to the Netherlands Company. Her probable destination is Japan.

A collision took place September 11, at Woosung, between the *Helen Nicholson* and the Ham. barque *Savallie*, the latter on her way to Shanghai, and before they could get free of each other an iron barque coming up got foul of them both. The *Helen Nicholson* had lost her jibboom, but we have not yet heard the whole extent of the damage.

The Hamburg steamer *China* on her way to Hong Kong came into violent collision with the French barque *Admiral Charnes*, bound to Shanghai, when outside of the lightship, both vessels sustaining serious damage. The former lost fore-yard, fore rigging and rails, while the barque had her bowsprit, jibboom, &c., cut away. The *China* returned to port, her captain having been seriously injured by a falling spar at the moment of collision.

A free college has recently been instituted at Canton for the benefit of Tartar youths, at the expense of the Acting Viceroy, who is himself a Tartar. The poverty of the resident military population prevents, as a rule, young men from obtaining thorough classical instruction, and the institution now set on foot is established with the view of affording such an opportunity gratis to some forty deserving youths.

The following are the average amounts of notes in circulation and specie in reserve, by the respective banks undermentioned, for the month ending August 31, 1866:—

ORIENTAL BANK.

Notes issued	$237,430
Specie in reserve	200,000

CHARTERED MERCANTILE BANK.

Notes issued	$320,419
Specie in reserve	200,000

CHARTERED BANK OF INDIA AND CHINA.

Notes issued	$21,800
Specie in reserve	21,800

HONG KONG AND SHANGHAI BANK.

Notes issued	$613,033
Specie in reserve	300,000

PROCLAMATION ON THE NEW DOLLAR.

By his Excellency Sir Richard Graves MacDonnel, Knight and Companion of the Most Honourable Order of the Bath, Governor and Commander-in-Chief of the Colony of Hong Kong and its Dependencies, and Vice Admiral of the same.

Whereas by the Order of Her Majesty in Council dated the 9th day of January, 1863, a proclamation was approved for the regulation of the currency in this colony wherein it was (amongst other things) declared and ordained, that "the dollar of Mexico, or other silver dollar of equivalent value as may from time to time be authorised by the Governor or officer administering the Government of Hong Kong, shall be the only legal tender of payment (except as hereinafter directed) within our said island of Hong Kong and its dependencies." Now, therefore, I, Sir Richard Graves MacDonnell, being the Governor of the colony, do hereby proclaim that the dollar and half dollar issued from the Royal Mint of Hong Kong shall be legal tenders for all payments within the island of Hong Kong and its dependencies.—By his Excellency's command,

W. H. RENNIE, Acting Colonial Secretary.

15th day of September, 1866.

Captain Pixley is a passenger for England by this mail. For some months past he has acted as superintendent of the Sailors' Home, a position which he most effectually filled, and which he has resigned, much to the regret of the directors of the Home, in order to return to England. Captain Pixley will leave behind him many friends who will always be glad to hear of his health, happiness, and prosperity.

SHOCKING CASE OF PIRACY AND MURDER.

The subjoined statement, by the mate of the American schooner *Lubra*, relates one of the most dreadful cases of piracy and murder that ever occurred near Hong Kong:—

Henry William Hall, chief officer of the American schooner *Lubra*, states:—"The schooner left this harbour at 11 o'clock A.M. on Saturday, the 22nd September, bound to Japan; there were on board the captain, his wife, two children, and a crew of myself, second officer, four Europeans, one Chinese steward, cook, and a Chinese female Ahmah, being armed with seven muskets, and having on board a general cargo; that when about 75 miles outside the Ly-e-Moon, and about 30 miles off Pedro Branco, a large piratical boat sailed and pulled alongside; the pirates threw stink pots and fired a number of rifle and pistol shots at the crew; about 30 armed Chinese then boarded; some of the crew of the vessel took to the rigging, four jumped overboard. The pirates then broke open the hatches, removing all valuable cargo, after which they went into the captain's cabin and shot him while lying on a couch. They returned to the deck and ordered the remainder of the crew from aloft, they not complying with their request the pirates fired at them killing one man and wounding three others. The pirates before leaving set fire to a train of powder on the between deck, and having destroyed everything the pirates left warning the crew not to return to Hong Kong. We got under weigh and arrived at this place at 5 o'clock this evening; one of the crew who jumped overboard has not been seen since. I cannot identify the boat nor any of the pirates, but some of the crew I believe can do so. It has since been ascertained that one of the schooner's crew can identify the pirate's boat, and is ready to accompany any expedition that may be sent in quest of the pirates."

Soon after the arrival of the *Lubra* the bodies of the captain and the seaman were taken to the Civil Hospital; and the *Osprey*, with one of the *Lubra's* crew on board was as quickly as possible despatched in search of the pirate. She returned unsuccessful. We have been made acquainted with some particulars which afford strong hope that the police have obtained a clue to the identity of some of the pirates by whom the schooner was boarded, and that ultimately it may lead to the discovery of the actual murderer of the captain. It is a somewhat suspicious fact that the brother of the pirate chief Chat Tai, the recently executed piratical chief, was the pilot employed to take the schooner through the Lye-e-moon passage. No inquest will be held upon the bodies of deceased as they were murdered outside the coroner's jurisdiction.

The following notice has appeared:—

The interest and responsibility of Mr. James M'Andrew in our firm ceased on the 30th June, 1865, and Mr. Francis Bulkeley Johnson was admitted a partner from the 1st July last.—Jardine, Matheson, and Co.—Hong Kong, Sept. 10, 1866.

The concession announced in the *China Mail* from the Government at Peking to certain Americans for laying a submarine cable from Shanghai to Hong Kong alludes to the scheme of Dr. Macgowan, but has no present significance. No formal concession has been granted.

The Mint it is said "has got no work to do," the silver sent in has all been used up, and the employes have since been pining for more. The *Daily Press* says: "The exertions called for in reference to the new dollar should be directed towards its more economical production. The two per cent. charge is preposterously heavy. The working expenses of the Mint if they require so heavy a charge must be cut down. The seignorage must be reduced to one per cent. if the Mint is ever to succeed."

SIAM.

It appears that the account given of the presentation of a sword to the King of Siam by M. Aubaret, on behalf of the French Emperor, was incorrect. The *Bankok Recorder* of the

Digitized by Google

23rd August says:—We have not until this late day learned that we made a mistake in saying in our issue for July 12th, that Monsieur Aubaret, French Consul, had the honour of presenting a sword to his Majesty the King as a present from the Emperor of the French, and that he probably at the same time presented Prince Somdetch Chowfa Chulalongkorn a dagger, being a gift from the Prince Imperial. It now appears that neither of these tokens of honour were sent by him. It seems that our mistake arose from its having been credibly reported that both the sword and dagger were mentioned in the Emperor's autograph letter to his Majesty the King of Siam as having been sent by the hand of M. Aubaret, and eye-witnesses of the public audience testified that they saw the sword presented. This is an apt illustration of the difficulty we have of getting correct information on affairs that occur in the Royal palace.

MALACCA STRAITS.

SINGAPORE.

Dates are down to the 5th October. The following summary is from the *Straits Times*:—

The P. and O. Company are astonishing the Eastern World by the rapidity of the late mail transits. The steamer *Ottawa*, with the London mail of the 27th August, arrived off this during the night of the 25th September, the letters being delivered the following morning, having occupied only twenty-nine days and some hours in the transit.

The clause for the incorporation of Labuan with the future colony of the Straits, which has been tacked on to the Transfer Bill in its passage through the House of Lords, will merely accomplish a measure which has been perfectly anticipated from the first. As at present administered, the Government of Labuan leaves a very considerable annual deficit; but it is not to be anticipated that, when incorporated as a province of this colony, the same expensive system will be maintained. The civil administration will be economically reduced to a point which can be covered by the revenue as it at present stands; and as for the military, now an item of some £3,000 to £4,000 a year, this can scarcely fall as a burden on the Straits, the gross military contribution of the entire colony having been definitely fixed at the yearly sum of £59,000. If the garrison of Labuan cannot be provided out of this amount, then its cost will clearly fall upon Imperial resources. There is another light in which the incorporation of Labuan deserves to be looked on rather favourably than otherwise by those interested in the Straits; and that is that, though hitherto it has continued to sink money, it may, under a more pushing and more narrowly-watched Government, be made to develop into a thriving port of Eastern trade. The island itself and the mainland contiguous are rich in almost every Eastern product, and if a proper stimulus be applied there is no reason why these should not be largely exported.

The improved nature of commercial advices from Europe has scarcely yet had time to affect trade here, which continues unusually dull. A revival may soon be anticipated however, and that the anticipation is pretty firmly held, is agreeably evidenced by the establishment of a new banking agency, namely that of the Bank of Rotterdam. Before the stoppage of the Commercial, there were five banking companies regularly established here; since that event the number has been confined to four, until now again it is increased to five—and there is little doubt that this number will be found ample for the requirements of the place for a long time to come. The new bank will absorb, it is expected, a large portion of business of the continental houses—by no means an insignificant slice of the commerce of the place.

The fortnight has been enlivened by a very superior amateur performance, which came off in the Theatre Royal on the 26th. Beyond a little agitation concerning the bad locality of the new cemetery, a total eclipse of the moon, beautifully visible on the evening of the 24th, and the training for the forthcoming races, there has been little else to occupy the minds of the people here since the departure of the last mail.

The circulation of the banks is thus given:—

Oriental	$200.000
Chartered of India	19,130
Asiatic	1,080

The China Steam Company's steamer *Mona*, Captain Haffenden, from Amoy with dates to the 14th Sept., having called at Manila and Labuan, arrived on the 29th Sept. She spoke the barque *Ayrshire*, from Labuan bound to this port, off Bantam Point.

The steamer *T. A. Gibb*, from Calcutta, carried 5,025 bales of cotton for China.

It is not likely that the Municipal Council has, at least as at present constituted, very much longer to exist, and an appreciation of what is dignified and graceful should prompt its members to mark its final days by an increased regard for the public wants and for public opinion. The Legislative Council which shall guide our destinies when the transfer to the Colonial-office shall have been completed must necessarily absorb a large portion of the duties which have hitherto devolved upon the Municipal Commission.

We have been informed that the Hon. Col. Macpherson, attended by the master attendant, has visited the Bon Accord Dock, now nearly ready for opening, when the colonel expressed his satisfaction at the progress of the works.

H.M.'s steamer *Pearl*, Captain Ross, from England *en route* to China, having called at the Cape of Good Hope, with dates to the 22nd July last, has arrived.

A preliminary prospectus of the telegraph scheme, which we have already noticed, is now published, and will be found in another page. It is to be hoped that the scheme will now be speedily carried out.

PENANG.

The following items are from the *Penang Gazette* of 6th Oct.:—"Penang, as well as the province, have during this wet season been visited on several occasions by very heavy falls of rain lasting for three or four days with very slight intermissions The heaviest fall, however, commenced on the afternoon of the 27th Sept., and continued with little cessation till the 2nd Oct. The north of the province was for nearly eight days an entire lake, and considerable damage must have been done to the newly planted paddy.

The Volunteers of Penang and Province Wellesley met on the 8th inst. at the practice ground to compete for the Hon. Colonel Macpherson's Cup, and the following is the score made, Lawrence Ignatio being the successful competitor. The shooting of the other members of the corps was less than mediocre:—

1 Lawrence Ignatio	33
2 P. C. Paddy	22
3 Joseph Anthony	20
4 John Allan	20
5 F. Shaw	20
6 J. Young	19
7 J. Wilson	19
8 D. C. Presgrave	18
9 R. Waller	16

On the 6th inst. the volunteer corps again met to shoot for his Honour the Governor's Cup, the successful shooter being again, as yesterday, Lawrence Ignatio.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

BUSH—On the 14th Sept., at the Mechanics' Hall, Hongque, Shanghai, the wife of J. Bush, Esq., of a daughter.

FITTOCK—On the 20th Oct., at Southsea, the wife of James Fittock, Esq., of a son.

GUIMARAENS—On the 1st Nov., at 10, Mecklenburgh-street, Mecklenburgh-square, the wife of M. F. Guimaraens, Esq., of a daughter.

HUFFAN—On the 26th Sept., at Hong Kong, the wife of F. S Huffan, Esq., of a son

LUXTON—On the 11th Oct., at 9, Silver-place, St. David's, Exeter, the wife of H. Luxton, Esq., of a son.

MURRAY—On the 24th Sept., at Elgin-terrace, Hong Kong, the wife of Dr. J. Ivor Murray, Colonial Surgeon, of a daughter.

MARRIAGES.

BALFOUR—KEIR.—On the 25th Oct., at Kindrogan, Perthshire, N.B., by the Rev. W. H. Langhorne, M.A., Francis Walter Balfour, Esq., of Fernie Castle, Fifeshire, late Major Rifle Brigade, to Jane Amelia, second daughter of Patrick Small Keir, Esq., of Kindrogan.

MACKENZIE—GIBSON.—On the 1st Nov., at the manse of Avoch, by the Rev. John Gibson, A.M., Minister of Avoch, and brother of the bride, assisted by the Rev. Roderick Nicolson, Minister of Applecross, Donald W. Mackenzie, Esq., late of Hong Kong, to Jemima Margaret, youngest daughter of the late Rev. James Gibson, D.D., Minister of the parish of Avoch. No cards.

DEATHS.

BELL—On the 11th Sept., at sea, on board the Leamington, while on the passag from Bombay to Singapore, Mary Wills, the beloved wife of Captain Christopher Bell.

BRADDELL—On the 30th Oct., at Crosthwaite-park, Kingstown, near Dublin, of Asiatic cholera, Horace, the dearly-beloved son of Thomas Braddell, Esq., Coomelagh, county Wexford, aged 21.

D'AQUINO—On the 19th Sept., at Hong Kong, Marianna Josefa, daughter of J. D'Aquino, Esq.

DOUGLAS—On the 5th Sept., at the Shanghai General Hospital, George J. Douglas, late of Rochester, U.S.A.

FREEMAN—On the 16th Aug., at Yokohama, Orrin E. Freeman, of Boston, Masschusetts, United States of America, aged 36 years.

LOWES—NICHOLS—On the 22nd Sept., on board the American schooner Lubra, Benjamin Lowes, master, and Lukler Nichols, seaman, killed by pirates.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents, and is divided into decimal parts of ten.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—Only at one port—Foochow—does there seem to have been any reflection on the tenor of advices from England of a nature to restrain speculative purchases. There the demand has slackened very considerably, and the teamen who before were holding out for extravagant rates, are now anxious to realise, but unable to do so, at one or two taels below their previous demands. At the northern ports business continues active, and rates have even been increased by the effect of large transactions and reduced stocks.

CANTON.—The market as regards country Congou for the fortnight has been extremely quiet, one chop of Oonfa has been settled at ½tls. 35¼ and several offers are pending, but at time of writing there is no actual business to report, and the present stock is 29 chops or 18,694 packages. Canton-made Teas: Prices close for the mail for Scented kinds at fully two taels advance, consequent on purchases having been freely made throughout the fortnight, the rise being chiefly on Scented Orange Pekoes. For Canton packed Congou there has been no inquiry whatever. More demand has existed for Gunpowders, and some 2,300 half-chests Pouchong have found buyers for the American market.

AMOY.—Congou: Settlements have been going on steadily and amount to about 5,000 packages; in the fortnight prices have ranged from $17¼ to $23½, most of the purchases being at about $19 per picul, which in some instances show a slight decline in value. Oolong: The same remarks apply. A steady market without any material change in price, though occasionally in favour of buyers, about 8,000 packages have been taken at $21½ to $37, the bulk being at $25.29 per picul. The Samuel Russell sailed for New York on the 19th. The Drydens and Amazone are expected. The Queen of May, also chartered for the same port, has put back to Hong Kong dismasted, and her voyage has been abandoned.

FOOCHOW.—Congou: Prices paid for the better flavory kinds, are fully up to last quotations, but Tea below tls. 20, 5 mace to 1 tael cheaper. Arrivals from the country are largely in excess of last season,—the present stock amounts to 120,000 chests. Holders are getting very anxious, and it is expected that prices will lower. Flowery Pekoe: Settlements have consisted principally of mixed leaf kinds at tls. 33 to 39, and a few even leaf at tls. 38·5 to 55; these last are of inferior appearance to last season's. Oolong: The stock, consisting chiefly of common grades, is neglected, the teamen not having sufficiently lowered their demands to the opinions of buyers. Scented Teas: A large business has been done in these, at former rates. The settlements of Congou reported amount to 7,802 chests 19,143 half-chests and 1,064 boxes at tls. 7.5 to 25. Say 2,454 chests and 5,043 half-chests at tls. 7.5 to 14 for Dust and Broken Leaf, 136 chests and 3,692 half-chests at tls. 14 to 18 for common to good common, and 5,312 chests, 10,408 half-chests, and 1,064 boxes at tls. 18.5 to 25 for Flavoury to good Flavoury. Souchong: Fair to second-class, 1,030 chests at tls. 22.7.5 to 35. Pekoe: Common, old, 115 chests at tls. 15. Fair mixed to fine even leaf, 710 chests at tls. 33 to 55. Oolong: Fair cargo to superior, 792 half-chests at tls. 25 to 31. Scented: Dust and leafy, 1,224 boxes at tls. 8.5.0 to 10.3.0. Medium to fine, 15,100 boxes at tls. 23 to 29.5.

Digitized by Google

SHANGHAI.—Black Teas: There has been a good demand for Congous throughout the fortnight, and prices may be quoted fully one tael higher. Arrivals have been limited, and stocks are now reduced to a small compass. Settlements for the fortnight have been as follows:—11,600 chests common to fair Oonam, at 20 to 26 tls. per picul; 7,300 fair to good Oopack (second crop), at 26 to 29½; 2,500 common to good Ningchow, at 24 to 30; 850 common to good Hohow, at 17 to 20½; 950 fair to good Siftings, at 9¾ to 10; total, 23,200 chests. Green Teas: A large business has been done, chiefly in Fychows and Teenkais, for the American market, at previous rates for all except finest chops, and for these an advance of two taels has been paid. Four chops of Pingsuey have been taken for England at former rates. Moyunes are delayed by adverse winds. Settlements have been as follows:—28,000 half-chests common Fychow to finest Teenkai, at 32 to 46 tls. proportion; 2,700 half-chests good to fine Pingsuey, at 38 to 40 tls. proportion; total, 30,700 half-chests. Reshipments, 1,200 half-chests. Stock, 20,000 packages.

HANKOW.—A fair business has been done at a decline of nearly two taels on the earlier settlements, but this was lost on later purchases, and the market was again firm. The stock was very small, and future supplies, it is estimated, will not exceed 20,000 chests. The Elizabeth Nicholson was alone on the berth at the reduced rate of £3 3s. per ton. Settlements for the fortnight were 19,600 chests.

KIUKIANG.—The arrival of both Black and Green Teas had been delayed by the weather, so that settlements and stock of both were nearly nominal. The total yield of Green Teas is likely to be larger than last year.

YOKOHAMA.—Since the last report there has been less competition for Teas, and the market has assumed a quieter tone. The purchases made have again been for the American market, and consist of Medium to Fine qualities at a decline of 1 dol. to 2 dols. per picul; for the finer parcels they are asking full prices, but there is more of inferior stuff on the market than usual. Although there has been a decline, the slightest competition would probably send the market up to its original point and perhaps further. Settlements amount to about 1,605 piculs. Medium, $28 to 30, 1,600 per picul; good Medium, $31 to 33, 1,600 per picul; Fine, $34 to 37, 700 per picul.

RAW SILK.—CANTON.—For this mail it would appear that rates had culminated, and the few transactions reported below that were easily made on the arrival of the mail steamer bringing telegrams as late as the 2nd from London, took place at the highest point (this season) of the market. The news, not being so encouraging as was expected, has cast a dulness on the market, and rates to-day are ruling rather easier. The fifth crop, which may be expected at market in about a week, is said to be very abundant, and is reported to consist more of the finer classes. Tsatlee, No. 1, at $620; Loong-kong, No. 1, at $615.

SHANGHAI.—As anticipated, prices have not been maintained, a slight fall having taken place in Crop Silks, as well as in the lower qualities, of which the Chinese are eager sellers, and judging from the gradually increasing stock on this market, which is mostly composed of the lower qualities, it would appear that the next mail may report a further reduction in the cost of everything but the very best chop Tsatlees. Tsatlees, Chops No. 1, tls. 640 to 670 per picul; 2, tls. 620 to 630 per picul; 3, 600 to 610 per picul.

YOKOHAMA.—Supplies since the beginning of the season have been constantly kept at the lowest possible ebb, thereby creating a state of things entirely in favour of the Japanese. Under this system of limited supplies on one side, and of unlimited orders on the other, the price for the best Mybash has rapidly advanced to $950. During the past fortnight some parcels of really fine Hank Silks have arrived, and were eagerly bought at a high premium; but with the exception of some Oshio and Koshio, of medium quality, the other descriptions of silk have not yet appeared. Arrivals since the last report may be estimated at 700 and settlements at 550 piculs, leaving an unsold stock of about 200 piculs; at this date last year the stock was of nearly 2,000 piculs. Total settlements since the beginning of the season amount to 1,800 bales against 3,700 last year same time. Regarding Silkworm's Eggs, the first arrivals of the Polivoltini sorts may now be noticed, and it is generally believed that the production of this article has been considerably less than last year. Good annual green sorts are still held at from 2 to 5 boos according to quality, and white sorts continue neglected. Total settlements to date amount to about 425,000 cards, leaving an unsold stock of nearly 190,000 cards, chiefly composed of those rejected for their inferiority. Quotations are Mybash and Sinchu—Best, $910 to $950 per picul; medium, $850 to $900; inferior, $790 to $810.

DRUGS, &c.—Cassia Lignea: A considerable business has again been transacted at advanced prices; 4,000 piculs having been taken, mostly for German ports; the present quotations are $19 to 10.50, with a stock of 4,000 piculs remaining on the market. Cassia Buds: $40, with 60 piculs stock and no sales. Galangal: $1.80, and 400 piculs continue to be offered thereat. China Root: $3.50 to 3.75. China Galls are offering at $12.50, but there are no buyers. Vermilion: $39 per box of 50 catties for best quality. Essential Oils, Star Anniseed and Rhubarb out of stock.

CAMPHOR.—HONG KONG.—No further arrivals during the fortnight. 200 piculs sold at $26 per picul unpacked and 100 piculs Japan Camphor at $26-40. Stock on hand between 3 and 400 piculs.

CHINA GRASS.—SHANGHAI.—Best No. 1 White, tls. 14 per picul; No. 2, tls. 11 to 13 per picul. Good quality continues very scarce, as the stock, comprising at from 10,000 to 12,000 bales, chiefly consists of medium Grass. Hankow quotations of 15th instant, for How Rock Chow Grass, tls. 12 to 12¼ per picul; the quality is complained of, the Grass being mixed with Green Hemp.

CHINA AND JAPAN IMPORTS.

SHANGHAI.

Grey Shirtings.—A lively business has been done throughout the fortnight, the market closes firm with a decided upward tendency. The total sales during the fortnight comprise 80,000 to 100,000 pieces.

White Shirtings.—The demand has been very limited, and sales do not exceed 2,000 to 3,000 pieces.

American Drills.—A very moderate amount of business at former quotations has been done. Stocks are large, having recently been increased to 7,780 pieces. The same remarks apply to sheetings, of which the stock is however small, not exceeding 1,000 pieces.

English Drills.—Have been in better demand, and about 7,000 pieces were taken at full rates. T-Cloths: The demand has been less active total sales not exceeding 4,000 pieces.

Handkerchiefs.—Total sales 2,000 dozen blue; 2,600 brown.

Spotted Shirtings.—Are in better demand; sales 5,000 pieces.

Brocades.—A lively demand for shipment to Hankow has absorbed about 7,000 pieces at advanced rates.

Chintz.—Superior makes are inquired for; sales 4,500 pieces.

Turkey Reds.—Sales 1,500 pieces.

Velvets are scarce and wanted, 1,120 pieces black reimported from Japan sold at tls. 0.2.5 per yard.

Velveteens.—Sales 1,000 pieces at old rates.

Woollens.—Spanish Stripes: A fair demand is prevailing, and 1,800 pieces were sold at full rates.

Medium Cloth.—Sales 240 pieces.

Camlets.—Scarlet and gentian are in demand for shipment to Hankow. Sales 1,500 pieces.

Long Ells.—The demand at Hankow is subsiding; 1,500 pieces wer quitted at declining rates.

Lastings.—Sales 280 pieces.

Crape, Lastings and Lustres.—Prices advancing, sales 540 pieces of the former and 1,000 pieces of the latter.

Orleans.—Figured, sales 1,000 pieces; Plain, sales 500 pieces

Metals.—Iron Nail Rods and Hoop Iron in fair demand at higher rates. Bar Iron is dull and unsaleable at quotations. All other Metals are neglected. Window glass is in better inquiry.

Coals.—Sales have been of limited extent. English Coals are quoted a shade higher. Sales of Anthracite have in the beginning of the fortnight been effected at tls. 11, ex ship; since then two large cargoes arrived of which one, comprising 1,000 tons, was quitted at tls. 10.3.5.

HONG KONG.

Scarcity of money among the natives on one hand and the unfavourable state of the weather which prevailed during past two weeks, have rendered this period one of great dulness and inactivity.

Cotton.—Directly after departure of last mail a brisk speculative inquiry for the Shanghai staple ensued, produced by its scarcity, and prices rapidly advanced to $25.50 to 26; other Chinese staples were also more or less affected by the movement, but did not advance quite so much. Since then our stocks have received considerable additions both of China and Bengal Cotton, and prices have gradually declined from $2 to $3, the market closing weak and unsteady.

Cotton Yarn.—A pretty lively business has been done in lower numbers at prices ranging from $205 to $212½ and about 300 bales changed hands at these figures—of 28 to 32 about 70 bales were taken by the trade at $235 to $240, whilst the high numbers have been entirely neglected.

Grey Shirtings.—A very limited amount of business has been done in 8¼ lbs. The trade being well supplied and the dearness of money militating against speculative operations, lower prices were accepted and a reduction of about 10 cents established; 7 lbs. continue scarce and in demand, and fair prices were obtained for about 4,000 pieces, say, $3.65 to $3.79; 1,000 pieces of 9.4 were acquitted at $5.10. For 10 lbs. there exists some demand.

T-Cloths.—A lively inquiry for 6 and 7 lbs. has prevailed and still exists, the scarcity of the articles however preventing transactions of any magnitude; 9,000 pieces were taken at quotations.

White Shirtings.—The market has been excessively dull, and the total sales reported do not exceed, 1,500 pieces.

American Drills are out of stock.

English Drills.—A small parcel of 150 pieces 40 yards was taken at $6.80.

Dutch Drills.—300 pieces of 40 yards changed hands at $7.20, and 200 pieces of 30 yards at $5.

Fancy Goods.—No transactions have taken place, and quotations are nominal.

Woollens and Camlets are in large supply, and prices have declined from 50 cents to $1.

Dutch Camlets are scarce and wanted, and $29 to $31 are realised for about 300 pieces.

Long Ells.—The only noteworthy feature is an eager demand for Scarlet, of which stocks are all but exhausted, assorted colours are however neglected, and sales of about 500 pieces have been taken at reduced prices.

Lastings.—No business done.

Blankets are in fair supply, but without inquiry.

Medium, Ladies', and Habit Cloths.—A moderate amount of business at quotations as reported, sales comprising 600 pieces.

Spanish Stripes have again advanced from 5 to 10 cents per yard; 420 pieces of assorted colours changed hands.

Metals.—Nail Rod Iron: A fair amount of business (say 8,000 bundles) was done at extreme rates. All other sorts of iron have been quiet and difficult of sale.

Lead.—Prices have still further given way, and a very small amount of business was transacted.

Malacca Tin.—680 slabs changed hands at $21.50 to $23.

Tin Plates.—The market continues well supplied, and about 1,000 boxes passed into trade at reduced rates.

Coals.—The simultaneous arrival of several ships from England and Australia with large cargoes had the effect of depressing the market, and prices receded to $10 to $10.50 for English and Welsh, and to $8 for Australian.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—From London, Aug. 27, Minnie; Sept. 10, Corea. From Cardiff, Sept. 1, Hugh Fortescue, Birch Grove. From Shields, Sept. 1, Wallaroo; from Sunderland, 1st, Allendale.

At SHANGHAI.—From London, Sept. 18, John Lidgett. From Liver-

Digitized by Google

pool, Sept. 19, Charlotte, Ajax steamer (via Hong Kong, &c.) From Newcastle, Sept. 19, Eastern Queen. From Sunderland, Sept. 19, Denemilon.

At Hong Kong and Canton.—Reported by Telegram. From London, ord Macaulay, Robin Hood. From Glasgow, Clifden.

At Manila.—From Cadiz, Sept. 14, A Floret.

At Singapore.—From London, Sept. 20, Caldbeck. From Cardiff, Sept. 21, Isabella. From Newcastle, Sept. 24, Niewland. From Hamburg, Sept. 23, Agathe.

At Penang.—From London, Sept. 19, Teesdale. From Glasgow, Sept. 28, Douglas Castle.

DEPARTURES.

From Yocohama.—For New York, Aug. 28, Eliza Hands; Sept. 5, Vanda.

From Shanghai.—For London, Sept. 19, Ann Adamson; 12, Dartmouth (via Hong Kong).

From Foochow.—None.

From Hong Kong and Canton.—None.

From Manila.—For London, Sept. 18, Punjaub.

From Singapore.—For London, Sept. 25, City of Edinburgh; for Liverpool, 22, Lochleven Castle; Oct. 3, Unrivalled.

From Penang.—For London, Sept. 26, Raby Castle; for Boston (via Padang), Rainbow.

FREIGHTS AND CHARTERS.

At Yokohama.—To London, Cotton and Tea £2 10s. to £3.; Silk, £4 to £4 10s.

At Hankow.—The Elizabeth Nicholson is loading for London at £3 3s.

At Shanghai.—There is but little inquiry for tonnage and rates for home remain at £1 10s. and for New York, £2.

At Foochow.—To London, £2 10s. to £2 with a downward tendency; to New York, £2 5s.

At Hong Kong and Canton.—There has been more inquiry for coasting purposes principally to the northern ports, without however any advance in rates; to the rice ports there is little doing, the rates are 30c. to 40c. per picul for Bangkok and 30c. to 35c. for Saigon; to London vessels are loading at 30s. The circular of George Holmes estimates the number of disengaged vessels in harbour at 52 representing 28,594 tons.

At Manila.—For the United Kingdom very little cargo is offering, the rates are £2 7s. 6d. for unclayed sugar, and £2 10s. for hemp.

At Singapore.—Rates to England remain at £2 per ton for dead weight and £2 5s. light cargo.

VESSELS LOADING.

At Yokohama.—For London, none; for United States, Lorten, Receipe.

At Hankow.—For London, Elizabeth Nicholson.

At Shanghai.—For London, Ajax (steamer), Agamemnon, Camilia, General Caulfield, Janet Mitchell, John Bull, Sir W. F. Williams, Oussin, Scinda, Juanpore, Red Deer; for United States, Lota, Wild Gazelle, Royal Diadem, Pegasus, Tycoon.

At Foochow.—For London, Northfleet, Seawfell, Dunmail, Louisa, Fontenaye, Beautiful Star, Ellenborough; for United States, Queen of the Seas.

At Hong Kong and Canton.—For London, Herald, Solent; for United States, Runnymede, Empress.

At Manila.—For London, Eena; for Liverpool Mercia; for Cork, Ellen Browse; for Falmouth, Oxonion; for United States, Arracan, Fearless.

At Nagasaki.—For London, W. Mitchell.

At Singapore.—For London, City of Delhi, and Caldbeck; for Liverpool, Dudley.

At Penang.—For London, Rockliffe: for Europe, Amphion; for New York, Teesdale.

VESSELS EXPECTED.

From Yokohama.—Thomas Dryden, Conference.

From Nagasaki.—George.

From Hankow.—Gossamer, Napoleon III., Highflyer, Fire Queen, Lauderdale, Mary Nicholson.

From Shanghai.—Burdwan, Pakwan, Coulnakyle, Cinderella, Fusiyama, Vigil, Star of China, Peterborough, Coral Nymph, Blencathra, Nelly, Illimani, Lansdowne, William Melhuish, Charlgrove, Challenger, John Paul, Knight of Snowdon, Marquis of Argyle, Trebolgan, Wild Deer, Queen of the East, Antipodes, Helen Nicholson.

From Foochow.—Feronia, Amber Witch, Zingra, Devana, Ornate, Philomela, Dewa, Gungadhur, Marion, Monarchy, Naomi, Veronica, Ellen Rodger.

From Canton.—Alma, Island Queen, Taymouth Castle, Victoria, Melbreck, Valdivia, The Cedars.

CASUALTIES.

HONG KONG.

The American brigantine Lubra, Hong Kong to Yokohama, has been boarded by pirates, the captain and five of the crew murdered, and the cargo plundered.

The Cyclone, Sydney to Shanghai, has been totally lost.

The Westminster has been lost on the Pratus.

VESSELS PASSED STRAITS OF SUNDA.

COMMERCIAL POSTSCRIPT.

In the event of Messrs. Dent and Co. liquidating, it is the general opinion in the City that all creditors will be paid in full.

Coffee.—At sales 400 casks, 70 barrels, and 300 bags Plantation Ceylon sold; triage 32s. to 61s., grey 72s. 6d. to 77s.

Terra Japonica.—Of Gambier Cubes, 80 baskets sold at 30s., and 200 bales common were withdrawn.

Sugar.—A sale of Manila, 4,000 bags clayed, at 27s. 6d.

Arrivals not included in the Tables.—Oct. 15, at Havana, from Manila, Adolfo; Nov. 6, at Bremen, from Bassein, Morning Star; Oct. 26, off Boston, from Singapore, Macassar; Nov. 9, off Plymouth, from Ceylon, Gala; at Liverpool, from Singapore, Grenada. Nov. 9, at Flushing, from Akyab, Hero; 11, in the Downs from Macao, Atma.

Departures.—Nov. 9, from London, for Shanghai, Maitland; for Colombo, Palestine; 7, from Cardiff, for Singapore, Guurtze Maria; for Shanghai, Anna Dorothea; 10, from London, for Hong Kong, Golden Fleece. From Liverpool, for Singapore, Patriot Queen.

Laid on.—At London, for Shanghai, City of Aberdeen. At Glasgow, for Batavia and Sourabaya, Priam.

Spoken.—George and Emily (George Avery?), Manila to London, Oct. 21, 24 N., 37, W.; Orient, Sourabaya to Bremen, 124 days out, Sept. 19, 16 S., 22 W.; Simoom, Manila to Queenstown, 80 days out, Sept. 16, 35 S., 25 E.; Ironsides, Manila to London, Sept. 18, 35 S., 20 E.; Erl King (screw steamer), London to Shanghai, Oct. 11, 5 N., 22 W.; Sophia, Singapore to Boston, July 23, 30 S., 19 E.; Lodore, Sunderland to Shanghai, Oct. 11, 5 N., 25 W.; Betty (Bremen barque), Queenstown to Batavia, 39 days out, Sept. 24, 2 S., 23 W.

POSTAL SERVICE TO CHINA VIA RUSSIA.

Referring to the notice in our last, we now append the days of despatch of the weekly postal service, communicated by H.M.'s Consul at St. Petersburg, in reply to an inquiry on the subject of telegraphic communication through Russia:—

The ordinary post between Kiachta and Peking, and *vice versa*, travels four times a month on the following dates:—From Kiachta on the 5th, 12th, 19th, and 26th; from Peking on the 4th, 11th, 20th, and 27th.

Royal Geographical Society.—The session of the Royal Geographical Society will commence next Monday (the 12th) with a paper by Sir Henry Rawlinson, M.P., on a remarkable journey which has recently been performed by Mr. W. H. Johnson, from Leh to Khoten in Chinese Tartary. In this journey Mr. Johnson crossed the great plateau which extends between the Himalaya and Kuen-lun ranges of mountains. The plateau lies from 16,000 to 20,000 feet above the level of the sea.

BANKS AND COMPANIES CONNECTED WITH THE FAR EAST.

Peninsular and Oriental Steam Navigation Company, 122, Leadenhall-street.

Messageries Imperiales, Head office in Paris, R. W. and H. Horne, agents, 4, Moorgate-street.

China Steamship and Labuan Coal Company, Ethelburga House, 70, Bishopsgate-street.

Netherlands India Steam Navigation Company, Gresham House.

DIFFICULTIES IN THE CHINA TRADE.

(To the Editor of *The London and China Telegraph.*)

Sir,—The observations on this subject which appeared in the *London and China Telegraph* of the 5th instant will I am sure be received with general satisfaction, while your unsparing condemnation of the abuse of credit which has prevailed of late years will find an echo in the hearts of many who, like myself, have a *bona fide* capital embarked in the trade, and consequently wish to see it re-established on a firm and substantial basis. This I fear can never be attained until it has been thoroughly weeded of those reckless speculators who, having a prospect of large gains, and *nothing to lose*, disregard alike the principles of sound trading and of commercial morality. The chief offenders are either young partners in old firms from which the original partners—and capitalists—have all retired, and who attempt to carry on a colossal business without capital on the waning *prestige* of the old houses; or else they are young beginners, who, having obtained credits to a small amount, regard them as inexhaustible mines of wealth, justifying enormous shipments of produce bought indiscriminately. The latter class usually select a newly-opened port for their *debut*, and by their insane competition speedily run prices up to a point at which remunerative operations become impossible either to themselves or others.

I do not wish to be regarded as an opponent of that praiseworthy spirit of enterprise by which so many men, comparatively young, have been enabled widely to extend our commerce in China, but I protest against a system that affords such facilities to persons of immature judgment and insufficient capital, as enable them to assume responsibilities to meet which their resources are totally inadequate. It appears to me that this—recklessness, I will call it, although another and a very ugly name suggests itself—is in most cases treated far too leniently by the press, and I am glad to see that you at all events do not fall into the prevailing error of "making things pleasant" at the expense of truthfulness and consistency.

—Yours, &c., OLD CHINA.

City, Nov. 7, 1866.

The Simplon and Mont Cenis Routes.—Mr. James Brunlees, writing to the *Times*, says that on passing the Simplon route on the 17th ult. he found all the reparations necessitated by the flood substantially completed. On the 22nd and 23rd ult. each breach of the Government road was so far made good by a temporary substituted road that he, with a party occupying two carriages, came right through from Susa to St. Jean de Maurienne. The only difference to travellers going to and from Italy is that instead of booking by the railway to St. Michel as formerly, they now book to St. Jean de Maurienne, and have to post an additional distance of about eight miles. It seems almost incredible that out of such havoc in the valley of the Arc a way should have been re-established so soon, but the Government wisely intrusted the reparations to Mr. Blake, Mr. Brassey's agent, who brought the whole of the summit railway forces to bear upon the work, while the engineer of the Grand Tunnel also lent a helping hand by partly suspending his operations and sending a large force of men. The reinstating of the Victor Emmanuel Railway between St. Jean de Maurienne and St. Michel has also been put into the hands of Mr. Blake, and he promises that by the end of November passengers will be conveyed to St. Michel as formerly. As the French Government are restoring the road at their own cost the loss to the Mont Cenis (Summit) Railway Company will not exceed £5,000. On the 15th ult., after nine years' labour, the Grand Tunnel of the Alps was just one-half completed.

Shipwreck near the Coast of China.—Referring to the remarks in our last, Mr. J. Newberry, who was in Formosa at the time, has written to *The Times* confirming the details. He says:—"A number of coolies were sent to supply the steamer, which went to the wreck, with water, and nine days' provisions for each of the shipwrecked. Two live bullocks, pork, poultry, eggs, and all kinds of vegetables in profusion, came for the use of the cabin, and finally about 160 or 170 packhorses arrived with firewood, the officials thinking she might run short of coal. I invited eight or ten of the officials to come on board, and, again thanking them for their kindness, requested to be allowed to pay for the provisions supplied to the steamer, but nothing could induce them to accept the smallest remuneration, and it was evident that all the coolies to whom I offered a trifling present had been instructed not to receive anything, and they refused to do so. They appeared not to require money, and, I presume, they get their supplies of clothing, &c. (they were all well-dressed in Japanese costume), by bartering with the Lin-chin islanders. I believe the Miaco-Sima Islands are tributaries of the Lin-chin Islands, owned by Prince Satsuma, one of the most enlightened princes of Japan."

The China Clippers.—The *Glasgow Morning Journal* says that "Clyde owners seem determined to sustain the character they have long ago earned for their ships all over the world. We lately had occasion to direct the attention of our readers to the great ocean race, in which the *Taeping* carried off the prize after one of the most remarkable voyages ever recorded. The famour clipper *Min* reached London a few days ago, and in her arrival we may notice a very extraordinary circumstance connected with this ship and her sister ship *Taeping*. Both ships were of Jordan's patent composite build, were built by Messrs. Robert Steel and Sons, Greenock (now known as the China firm), are owned by Alexander Rodgers, Esq., and their sails are made of Rutherford Brothers' canvas—names well known in the shipping world. The *Taeping*, we notice, has cleared again for China. No doubt every care has been taken by the owner, and every effort will be strained by the captain to retain the "blue ribbon of the sea," and the public will look forward with great anxiety for future news of what is now one of the most exciting events in mercantile navigation.

Diplomatic Appointments.—The following notifications have appeared in the *Gazette*:—Oct. 13: The Queen has appointed Frederic Bernal, Esq., now Her Majesty's Consul at Baltimore, to be Her Majesty's Consul at Havre-de-Grace; and Harry Thomas Alfred Rainals, Esq., now Her Majesty's Consul in the Philippine Islands, to be Her Majesty's Consul at Baltimore. Oct. 19: The Queen has appointed George Thomas Ricketts, Esq., now Her Majesty's Consul at Sarawak, to be Her Majesty's Consul in the Philippine Islands. Oct. 29: The Queen has approved Mr. Alfred Hasche as Consul at Penang for his Majesty the Emperor of Austria. Oct. 30: The Queen has approved M. W. C. van Oordt as Consul at Hong Kong for his Majesty the King of the Netherlands. War-office, Nov. 6.—The Queen has given orders for the appointment of Lieutenant-Colonel Frederick John Goldsmid, of the Madras Staff Corps, Superintendent of the Indo-European Telegraph, and Edward Backhouse Eastwick, Esq., some time Secretary of Legation at the Court of Persia, to be Ordinary Members of the Civil Division of the Third Class, or Companions of the Most Honourable Order of the Bath; Foreign-office, Nov. 3.—The Queen has approved of Mr. Thomas Fitnam as Consul at St. Helena for the United States of America.

Naval and Military.

The following are the troops ordered to China and Japan to proceed by the steamer Golden Fleece. They will embark at Portsmouth with the exception of the 73rd Foot, which will go on board at Queenstown:—

For Hong Kong.—73rd Foot, consisting of 3 field officers, 25 officers, 54 sergeants, 21 drummers, 322 rank and file; 3 officers' wives, 4 children, 1 servant, 71 soldiers' wives and 49 children. Detachment of Royal Artillery, including 1 drummer, 13 rank and file, 1 soldier's wife and 2 children.

For Japan.—Detachment of Royal Artillery, consisting of three sergeants, 1 drummer, 46 rank and file, and 7 women and children. Detachment of 9th Foot, consisting of 2 battalions under the command of Captain Gipps; 1 drummer, 4 sergeants, 44 rank and file, and 15 soldiers' wives and children. The drafts for Japan will be conveyed from Hong Kong in another vessel.

The *Golden Fleece* after landing her outward troops at Hong Kong, will convey the 2nd battalion of the 20th Foot to the Cape of Good Hope, and the 2nd battalion 5th Foot to England.

The *United Service Gazette* is informed that there are several candidates for the vacancy which will shortly take place in the command in China by the retirement of the present Commander-in-Chief, Rear-Admiral G. St. V. King. The *Gazette* thinks that Sir Henry Keppel, K.C.B., will be the future Commander-in-Chief in the West Indies.

Her Majesty's four-gun vessel Sylvia, commissioned by Commander Edward William Brooker for surveying purposes in Japan and the Korea, will be in readiness for sea in a few days.

The screw steam gun vessel Star, 4, Commander Bradshaw, at Plymouth, has been inspected by Captain Ewart, preparatory to her departure for the East Indies.

Admiral Sir William F. Martin, K.C.B., has assumed the duties o commander-in-chief at Devonport, vice Admiral Sir Charles H. Fremantle, K.C.B., whose period of command has expired.

The Rinaldo, 17, screw-sloop, is to be immediately commissioned for service on the China station.

The Daphne, sister ship to the Amazon, recently sunk in the English Channel, has been successfully launched from Her Majesty's dockyard at Pembroke Dock. The dimensions of the Daphne are as follows:—Length over all, 189ft.; breadth extreme, 36ft.; depth in hold, 19ft. 4 in.; burden in tons, 1,081 6-94; number of guns, 4; horse-power, 300.

Major-General the Hon. James Lindsay, formerly of the Grenadier Guards and M.P. for Wigan, and now commanding in Canada, will return home early in the ensuing year, and will then succeed Major-General Lord Frederick Paulet, C.B., as general officer attached to the Guards.

The remains of the late Major-Gen. Sir Charles Warren, K.C.B., Colonel of the 96th Regiment, were interred on Friday, Nov. 2, in the Cathedral-churchyard of Bangor, North Wales, special permission having been obtained from the Secretary of State for the intramural burial. Sir Charles's services extended over a period of fifty-two years, during the whole of which time he was actively employed. He served in China from 1841 to 1844 (medal, brevet of Lieut.-Col., and C.B.); commanded the 55th in the expedition up the Yang-tse-kiang, and was severely wounded at the storming and capture of Chinkiang-foo, where he was personally engaged with three Tartars, whom he killed with his sword. He afterwards served throughout the Crimean campaign and the Indian mutiny, where he greatly distinguished himself. He was knighted by Her Majesty at Windsor on the 17th of May, 1861, and at the same time was appointed to the colonelcy of the 96th Regiment.

Not very long ago a flagship was required for Channel service, and the Minotaur, the representative of our largest and untried class of iron-clads, was named for the duty, it being naturally considered that in the trials then contemplated, and which have since been made of our iron-clads, under steam and canvas, it was essential to a full knowledge of their capabilities that all classes should be represented. The Admiral, however, who wanted a flagship objected to the Minotaur. It was said she was too big,

Digitized by Google

too fast, and altogether too much of an experiment to be trusted with the flag of an Admiral commanding a squadron. The internal fittings aft were also understood to be not entirely approved. Whatever the cause, the Minotaur was rejected for flagship duty, and another vessel selected whose class merits could be ascertained from other like vessels afloat and in commission. The course followed with the Minotaur is about to be copied, if we are rightly informed, on the change of the command of Her Majesty's ships on the North American and West India station, and in the present instance an endeavour will be made to carry it out in a still more objectionable manner. The present situation may be best understood by a brief *resume* of facts bearing upon the preparation and selection of a ship to carry the flag of the successor to Vice-Admiral Sir James Hope in North American and West Indian waters. The armour-plated wood-built steam-frigate Royal Alfred, 4,068 tons, 800-horse power, has been specially fitted for a flagship's duties, and it is no secret that the Controller of the Navy is most anxious that she should be placed in commission on the first opportunity, and that such opportunity was expected to offer itself on the relief of Sir James Hope. The Royal Alfred carries the thickest armour plating (6in.) of all the wood-built armoured vessels in Her Majesty's Navy, and will carry a heavier armament (12 ton 9in. rifled guns) than any other vessel of her class afloat. Her accommodations for an Admiral and his suite, as also for her officers and crew, are all that can be desired. The ventilation of the ship is perfect; her speed will be a good 12 knots under full steam, she will possess good average sailing qualities, and her metal-coated bottom renders her peculiarly suited as an ironclad for cruising in tropical waters. On the 1st of the present month the Royal Alfred was so far advanced in her outfit that she was then ready for commission, and would be ready for sea with her new and formidable armament complete by the time Sir James Hope's successor was ready to proceed to his command. But now comes the change, and the following of the precedent established with the Minotaur. Captain Turnour and Commander Twiss return to the half-pay list from the Royal Alfred on the 15th inst., the frigate will be placed on the inactive list of the "reserves" at Portsmouth, and the wooded un-armoured two-decker Duncan, the present flagship of Sir James Hope in the West Indies, is to return with Sir James to England, undergo a thorough repairand refit, and again proceed to the North America and West India station as the flagship of Sir James Hope's successor, Vice-Admiral Sir George Rodney Mundy, K.C.B. In these days of ironclads the Duncan is not a fighting ship, and therefore is not a fitting vessel for the flag-ship of a British Admiral in foreign waters. She can only carry guns that are harmless in their fire upon the sides of an ironclad, while at the same time her own hull offers a huge target ready for burning by the first broadside of an enemy's shells. If the Duncan is refitted for the new Admiral's flag for the West India command, a return of the cost of her refit moved for in the House of Commons may be conducive to Admiralty economy and wisdom in the future.

The Admiralty official *Navy List* for the current quarter contains in its "List of the Steamships and Vessels of the Royal Navy" one vessel thus placed:—"96. Captain, 6, iron-screw turret-ship, armour-plated, 4,272 tons, 900-horse power; building by Messrs. Laird, Birkenhead." This, of course, is the vessel about which so much has been said as having been designed by the Messrs. Laird, under Captain Coles's superintendence and directions, and which is supposed to represent Captain Coles's views on the subject of turret-ships. As Parliament at present stands prorogued it is impossible to ask Sir John Pakington in his place in the House of Commons whether this vessel has any existence beyond the appearance of her name and description on the official navy list. It is reported that she has no existence beyond the list, and although described there as "building by Messrs. Laird," that no steps have yet been taken for laying her down, nor is the contract for her construction yet signed.

The contract for the extension of Portsmouth Dockyard has been signed between the Admiralty and Mr. George Smith, of Pimlico, and during the past week the latter has been engaged at Portsmouth with Mr. W. Scamp, the designer of the extension works, and the Deputy-Director of Works to the Admiralty, in making the necessary arrangements for the immediate commencement of the undertaking. Five years is the specified contract time for the completion of the works.

It has been announced in the garrison at Woolwich that arrangements are ordered to be made forthwith for the reception of Prince Arthur, who will commence his probationary studies as Gentleman Cadet at the Royal Military Academy at Woolwich, probably in January next, for admission to the Regiment of Royal Artillery or the Corps of Royal Engineers.

The subjoined despatch has been received at the Admiralty:—

H.M.S. Nimble, New Providence, Oct. 9.

Sir,—I regret to have to report that in a terrific hurricane on the 1st and 2nd of October H.M.S. Nimble was blown on shore in the harbour of Nassau, abreast the Naval-yard, on a sandy bottom, in 6½ feet (high water) neap tides. The ship has not received the slightest damage, and is not making any water. I have cleared everything out of her except the pivot-gun and engines, including seventy tons of coal. Everything has been placed under cover in the naval yard.

In addition to this, we are sorry to learn that of the shipping in port during the recent hurricane 93 vessels and boats were destroyed, 97 seriously damaged, and 41 slightly injured—total, 231. In Nassau there were 617 dwelling houses destroyed and 609 damaged, 5 places of worship destroyed and 3 damaged, 17 warehouses, 1 theatre, and 1,034 persons rendered housel ss.

THE ADMIRAL OF THE CHINA STATION.—It has been stated, says the *Army and Navy Gazette*, that the health of Rear-Admiral George St. Vincent King has suffered from the effects of a foreign climate, and that he has signified his wish to be re-called from China. If the admiral has done anything of the kind he has conveyed his desire privately to some member of the board, as nothing is as yet officially known of his reported resignation. There is an anomaly in this China command which requires to be looked into. The flag officers who have of late years been sent to that distant and important station have always been rear-admirals, but on entering the limits of their command they have had conferred on them the temporary rank of vice-admiral, with all its concomitant advantages. Such being the case, it has been represented to the Admiralty that an officer in the enjoyment of substantial rank as vice-admiral might be sent out to relieve Rear-Admiral King when the time arrives for his return to England. We have a precedent for the case:—Sir Alexander Milne was a rear-admiral when he went out to the West Indies. Sir James Hope also had his flag at the mizen when he relieved Sir Alexander. Sir James has not been recalled on account of his promotion, and is now actually about to be relieved by Vice-Admiral Sir George Rodney Mundy. In the event of a vice-admiral being sent out to China, we have reason to believe that Vice-Admiral the Hon. Sir Henry Keppel, who stands just one below Sir G. R. Mundy on the list, will offer his services to Sir John Pakington. Sir Henry knows the Chinese and the Chinese waters well; and piracy would have but very little chance of cropping up its head while he is on the spot to keep it under.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, Nov. 7.

The important election day, for constituting a new Parliament in the place of that which was dissolved, has passed without any disturbance taking place. The Royal proclamation, printed in red, white, and blue (the national) colours, was addressed to every elector, and the papers in general did all they could to persuade them to do their duty by voting. Of the 98,270 electors, 71,760 voted in favour of the Liberals. Against 18 Conservatives and 6 Independents 80 Liberals were duly elected. But still the vote is not decisive, for in fourteen districts re-elections must take place, because the twenty-one candidates did not obtain the absolute majority. On both sides the losses are very important, because some of the leaders are rejected by the electors, while others must submit themselves to a re-election. Of course nothing can be said with any certainty as to the result, but I think it very improbable that the Ministerialists will have the mafority in the new Parliament that will meet on the 19th, on the same day that Mr. Myer, the newly appointed Governor-General, will start for Batavia by the mail route. His task will be very difficult, for that he is cordially hated by the Europeans in Java is shown by the disparaging notices already published in the Java papers, notwithstanding that the fact of his appointment was not yet known in the Far East when the papers which we received by yesterday's mail were published.

Of course there is a standstill in politics, now that Parliament is dissolved, and nothing is spoken of but the elections which have taken place and those which will take place, and the briberies and tricks that were applied to gain the majority. Indeed, the very inferiority of the election system now in force has been elucidated clearly on this occasion, and I should not wonder at a reform agitation originating from it. I need not say that if the Liberals have the majority in the new Parliament, and the ministers decide not to resign, but to dissolve again, a new electoral law must be created. But . . we are not yet so far.

Her Majesty returned some days ago from her voyage to Switzerland, and after remaining some days in the Hague, she started for "Het Loo," to meet H.M. the King. The Royal Family also proceeded to this seat, including the Prince of Orange, after he had given an audience of leave to Mr. Meyer, the Governor-General.

On the 30th ult. the Japanese gentlemen who have remained here during the last two years gave a farewell dinner to their many friends. They arranged a grand festival in the Hotel de l'Europe at the Hague, and a great many guests attended, among whom appeared Mr. de Mouchy President of the Dutch Trading Company, and the Captain-lieut. of the navy, de Fremery, who will take the command of the *Kay-Oo-Mar*, the man-of-war that was built here for the Japanese Government, which will start in a few days.

The news received by the last Java mail, that the steam line between Java and Australia would not take effect yet, caused much disappointment, because it is generally thought that this communication will give great profits to both countries. When the financial position of Australia is in a better condition it will be able to grant the subsidy for this line, and the opinion is, that the communication between these colonies will be granted to the Netherlands-India Steam Navigation Company, who asked from that Government a subsidy for five years of only £45,000 per annum.

Among the several candidates for the new Parliament appeared Mr. Sloet van der Beele, the ex Governor-General, who is now on his return.

Messrs. Besier and Jonkheijm from this town have issued to-day a prospectus of a Pasaroean-tramway company, with a capital of 1,500,000 guilders, in shares of 5,000f. The success of this undertaking is certain, now that the Government has granted a very favourable contract to this gentleman.

Prince Frederick will celebrate on the 27th inst. his fiftieth jubilee as grand master of Freemasonry. The brotherhood has the intention to erect a foundation, on a very large scale, in which every orphan of freemasons who die in poverty will receive a first-class education. The funds are subscribed and will be published on the day of the festival.

Mr. Jhr. H. Boreel van Hogelanden has taken his dismissal as a member of the First Chamber of the States-General. On the 9th of Nov. an election will take place to fill up the vacancy.

Her Majesty has appointed Mr. N. G. Peter at Hong Kong, as Consul for the Netherlands in China; Her Majesty has approved of the appointment of Mr. A. Bauer to be Consul for Denmark at Batavia. The knighthood of the Metherl Lion was conferred upon the Poet Laureate, J. J. L. ten Kate at Amsterdam.

COMMERCIAL.

COFFEE.—The market closes very firm. There was rather a lively demand for all left from the last auction of the Trading Company, butf holders declined to operate without an advance. Nothing was offered o private lots, and the transactions only include 290 bags and 100 bags Ceylon. The total stock amounts to 421,400 bags.

SUGAR.—The market is very calm. The transactions are of little importance and only comprise 1,900 mats Java ex Afghan at prices kept secret; 800 mats ex ditto, at 1¼f. under September value, besides 2,000 mats ex several ships. The Trading Company announces its auction on the 22nd inst., at which are are to be offered 34,300 mats. The stock of raw sugar amounts to 48,071 mats of the Trading Company and 26,585 kr. of private.

Digitized by Google

RICE (UNCLEANED).—The market is more active, and there were sold 2,265 bags Java ex A. R. Falck at 9¼f.; 9,500 bags Necransie ex James C. Bell at 7¼f. and 1,200 bags Rangoon ex Jan van Galen at 7⅜f. The stock is much increased by the considerable importations of the last few days.

SPICES.—The market remains still inactive, and there are only a few orders for consumption. The stock is 271 casks nutmegs, 90 casks mace, 214 fard. cinnamon, and 983 bags pepper; while the stock on warrants amounts to 5,188 casks nutmegs, 960 casks mace, 1,155 fard. cinnamon. The 3,234 bags pepper imported from Singapore ex Altona were sold in auction at 18¼ to 18½ cents.

TOBACCO (JAVA LEAVES).—There is still a good demand for superior qualities, but there is want of stock; in the meantime the position of inferior qualities is much improved, so that it is very probable that the stock, consisting of 21,633 bags, will for the greatest part be brought into the market during this month. In Amsterdam already 6,437 bags were announced for sale on the 29th. Manila: It is some time since here was any speculative inquiry for this sort, and there was during the last month scarcely any demand for consumption. The tone of the market has however much improved lately, and very important transactions were effected, so that all was sold that was disposable in the first and second hand for account of foreign markets. There is still a lively demand, and there are many orders at higher limitations. The only holder, whose stock amounts to 1,394 bags, declines however to accept the offers. This great firmness is shown by the fact that the floating parcels Manila, amounting to 8,750 bags were bought for account of a *regie*, and it is supposed that the last transactions were for the same account.

TEA.—The market is in a firm condition. The 5932/4 6/8 and 529/12 chests Java, which were offered on the 31st Oct. by the Trading Company were sold at the following price:—

Boei	53 to 73c.	Pecco	127 to 207c.
Congo Boey ..	66 to —	Orange Pecco ..	111 to 137
Congo	50 to 93	Thunkay	65 to 13
Souchon	70 to 122	Schin	56 to 72
Souchon Pecco ..	75 to 85	Hysant	76 to 139
Pecco Congo ..	60 to 88	Uxim	86 to 99
Pecco Kempoey ..	142 to —	Joosjes	98 to 160
Pecco Souchon ..	76 126		

On the same day 681 ¼-chests and 36 ½-chests Java were sold privately at the following prices:—Boei 61c., Congo 70 to 72c., Souchon 80 to 100c., Pecco 146c., Thunkay 79 to 87c., Schin 70c., Hysant 131 to 136c., Uxim 140c. For private account, a cargo from China will arrive shortly. The Monarchy, which sailed on the 12th of August from Foo-chow-Foo, is charged with 6819 ¼-chests and 3274 ½-chests Congo 1117 ¼-chests and 283 ½-chests Souchong, and 443 ¼-chests Pecco. Since the above mentioned auctions there was a good speculative demand in consequence of the low prices paid.

JAPAN CAMPHOR.—Of the 971 t. offered by the Trading Company only 200 t. were sold at prices which did not transpire; the rest was bought in. Since our last report the market has been very animated, and in consequence of the important transactions holders decline to sell Japan under 80c., and China 78c.

PEARL SAGO.—The 1,675 chests imported per Altona from Singapore were sold at public auction at 10¼f. to 10¾f. The valuation was 11f. to 11¼f.

JAVA INDIGO.—Continues with a good demand; about 80 chests were sold at very firm prices. The 250 chests which arrived last week for private account are to be brought into the market in a few days. These parcels arrived per St. Jan.

TERRA JAPONICA.—The 1,171 b. offered some days ago at public auction were partly sold at 13½f.

COTTON.—The 1,547 b. E.I. offered by the Trading Company were sold as follows:—

799 bales	Broach, barely fair	57f. to 58¾f.	
15 „	Dhollerah, midddling fair	54	—
99 „	do. barely fair	57¾	„ 58
155 „	do. fair	61¼	„ 62
479 „	Tinnevelly, good fair	63	„ 63½

BANCA TIN.—Has been in good demand since our last report, and after a slight reduction in price the market closes firm at last month's quotation. The deliveries have been very large. The transactions include 1,500 slabs at 46¼f., and nothing can be bought now under 46¾f. The fact that Banca was freely offered in the early part of the month, according to *Nieuwe Rotterdamsche Courant*, is verified by the following:—"Some commission houses seem to have taken fright at their holdings, and pressed sales both in France and England at prices which must have left them a loss on the sale price. Some sales were, without any doubt, made in the hope of covering them at a lower price before delivery was demanded." The position of the article is now gradually but steadily improving. The quantity of tin now in Holland is—on warrants, 79,450 slabs; and unsold stock, 51,189 slabs, against respectively 121,259 slabs and 73,014 slabs in 1865. Billiton Tin firm; 1,000 slabs were sold at 45¼f.

HIDES.—Since our last report the following parcels were sold: 315 ps. Samarang ex Ouderkerk a.d. Amstel at 40c.; 934 Sourabaya ex Sandringham; 682 Samarang ex Ouderkerk a d. Amstel: 214 Sourabaya Rinder ex Dageraad.

ARRACK.—Confidence in this article has again highly improved, and business to a fair extent was done privately. The following lots were sold: 100 casks Batavia ex Charlotte of Derby; 50 casks Sourabaya ex Acadia; 81 casks ex Star Queen; 12 casks Batavia ex Tagal; and 18 casks ex Lady Alice. The prices paid did not transpire.

MISCELLANEOUS.—Galinuts: 38 chests Japan offered by the Trading Company were sold at very firm but secret prices. Long Pepper: With some transactions; the quotation now is 17c. Cassia Lignea: 65c. Cassia Vera: 599 b. ex Alblasserdam, from Padang were sold at firm prices. Good ordinary quality is quoted in the second hand at 33c. to 35c. Japan Wax: There is but a very unimportant stock, while there is a lively demand. Preserved Ginger: 200 chests were sold at very firm prices, but which did not transpire. Gutta Percha: Fine quality with a good demand. Gum Damar: Continues firm, and no fine qualities can be bought under 33c. Rattans: The following parcels were sold:—100 piculs, ex Stad Middelburg; 100 piculs, ex Nyverheid; 50 piculs ex Jan van Galen; 4,200 bundles, ex Freeland; 200 piculs, ex Kinderdyk; 50 piculs, ex Marinus, and 250 piculs ex Diana. Sapan Wood (Bima): Dull. A lot (damaged) valued at 7¼f. to 7½f. Cocoanut-Oil: Cochin, 38f.; Ceylon, 33½f., with a very limited demand. Tortoise Shells: The Trading Company offered 76 chests in public auction of which 58 chests were sold from 5f. to 14f., 18 chests were bought in at 9f. per half kilogramme.

P.S. The Trading Company has announced its monthly auction, which is to be held at Amsterdam on the 21st, and at which 158,300b. are to be offered.

MONEY.—Since our last report the Stock Exchange was generally very dull, and transactions of every sort were remarkably restricted. There is still an evident indisposition on the Bourse to enter into speculative engagements, and there is a total absence of *bona fide* investors from the market, notwithstanding the favourable condition of the money market. Money in the discount market is still plentiful, and the rates easy. Dutch: 2½ per cents., 55; 3 per cents., 65¼; 4 per cents., 88. Trading Co., 136¼; Central Railway, 42; Society of Expl. State Railway, 63; Russian 5 per cents., 96; Austrian 5 per cents., 43⅜.

CHANGE.—London 3 m., f.11.65; 2 m., f.11.68½. Short, f.11.78½. Paris, 3 m., f.46.30; 2 m., f.46.42.½. Short, f.46.75. Antwerp, 3 m., f.46.25; 2 m., f.46.55. Hamburg, 3 m., f.34.70; 2 m., f.34.88½. Short, f.35.20

SHIPPING.—ARRIVALS.—Oct. 24, at Brouwershaven, from Batavia, Charlotte of Derby; at Texel, from Batavia, Willem Daniel; Oct. 25, at Brouwershaven, from Batavia, Koffyboom and St. Jan; Oct. 26, at Brouwershaven, from Batavia, Argo; from Bassein, Zeemanshoop; at Texel, from Batavia, Senior; at Hellevoet, from Batavia, Van der Palm; Oct. 28, at Brouwershaven, from Batavia, Jeannette Cornelia, India, Huy de Coper; Oct. 29, at Texel, from Bassein, Almonde; Nov. 1, at Zierikzee, from Sourabaya, County of Renfrew; Nov. 2, at Texel, from Batavia, Bernard and Agnes; Nov. 6, at Brouwershaven, from Bassein, British Banner.

DEPARTURES.—Oct. 26, from Brouwershaven, for Melbourne, Johanna Maria.

PASSENGERS INWARD.

From JAVA.—Per St. Jan: Messrs. L. de Bruyn, S. J. Boers and two children, J. Micola and family, J. D. Naumann and family, B. Brands and family. Per Koffyboom: Mrs. Dixon, Miss Dixon, Mrs. Pfeiffer and family, Mr. Dixon and Mr. F. W. Rappard. Per Senior: Mrs. van Heukelon and family, Mr. Sweets and family, Miss Morseler, Messrs. Essig, Meeters van Belle and van Staalem. Per Argo: Messrs. Belge and family, Mr. Potter and family, Messrs. Wiegerman, Doornick and Fleury. Per Aldebaran: Messrs. Knebel and family, Schwertsel and Koppenschaar. Per Bernard and Agnes: Mr. Young and family, Mr. Brouwer and family, Mrs. Young and Wilkens.

RUSSIA, GERMANY, &c.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, NOV. 7.

The Federal Council of the Swiss Republic has authorised the Swiss Consul-General in Japan to signify the accession of Switzerland to the new Customs' Treaty, based on an *ad valorem* duty of 5 per cent., concluded on the 25th of July this year between Japan and Great Britain, France, the Netherlands, and the United States of America.

The Senate of Bremen, in conjunction with the Senates of Hamburg and Lubeck, has established a Hanseatic Consulate at Takao, on the Island of Formosa, and given the appointment to Herr Carl Christian Hagen.

A communication has been received by the Imperial Geographical Society at St. Petersburg from Mr. N. P. Anossaw, one of its members, dated from the Stanitza of Albasin, giving an account of the discovery of an extensive bed of auriferous sand in the Amoor district. The credit of the discovery as well as the profit are due to Mr. Benardaki, who for the last five years has been sending out gold-seeking expeditions, which have cost him on the aggregate a sum of 70,000 roubles.

In your last number your correspondent at Rotterdam announces the death of Colonel von Siebold. It is unfortunately but too true, and an irreparable loss to the scientific world, in which he held so high and distinguished a position. He was a Bavarian by birth, having been born on the 17th of February, 1796, at Wurtzburg on the Maine, and he died at Munich on the 18th of October last, of typhus fever, having therefore completed his seventieth year. When attacked by the disease he was engaged in arranging his Japanese ethnographical collections. His fortunes during his first residence in Japan, from 1822 to 1830, are well known. In 1854, on his last return from that country, and after retiring from the Dutch service, he took up his abode at the university town of Bonn, on the Rhine, but his principal collections are in the museum at Leyden. His chief works are, "Epitome Linguæ Japanicæ," published at Batavia in 1826; his Atlas of Sea Charts and Land Maps of the Empire of Japan; "Nippon," a description of Japan; and last, though not least, his celebrated "Fauna et Flora Japanica."

A Binturong (*Arctites Binturong*) has been received at the Hamburg Zoological Gardens, a present from Mr. Willy Krohn, of Singapore.

COMMERCIAL.

COFFEE.—Prices have not risen, though the deliveries continue large, and stocks are much reduced. Sales of the week 25,000 bags.

SUGAR.—Raw, 8 sch. bco. lower. Refined, calm, with but few transactions, owing to absence of ready goods.

RICE.—Market firm, the late advance being fully established. Nothing done in rough.

SPICES.—Cassia Lignea in great demand at rising prices, and 2,000 chests sold by importers. Pepper commands an easy sale at high rates.

SPELTER.—More animation in the market, and rather better prices paid. Sales of the week 15,000 centners.

DISCOUNT.—Without alteration, though money is not so plentiful.

SHIPPING.—ARRIVED.—Oct. 28, Johannis, from Maulmain; Nov. 3, Laura, from Manila.

SAILED.—Oct. 28, Kali Maas, to Hong Kong; 29, Voladora, to Manila 31, Formosa to Hong Kong.

LONDON, MONDAY, NOV. 12, 1866.

KOREA.

IN writing of this country, which appears likely henceforth to assume a prominent position in our record of progress in the Far East, we shall take leave once for all to dispense with that intrusive particle with which most writers have hitherto thought proper to define it. The origin of the phrase "*The* Korea" was probably geographical, and was intended to express "The Korean Peninsula;" but in treating of it as a kingdom we have nothing to do with geographical definitions, and should therefore say simply "Korea" as we would say "China" or "Japan." And having demonstrated this, at all events to our own satisfaction, we will proceed to consider the probable and possible results of those impending operations by his Imperial Majesty's forces of which this jealously guarded land is to be the scene. Korea is to be "opened up." Early in last year* we pointed out that events were tending slowly but surely to this end. The necessity of finding new channels for our increasing trade, the knowledge that in Korea would be found extensive markets for our cotton and woollen manufactures, and its known mineral wealth, to say nothing of the expediency of gaining a footing there as a counterpoise to Russian encroachments, all served to indicate that an attempt to establish intercourse with the Koreans could not long be postponed. Ten years ago Sir JOHN BOWRING, when Plenipotentiary in China, was empowered to visit Korea, but did not find a suitable occasion; lately, Mr. MORRISON, H.M.'s Consul at Tang-chow, paid an unofficial visit to its shores; and Sir RUTHERFORD ALCOCK has for some time had full authority to open negotiations should a favourable opportunity offer; but nothing has yet been done. In the meanwhile events have been precipitated in a way not altogether new in the history of the East. When a small band of devoted missionaries or of bold traders find their way into an unknown land, their temerity is sooner or later sure to meet its punishment in the shape of persecution, ending too often in torture and assassination. Then follows a demand for redress on the part of the nation thus outraged; this being backed by an armed force cannot long be resisted, and the affair terminates with the signing of a Treaty of Peace—and Commerce. In the present instance the grievance is a very serious one; no less than the brutal murder of a large number of French missionaries and a wholesale massacre of their converts. A telegram via Kiachta informs us that the French Admiral has declared war, and has no doubt by this time commenced active operations. So far, the cause of quarrel was of a purely sectarian nature, and did not directly implicate any other nationality; but the telegram above mentioned also tells us that the American vessel *General Sherman* having been unhappily driven ashore on the coast, forty of her crew and passengers were murdered by the Koreans. This is an outrage which calls for interference on the part of every European Power having any interests to protect in China waters, and we should imagine that neither the English nor American Government will hesitate to join in inflicting the punishment it so richly merits.

In truth, it will not do to be over-scrupulous in this matter. It must not be forgotten that the more quiescent the attitude of Russia may be in Europe, the more reason we have to apprehend further territorial encroachments in Eastern Asia. A few years ago the beautiful island group of Tsu-sima was barely saved from the Russian grasp; and even should France be disinclined to pursue a policy of annexation, so glorious a prize as this group might well tempt her to continue it. For Tsu-sima lies midway between Kiu-siu and the southern coast of Korea; commands the highway between the China sea and the Gulf of Tartary; is rich, fertile, and has a magnificent climate; and, finally, possesses a splendid harbour. Even with a view only to the ultimate fate of Tsu-sima, it clearly will not do to allow France to stand alone in her operations in Korea. With regard to the benefits to be derived from commercial intercourse with the Koreans, they are obvious. The population is 9½ millions, and the natives are, generally speaking, fully alive to the advantages of trade, and would readily avail themselves of it if allowed by their Government. King-kia-tao, the capital, is situated in the centre of the peninsula, on a navigable river whose mouth is on the west coast, opposite the Shantung promontory. Here one suitable position might be found for a foreign settlement, while Deer Island, situated at the entrance of a fine harbour in a thickly populated district on the south coast, offers an excellent site for another. At these ports a ready sale would be found for cotton and woollen manufactures and other articles of European production; while in exchange, copper, lead, iron, coal, silk, tobacco, hemp, and cotton, as well as timber and furs, would be obtainable. In addition to this there is already a lucrative trade between Korea and Japan, in rice, ginseng, seaweed, &c., which might be largely increased and extended to the various China ports. Let Government procure access for us, and we will answer for it that out of these materials British enterprise will soon build up an important trade.

* See article "British Trade with the Korea" in the *London and China Express* of Feb. 27, 1865.

FRANCE AND KOREA.

The *Moniteur*, in commenting upon the report that France has declared war in Korea, says:—

"In consequence of a Palace reactionary intrigue, several missionaries in Korea have been put to death. The French Government is but imperfectly acquainted with the facts, and has therefore been unable as yet to take any decision on the subject. Admiral Roze has been sent to cruise off the coasts of Korea, and will doubtless be able to ascertain the real state of things."

The above cautious and rather ambiguous announcement in the official organ the *Moniteur* is in allusion to the telegram published by us and noticed in another column. There has been an impression that the opportunity would be availed of to enforce a treaty of commerce on the Koreans, and that Her Majesty's Government would be asked to join in the same, but we are able to state that no such representation has yet been made by the French Government.

THE STRAITS UNDER THE COLONIAL-OFFICE.

THE Order in Council for the Government of the Straits Settlements by the Colonial-office has not yet been drawn up, but arrangements are we believe in progress for assuming the Government in next March. Several changes are in progress, in order to establish the future Government more in accordance with colonial regulations. In the first place, the Governorship has been offered to and accepted by one of the Governors of another colony nearer home. There will be no Lieutenant-Governors for Penang and Malacca, but simply agents. The appointment of Attorney-General has been conferred on Mr. BRADDELL, an Irish barrister, who has held office as Government prosecutor in Singapore and went out by last mail. The officers who have served under the Indian Government will have the option, we presume, of retiring on what pensions they may be entitled to. It is of great importance that the new Government should be possessed of vigour. For the past year all measures that could possibly stand over have been left, and there is now an accumulation to be energetically and wisely carried out. It is to be hoped that, in the first place, the present system of keeping accounts will be altered, and that dollars and cents will be adopted, this being the actual currency. A currency of small silver and copper coins is also much wanted, and can easily be produced by the Mint at Hong Kong.

In the formation of the Government we understand that economical views will prevail. The question of the greatest impor-

Digitized by Google

tance in the expenditure, is that of the military and the convict establishments. Many persons are in favour of the abandonment of the convict system, but we are of opinion that it would be a mistake to abandon it. Properly regulated, the convicts are extremely useful in the repairs of roads, &c., and a source of saving instead of a loss. The garrison is, we believe, to consist of three batteries of Royal Artillery and a wing of the Ceylon Rifles, and the total cost to the Straits Government is not to exceed £59,300. This is a very heavy item, and we should think capable of being reduced. In the civil establishments of the respective settlements there is room for economy in more than one of the departments.

THE P. AND O. COMPANY'S SERVICE.

We understand that it is the intention of the directors of the P. and O. Company to commence an extra fortnightly service between Suez and Bombay early in January next. This, with the present contract, will give communication four times a month. It is intended as a trial service in order to determine what increase of traffic can be secured, and with a view to enable the directors to form an opinion as to its cost, and what amount of subsidy it will be necessary to ask should the Post-office decide on inviting tenders in accordance with the recommendation of the Parliamentary Commission. The Company have contracted for another large steamer with Messrs. Denny and Co., of Dumbarton.

THE GREAT REQUIREMENT OF CEYLON.

Ceylon might be considered fortunate in the possession of a surplus revenue, but for the litttle account to which it is put. With this colony as with others, it is only by the administration. taking time by the forelock, and anticipating in a manner the requirements of the future, that the evils attendant on widespread pauperism, and a taxation too heavy to be sustained with anything like equanimity can be avoided. The Government should set itself about the work of productive expenditure, instead of satisfying itself with a mere financial investment, and the attendant percentage. The thousands of Indians pouring into the colony and unable to find work constitute a monition to be heeded. Cannot the Government turn this surplus labour together with surplus revenue to profitable account? Agriculture must constitute for a century to come the true wealth of Ceylon; but so far her productive powers are singularly backward in all articles but coffee. Her old character for specialities clings to her; and if the saying of a British Admiral, that she "could not provision a cockleboat in distress" is no longer true, it is unfortunately the case that she is a large receiver of produce which she should herself raise. The Crown lands now covered with jungle might be made to yield vast supplies of rice and maize, if only properly irrigated, a work which the Government might well undertake. There are the evidences, in gigantic tanks now in ruins, that the irrigation of those lands was the leading idea of Ceylon's former masters. The production of rice on a scale sufficient for the requirements of the colony would give a vast stimulus to the production of coffee, and solve the problem which now engages the attention of planters—that of reducing the prime cost of the berry. It is not improbable that at no distant date Ceylon may meet with very serious competition notwithstanding present superiority; at all events, supplies will be on a scale necessitating closer attention to charges. Let the food of the coolie be cheapened, and more labour can be absorbed on the estates and these proportionately extended. Larger incomes will be realised and fewer bankruptcies recorded. It is, we conceive, for the Ceylon Government to take the initiative in the matter. The step is bold, but the issue is certain. A larger revenue may thus be derived from a given sum than in any other mode; and, what is more, there will be no difficulty in realising any desired portion of the principal. Agriculturists in this country and in India are casting about for more desirable locations, and a host of buyers would present themselves for these now profitless jungle lands when the occasion offered. There exist in districts of the colony the best facilities for irrigation and estimates made by skilled hydrographers would come near the mark. Thus there would be nothing problematical in the undertaking; the thousands upon thousands of pounds now lost annually to Ceylon, would vivify new branches of home and foreign trade, increase the circulating medium, and place her future prosperity on a yet more stable basis. Sir Hercules Robinson is far too clear-headed a man not to see the force of our representations. Objections may be no doubt started as to the propriety of thus applying revenue waiting to be disposed of, but true statesmanship will not fail to overrule them in the interests of the colony.

COMMERCIAL BANK CORPORATION OF INDIA AND THE EAST.

The following letter has been published in *The Times*:—

"THE COMMERCIAL BANK CORPORATION OF INDIA AND THE EAST.

"Sir,—I do not observe that you have noticed the report of the official liquidator on this bank, which suspended payments on the 15th May last, and whose report was issued on the 25th of October. Nevertheless, there are matters connected with it well worth public notice, and a question arises concerning creditors, which it behoves men of business to attend to.

"The bank, which was founded on a successful establishment of somewhat similar name at Bombay, was established in 1865 by Royal charter, with a London direction, a paid-up capital of one million sterling, and a reserve fund of £238,802. In little more than seventeen months after its commencement it suspended payments with liabilities of £3,150,839. But the official liquidator gives an estimate of assets amounting to £3,332,447, which would leave a reasonable prospect of a surplus to shareholders of £181,608; and he announces that there is every probability of a considerable dividend being declared early in next year. So far so good; creditors are to be paid in full, and shareholders are to have a small surplus. Even Shylock would have been satisfied with the arrangement. But, on looking more closely into the accounts from a creditor point of view, these flattering prospects vanish. For the official liquidator states that his estimate of assets is founded on the assumption that ample time will be allowed for realising the doubtful securities, consisting of shares in land and reclamation companies in Bombay and of land and house property in China. It may be wise not to force sales of Bombay Land Company shares and such like at the present moment, but this is a question for the shareholders which they alone should settle, and with which the creditors have nothing to do. If, after 'ample time' has been given, these securities find no better market than at present, then the deficiency will have to be made up by a call on the shareholders, who are liable to the extent of another million; and I submit that, as a sound principle of official liquidation, this call should be made at once, and the creditors be paid off. The creditors have had nothing to do with the imprudent advances, the establishment of branches in so many different parts of the world, the official mismanagement, all of which are brought to light in the official liquidator's report, and therefore they ought not to be made to wait for the collection of contingent assets solely for the benefit of the shareholders who have had the management of these things. Moreover, when the 'ample time,' which may mean many years, has expired, and a call has to be made, how many of the shareholders will have followed the walk of Premchund Boychund into the Insolvent Court, or have made safe their property in the manner so often practised successfully in the East.

'Nov. 5." "A Creditor.

LANCASHIRE COTTON-SPINNERS AND LIVERPOOL COTTON MERCHANTS.

The quarterly meeting of the Manchester Chamber of Commerce took place on the 24th ult., when an interesting conversation took place relative to a proposed alteration in the terms of payment for cotton, with a view to remedying certain evils which had crept into the trade as conducted for some time past.

Mr. Malcolm Ross, the President, said that an interview had taken place between sub-committees of the American Chamber of Commerce at Liverpool, the East India and China Association of Liverpool, the Cotton-spinners' Association at Manchester, and of this Chamber, in reference to an alteration of the terms of payment for cotton. The usual course in buying cotton at Liverpool was for cash in ten days, or a banker's bill at three months. These bankers' bills had been sent to Liverpool when the rates of interest had advanced above 5 per cent., though they were only chargeable by the practice of trade at 5 per cent. During the recent panic parties selling cotton refused to receive these bills except at the current price, and thus in the same market on the same day prices varied as much as ¼d. to ½d. per lb., those having cash being able to buy so much cheaper. It was felt that some arrangement should be made by which prices would not fluctuate with the rate of discount. A meeting of the representatives of the different bodies he had named accordingly took place on the 18th inst., when the matter was discussed in all its bearings. The Liverpool people wished to convert all payments into cash payments. They said cotton was the only colonial produce imported that was not paid for in cash, and they wished to place cotton on the same footing as coffee, tea, sugar, and other things. It was, however, represented, that that would be a direct interference with the customary mode of dealing in the cotton trade, and, after a long conversation, the following terms were agreed to:—"That a discount of 1¼ per cent. be deducted for cash, in ten days, buyers having the option of paying in approved bankers' bills not exceeding three months, such bills to be received at the Bank of England rate of the date of tender." He had since received communications from the American Chamber of Commerce and the East India and China Association at Liverpool ratifying on their part the agreement which their representatives had made. (Hear, hear.)

Mr. Fergusson suggested that the terms of payment for yarn in the Manchester market should also be considered. The practice in Manchester had been consequent upon the practice which had obtained in Liverpool, to accept these bankers' bills taking the rate of interest at 5 per cent., although it might have been absolutely as high 10 per cent. If the arrangement described by the president was to be carried out, it was only fair the spinner should receive payment on similar terms. (Hear.)

Mr. Wright Turner, Mayor of Salford, endorsed the sentiments of Mr. Fergusson. Under the new arrangement the cotton broker and the manufacturer would be safe, and nearly all the risk would fall upon the

Digitized by Google

spinner. If they could shorten the present terms of payment, which was cash in a month, to cash in fifteen days, it would be some advantage.

The PRESIDENT observed that in the home trade these bills were not recognised at all. They were only used in the foreign trade. He thought the moment was not opportune to reduce the present term until it could be ascertained whether the whole trade, including buyers and sellers, would be unanimous in agreeing to the change.

Mr. DORRINGTON (of Fraser and Co., merchants) agreed with Mr. Fergusson that a similar alteration should take place in the yarn trade. He thought they had come to a valuable conclusion between spinners and sellers of cotton in placing cash and bills on a fair relative footing, because it would tend to destroy that spirit of speculation which had been so very injurious to the interests of Manchester. He thought, however, it would be premature to discuss the question of an alteration until the matter had been discussed at a special meeting of the Chamber. He suggested that a special meeting should be called for that purpose.

Mr. HUGH MASON, cotton spinner, thought the first step had now been taken to remedy a grievance which rested upon the cotton-spinners and sellers of twist and cloths. The spinner and manufacturer had been comparatively indifferent about receiving payment in cash for bills, because it had been the rule to receive bankers' bills in payment for cotton at Liverpool, and therefore the spinner had been enabled to take a bill he had received at Manchester to Liverpool next day, and pay for his cotton with it, so that he had not suffered, whatever might be the rate of discount. But under the new arrangement, if he took a bill to Liverpool, which he had received in Manchester at 5 per cent. when the Bank rate was at 10 per cent., he would suffer a loss of 5 per cent. No spinner henceforward, however, would be so foolish as to do anything of the kind. Many people—himself among the rest—were regularly in the habit of buying bills in Liverpool at the best terms they could get, and handing these bills to the sellers of cotton at 5 per cent., so that if he paid 8½ per cent. for them, he pocketed the 3½ per cent. difference. That was a grievance the Liverpool merchant had a very good right to complain of. He had been told, on Liverpool authority, that during the exceptional time of the 10 per cent. rate for money, spinners had taken their cash down to Liverpool to pay for their cotton, and that certain brokers had been in the habit of receiving that cash and going into the open market and buying bills at 8 or 9 per cent. and then pocketing the difference. ("Shame.") That was deserving of reprobation. Certainly, if a spinner took his cash to Liverpool he had a right to that, and no broker had a right to take his cash and go into the market to buy bills and pocket the difference. This new arrangement would stop all that, because bills would not be a tender for cotton except at the Bank rate of the day.

The discussion then dropped, the PRESIDENT observing that he would adopt the suggestion of Mr. Dorrington to call a special meeting on an early day.

THE CONDITION OF LYONS.

(FROM OUR OWN CORRESPONDENT.)

Recent accounts have in no way reduced the anxiety respecting the condition of the silk trade of Lyons; on the conrary, they have strengthened former accounts, and prove that the great silk centre is in a most deplorable condition, and the working classes in a position from which nothing but aid from without can release them. The abandonment by fashion of figured for plain silks is cited as the cause of the terrible falling off in the Lyons trade; but changes of this kind are of constant occurrence, as the ribbon weavers of St. Etienne and other places know to their cost. We fear there are other causes which operate, or, in three words, we do think the Lyonese manufacturers have exhibited sufficient courage and breadth of view in grappling with the difficulties which have for a long time surrounded them. The dearness of silk and the revolution in the market demanded a complete change in the system, and the trade has not shown itself possessed of the means or the boldness necessary under the circumstances, and have waited for better times while the poor weavers of Lyons have sunk into despondency, and rivals abroad have taken advantage of the fact.

The Emperor has come forward handsomely in aid of the workmen of Lyons; he has placed £12,000 from his private purse at their disposal, and the Society of the Prince Imperial, of which the Empress is Lady President, offers them a loan of equal amount. The Minister of the Interior favours the idea of the workmen that the best means to be taken to meet the change of fashion which at present prefers plain to figured silks is to form co-operative societies; but as the law of 1856 confines societies *en commandite* with shares of four pounds each to a maximum capital of £8,000, the Minister recommends the other form of association, that of the *Societe Anonyme*, which requires a semi-official controlling council, and ministerial examination and recognition, and promises them all possible assistance. There is little doubt that the position of the manufacturing population of Lyons will cause the law of commercial associations, which has been so long under consideration, to be revised during the coming session, and it is to be hoped that a change in the law may stimulate the exertions of the capitalists and manufacturers. The whole commercial world, and England especially, is interested both in the Lyons manufacture and in the law of association in France, and we trust that out of the serious affliction which now weighs upon Lyons some good may come by way of compensation.

EMIGRATION FROM THE MERSEY.—The emigration officials at Liverpool have completed their usual returns of the exodus from Liverpool, and, although the fact is not stated in the statistics, a large number of the emigrants have gone to Texas direct. During the month of October there sailed to the United States 24 ships under the act, with 7,091 passengers, of whom 606 were cabin and 6,485 steerage; of this number 2,612 were English, 208 Scotch, 2,454 Irish, and 1,211 foreigners. To Canada there were four ships with 1,061 passengers, of which 163 were cabin and 898 steerage: of this number 380 were English, 52 Scotch, 188 Irish, and 278 foreigners. To Victoria there were two ships, with 701 passengers, of which 94 were cabin and 607 steerage; of this number 252 were English, 23 Scotch, 304 Irish, and 28 foreigners. In "short ships" there sailed to the United States 1,024 passengers: to South America 73, to Victoria 34, to Africa 401, and to the West Indies 35. From a rough calculation it appears that during the past month upwards of 3,600 Irish emigrants have left Liverpool for America.

EXPORT OF COAL FROM THE UNITED KINGDOM.—The exports of coal, writes the *Daily News*, from the northern ports of Great Britain during September last amounted to 440,086 tons, an increase over same month of 1865 of 30,096 tons; from the Yorkshire ports, 34,383 tons; from London, 2,497 tons; from Liverpool, 48,652 tons; and from the Severn ports, 236,845 tons. The total exports of coal during September were 821,585 tons, showing an increase as compared with September, 1865, of 18,900 tons. The exports from January to September, inclusive, were 7,159,431 tons, an increase over same period of 1865 of 647,171 tons. Messrs. Higginson and Co., of Liverpool, in a report just issued, state that exports of coal coastwise from the port of Liverpool during September, 1866, were 13,297 tons, an increase over September, 1865, of 657 tons. The total imports of South Wales and other coals into the port of Liverpool from 1st January to 30th September, 1866, amounted to 53,730 tons, a decrease as compared with same period of 1865 of 12,916 tons; for the same period the imports of coal into London were 2,176,292 tons, a decrease of 168,603 tons. The imports of sea-borne coal in London during September amounted to 243,887 tons.

THE LONDON SHIPBUILDING TRADE.—The late commercial panic has had a seriously depressing effect on this branch of industry, and the aspect of our usually busy waterside in the neighbourhoods of Greenwich and Blackwall is, and has been for the past three or four months, of a particularly depressing character even to the uncommercial observer. The London iron shipbuilding trade is now at a dead lock, and the large yards that skirt the banks of the Thames from Millwall to Bar Creek, show now vast desolate spaces, occupied only by poles and scaffolding. In this long reach, from whence formerly the din of ironworkers proceeded night and day, six or eight iron vessels only are slowly rising into existence. These outward and visible signs indicate also a great amount of distress among the inhabitants of the adjacent parishes. In Greenwich and Debtford alone about 10,000 men are out of employment, and this large body by no means represents the total number of those whose wages entirely depend upon the activity of the shipbuilding trade. Extensive strikes among these men, the dull state of the money-market, and the important fact that London has, in shipbuilding, a very formidable rival in Glasgow, are all causes tending to this very unsatisfactory state of things, which, if it lasts long, will bring a vast amount of misery upon the working classes living in the neighbourhoods above mentioned.

THE EAST INDIA ASSOCIATION.—It has frequently been remarked that whenever any important question concerning India is brought forward in the House of Commons, it is regarded with so much indifference that there is rarely a quorum of members present, and the reason of this is that, with a few exceptions, they are personally ignorant of all that concerns India. At present there are many members of both Houses who are eager to obtain sufficient knowledge to enable them to understand the various Indian questions that are from time to time brought before the House; they complain, however, that they cannot obtain that knowledge without laborious reading up of dry records, blue books, or parliamentary returns; that they do not know where, or how, to get it readily, and that, therefore, they take no interest or part in debates on Indian questions which are only comprehended by those few members of the House who have been in India, or who make them their special or official duty. To remedy this, several members of Parliament, members of the civil and military services, European and native merchants, and other gentlemen more or less connected with or interested in Indian affairs, have formed an Association in London, called the East India Association. Its chief objects are to collect accurate information on all the subjects connected with India and Indian questions that may be before Parliament; to arrange, classify, condense, and hold that information readily available to those who may require it, to strive to form public opinion; and to advocate by every legitimate agency the interest and welfare of all classes of British subjects in India. In order to carry out these objects, it is proposed to hire rooms as near as possible to the Houses of Parliament, where a permanent committee will conduct the business of the association, and where members of Parliament can meet natives of India, or members of the association who have been in that country, and thus obtain an amount of special knowledge which can be so much more readily and easily acquired in conversation or discussion than by laborious research. To the natives of India this association will offer that channel of communication with the Government and people of England which they have so long been in need of, and of which they will doubtless readily avail themselves, seeing that the association is principally composed of those who profess, or have already proved themselves, to be their friends. It is proposed that every member of the Association shall pay an annual subscription of not less than £2.

M. BERTHEMY, the French Minister Plenipotentiary in China, is about to be transferred to the United States. His successor is not yet announced.

Monetary and Commercial.

It is with great regret that we have to announce that the bills of Messrs. Dent and Co., China, to the extent of about £30,000, have been refused by Messrs. Dent, Palmer, and Co., London. Of course it is impossible to say what course the firm will pursue on receipt of this intelligence, but it is assumed that it will suspend and liquidate its affairs. The present partners are John Dent, Francis Chomley, Henry Dent, Alexander Turing, and H. P. Hanssen. The firm has been established over thirty years; in the first instance by Mr. Thomas Dent, succeeded by Mr. Lancelot Dent and Mr. Wilkinson Dent, and subsequently by Mr. John Dent;

Digitized by Google

numbers of partners have retired from the firm in turn with fortunes, and it enjoyed a prestige until lately of the very highest order. The Chinese trusted it to any extent long before a bank was ever established in China, and to hear of such a disaster will we fear have a most important effect on transactions with other firms. Not only was the credit of the house nearly immeasurable, but its known liberality was a household word. Every visitor to China left it with high enconiums on the hospitality of Dent and Co. The fall of this house, if it should be so, will be a blow to the trade which can hardly be estimated. We cannot of course know their precise position, but the liabilities are roughly believed to be over £2,000,000; neither do we know their resources or capabilities for meeting so great a misfortune as the dishonour of their bills by their London agents. Messrs. Dent, Palmer and Co. were simply their financial agents, and were not connected with the firm in partnership. During the week ending on the 3rd rumours were current that the firm had stopped, but on inquiry at Messrs. Dent, Palmer and Co.'s we were assured that this was not the case, and that all their bills had been duly honoured, and on this assurance we penned the comments which appeared in our issue of the 5th. The bills were refused on the 6th, but it was not made public until the 8th.

The *Daily News* had the following on the subject. *The Times* simply announced their drafts had been refused :—

"The drafts of Messrs. Dent and Co., the influential and well-known merchants of China, have been refused acceptance by their London agents, Messrs. Dent, Palmer, and Co. The house, which has been established many years, and has always occupied a position of the first rank, has agencies at Hong Kong, Shanghai, and Foo-chow-Foo. Its partners are Mr. John Dent, Francis Chomley, Henry W. Dent, Alexander Turing, and H. P. Hanssen. The business of the firm was of great magnitude up to about twelve months ago, and, though it has since been considerably curtailed, the engagements are roughly estimated at from two to three millions sterling. Mr. John Dent, the head partner, returned to London three years ago with a fortune of about £800,000, which he had amassed in China. Upon the formation last year of the Blakely Ordnance Company (which is now being wound up) he joined that concern as chairman, and his engagements in connection therewith are said to reach £120,000. The partners have always been considered very wealthy, but about a year ago they suffered a loss of no less than £200,000 by the malversations of a Portuguese clerk in their employment at Shanghai, who was sentenced to seven years' imprisonment. It is fully expected that the creditors will receive the whole of their claims, the resources of the house being still large. It will be proper to add that the firm of Dent, Palmer, and Co., of London, is a totally distinct and separate concern from that of Dent and Co., of China."

The *Post* says :—

"It is reported that an eminent English house in China has failed, and owing to telegrams their agents here have deemed it necessary to decline the acceptance of their drafts. Other China houses are stated to be in difficulties. The general feeling seems to be that the Bank will reduce its rate of discount to-morrow, unless the reported failures in China are considered of sufficient importance to induce the directors to continue the present rate until more precise intelligence comes to hand."

The *Herald* has the following :—

"Rumour has been extremely busy the last few days with the name of a house of standing in China, which was stated to have made enormous losses in tea. To-day it transpired that the drafts of Messrs. Dent and Co., of China, had been refused acceptance by their agents here, Messrs. Dent, Palmer, and Co., of London, except so far as relates to this agency. Of course, though there may be difficulties, it does not follow that suspension is inevitable, and we must now wait and see what will be the result of the return of the acceptances. Mr. John Dent, the head of the firm, has been connected with some of the late public companies, and in one it is feared he has been compelled to sacrifice a considerable amount of money. The house, it is believed, is one of the largest in China, and Mr. Dent, being dissatisfied with recent management, had gone out to look into the position of affairs."

The prospectus of the Agra Bank to carry on the business of the late Agra and United Service Bank, which has been fully noticed in previous numbers, has been issued, and will be found in our advertising columns. The following circular also has been issued. It will be perceived that meetings of creditors have been convened to be held at the London Tavern, on Monday, the 12th (this day), at two o'clock, for creditors above £100; and on Tuesday, the 13th, at two o'clock, for creditors below £100 :—

"Having been appointed a committee for carrying into effect the resolutions printed on the other side, we now beg to submit to you for your consideration the enclosed copy of the proposal therein referred to, and draw your special attention to the modifications appearing at the foot thereof. We have further to ask the favour of your attendance at a meeting of the creditors of Agra and Masterman's Bank (Limited), to be held at the London Tavern, Bishopsgate-street, London, as follows, viz., as to creditors above £100, on Monday, the 12th November, 1866, at two o'clock in the afternoon. As to creditors of or below £100 on Tuesday, the 13th November, 1866, at two o'clock in the afternoon. This division is necessary in consequence of the large number of creditors. We enclose a card of admission, which should be signed by you before being presented at the door. If you should be unable to attend the meeting, but approve of the proposal, may we ask the favour of your signing and returning the enclosed form of assent, prior to the meeting. We intend to sit daily at the board-room of the bank, No. 35, Nicholas-lane, Lombard-street, London, from three to five o'clock P.M., on each day, between this date and the days of meeting, in order to afford information and explanations to creditors, and if you would favour us with a call we shall be happy to give you every explanation in our power.

"The following are submitted as some of the advantages to creditors of the proposed arrangement, which has been framed in a spirit of fairness and equity towards all interests. 1. They will receive 5s. in the pound (making with the 5s. already paid, 10s. in the pound), with interest on the whole 10s., from the date of stoppage, to be paid in cash in Jannary next. 2. The balance of 10s. in the pound will be payable by instalments at the fixed dates mentioned at the foot of the enclosed proposal, with interest added to each instalment, viz., 3s. in the pound, in July, 1867; 3s. in the pound in April, 1868; 4s. in the pound in October, 1868. 3. Each instalment will be represented by a negotiable instrument available for discount. 4. They will have the additional security of the new capital of £400,000. 5. The existing liability of the present shareholders will remain unaffected. All communications may be addressed to Messrs. Chadwick, Adamson, M'Kenna and Co., No. 40, Old Broad-street, London, E.C., or to the shareholders' committee, No. 35, Nicholas-lane, London.—We are, your obedient servants,

"W. Bracken, B. Burt, Proby T. Cautley, H. B. Dalzell, E. H. Morland, G. Paton, Henry W. Peek, Geo. Pollock, M. Richardson, James Spicer, Jas. Thomson, E. Wilmot."

The following notices have appeared in *The Times* on the scheme, and we trust that the new bank will meet with all the success which is expected :—

"The completed prospectus for the resuscitation of the Indian portion of the Agra and Masterman's Bank has been issued. The board of direction is a thoroughly sound and respectable one, and the London agency has been undertaken by Messrs. Glyn and Co. Of the proposed new preference capital of £400,000 considerably more than half has already been subscribed, and the only material alteration in the scheme as originally planned is for the payment of the creditors at an earlier date than was then thought practicable.

"A meeting of the principal creditors is convened for the 12th and 13th. The object is to obtain consent to the terms of liquidation proposed, and which may perhaps be regarded as the most satisfactory ever presented in the case of the suspension of a large public establishment. By January next 50 per cent. will have been paid, with interest, and the remaining moiety is to be discharged by three instalments, extending over about 21 months, such instalments being represented by promissory notes, which, as they will also carry the ample interest of 5 per cent., and be secured by the resuscitated institution, with its new capital, may be expected at all times to prove readily convertible. The number of other banks lately cleared away in India opens the best field for the revived establishment, and the fact that instead of drawing upon itself in London it will henceforth draw upon Glyn's affords the most direct practical security against the possibility of mismanagement. Under these circumstances all the parties concerned may count upon cordial co-operation, more especially bearing in mind the character of the Stock Exchange operations by which the stoppage was brought about, and ruin inflicted on the shareholders. At the same time, it is to be hoped that both creditors and shareholders will recognise the disinterested efforts of the professional liquidator, Mr. Cannan, by which the present result has been accelerated and rendered possible."

In reference to commerce with Western China, the *Manchester Guardian* says :—

"The new movement of the Chambers of Commerce to bring about the commercial opening of the Shan States before the French reach them from Cochin China, and raise impediments to British trade with those countries, is progressing under the advocacy of the project by its originator, Captain Sprye. The Bradford Chamber last week addressed to the Earl of Derby another memorial, which refers to and quotes a previous memorial on the subject, dated upwards of six years since, to the late Viscount Palmerston, then Prime Minister. The present memorial further shows, from Parliamentary letters from which it quotes, that between June, 1860, and February, 1864, twenty-six memorials advocating the opening of this new Eastern trade were sent up to Viscount Palmerston, as Prime Minister, or to members of his Cabinet, from the chief commercial bodies of the kingdom, and this without any result." The same paper adds—'It is to be hoped that the present memorial may draw Ministerial attention to this long proposed and too long neglected plan for the extension of British commerce over extensive, rich, and populous portions of Eastern Asia."

A meeting of the shareholders of the China Steamship and Labuan Coal Company has been called for the 26th inst., to consider the proposals of the directors for reconstructing the company according to the plans already noticed in our columns.

The biddings for £300,000 in bills on India took place on the 7th. The proportions allotted were — to Calcutta £145,800, to Madras £4,200, and to Bombay £128,700. The *minimum* price was fixed at 1s. 11¼d. for all the Presidencies, an advance of 2 per cent. on the previous terms. Tenders on Calcutta and Madras at 1s. 11 3/32d. will receive about 80 per cent., and on Bombay at 1s. 11 3/32d. in full. These terms show a slight increase in the demand for means of remittance to Calcutta, and a diminution in the demand for Bombay.

The appearance of the telegram, "War declared by France in Koroa," in our last issue gave rise to the following comments in *The Times* :—

"The telegraph and courier service through Russia and Mongolia *via* Kiachta, the frontier town, appears to have greatly improved. The time occupied by the couriers between Kiachta and Tienstin has now been

Digitized by Google

reduced to twelve days. The telegraph wires are complete from London to Kiachta and seem to work well, a telegram having just been received in fourteen hours. From Tientsin messages are conveyed by steamers to all other parts of China. The cost of a message of twenty words is about £4 5s., and the agency is at the *London and China Telegraph* Office, 12, George-yard, Lombard-street."

A project is on foot for establishing a company for the purpose of trading with different countries in Asia, and several eminent bankers have promised to support it. The belief is that French commerce is capable of great extension in that part of the world.

The amount of bullion by the P. and O. Company's steamer *Massilia*, from Southampton on the 4th inst., was,—in gold to Alexandria, £20,175; to Madras, £791; in silver to Calcutta, £10,150; to Singapore, £5,940; to Hong Kong, £990; total in gold £20,966; in silver, £17,080.

PRODUCE MARKETS.

TEA.—Our market remains in the same dull and depressed state, with increased anxiety on the part of holders to realise, and the steady determination of the trade to buy only for immediate wants from public sales have day by day become more difficult to make, and prices for nearly all descriptions have again given way. The continued large export from China in the face of the money difficulties here and the very discouraging accounts sent from this side surprises every one, and until some decided check is shown in the export there can be no revival of confidence, as the quantity afloat and to arrive the next few months is so largely in excess of our deliveries that we must have a large addition to our already heavy stock, whilst the losses are such as must open the eyes of all shippers to the folly so long carried on of hurrying forward shipments in the early part of the season at a rate nearly approaching double that of our requirements, and at prices which would only be safe upon an export about half equal to our wants. In Congous, siftings remain much as before, some parcels of new, with fair quality, have been sold from 8d. to 9d. per lb. Broken-leaf and leafy kinds have sold ½d. per lb. lower. Fair to good common have been sold at public sale from 11d. to 11½d. per lb. Fair flavory kinds, of old import, from 11¾d. to 1s. 1d. per lb. Fair to good Kaisows have sold at a further reduction of 1d. per lb. Fine meet only with a slow sale, but as the trade want them, they are willing to pay fair prices. Finest show no alteration. Pak Lings remain much as before. Common to fair black-leaf have lost the ½d. per lb. improvement last quoted; the fair to good qualities of this import have been sold from 1s. 2d. to 1s. 8d. per lb., fine from 1s. 9d. to 2s. 2d., showing a decline of fully 2d. per lb. New-make Canton kinds show a decline of fully 1d. per lb. In Oolongs there is no change to notice, they having been only in limited request. Some few parcels of fine Souchong have been sold at relatively full prices. Flowery Pekoes are without alteration. In Scented Teas there has been a moderate amount of business, but prices have again ruled rather in favour of buyers, especially for the fair to good kinds, both of Canton and Foochow make. In Greens there has been a steady, though limited demand, confined exclusively to home requirements. The new Ping Sueys, mostly by steamer Agamemnon, have sold at full rates, the No. 1, or extra fine Gunpowders, at 3s. 10d. to 4s. per lb., and other grades in proportion, but with further supplies such prices cannot rule. The Chanticleer, from Yokohama, has brought about 2,000 half-chests uncoloured leaf of fair to good quality; an average price of 1s. 4½d. per lb. has been offered for 1,500 of the better qualities; a few good common have sold at 1s. 3d. per lb. In coloured sorts but little is passing. The public sale of this week comprises 50,700 packages, of which 49,500 packages are without reserve. The following comments are from the *Produce Market Review*:—It has been a general remark in reference to the late panic that the commercial failures were few, and that the produce markets were less immediately affected than is usual in periods of dear money. This may have been the case, but the value of produce has steadily declined throughout the summer and autumn, and if commercial failures have not absolutely resulted from the long-continued pressure for money, great difficulty must have been experienced amongst importers, and loss of an almost unprecedented character must have fallen upon the consigners of Tea to this country, by the great depreciation in value throughout the year. Thus, although everyone expected that the price of Tea could fall no lower, the announcement this week of difficulties amongst China houses has broken confidence, and may have led, when coupled with the continued want of prosperity in the trade, to an anxious desire on the part of the merchants here to realise. This may be easily understood when it is considered that a large proportion of London merchants act as agents for the sale of Tea for houses abroad, their transactions involving considerable expense. Any long-continued want of confidence must therefore influence the conduct of business of this kind, and increase the desire to turn consignments into money. At the public sales this week prices have fallen materially, and although, as is usual, the preponderance was of kinds below 1s. 6d. per lb., and the better qualities may therefore not immediately be affected, it is acknowledged that a fall of at least 1d. per lb. has taken place in common Congous; and our belief is, that if careful comparison were made of the prices obtained at former sales, a fall of 2d. to 3d. would be found to have taken place in numerous instances. It might be argued that, after a series of such severe trials, the low price of Tea would make it a safe purchase; but it is to be remembered that the increase of supply during the last ten months has been more than three-fold the increase of delivery during the same time. The character of the Tea trade is rapidly changing, the exporters of Tea from China are much more numerous; the days in which there was a monopoly in the trade by a few large houses appear to have passed, never to return, and with them the fluctuations in the value of Tea. The necessities of the more modern houses that have taken their place make prompt realisation a necessity, and hence the continued tendency to sell by public auction.

SILK.—We have a very quiet market in silk. The latest telegram, under date 8th October, seems to adhere to the notion that the total export from China will not reach 28,000 bales. The prices advised too would indicate full confidence in these figures. Still the demand having been once checked has never been resumed, and the business doing is upon a very moderate scale. An unloading of 1,800 bales, including 400 bales of the new Japan Silk, is just taking place, but at present nothing has been done—some of the Japan Silk is really fine as regards quality and size, but the present rates very much check business. Deliveries for October are 2,858 China and 505 Japan, and from 1st November to 8th 482 China and 111 Japan. China Silk Piece Goods: The only goods in the Sales yesterday were 501 demi pieces Pongee Handkerchiefs. 100 pieces of Figured white, 8 yds. × 28 in., 11¾ oz., beautiful goods, sold for 31s., 100 Figured Crimson, 11 oz., useful goods, at 23s., and 50 Plain White, 8 yds. 12½ oz., fine goods, at 32s., all high rates, and the result of scarcity; the remaining 250 pieces were bought in. The only transaction by private contract during the past month was that of 500 pieces of Black Silk Handkerchiefs, which found buyers immediately on arrival at very extreme rates.

COTTON.—The extreme and continued dulness of the Manchester market has not been without its effect on those of London and Liverpool, and the cotton market since our last report has been extremely dull, with business only of the most limited description. Prices have declined ¼d. to ½d. per lb. for all kinds, Tinnivelly and China being the last to succumb. The sales in London during the week ended 3rd November amounted to 2,180 bales, including 150 bales China ex Western Chief, classed as "fully fair," very few bales being of lower quality. These sold as follows:—middling fair, 9½d.; fair to fully fair, 10¼d. to 10¾d.; good, 11d. The stock of China and Japan cotton in the United Kingdom on the 1st November amounted to 5,846 bales, against 2,548 at the same period of last year. The closing quotations as given by the London Cotton Brokers' Association are as follows:—Dhollerah: middling fair, 10½d.; fair, 11¼d.; good fair, 11½d. Tinnivelly: middling fair, 9½d.; fair, 10¾d.; good fair, 11¾d. to 12d. The quotation for China remains the same as above. At Liverpool Middling Orleans has declined ½d. per lb. and is now quoted at 15¼d. There are telegraphic advices from New York up to the evening of the 7th inst. which place middling Upland at 40 cents. At the close of the market of the 8th inst. there was a sale reported of 50 bales fully fair China at 10d. and of 5 bales Penang at 11¼d., also 20 bales same description in the seed at 3d. per lb.

COIR YARN.—There has been a good demand, and all lots have met with ready sale at full prices. At auction 453 bales Cochin realised, for good medium £38 per ton, medium, £35 to £35 5s. Of Ceylon at public sale 83 bales were offered, nearly all of which sold, fine, £48 to £57 15s.; good, £43 10s. to £44 10s.; and privately 78 tons have been placed, good medium, £37 to £39; medium, £35; common to good common, £30 15s. to £33 15s. per ton.

COIR FIBRE.—The demand for this import is also good, and of 72 bales Cochin offered all sold, fine £47 5s.; good medium, £39 10s. per ton. Of Singapore 50 bales realised for brush, £41 to £42 5s.; and for mattress, £25 15s. per ton.

COFFEE.—Up to the close of the weekly market on the 3rd inst. there was a moderate supply with strong demand, and prices were well sustained Since that date there has been an alteration, the market has been over stocked, and no demand existing for the increased quantity offered. Price

Digitized by Google

have consequently declined, and with the exception of the better kinds of coloury Plantation the quotations average 1s. per cwt. lower than at the date of our last. Native Ceylon ranges, according to quality, from 62s. to 72s. per cwt., and Plantation 73s. to 83s. Of Manila 435 bags were offered at auction, and all withdrawn.

SUGAR.—The following remarks are from the Circular of Messrs. Carey and Browne:—"The easier position of monetary affairs has had no favourable influence on this market, the general tone of which has lately been one of extreme quietness and depression. Continued disinclination to operate, combined with some appearance of desire on the part of holders to realise, has caused the value to recede, and the moderate business concluded has been mostly at a nominal decline of 6d. to 1s. per cwt. on previous quotations." Mauritius has been but sparingly offered, and of Manila only trifling lots have been placed. Clayed being worth nominally 27s. to 27s. 6d., and Unclayed, 24s. to 25s. Of Penang 4,293 bags have sold at auction, ordinary to good brown, 26s. 3d. to 28s. 6d.; low to good yellow, 30s. 6d. to 33s per cwt. Privately, the only sale reported is of 1,000 bags Penang at 29s. 6d. to 32s. per cwt.

RICE.—There is no further improvement in this market, and no arrivals of Java at present. There is, on the other hand, no decline to report, Nekranzie being still quoted 11s. to 11s. 3d. Of Rangoon there has been a sale at Liverpool of 6,635 bags at 11s. 6d. per cwt., which is the only sale in any quantity that has taken place.

PEPPER.—Black: Sales of Singapore and Penang descriptions have been in fair quantities, but prices have declined about ⅛d. from those of last report. At auction 3,759 bags Singapore were offered, about three-fourths selling at 3⅛d. to 3¼d. per lb. Of Penang the quantity offered was 2,461 bags, of which about half sold at 3d. to 3⅛d. per lb. Private transactions extremely limited. White: Very flat, and also declined ⅛d. to ¼d. per lb. One-third of 1,105 bags Singapore at auction was taken, realising 5⅞d. to 6⅛d. for ordinary to good.

SAGO.—This import is flat, with a slight decline in price. Of 3,379 bags and boxes offered at auction only a small portion sold at 17s. 6d. to 18s. per cwt. for good bold, and 17s. for middling small. Sago Flour: Quiet, and of 2,925 bags at auction a few only sold at 14s. to 14s. 6d. per cwt. for middling old.

TERRA JAPONICA.—Market flat, and prices lower. Of 370 bales Cutch Pegue at auction a few only sold at 30s. 6d. to 31s. for middling, and a parcel of first-class sea-damaged realised 30s. to 30s. 6d. Gambier is also cheaper, 1,637 baskets Cubes having sold at 30s. to 30s. 6d.

MANILA HEMP.—The quantity offered has been more in proportion to the demand, but a still further supply is needed. The whole of the quantity at auction, consisting of 2,500 bales Albay quality, sold at £51 10s. to £52 10s. per ton.

SPICES.—Cloves: Penang rather cheaper; of 69 cases at auction, two-thirds sold at 1s. to 1s. 0¼d. per lb. for good; later 27 cases were bought in at 1s. 1d. per lb. Nutmegs: Fine bold are scarce, and alone maintain their value, commoner sorts being cheaper. At auction there were offered 129 cases Penang, 11 cases Singapore, and 18 casks Batavia, of which about half sold at 3s. 10d. to 4s. per lb. for good to fine bold, and 1s. to 1s. 11d. for ordinary small to good medium. Ginger: Rather dull, the only sale being 29 cases very low dark Cochin at 54s. per cwt. Mace: The demand is only for good qualities, ordinary and common being neglected. At auction there were 26 cases Singapore and 26 casks Batavia, about one-fifth of which sold at 3s. 1d. to 3s. 7d. per lb. fair to good palish, and 1s. 6d. to 1s. 10d. middling to good reddish.

CINNAMON.—At the quarterly sales 1,882 bales were offered, an account of which is thus given in Messrs. Lewis, Peat, and Mackay's Circular:—Superior was abundant, in very little request, and declined 6d. to 9d. per lb.; 1st sort ruled at par to 3d. decline; 2nds, 3rds, and 4ths at previous value for really good, and a 1d. to 3d. decline on common to middling. 466 bales 1st sort at 1s. 1d. to 2s. 9d. including the "superior;" 737 do. 2nd at 1s. to 2s. 6d.; 399 ditto 3rd at 1s. to 2s. 1d.; 288 ditto 4th and Jungle 10d. to 1s. 6d. At a small subsequent auction higher prices were realised.

COCOA-NUT OIL.—The market has continued steady at previous rates but the demand is limited and the business done trifling. Only 55 casks Ceylon at auction, quotation £48 10s. to £49 per ton.

OILS.—Anniseed: Selling slowly at previous quotations. Cinnamon: steady, and only one case sold out of five offered at auction for 2s. 3d. per oz. Citronelle: Without change, two-thirds of 4 cases offered sold at the former price of 3½d. to 3¾d. per oz. Lemon Grass: 7 cases offered at auction, all retired.

JAPAN WAX.—Good qualities continue scarce and are much wanted. Of 485 boxes at auction two-thirds watery saucers sold at 54s. to 64s. per cwt.

INDIA RUBBER.—Very quiet, no demand and but little offer. At auction 42 caskets Penang were bought in at 1s. 9d. per lb.

GUTTA PERCHA.—The market continues very flat. At auction 55 tons were offered, of which a small portion only sold at 11½d. to 14d. per lb. for ordinary to middling mixed and reboiled. Arrivals are expected and sales advertised.

GUMS.—Benjamin: 57 cases Siam at auction sold at £29 to £30 10s. per cwt. for 2nd to 1st size tear in block; £13 to £15 dust and seed in block; and £16 to £18 dark rough. Sumatra retains for the most part its former value. Of 117 cases at auction, 10 cases good seconds realised £13 2s. 6d. to £13 5s. per cwt.; 12 cases middling seconds, Singa- £10 2s. 6d.; and 13 cases brown thirds. £5 to £5 5s. Copal: 137 cases pore coated and unsifted were bought in at 40s., and 54 boxes sold at 35s. Damer: Scarce and firm; 30 cases at auction retired. Gamboge: This import which advanced so suddenly to double the previous value has again receded, and out of 9 cases offered, one only sold at £25 per cwt. for fair pipe but broken, being little more than half our last quotation.

TIN.—This market since our last report has exhibited great improvement, and prices for Foreign have advanced from 20s. to 40s. per ton with fair business doing. The latest quotations are, for square Straits, £81 to £81 10s. per ton; for round bottom, £81; and for Banca, £83. At Liverpool, Straits is held at £81 to £82.

GALLS.—Of Japan, 128 cases were bought in at 64s. to 65s. per cwt., very small 60s.; 5 cases broken sold at 57s. Of China, 57 cases sold, one lot at 62s. 6d., remainder, 62s. per cwt. The stock of China and Japan amounts to 1,730 cases against 950 at the same period of 1865. The imports during the past 10 ten months of the present year have been 5 165 cases against 3,320 during the corresponding period of last year.

HIDES AND SKINS.—The sales of East India Hides during the past month have been large, and amount to 320,736 Hides. Batavia: 985 Buffalo Hides have been offered at the sales, but without finding buyers. Singapore, &.: The sales comprise 1,918 Singapore and Penang Buffalo Hides which realised full prices. Best 5½d. to 6d. per lb.; Seconds 4¾d. per lb. Manila Buffalo: Meet little inquiry. 449 Hides have been sold; heavy 4¾d. per lb.; thirds 3¼d. per lb.

HORNS.—The quotation for Singapore Deer Horns is 45s. to 50s. per cwt.

MISCELLANEOUS.—Blacklead: Very quiet, and 223 barrels at auction all retired. Ebony Wood: Nothing doing. Sapan Wood: 14 tons Ceylon sold at £9 10s. per ton. Musk: 1 caddy Tonquin bought in at 35s. Soy: Remains flat; 12 casks China and 97 cases Japan at auction all retired. Tortoiseshell: 1 case (92 lbs.) of Penang sold at 12s. 6d. per lb. good middling, and 2 cases Manila partly sold at 16s. per lb. Turmeric: Of 95 bales China offered at auction, 20 bales good with some bulbs sold at 40s. per cwt. Rattans: Steady; of 11,272 bundles Penang, and 8,175 bundles Rangoon at auction, two-thirds sold at 3s. 1d. to 5s. 6d. per 100. Cubebs: 59 bags sifted Singapore bought in at 75s. Japan Cassia: 47 bales and 60 cases bought in at 50s. to 60s. and 160 mats bought in at 45s. Anniseeds: Of 75 cases China Star offered 53 sold, mouldy 79s. to 82s. per cwt., and 3 cases fair sound 85s. per cwt. Preserves: 97 cases China chiefly Chylong Ginger sold at 1s. 1½d. to 1s. 1¾d. Isinglass: Manila quoted at 1s. 4d. to 1s. 9d. Indigo: At Liverpool 8 chests East India sold at 5s. 10d. to 7s. 5d. per lb.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars £6s. 5s. to £6 10., nail rod, £8 5s. to £8 15s.; hoops, £9 10s. to £10; sheets, single, £10 10s. to £10 15s.; Staffordshire bars, £8 7s. 6d. to £8 15s.; rails £6 5s. to £6 10s.

STEEL.—Swedish keg, £15 15s. to £16.

COPPER.—Sheet and Sheathing, £88 to £93 per ton; yellow metal, 7¼d. to 7¼d per lb.

TIN.—£82 to £85 for block; £83 to £86 for common bars. Tin plates, best charcoal I.C., 33s. to 34s.

LEAD, &c.—English pig, W.B., £22 10s.; shot, patent, £23 10s. to £24; sheet, £21 5s.; spelter, £21 5s. to £21 15s.; zinc, English sheet, £28; quicksilver, £6 18s. to £7.

The following is from the Circular of Messrs. French and Smith:—Our markets have dragged heavily during the past month, buyers taking only for immediate needs, speculation being almost forgotten in the trade. Iron: Scotch pig remained with scarcely any variation in price until within the last few days, when the market became more depressed. We quote warrants 52/9. The price is now reasonable enough; a few of the choice brand are very scarce. The disclosure just made in the Glasgow Bankruptcy Court of the operations of the late pig iron "rig" is not very creditable to any concerned, but is particularly dishonourable to the brokers engaged, as in the agreement signed by each party he binds himself "to give no advice, hint, or information, directly or indirectly, to any outside party, with regard to operations in Scotch pig iron warrants," consequently the brokers must have sacrificed their old and regular customers for the interest of this clique. However, the result to all concerned was heavy loss. Welsh iron is in moderate demand; for Staffordshire also there is a fair inquiry. Copper: For this metal the market continued depressed throughout the month. In some descriptions of foreign there has been a little more inquiry within the last few days. The quantity of Straits tin afloat for Europe is about 442 tons, against 1418 in 1865, and 1110 tons in 1864. Tin Plates: The shipments for October were 125,000 boxes, against 105,000 in the same month last year. The work continue full of orders, and it is difficult to obtain deliveries in anything like reasonable time. Lead continued firm in price, and as there is scarcely any foreign Soft on the market the price seems likely to be well maintained. Spelter: Advanced £1 per ton, the present quotation being £21 5s. to £21 15s. The stock on the 31st ult. was 4896 tons, against 6,684 tons the same period in 1865. Quicksilver: No change.

EXPORT OF BULLION TO CHINA &c.

FREIGHTS AND CHARTERS.

Outward berth freights still remain low, and there seems but little likelihood of a speedy improvement. Homeward transactions are nominal.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 40s. weight, 50s. meast. To Nagasaki: 50s. weight or mea. To Shanghai: 45s. weight, 45s. to 47s. 6d. meast. To Hong Kong: 40s. weight or meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Ceylon: 25s. to 30s. weight, 35s. meas.

The current quotations for coal, &c., are as follow:—From Wear or Tyne per keel. For Hong Kong: £41. For Singapore: £31. For Shanghai: £50. For Saigon: £50. For Yokohama: £51. From Newport, Cardiff or Swansea, per ton. For Hong Kong: £2. For Singapore, £1 9s. For Shanghai: £2 10s. For Saigon: £2 8s. For Yokohama: £2 7s. 6d. Batavia: £1 6s.

The Admiralty have invited tenders, and subsequently ordered the Argonaut to be surveyed, for the conveyance of 288 tons navy provisions from Deptford to Hong Kong.

CASUALTIES.

The Iddo Kimball, Gillespie, from New York to Shanghai, put back to New York, Oct. 22, having sprung a leak during a hurricane experienced on the 18th Sept., in lat. 15, lon. 29.

Advices from Mauritius, dated 18th Oct., report that the Jan van Schaffelaar, which had arrived there from Batavia for Rotterdam, was leaky.

The Excelsior, Maxwell, from London to Colombo, &c., arrived at St. Vincent, Oct. 1, leaky, and with damage to stern-post, which was being repaired, had thrown overboard about 30 tons of cargo.

Intelligence has been received that the Westminster, from Shanghai to London, has been wrecked on the Prata shoal.

The Costa Rica (steamer), which left New York on 10th of October for Hong Kong, was obliged to put back to New York, leaky and disabled.

The Senior, Bakker, from Batavia to Amsterdam, has twice been in collision in the Great North Holland Canal.

MISCELLANEOUS.

At ST. VINCENT.—Oct. 1, Excelsior, Maxwell, from London for Colombo, &c.; 6, Erl King (str.), Pinel, from London, and left 7th for China, &c.

On the 3rd instant Messrs. Randolph, Elder, and Co. launched from their shipbuilding-yard at Fairfield, the Govan, the *Satara*, a screw steamship 1,230 tons, builders' measurement, and 250-horse power (nominal), of the following dimensions:—Length over all, 245 ft.; breadth, 32 ft.; and depth (moulded), 22 ft. The *Satara* has been built to the order of the British India Steam Navigation Company, and is intended as an addition to their extensive fleet. Her engines, which are being supplied by the same firm, are direct-acting, with surface condensers.

The P. and O. Company's new screw steamship *Surat*, Captain G. Dunn, sailed from Southampton on the 7th inst. for Calcutta, via the Cape of Good Hope, to be employed in the mail service on the India station.

JAPAN & CHINA NEW MAIL ROUTE
VIA PANAMA.

THE PACIFIC MAIL STEAM SHIP COMPANY despatch their splendid side-wheel Steamers from NEW YORK on the 1st, 11th, and 21st, and from PANAMA on the 9th, 19th, and 29th of every month for SAN FRANCISCO, calling at ACAPULCO, MANZANILLO, MAZATLAN, *en route* thence to YOKOHAMA and HONG KONG. Passengers from England may connect with this line at New York by any of the various steamers from Liverpool, Southampton, or Falmouth, to that port, or at Panama by the steamers of the Royal Mail Steam Packet Company leaving Southampton on the 2nd and 17th of every month.

PRELIMINARY PROSPECTUS OF

THE EASTERN ASIA TELEGRAPH COMPANY

(LIMITED).

(TO BE REGISTERED UNDER THE INDIAN COMPANIES' ACT, 1866.)

CAPITAL £150,000 (with power to increase), in SHARES of £10 each.

Provisional Directors.

WILLIAM PATERSON, Esq., Singapore (Messrs. Paterson, Simons, and Co.)
W. H. READ, Esq., Singapore (Messrs. A. L. Johnston and Co.), Consul for the Netherlands.
J. J. GREENSHIELDS, Esq., Singapore (Messrs. Guthrie and Co.)
ALEX. FRASER, Esq., Batavia, Managing Director of the Netherlands India Steam Navigation Company.
J. J. E. BROWN, Esq., Pinang (Messrs. Brown and Co.)
LAWRENCE NAIRNE, Esq., Pinang (Messrs. Nairne and Co.)
SAMUEL VAN HULSTIJN, Esq., Batavia.

(With power to increase their number.)

Interim Secretary—A. LOGAN, Esq., Singapore.

It is intended to form a Board of Directors in London; meanwhile, communications may be addressed to W. W. Ker, Esq., 101, Cannon-street, E.C.

It is proposed to construct a line of Telegraph by land from Moulmein or some other point in the Tenasserim Provinces where the British Indian line terminates, passing down the Malay Peninsula to Singapore, touching at Penang and Malacca. A branch line to be carried from Tavoy to Bangkok, the capital of Siam, and thence (with permission of the French Government) to Saigon in Cochin China. The length of these lines, it is estimated, will be about 2,000 miles. The main line will also be joined with that of the Netherlands India Government by means of a cable from Malacca to Bankalis in Sumatra.

The Governor-General of India in Council is prepared to give every reasonable assistance and facility to the construction of that portion of the line which will pass through British territory, and the Governor-General of Netherlands India has expressed himself in very favourable terms in regard to the proposed junction with the Netherlands India Telegraph system.

Concessions, for ninety-nine years each, of the exclusive right to carry the lines through their respective territories, have been granted by His Majesty the King of Siam, the Sri Maha Rajah of Johore, and the Sultan of Salengore, and have received the sanction of the Government of India and the approval of the Foreign Office. The protection of the several native Governments has been formally promised in the construction and working of the lines.

From inquiries which have been instituted, it is believed that the proposed lines from the Tenasserim Provinces to Singapore and Bangkok could be erected within one year from their being commenced, and from the progress which is being made with the line of the Netherlands India Government through Sumatra, it is expected that it will be completed before the end of 1867, so that there would be no delay in bringing the two lines into conjunction and immediate working.

The proposed lines would form important links in the establishment of telegraphic communication between Europe, via India, with the Australian Colonies on the one hand and with China on the other. Negotiations have, indeed, been opened with the several Governments of the former, which have promised every assistance and encouragement to the extension of the line in that direction. It is believed that the sanction of the King of Cochin China could be obtained to the construction of a line from the Siamese frontier to his capital, Hué, on the Gulf of Tonquin, whence by submarine cable an extension to Hong Kong could be completed with stations at the island of Hainan if thought necessary.

The advantages of a land over a submarine line of Telegraph are obvious. The much smaller cost of placing such a line (less than two-thirds), the greater facilities for effecting repairs and their trifling expense, as compared with the employment of steamers, &c., in the case of submarine lines, need scarcely be pointed out, and, in fact, the cost of erecting the 2,000 miles of lines proposed, with all other necessary outlay, is estimated not to exceed £50 per mile. By small gratuities to the local chiefs of the districts through which the lines will pass their perfect security may be effectually assured, whilst the experience of the persons engaged in laying the Dutch lines through Java and Sumatra, countries in all respects similar to the Malay Peninsula, has shown that there are no great physical difficulties to be overcome, and no danger to be dreaded from the hostility of the natives, or from the destructive habits of wild beasts.

General No. 943 of 1866.—No. 133.
From the Deputy Secretary to Government, Straits Settlement, to Messrs. Paterson, Read, and Greenshields, Singapore.
Dated Penang, the 28th August, 1866.

Gentlemen,—With reference to previous correspondence on the subject of the intended establishment of telegraphic communication between Moulmein and the several stations in the Straits, I have been desired, by His Honour the Governor, to inform you that His Excellency the Governor-General in Council has no objection to the concessions offered to the proposed Telegraph Company by His Majesty the King of Siam and His Highness the Tumongong of Johore, and a recommendation will therefore be made to Her Majesty's Government for the ratification of the terms conceded by the former, whilst the necessary communication will, at once, be addressed by this Government to the latter Ruler.

The Governor-General in Council is prepared to give every reasonable assistance and facility to the Company, when formed, in erecting the portion of the line which will pass through British territory, and, in regard to the terms to be given to the Company, will be ready to consider specific proposals, based upon the [following] stipulations (marginally noted), whenever they may be duly submitted:—

1st. A guarantee of the monopoly as far as a British territory is concerned for a prescribed number of year only.
2nd. A limited rate of charge.
3rd. Completion of the line within a specified time.
4th. Government to be empowered to cancel the agreement in the event of the telegraphic service not being conducted to its satisfaction.

I have the honour to be, &c.,
M. PROTHEROE, Lieut., Dep. Sec. to Govt.

Extract of a letter from H.M. Consul at Bangkok, dated Aug. 23, 1866.

"I have received from Lord Clarendon an answer to my despatch about your Telegraph line, and am willing to give you any assistance in my power."

Copy of letter from India Office to Foreign Office.
India Office, June 14, 1866.

Sir,—I am directed by Lord de Grey to acknowledge the receipt of your letter of the 8th inst. with its enclosures from H.M. Consul at Bangkok, relative to the proposed construction of a line of Telegraph from Rangoon to Singapore and Bangkok; with respect to which he has no observation to offer, further than that it would be gratifying to him to learn that the project has been successfully accomplished.

J. STANSFELD.

Genl. No. 335 of 1866.—No. 32.
From the Deputy Secretary to Government, Straits Settlement, to Messrs. W. Paterson, W. H. Read, and J. J. Greenshields, Singapore.
Dated Singapore, March 23, 1866.

Gentlemen,—I have the honour to acknowledge the receipt of your letter of the 22nd inst. on the subject of the establishment of a telegraphic line between this and Moulmein, and to state in reply that His Honour the Governor will have much pleasure in recommending the measure to the favourable consideration of His Excellency the Governor General in Council.—I have the honour to be, &c.,
M. PROTHEROE, Lieut., Dep. Sec. to Government.

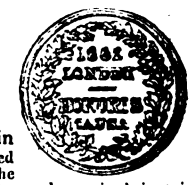
HARMONIUMS.

W. E. EVANS,

THE ORIGINAL INVENTOR AND MANUFACTURER OF HARMONIUMS IN ENGLAND,

RESPECTFULLY draws the attention of intending purchasers to his Unrivalled Instruments, in which he has recently introduced several important patented improvements. Amongst which may be specially mentioned the "double-action expression wind movement," by means of which the wind is supplied with half the usual exertion, and the most perfect expression realised; thus superseding the use of the "Expression Stop," so difficult of management in all Harmoniums. The advantage to purchasers is obvious, in selecting an instrument of a manufacturer whose whole life has been devoted to perfecting the Harmonium, and who finishes with his own hand every Instrument that leaves his Manufactory; whilst the prices charged are no higher than those of other makers. Every Instrument is Warranted. The undermentioned, SPECIALLY PREPARED FOR INDIA, are recommended:—



No. 1.—With One Stop, in Oak or Mahogany... ... ... 11 Guineas.
(Tinned Packing-case, and delivery at any home port, 35s. extra).

No. 3.—With Four Stops, in Oak or Mahogany ... ... 21 Guineas.
(Tinned Packing-case, and delivery at any home port, 40s. extra)

No. 5A.—With Twelve Stops, in Oak or Mahogany ... ... 29 Guineas.
Tinned Packing-case, and delivered at any home port, 42s. extra).

No. 6A.—With Fifteen Stops, in Oak or Mahogany ... ... 43 Guineas.
(Tinned Packing-case, and delivery at any home port, 45s. extra).

No. 9.—With Nineteen Stops, and Two Rows of Keys, in Oak or Mahogany... ... ... 80 Guineas.
(Tinned Packing-case, and delivery at any home port, 63s. extra).

THE "EVANS" IMPROVED HARMONIUMS

Are remarkable for the entire absence of the nasal and reedy tone which has hitherto been the great impediment to the general adoption of the Harmonium in private houses whilst the sluggishness of speech, another great defect in most Harmoniums, has been entirely overcome by W. E. EVANS' improvements, without any MECHANICAL appliances. Fully detailed Price List, with Testimonials from the most eminent Musicians, &c., may be obtained of the Sole Manufacturer and Patentee,

W. E. EVANS, 2B, MARKET-PLACE, GREAT PORTLAND-STREET, LONDON, W.

Mr. Evans is in no way connected with any other House in London.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

DR. J. COLLIS BROWNE'S CHLORODYNE. Vice-Chancellor Sir W. Page Wood stated publicly in Court that Dr. J. Collis Browne was undoubtedly the Inventor of Chlorodyne; that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See *The Times*, July 13, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of any service in Cholera was Chlorodyne.—See *Lancet*, Dec. 31, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. Extract from *Medical Times*, Jan. 12, 1866.—"Is prescribed by scores of orthodox medical practitioners. Of course it would not be thus singularly popular did it not supply a want and fill a place."

DR. J. COLLIS BROWNE'S CHLORODYNE is the best and most certain remedy in COUGHS, COLDS, ASTHMA, CONSUMPTION, NEURALGIA, RHEUMATISM, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE is a certain cure in CHOLERA, DYSENTERY, DIARRHŒA, COLICS, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE. EXTRACT *from the* GENERAL BOARD OF HEALTH, *London, as to its efficacy in Cholera*—"So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. MONTGOMERY, Esq., *late Inspector of Hospitals, Bombay*.—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health after eighteen months' severe suffering, and when all other remedies had failed."

DR. J. COLLIS BROWNE'S CHLORODYNE. CAUTION.—None genuine without the words "Dr. J. Collis Browne's Chlorodyne" on the Government Stamp. Overwhelming medical testimony accompanies each bottle. Sole Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury, London. The immense demand enables the proprietors to reduce the price; it is now sold in bottles, 1s. 1½d., 2s. 9d., 4s. 6d., and 11s.

AGENT: Hong Kong, Mr. A. S. WATSON.

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.

HUBBUCK'S PATENT WHITE ZINC PAINT.

THE most durable and beautiful paint known, is cheaper than White Lead, and is proved to be superior for all purposes than the pernicious Lead Paint, and equally adapted for all climates.

Its whiteness is unaffected by bilge water, boiling sugar, or noxious gases.

It is free from any poisonous ingredient, and suited in all respects to the use of the painter.

Each Cask of Pure White Zinc is Stamped "HUBBUCK, LONDON PATENT."

Inferior Zinc Paint, so marked, having been sold in Foreign Markets, the Patentees offer a Reward of FIFTY POUNDS for information which will lead to the conviction, in an English or Colonial Court, of those who have pirated their Mark. Both Exporters and Retailers are liable for its sale.

THOMAS HUBBUCK AND SON,
HIT E LEAD, OIL, PAINT, AND VARNISH WORKS,
24, LIME-STREET, LONDON.

HUBBUCK'S ANTI-CORROSIVE PAINTS

Are very durable, and the most valuable protection to Iron Roofs, Bridges, Piers, Ships and Buildings, exposed to stormy weather and scorching sun; they soon become extremely hard, and do not blister.

They are made of Stone, Slate, Copper, White, Blue, Green, or any other Colour that is desired.

HUBBUCK'S ANTI-OXIDATION COMPOSITION,

For Coating Iron and Wood Ships' Bottoms; a preservative against fouling and corrosion. This Composition is ready for immediate use, and obviates the waste of carrying unmixed Paints, Oils, Driers, &c. It is also applicable to all the purposes of other Paints.

HUBBUCK'S PALE BOILED OIL

Has less colour than Raw Linseed Oil, is a quick, hard and certain drier for White and Light Coloured Paints.

PAINTS AND OILS PROPERLY PACKED FOR EXPORTATION.

PEACOCK & BUCHAN'S COMPOSITION FOR IRON SHIPS.

THIS is now established as the best and cheapest Composition known for keeping the Bottoms of Iron Ships CLEAN and free from Corrosion or GALVANIC ACTION. Apply to the Manufacturers direct, at SOUTHAMPTON, or to their accredited Agents at all the principal sea ports of the world.

From Captain John Ralph Engledue, Managing Director of the Thames Iron Works Ship Building, Engineering, and Dry Dock Company, Orchard-yard, Blackwall:—

"The Thames Iron Works, Ship Building, Engineering, and Dry Dock Company (Limited),
"Orchard-yard, Blackwall, E., September, 26th, 1865.

"Messrs. Peacock and Buchan.

"Gentlemen,—I shall at all times have much pleasure in bearing testimony as to the value and superiority of your Compositions for Ships' bottoms.

"I have used the No. 2 extensively for the last fifteen years, more particularly on the bottoms of the iron ships belonging to the Peninsular and Oriental Steam Navigation Company, and in every instance successfully. It is easily applied, economical, keeps the bottom CLEAN, and also has the property of preserving the iron.

"I visited, in dock, an iron SAILING vessel, called the 'Chile,' a few weeks since, and found her bottom perfectly clean, which had been coated with your Composition for upwards of twelve months, having made a voyage to New Zealand and back, and in salt water the whole time.

"I have also used your No. 1 Composition for the bottoms of wooden ships, coppered, and found it most advantageous, making the copper last double the usual time, and then only taken off to recaulk.

"I have at various times tried preparations of copper on iron ships, and in every case found the iron and rivet damaged.—I am, Gentlemen, yours faithfully,

"(Signed) J. R. ENGLEDUE."

"Egyptian Navigation Company, Azeeziah Mussriah, 61, Mark-lane, 7th July, 1865.

"Messrs. Peacock and Buchan, 39, Upper East Smithfield.

"Dear Sirs,—I have received orders to send to Egypt three tons of your patent Composition for ships' bottoms, same as supplied me in July, 1864. I now wish to know the soonest time you could have this packed and ready for shipment, as there is one of the Company's steamers leaving London about the end of next week. Please reply by return, and state price.—I remain, yours obediently,

(Signed) D. ABDUL HAMID BEY,
"I. FRICKEN."

CHRISTY'S Cases for conveying Fruit Trees, Vines, Plants, Flowering Shrubs, and Seeds, to the East, when shipped in the holds of Steamers like ordinary Case Goods. Mr. John Waterer, junr., the American Nursery, Bagshot, Surrey, or Mr. Christy, 28, Pall Mall, London, are prepared to execute orders for gentlemen in the East, and beg to call attention to the list of prices and conditions. FRUIT TREES, including PEARS, APPLES, PLUMS, CURRANTS, GOOSEBERRIES, PEACHES, NECTARINES, APRICOTS, CHERRIES, and QUINCES, per case, 10 Guineas.

	Guineas.
20 FRUIT TREES, with Ten venes, per case	14
ROSES of the best kinds ... ... „	15
RHODODENDRONS and AZALIAS, &c.	15
GARDEN SEED (various) ... ... „	5 upwds.

The number depends on the size of the roots; the cases average 30 plants each.

All the above prices include freight, insurance, and all charges to any port where the P. and O. steamers call. The season for shipment commences about September and ends in January. All orders must be accompanied by a remittance or orders for payment. The name of the agent at the port of arrival must be furnished, to prevent delay in forwarding.

IMPORTANT ANNOUNCEMENT.

JOSEPH GILLOTT,
Metallic Pen Maker to the Queen,

BEGS to inform the Commercial World Scholastic Institutions, and the Public generally that, by a novel application of his unrivalled Machinery for making Steel Pens, he has introduced a NEW SERIES of his useful productions, which, for EXCELLENCE OF TEMPER, QUALITY OF MATERIAL, and above all, CHEAPNESS IN PRICE, must ensure universal approbation, and defy competition.

Each Pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with label outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition J. G. has introduced his WARRANTED SCHOOL and PUBLIC PENS, which are especially adapted to their use, being of different degrees of flexibility, and with fine medium, and broad points, suitable for the various kinds of Writing taught in Schools.

Sold Retail by all Stationers and Booksellers. Merchants and Wholesale Dealers can be supplied at the Works, Graham-street, Birmingham; at 91, John-street, New York; and 37, Gracechurch-street, London.

PRIZE MEDAL

ELASTIC  BOOTS.

W. SPARKES HALL & CO. beg to call attention to their PANNUS CORIUM BOOTS which are peculiarly adapted for India or any warm climate. They have the appearance of leather, and are cleaned with ordinary Blacking, but the material is much softer than any leather ever introduced. Pannus, Corium Boots are now coming into general use in India, and will be found a great luxury to Ladies and Gentlemen in any climate with tender feet.

A Printed Circular, with full particulars of Prices, forwarded free to any part of the world.

A. & F. PEARS, Soap Refiners, and Perfumers,

DEPOT:—91, GREAT RUSSELL-STREET, LONDON.

MANUFACTORY:—LANADRON WORKS, ISLEWORTH, NEAR LONDON.

Shippers Supplied on Liberal Terms.

PRIZE MEDAL,

INTERNATIONAL EXHIBITION, 1862.

AWARDED TO

F. MORDAN,

FOR

IMPROVEMENT IN WRITING MATERIAL

F. MORDAN'S EVERLASTING GOLD PEN is now established in reputation as the most beautiful, useful, and truly economical Pen ever manufactured. Thirty years' experience has only increase, the estimation in which it is held, and tested the value of the warranty given with it. F. MORDAN can now proudly point to a sale of upwards of 90,000.

F. MORDAN'S PATENT PNEUMATIC INKSTANDS, the most useful and simple ever offered to the public perfectly protecting the ink from dust or evaporation.

F. MORDAN'S WRITING, COPYING, BLUE, BLUE BLACK, BLACK, COLOURED, and MARKING INKS, in bottles of new and useful designs, with patent spouts and stoppers. These bottles are rapidly superseding all others, there being no increase of price for these improvements.

F. MORDAN'S PERFUMED MAUVE INK for Ladies' writing.

F. MORDAN'S SCENTED SEALING WAX in fancy colours; also HARD INDIA WAX for warm climates.

F. MORDAN'S LIQUID GLUE, for mending Glass, China, Wood, Metals, &c.

F. MORDAN'S PREPARED LIQUID GUM, for Office use, and general purposes.

Merchants and Shippers can obtain Illustrated Catalogues on application at the Manufactory,

LBION WORKS, 326, CITY ROAD, LONDON.

DINNEFORD'S FLUID MAGNESIA.

THE Medical Profession for Thirty Years have approved of this pure solution of Magnesia as the best remedy for Acidity of the Stomach, Headache, Heartburn, Gout and Indigestion; and as a mild aperient it is especially adapted for ladies and children. Prepared by

DINNEFORD & CO.,

CHEMISTS, &c.,

172, NEW BOND-STREET, LONDON

And sold throughout the world by all respectable Chemists.

CAUTION.—See that "Dinneford & Co." is on each bottle and red label over the cork.

HOLLOWAY'S OINTMENT AND PILLS.—Much watchfulness must be exercised as winter advances, and the earliest evidences of ill-health must be immediately checked and removed or a slight illness may result in a serious malady. Relaxed and sore throat, diphtheria, quinsey, throat cough, chronic cough bronchitis, and most other pulmonary affections will be relieved by rubbing this cooling Ointment into the skin as near as practicable to the seat of mischief. This treatment, so simple and effective, is admirably adapted for the removal of these diseases during infancy and youth. Old asthmatic invalids will derive marvellous relief from the use of Holloway's remedies, which have brought round many such sufferers and re-established health after every other means had signally failed.

THE AGRA BANK, LIMITED.

To be incorporated under the Companies' Act, 1862, For the purpose of carrying on the Business of the Old Agra and United Service Bank.

CAPITAL, ONE MILLION STERLING,

Of which £400,000, in 40,000 Shares of £10 each, to be fully paid-up, are now offered for Subscription.

These are the Shares described as "A" Shares in the accompanying Statement.

Upwards of one-half of these Shares has been already agreed to be subscribed. Deposit on application, £1 per share; payment on allotment, £2 per share; payment 15th July, 1867, £3 per share; payment 15th January, 1868, £4 per share. With power to pay up in full at any of these periods, dividends being allowed on all payments *pro rata*.

DIRECTORS.

CHAIRMAN—JAMES THOMSON, Esq., Chairman of the Madras and East India Irrigation Companies.

James Spicer, Esq. (Messrs. J. Spicer and Sons), Vice-President and Trustee of the Equitable Assurance Society.

Robert Slater, Esq. (of the late firm of Morrison, Dillon, and Co.), Director of the Fore-street Warehouse Company.

John Stewart, Esq., Director of the Imperial Ottoman Bank.

J. Carrington Palmer, Esq. (Messrs. McKillop, Stewart, and Co.)

Col. the Hon. H. B. Dalzell, late Bengal Artillery.

(With power of increase as mentioned below.)

BANKERS.

Messrs. Glyn, Mills, Currie, and Co.

MANAGER.

Macintosh Balfour, Esq.

SOLICITORS.

Messrs. Ashurst, Morris, and Co.

AUDITORS.

David Chadwick, Esq.; and second Auditor to be appointed.

The objects of the Bank are:—

To take over the assets and liabilities of The Agra and Masterman's Bank (Limited), and liquidate the same as a working Bank, and to continue that portion of the business formerly carried on by The Agra and United Service Bank (Limited).

The proposed plan for this purpose is explained in the accompanying statement, which has been already circulated, and which, at a numerously attended meeting of the shareholders of The Agra and Masterman's Bank (Limited), held at the London Tavern, on the 18th Oct., 1866, was unanimously and cordially adopted, and a committee of shareholders appointed to "carry out the necessary arrangements to give effect to the proposal, with power to make such modifications therein as the committee may find necessary."

Attention is drawn to the modifications already agreed to by the committee, as appearing at foot of the accompanying statement.

The Committee have nominated the six above-named Directors, and it is intended to add, not exceeding three additional Directors, to be selected by the Board from the subscribers to the new capital, making the number of original Directors not exceeding nine, but with power to increase afterwards, if found desirable.

The business which it is proposed to carry on has been tested by the experience of the past to be both safe and profitable. From the establishment of The Agra and United Service Bank in 1833, up to the end of 1863, when it changed its name and entered upon an extended field of operations, it proved itself a growing and unchecked success, and during the years 1862 and 1863 respectively paid to the Shareholders clear net dividends of 18 and 20 per cent.

The advantages which the proprietors of the shares now offered will receive are:—

(1.) The benefit of an old established and profitable business, without any payment for goodwill.

(2.) They will have a preference dividend out of profits for two years of 10 per cent. per annum on their paid up capital.

(3.) They will have the option at once, or at any of before-named periods, of paying up the whole amount of £10 per share; dividends being allowed on all payments *pro rata*. The liability on the Shares will therefore be *actually*, and not nominally, *limited*.

TO IMPORTERS.

The undersigned beg to remind Importers of Wearing Apparel, and Boots and Shoes, of the many advantages which their long experience as Manufacturers and Shippers, their vast resources, and their intimate knowledge of the requirements of Foreign and Colonial Markets enable them to offer.

PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power, ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz. a Shipwright, an Engineer and a Blacksmith. Dry Godowns for the reception of vessels, stores, &c., when requiring to discharge them.

Amoy, March, 1865.

FOR HONG KONG AND WHAMPOA, the very fast, new clipper JOHN MILTON, A 1, 14 years, 618 tons register, A. PIROUET, Commander; lying in the East India Docks. This ship, built last year, made the passage to China against the Monsoon in 104 days. Has good accommodation for passengers.

For Freight or Passage apply to SHAW, LOWTHER, AND MAXTON, 2, Royal Exchange-buildings, London E.C.

FOR SHANGHAI, to follow the MAITLAND, the celebrated clipper ship SIR LANCELOT, A 1 14 years, 886 tons register, RICHARD ROBINSON, Commander; to load in the East India Docks. This beautiful ship was built last year, on the lines of the Ariel, by Messrs. Robert Steele and Co., of Greenock. Has superior accommodation for passengers.

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, E.C.

Last Shipping Day the 24th November.

DIRECT for SHANGHAI, the magnificent Clyde-built clipper ship HOANG HO, A 1 fifteen years, 565 tons register, J. CARRINGTON, Commander; loading in the East India Docks. This splendid high-classed ship, built in 1864, is strongly recommended to shippers of fine goods.

For Freight apply to GELLATLY, HANKEY, SEWELL, and Co., 27, Leadenhall-street, E.C.

FOR SHANGHAI Direct (last shipping day 8th December), the magnificent China clipper ship LAUREL, A 1 thirteen years, 638 tons register, GEORGE MOODIE, Commander; lying in the East India Docks. This well-known ship (owned by Messrs. John Willis and Son (is strongly recommended to shippers of fine goods.

For Freight or Passage apply to GELLATLY, HANKEY, SEWELL, and Co., of 27, Leadenhall-street, E.C.

Will sail, full or not full, 28th November.

FOR SINGAPORE, BELLE OF SOUTHESK, A 1 ten years, Captain MCKENZIE; W.I. Docks. This beautiful Scotch-built clipper, just returned from her first voyage, made the quickest passage from London of the season.

For Freight or Passage apply to the owners, Messrs. MACTAGGART, TIDMAN, and Co., 34, Great St. Helen's; or to TIDMAN, LANGMORE, and Co., 2, Great St. Helen's.

COLOMBO (CEYLON) Direct (to follow the Palestine), having all her dead weight engaged, and only room for light measurement goods, the new clipper ship BOYNE, AA 1, 618 tons register, R. P. JONES, Commander; loading in the West India Docks. This splendid vessel has a full poop, with magnificent accommodation for the comfort and convenience of passengers.

For passage apply to the owner, W. H. TINDALL, 5 Tokenhouse-yard, E.C.; or for freight or passage to F. TALLACK, 23, Birchin-lane, Cornhill, E.C.

FOR COLOMBO and COCONADA (under engagement to H.M. Council for India, will have quick despatch), the splendid clipper ship BROCKHAM, A 1 twelve years, 1,048 tons register, R. J. BARROW, Commander; lying in the East India Docks. Has excellent accommodation for passengers.

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings.

FOR COLOMBO Direct (under engagement to Colonial Government), to sail on the 23rd November, the fine British-built ship MEDWAY, A 1 12 years, 612 tons register, T. GRIEVES, Commander; loading in the Victoria Docks. This fine vessel is strongly recommended to shippers. Has splendid cabin accommodation.

For Freight or Passage apply to the owner, GEORGE MARSHALL, 3, Cross-lane, St. Mary-at-Hill.

To follow the FRANCES.

And will meet with the usual quick despatch.

DIRECT for COLOMBO, the beautiful fast-sailing ship ABOYNE, A 1 ten years, 444 tons register, JAMES GRANT, Commander; lying in the London Docks. This splendid clipper ship, built in 1864, offers a first-rate opportunity to shippers of fine goods.

For Freight or Passage, apply to JOHN C. CAMPBELL 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

To follow the FRANCES.

Will meet with the usual quick despatch.

DIRECT for COLOMBO, the well-known fast-sailing ship, ABDUL MEDJID, AA 1, (owned by Messrs. Vanner Prest, and Lyth), 400 tons register. J. PITON Commander, West India Docks. This magnificent vessel offers a first-rate opportunity to shippers of fine goods Has elegant accommodation for passengers.

For freight or passage apply to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

Will meet with very quick despatch.

FOR SADASHIGUR, CANNANORE, BEYPORE, and COCHIN.—The beautiful clipper ship, MILBROOK, A 1 9 years; 328 tons register, JOHN BARRON, Commander; West India Docks This fine little vessel has been especially selected to take the place of the Star of Ceylon—lately lost.

For Freight or Passage apply t JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

Steam to Calcutta.

Leaving the East India Docks Nov. 24, last Shipping Day 22nd.

Outward Passage Last Year 64 Days.

DIRECT FOR CALCUTTA, the splendid River-built Twin Screw Steam Ship, "FAR EAST," A 1 12 Years, 1,260 Tons Register, horse power—150 nominal, 600 indicated, HENRY JONES, Commander. This magnificent Ship built in 1864 by Messrs. J. and W. Dudgeon, of Millwall, has a full poop, and her Cabin Accommodation cannot be surpassed.

For Freight or Passage, apply to Captain HENRY JONES, on board; or to GELLATLY, HANKEY, SEWELL and Co., 27, Leadenhall-street, E.C.

Bills of Lading to be had on application to Messrs. Smith, Elder and Co., Cornhill.

Printed for the Proprietors by WOODFALL and KINDER Milford-lane, Strand, W.C., and published by JOHN ELLISON, at the Office of the "LONDON AND CHINA TELEGRAPH," 12, George-yard, Lombard-street, E.C., in the parish of St. Edmund the King—Monday, Nov. 12, 1866.

The Malta and Alexandria cable is again out of order, and we have consequently no news of the French mail from Suez; but it is expected here on the 5th prox. Telegrams via Galle have been received in advance of the mail of 30th Oct. from Hong Kong.

List of Passengers.

PASSENGERS INWARD.

By this mail to Marseilles, per P. and O. str. Massilia.—From Yokohama: Messrs H. James, E. Seyd, E. J. Spence. From Shanghai: Messrs. T. H. Cheshire, J. B. Hallam, C. Glover, A. White, two Japanese and child. From Hong Kong: Mrs. Lambert and servant, Messrs. R. Deacon, H. H. Severs, E. H. Lavers, C. Medina, J. Ellis. From Singapore: Messrs. C. V. Sagade, D. Alexander, R. De Montigny, Lieut. F. Vanderzee. From Penang: Messrs. H. Brand, E. Courtaux, B. Lemmann. From Chiua, via Bombay: Mr. Rennie. From Singapore, via Bombay: Mr. Oppert and infant.

To Malta.—From Hong Hong: Mr. Weld.

To Gibraltar.—From Hong Kong: Miss Acibel. From Singapore: Mr. De Castro, Mr. Mourales.

To Southampton, per P. and & O. steamer Syria, expected to arrive.—Dec. 2. From Hong Kong: Mr. and Mrs. Davidson, child, and servant, Mr. Guild, Mr. Lambert and servant, Mr. Martin, Mr. Caldwell, Mr. Mourilyan, Mr. Howell, Mr. Jameson, Mr. Nicholson.—From Singapore: Mrs. Venn and child, Mr. Christian.—From Galle: Mr. Leake, three children, and two servants, Rev. J. Clowes.

PASSENGERS OUTWARD.

Per P. and O. steamer Ceylon, from Southampton, Nov. 20.—To Singapore: Miss Jury, Mr. H. K. Bilby, Mr. J. C. Morris. To Penang: two second-class passengers. To Ceylon: Mr. G. Hamner, Staff Assist.-Surgeons Gillespie and Dr. Brown, Mr. O. E. Pennyerwick, Mr. H. Banner. To Hong Kong: Rev. D. B. Morris, Mr. W. Stock, Mr. T. Pitcher. To Shanghai: Mr. R. H. Boyce. To Calcutta: Major F. Corbett, Mr. A. Ross, Mrs. Babington, Miss Tweedie, Miss Woodthorpe, Mr. N. Grieve, Mrs. George, Mrs. Hamner, child, and servant, Capt. and Mrs. H. T. Forbes, two children, and servant, Mr. Studd, Mr. T. A. Shaw, Miss M. Jones, Mr. G. F. Barnard, Mr. G. F. Taylor, Mrs. Wright, Miss Delpratt, Mr. T. Gracey, Mr. Clifford, Col. B. Boyd, Miss Davies, Miss Kellner, Mr. and Mrs Dudley, Mrs. Southward, Major and Mrs. Forster, two children, and servant Mr. T. D. Wise, Mr. H. F. Wilson, Miss Pakenham, Mr. J. M. Courtney, Staff Surg-Maj. Ivey, Asst.-surg. Boult, Mr. N. Luard, Mr. W. C. Miller, Capt. Bell Mr. Kavanagh, Lieut. and Mrs. T. H. C. Taylor, and one second-class passenger. To Madras: Miss Hunter, Col. R. Jones, Mr. Tasker, Mr. J. Broughton, Col. Wilson, Mrs. Stradiot, two daughters and son, Capt Harrison, Mr. F. A. Cook, Mr. F. A. Cook, Mr. F. B. Hanna, Mr. and Mrs. A. M. Rainey and child, Mr. A. N. Combe, Mr. G. Smith, Mr. and Mrs. Wright and servant, and one second-class passenger.

From Marseilles, Nov. 28.—To Ceylon: Mr. W. H. De Saram, Mr. M. H. Moss. Mr. James Brander, Dr. J. and Mrs. and Miss Loos, Mr. G. W. Falconer, Mr. and Mrs. Pilkington, Mr. and Mrs. A. W. Bayliss, two children and servant. To Hong Kong: Mr. G. Newton, Mr. Red. To Yokohama. Mr. J. Thurburn. To Calcutta: Mr. W. O Law, Major and Mrs. Hamilton and two children, Mrs. Craster, Miss Pugh, Dr. Liddersdale, Captain and Mrs. Lloyd Bronne, Captain Rowcroft, Mr. and Mrs. A. Young and child, Mr. N. K. Clementson, Mr. and Mrs. F. M. Phillips, Mr. and Mrs. Eldridge, child, and servant, Lieut. and Mrs. Thornton, Miss Taylor, Mr. J. Dickie, Mr. Grubb, Col. Dodgson, Miss E. Parker, Major W. Revely, Mr. and Miss Pugh, Mr. Balfour, Mrs. Bolders, Miss Parry, Lieut. L. K. Scott, Mr. Moran, Mr. Carnac, Hon. Justice Peterson, Miss Smith, Mrs. Duff, Captain F. H. Goold. To Madras: Major and Mrs. Clephane, Mrs. N. E. McLeod, Miss Mein, Mr. P. Macfadyen, Mr. A. McIver, Miss Nicholls, Mr. and Mrs. N. C. Ellis, Mr. Fortey, Captain J. and Mrs. Vertue, Mr. A. G. Dodson, Dr. J. H. Orr.

Per P. and O. steamer, from Southampton, Nov. 27.—To Hong Kong, via Bombay: Capt. Edmonds.

Per P. and O. steamer from Southampton, Dec. 4.—To Ceylon: Mr. H. Irwin, Mr. E. Fuller, Mr. A. N. Davidson, Mr. P. Le P. Bookey, Miss Bookey, Mr. J. H. Maclean, Mr. Hippesley, and brother, Mr. and Mrs. G. Armitage. To Shanghai: Miss Luprark. To Singapore: Miss Gale. To Hong Kong: Miss Roy, the Rev. J. Kingston, R.N.

From Marseilles, Jan. 12.—To Penang: Mr. H. J. D. Padday. To Ceylon: Mr. and Mrs. Boustead. To Hong Kong: Mr. Still.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

From this port we have advices to the 30th September. The English mail of 26th July arrived out on the 16th September. The P. and O. steamer, *Nepaul*, which conveyed it to Yokohama, encountered a severe typhoon, and was in considerable danger during some portion of the voyage. The skill and courage displayed by Captain Hector, under very trying circumstances, induced the passengers to address the following letter to him:—

"We cannot leave the steamer *Nepaul*, after the short but trying passage from Shanghai, without expressing our high appreciation of your abilities as a commander, which have been so signally displayed in the heavy gales we have experienced, seconded as they have been by the able co-operation of the officers subordinate to you.

"We will take it as a compliment to ourselves if you will accept the accompanying purse, with which to purchase for yourself some lasting memento of our voyage and of the dangers from which we have escaped.

"We would be glad if you would have inscribed upon the testimonial which you may choose for yourself, a few words suggestive of the circumstances under which it has been offered to you."

The death of the late Shiogoon is now fully confirmed, although the fact has not yet been officially promulgated. The usual course is for the Gorogio to send in their recommendation to the Mikado, who, if he approves their choices makes it known to the elected Shiogoon and confirms him in his office. The Shiogoon then informs the Gorogio officially of his appointment, and they forthwith issue a decree making it known to the Daimios and the people. In the present case the Gorogio have unanimously voted for Stotsbashi, who was well known at the time the mail left to be in full charge of the Government, although the prescribed formula had not been entirely completed. A rumour had been published by the *Japan Times* to the effect that Stotsbashi had been murdered, but the *Herald* decisively contradicts this on the authority of the Gorogio.

Stotsbashi, an ambitious and powerful statesman, is the son of Mito, who has always been regarded, *par excellence*, as the determined foe to foreign intercourse, and who was condemned to "life-retirement" for the part played by him on the first admission of foreigners. The *Herald* says however that in reality the Prince is suffering for the faults of his Kerai or retainers. In Japan, a daimio has but nominal sovereignty over his retainers; for they are a troublesome set of fellows, and often force their master into a course of action he himself would disapprove of, or, as in the case of Mito, commit deeds and depredations for which he has to bear the punishment. The *Herald* reminds us that lately Choshiu has been thus overruled by his Kerai. He had accepted the terms of the Tycoon, and on a certain day was to have made his submission; but on that day he sent a message to declare that his retainers would not allow him to act up to his written engagement, and they were prepared to abide the issue of war.

Digitized by Google

The new Shiogoon is described as being able, energetic, and in all respects suited to hold the reins of Government; he is dignified, yet kindly and courteous in his manner, and favourably disposed towards foreigners. Until lately, Stotsbashi and Satsuma have been very friendly—both being desirous of introducing reforms into the country, and two such men working together to such ends might have had an immense influence for good. After a while Stotsbashi perceived that not only a reformation in government was Satsuma's design, but a change of dynasty, and on this point the difference of opinion was so great that a more limited intercourse between them was the result. Three powerful daimios, Iwami, Bizen, and Inshiu, whose territories are between Kioto and Nagato—and who hesitated to join the late Tycoon—have not only sent in their adherence to Stotsbashi, but also a contingent to aid his cause.

The *Herald* gives the following account of the death of the late Shiogoon from a disorder which, although described as peculiar to Japan, would appear to be only an aggravated form of dropsy:—"The Shiogoon who a little more than a year ago went forth from Yedo in all the pomp and panoply of war before the eyes of foreigners, died at Osaca about three weeks since of a disease unknown in Europe, but to which Japanese seem to be very liable—and called by them Kake. It commences by the swelling of the knees and thighs, and so long as it is confined to them there is no danger; but if it is unchecked and reaches the abdomen or more particularly the kidneys and bladder it is certain death. Before the late Shiogoon left Yedo he had suffered more than once from dropsical affection and he was anything but strong and healthy. This may account for his inertness; and although we must feel a certain degree of sympathy at his dying so young and just as family endearments were commencing with him, we cannot but declare our opinion that, for the good of the country, a much more able and active man was requisite."

It is believed that the change now taking place in the Government will be the means of putting an end to the war in the South. The *Japan Times* says that the Gorogio themselves have officially acknowledged the defeat of their forces, and that the Prince of Kanga, one of the most important Daimios of the Empire, has offered his services as mediator between the contending parties, and has made to Chosiu overtures for an honourable peace. In reply, the Prince of Nagato has issued a manifesto in which he states the terms upon which he will consent to lay down his arms. He commences by recapitulating the victories he has won and the towns and villages which he has either burnt or taken, and the amount of treasure, guns, munitions of war and stores which have fallen into his hands. The Shiogoon's troops, this curious state paper proceeds to say, have only gained one and that a temporary success—one, too, which reflects more disgrace upon the arms of the Yedo chief than any of the defeats which his generals have suffered. This was at the isle of Ooshima, which was bombarded for five days and finally taken without resistance, there being in the place no soldiery, none but inoffensive peasants and fishermen, who, with their women and children, were massacred without mercy. Chosiu reprehends in the strongest language this shameful deed, and proceeds to show how on the approach of his own people to the relief of the place it was immediately evacuated by the Shiogoon's men and remains at this moment in his possession. Considering himself, therefore, master of the situation, he states that the terms on which he will consent to lay down his arms are:—

1. A public acknowledgment of his innocence of the crimes imputed to him by the Shiogoon.
2. An apology from that chief for having aspersed his character before the Mikado and foreigners, and
3. Permission to retain all his conquests.

Should this last demand be acceded to, Chosiu will be left in possession of a considerable part of the Province of Geyshiu, the whole of Iwari, and of that part of Kokura opposite Simonoseki, giving him entire and absolute command of the Straits. The *Times* thinks that these terms must be accepted, lest harder ones should be proposed. Chosiu boasts, with but little exaggeration, that he has five rifles to the Shiogoon's one. For two years past he has been drilling his troops, and his victories have been won by force of superior arms and discipline. At the same time, it is more than suspected that serious disaffection exists in the ranks of the Shiogoon's army.

A passenger by the *Nepaul*, in a letter to the *Japan Times*, says:—

The trip was a chapter of accidents from beginning to end, but there occurred several episodes which brought out in strong relief the good qualities of the ship, of her commander, and his officers. A most evil omen inaugurated our voyage. None but those who have heard the cry of "a man overboard," witnessed the excitement which it causes, and felt the breathless suspense which follows—can appreciate these sensations from any description. In this case we had none but the experience of sadness. Within a quarter of a minute from the first cry of alarm, the engines were reversed, and in five minutes a boat was lowered; but the poor fellow had fallen over apparently on the wrong side of the ship, and there is little doubt that his life was either beaten out of him by the heavy sea dashing him against her side, or entangled him with the screw, long before the boat was even launched. After half an hour's search she returned without him.

Just before dinner again the cry "Man over board" rang through the ship. Instantly the engines were reversed, and in an incredibly short space of time a boat was lowered, manned by an officer and four men. The launch was successfully made in an exceedingly heavy sea, and to those who watched it the idea must have occurred that five lives were being risked to save one. Happily on this occasion the boat returned, after a most anxious quarter of an hour, with the man, and with the utmost peril and difficulty she was secured in the davits. The sea which washed this man overboard swept another off the deck at the same time, but he was thrown on board again by the returning wave. This fact alone will give you some idea of the state of the sea at the time, and of the skill and daring shown in launching the boat.

During the gale which followed a sudden squall split the main trysail into ribbons, while it was being shifted, and the Malays, panic-struck, let go the halyards and huddled together in the waist. The sea was then breaking all over the ship from stem to stern and rolling frightfully, and the main boom, uncontrollable by the two or three hands that remained at their posts, swayed about and threatened destruction to the deck-house and the life-boats. But here it was that Captain Hector showed to advantage. In his sleeping dress, and with only his officers and the few English sailors to help him, he handled the ropes, managed to secure the dangerous spar, and before long a new sail was bent and set. We were clearly in for bad weather, and the orders to "batten down hatches and skylights" (and even the coal bankers) and to the men to stand by the boats with hatchets and "*in case of emergency not to stick at a trifle*" (which meant cutting away everything), showed us all clearly that we were in great danger. Thus we fared all through the long and anxious night of the 15th—wind and sea constantly increasing—barometer steadily and ominously falling and that sickly oppressive heat prevailing, which is so characteristic a sign of a typhoon. During the hurricane we lost three boats and a man was drawn in by the machinery and crushed to death—but the good ship herself suffered no damage, not making an inch of water and established her character as one of the best sea boats afloat.

The English, Dutch, and French Ministers had been in Yedo for some days—it was supposed on business connected with the late Convention, some provisions of which are not carried out, nor indeed is any intention shown of their fulfilment. In Article VII. was promised a radical reform of the many and flagrant abuses from which the mercantile community suffers in the matters of boat and coolie hire, and also that, to protect merchandise from exposure to the weather, the hatobas (landing places) should be covered in. Three months had elapsed since this Convention was signed, and no steps have been apparently taken for its fulfilment.

During the stay of Sir Harry Parkes in Yedo he was permitted to see the Japanese Mint, with the whole process of turning out the coinage on the old time-honoured system of the country. This is the first time the old exclusive spirit has been broken through in this quarter. Indeed, the Japanese Government seem by every possible mark of civility and respect, to show the British Minister the esteem in which he is held by them. The friends of H.E Sir Harry Parkes will hear with pleasure that Lady Parkes was safely delivered of a son on the 16th September.

The racecourse is fast approaching completion, and when it is in perfect order it will be difficult to find a better in the East. For the present, the residents have to be content with the newly filled-in swamp (now nearly finished) for a recreation ground, but as soon as brighter times dawn upon the Government a better one may be looked for.

NAGASAKI.

By late advices from Nagasaki we learn that H.M.S. *Argus* had left for the Inland Sea, where she will remain to watch proceedings. The *Aviso* has been sold to the Prince of Imo, but not yet delivered. For the present she is still under charter. The *Margaret Campbell* has sailed for England with 76,756 lbs. of green, and 46,281 lbs. of black tea. The *Martin White* and *Emperor* had both arrived safely. The price at which the *Aviso* was sold is said to have been $40,000. Our correspondent points out a singular fall in the value of the tempo. Until recently, an ichibou had been considered worth only 16 to 17 tempos, it is now changed at 25 to 26.

It is surprising that the Japanese, who have so readily understood the mechanism of steamers, should be so slow in arriving at a correct estimate of their value. Their last purchase has been the *Kestrel*, a condemned English gunboat, for which they are reported to have given $35,000 in cash and the *Mercury*, which they had just bought for $30,000. The *Hiogo* is still under charter to the Japanese Government, and was about to start again to Osaka, whence she had just arrived.

CHINA.

PEKING.

There are rumours of difficulties at Peking with the French, in reference to their demand for a site for a cathedral. These reports come by way of Canton, and no reliance can be placed on them.

CHEFOO.

The French Admiral with his squadron had sailed for Korea, but we have no particulars or confirmation of the telegram published in our issue of the 5th. *Via* San Francisco we hear that a part of the crew of the *General Sherman* had arrived at Shanghai.

HANKOW.

A notification has been issued by the Consul at Hankow, cautioning British merchants there against importing illegally coined copper cash. The coins are composed in part of sand and mud; are small, thin, and very brittle, and they have the characters *K'uan yung* on the obverse, instead of the style of the reign of some Emperor of the present dynasty. The merchants are also further cautioned against importing the "sand-skin" variety *sha 'ko*, a still smaller cash of similar properties, under penalty of confiscation.

Mr. Medhurst has also issued a circular (not in his official capacity) inviting the people of Hankow to subscribe towards the erection of a church at that place. The building now hired for church purposes will have to be definitively given up at the end of September, and there is no prospect that a public service will be able to be kept up after that date. It has been suggested that a room at the British Consulate should be placed at the disposal of the church committee, and by others that another building might be procured on a tenure similar to that under which the present one is held. As regards a room at the Consulate, Mr. M. explained that however desirous he is as H.B.M.'s Consul to do all in his power to oblige the community, he does not feel himself called upon to alienate any portion of the Consulate office from its legitimate purpose, when he sees so little prospect of ever having the portion so lent placed again at his full disposal. The other alternative, that of hiring another building in the place of one now about to be given up, seems to be equally out of the question through want of funds. The sum required is tls. 3,000, half of which will be obtained from the home Government, when the other moiety is locally subscribed. The subscription list is now open; a public meeting of subscribers is to be held when the list is filled up.

SHANGHAI.

The P. and O. mail of 10th August arrived out on the 26th Sept., and the French mail of 17th on Oct. 3. Dates are now down to the 9th Oct.

The Returns of Trade for the month of August have been issued by the Imperial Customs. In glancing over that for Shanghai we find the most noticeable feature to consist in the large number of pieces of grey shirtings imported in August this year as compared with the same month last year, there being an excess of nearly 100,000 pieces. The figures are—in August, 1865, 146,258 pieces; same month this year, 245,951 pieces. Of T-Cloths 37,000 pieces have been imported in August, 1866, against 25,000 during the same period last year. There is also a very noticeable difference in rice imported during the month as compared with last year, namely, only 470 piculs in August, 1866, against no less than 174,531 piculs for August, 1865. The re-exports of grey shirtings for the month of August amount in all to 157,850 pieces to all ports; thus making the increase by import to the stock during that month about 68,000 pieces, from which has to be deducted the local consumption of Shanghai. Of the re-exports 112,700 pieces alone go to Tientsin; to Hankow the number of pieces is 22,450.

A placard of a very strange description has been found by a missionary gentleman posted on the walls of a city in Honan. It is a tissue of abuse of foreigners and a recommendation that they should be expelled from the kingdom. The origin of it is not known, but there is no proof that the officials had a hand in it, though such is of course suspected in some quarters.

The Rev. Mr. Wylie, who is well known as one of the most proficient Chinese scholars in Shanghai has started upon a journey of observation. He will, we hear, visit seven or eight different provinces and the results of his investigations will doubtless throw much additional light upon our present knowledge of China and the Chinese. He anticipates being away about three months.

A meeting of shareholders in the Shanghai Wharf Company was held to deliberate on the means of raising a loan of taels 22,000 to pay off a mortgage. It was stated that efforts to obtain this sum from banks had failed, as they all had instructions to advance money on landed security; and a resolution was passed leaving the deeds in the hands of the Commercial Bank to deal with as the liquidators might please. We understand that Captain Patridge has entered into negotiations for purchasing the concern.

The accounts of the Provisional Committee of the French Concession to the 31st August, 1866, have been given out. They show the total receipts from the 1st April to the date to have been tls. 38,707.25, which, together with the balance in hand on the 1st April, namely tls. 6,634.58, and a petty profit in exchange of tls. 5.68, make a total on the side of income of tls. 45,547; from which was to be deducted a total expenditure for the above named period of tls. 44,755.75; leaving a balance in hand of tls. 791.76, of which tls. 513.59 was in the hands of the secretary and tls. 378.87 at the Comptoir d'Escompte.

The accounts show a surplus on the budget of tls. 2,505.42, but, in order to arrive at this result, it has been necessary, in consequence of the diminution which became apparent in the receipts, to make sundry modifications in the budget originally voted; and the following items have, on prudential considerations, been put off to the year 1867-8, namely, the payment on account of furniture for the Town hall, tls. 1,875; arms for the police, tls. 2,454.37; balance due to Lok-Yu-Yu, tls. 5,250; reserve for the police officers arrived from France, tls. 3,358 93; in all, tls. 12,938.30. The diminution in the receipts at the same time amounts only to tls. 9,475—namely, in the Impot Extraordinaire, tls. 7,000; land tax, tls. 900; boats and sampans, tls. 1,575. In consequence of the occurrences in June last, it has been necessary to reduce by nearly two-thirds the Impot Extraordinaire voted last May, and in consequence of a delay in completing the new bund the land tax has been equally subject to diminution. A sum of tls. 1,000 due from the Taoutai as indemnity for closing the gambling houses has to be added, which being payable on the 1st April instead of 1st March, placed it in the budget of 1867-1868. Favourable circumstances may ameliorate this position by tls. 4,000 to tls. 5,000; but it is not prudent to count upon them.

A meeting of creditors for final examination and discharge in the estate of Dow and Co. took place before W. C. Goodwin, Esq., acting as Commissioner in Bankruptcy, when various claims were proved. Mr. Mitchell called attention to a claim on behalf of Messrs. Hooper and Co., which had already been brought forward by their attorney, C. Grey, now deceased. claim was deferred; but as the assignees had notice of it, the commissioner decreed that on any dividend being made sufficient should be reserved to meet it. The creditors' assignees expressed their satisfaction with the accounts, and did not oppose the discharge, which was accordingly granted; and it will be declared on the 25th October.

An interesting case has come before the Mixed Court arising from certain tenants of Mr. E. M. Smith, who were actors and engaged at the theatre in the Maloo, having been induced, by being falsely informed that Mr. Smith, the owner of the theatre, intended to close it, to break an engagement which they had made with the lessee and to go over to an opposition theatre, the property of Mr. Probst; Mr. Smith, therefore, brought a charge against the Chinese who had used his name without authority. In defence it was stated that the actors came over voluntarily and that no such decoy as alleged had been resorted to. Mr. Smith appeared in person and Mr. Lawrence for the defendants. Mr. Probst was also in court, and was invited to a seat on the bench. The case, after a lengthened investigation, was decided by the Chinese magistrate in favour of the defendants; but Dr. Jenkins, who was assessor, did not concur in the judgment and recommended the plaintiff to appeal to his Consul.

A robbery of a box of gold bars to the value of no less than tls. 8,000 had been made from the steamer *Corea*. The treasure appears to have been appropriated either at Tientsin or between Tientsin and this port.

The watchman at Messrs. Dent and Co.'s godowns informed Mr. Ford, the godown keeper, on the morning of the 1st inst. that there were two suspicious looking sampans moored off the wharf. On Mr. Ford's going towards the sampans two men jumped overboard, and escaped to the shore. He found in the sampans six Cantonese swords, one pistol, two guns, a quantity of powder, empty stink pots, caps, shots, balls, bullet moulds,

Digitized by Google

&c. Mr. Ford at once gave information to the police, who have taken charge of the sampans. The circumstance is somewhat significant, and points to a new mode of committing burglaries upon property abutting on the river. It is to be hoped that the timely frustration of the first attempt may have the effect of nipping in the bud a species of crime which would be of the most dangerous nature should it be adopted by the rascally Cantonese in the settlement. We doubt not the police will be carefully on the watch, and that any suspicious looking sampans will be overhauled without delay.

The steamer *Hongkong* has, we hear, been sold to the Governor of Fohkien for the sum of Tls. 11,000.

The Postmaster-General in Hong Kong has received instructions from Lord Stanley of Alderley to alter the departure of the mail from Shanghai on such occasions as it is fixed to leave on Mondays, to Tuesdays, should the alteration meet the approval of the community.

The project of erecting a church for seamen on the Pootung Point is receiving support. It was announced at a recent meeting that upwards of Tls. 1,000 have already been collected, and there is no doubt of the scheme being carried out.

Vicomte Breneir de Montmorand, Consul-General of France, and Sir Edmund Hornby, Chief Judge of the Supreme Court, have returned from Nagasaki.

The Chinese officials have sanctioned a monthly sum of tls. 3,000 to be set aside out of the Customs' receipts for the purpose of erecting lights in the Yang-tse.

From Nanking native reports come to hand speak of disturbances among the soldiery in the provincial capital. After having dissipated their wages in gambling, the men have taken to squeezing and robbing the inhabitants, with a view to recruit their funds. The viceroy has beheaded 54 men convicted of this eccentricity.

Messrs. Vaucher, Freres' Swiss bungalow on the Sikawei-road has been sold for taels 1,650, and the property at the top of Foochow-road, adjoining Mr. C. Thorne's garden, has been sold for taels 4,100. The three *mow* of land opposite were bought in for taels 100 per *mow*, and some shares in the French Gas Company at taels 45 each.

AMOY.

Madame Anna Bishop has arrived at Amoy, *en route* from Manila to Shanghai. Great sympathy has been exhibited among the European inhabitants for this lady, who was on board the *Libelle* when that vessel was wrecked, and who for fourteen days was exposed to the weather in an open boat. A collection has been made and a private entertainment given at the residence of Mr. Swinhoe, the British Consul, assisted by Mr. Lascelles; Madame Bishop also sang at two concerts, which were well attended, the entertainment provided on both occasions giving every satisfaction.

H.M. gunboat *Cormorant* arrived 3rd September to relieve the *Perseus*, Commander Stevens, which vessel has been ordered to proceed to Japan.

HONG KONG.

The French mail of 17th Aug. arrived out on the 28th Sept. The P. and O. mail of 27th on 2nd Oct. Dates are now down to the 15th Oct.

(FROM OUR OWN CORRESPONDENT.)

Some discussion has been again provoked here during the last week or two on the subject of railways and telegraphs in consequence of the appearance of a new project for a railway from Shanghai to Soochow, and the announcement that a Yankee speculator, Macgowan by name, has procured in New York the formation of a company for submerging a telegraphic cable between the Peiho and Hong Kong. Neither of the schemes thus heralded are looked on with much confidence, but the knowledge that projectors in this line are still busy has brought the subject with some prominence before the public, who express some curiosity to learn whether in the year which Sir R. Alcock has now passed at Peking he has been able to make any impression on the Chinese officials in a favourable direction towards such enterprises. Those best acquainted with the character of Chinese policy are, however, heard to declare that the concession of a railway line to any European company is an extreme improbability, but not so the construction of railways for the Chinese Government itself, upon a principle similar to that pursued by the Pacha of Egypt. The travelling mandarin, Pin, who returned from Europe in company with Mr. Bowra, of the Customs' service, by last French mail, is understood to have formed a strong opinion on this point, and will probably lay it before the Board of Foreign Affairs on his arrival at Peking.

The journal kept by this mandarin during his recent tour in Europe is to be published after having been submitted to the Peking authorities, and will then be translated into English by Mr. Bowra and into French by Mr. Deschamps, both of whom were of the party with which Pin travelled. The latter, after visiting Canton, has just left here *en route* for the North, having called on the Governor and viewed the sights of Hong Kong in passing through.

One of the most curious of all the diplomatic tomfooleries that have been recorded of late years is about to be perpetrated, if I am not misinformed, on behalf of his Majesty the King of the Belgians. M. de Meritens, an unquiet spirit of the French order, who has been for the last five or six years in the Customs' service, though acknowledging but a nominal obedience to the successive Inspectors-General (Messrs. Lay and Hart), is on his way back to China, after an absence on leave, with, it is reported, a commission from the King of the Belgians to negotiate at Peking for the cession to that monarch of the Island of Formosa! No one knows better, probably, than M. de Meritens the scorn with which such a proposition would be heard (not listened to) by the Chinese Ministers; but as an excuse for getting to Peking, whence the not unreasonable jealousy of his superiors in the Customs' service has hitherto kept him excluded, the idea is an excellent one. There is something ludicrous in the idea of colonisation in these seas by a shadowy Power like Belgium, even were it in the remotest degree probable that other nations would stand by quietly to sanction a cession of territory to outsiders whilst they themselves stand voluntarily pledged to abstain from the tempting policy of aggrandisement; but it would be by no means surprising were Prussia, during the six or nine months' superiority which she is about to enjoy in virtue of her predominance in the possession of breech loading weapons, to attempt the fulfilment of the schemes in the same direction which Count Eulenberg is believed to have strongly urged upon his Government. In any case, however, although the invitations of Prussia might be listened to more respectfully than those of King Leopold II., there can still be no doubt that an equally decided refusal would meet every proposition for the voluntary dismemberment of the Chinese Empire.

Nothing of special importance has occurred in this colony since the departure of last mail. The excitement against the Stamp Act has in a great measure died away since the preparation of the memorial with which the antagonists of the measure hope (?) to influence the Secretary of State for the Colonies against the measure; and the Chinese traders, who have been much excited by the false reports that were circulated among them with reference to the intended legislation, have taken the lecture and explanations addressed to them by the Governor very fairly to heart.

In the adjacent settlement of Macao the coolie trade is now in full swing, and about two thousand miserablle victims are shipped off weekly to Havana and Peru. It is not too much to say that ninety-nine hundredths of these so-called emigrants leave the port by no will of their own. A magnificent ball is to be given to-morrow at Macao in honour of Governor Amaral, who has done so much for embellishing the place and giving an impetus to the trade on which the settlement thrives. He is to leave by the next steamer, after the arrival of his successor, a Senhor Horta.

The following items are from the *China Mail*:—The report that a committee of inquiry into the capabilities and prospects of the Mint has been appointed is calculated to give general satisfaction at the action taken by the Government. The gentlemen appointed, Messrs. Mercer, Whittal, and Long, may be fully relied on to give an unbiassed report; and the fact that one at least is known to be hostile to the continuance of that establishment would ensure greater attention to any recommendation tending to ensure its vitality which might meet his concurrence. Since the question of the Mint's success or failure has become a matter of public discussion, we have persistently urged the necessity of not only legalising the new dollars, but of rendering illegal the tender of old dollars in payment of account after a certain date. Unless some step be taken to force the circulation of the former upon the Chinese, the prospects of the Mint cannot be said to be bright; but now that we have the means of conferring a real benefit upon commerce, native as well as foreign, it is to be hoped the opportunity will not be lost. Attention should nevertheless be

Digitized by Google

paid to well founded objections of the Chinese to the new dollars as they now are; and surely, in this age of modern miracle, some means could be found to produce a coin which could scarcely be successfully imitated or debased by the Chinese. We commend to the attention of the Commission the fact that the success of the Mint depends on the Hong Kong dollar being accepted by the Chinese outside the colony, and that to gain this end it must possess the qualities above indicated.

Ten cent pieces are being coined daily. Nearly a million have been turned out already, and preparations are being made for an issue of pieces of 20 cents each. Forty thousand is, we have been informed, the number of the smaller coins the Mint machinery is capable of turning out daily, and from 18 to 20 per cent. is the estimated profit on the manufacture of this class of coin, which is not, intrinsically, of the value for which it passes current by law.

An expedition, very strongly equipped with European appliances for warfare, is on the point of leaving Canton, we learn, for the purpose of subduing the insurgent Hak-kas, who have been driven by the Pun-ti clans into mountain fastnesses near the West Coast.

We learn with great regret that the Union Dock Company's chop at Whampoa, occupied as a floating residence by Captain T. B. Rennell, the company's superintendent, was destroyed by fire. The occupants of the chop fortunately escaped with their lives, but no property could be saved. The fire is believed to have originated in the servants' room.

Murders have become unpleasantly frequent here of late, three having taken place in as many weeks. The *Lubra* pirates are, as yet, mostly at large, but strong hopes are entertained of catching them.

The shipping branch of the Harbour Master's department has been transferred to the Sailor's Home, much, we hope, to the advantage of that institution.

The cricket season has commenced in Hong Kong, the first game having been played a few days since, and the event formally inaugurated by a dinner in the evening.

The Portuguese Club-house, now fast approaching completion, will be a noteworthy addition to the architectural edifices of this city. Besides the ordinary accommodation provided in first class club-houses, it includes a very neat and spacious theatre. The club will thus supply a want that has long been felt here. Mr. Story is the architect of the building, and it is creditable to his skill and taste in architecture. It is no less gratifying as an evidence of the liberality and enterprise of our Lusitanian fellow-residents. We understand that it will be opened with a formal demonstration on their part, and that his Excellency the Governor of Macao will be invited to take part in the opening ceremony.

The memorial to Lord Carnarvon against the Stamp Act has been forwarded by the present mail.

We are glad to state that the missing cutter of the *Osprey* with the crew of twelve men and the master, arrived at Hong Kong on the 15th Oct. in a Chinese junk.

We take the Bank Returns of the past month from the *Gazette*:—

THE LATE CRUIZE OF THE "OSPREY."

H.M.S. Osprey was despatched in pursuit of the pirates who had attacked the schooner Lubra. With a mandarin on board, and the gunboat Janus in tow she visited Mirs Bay, Haarlem Bay, and several other places in the neighbourhood; at Capchy Bay the Janus ran on shore, but was got off again in a short time, and both vessels returned to Hong Kong on the 3rd, having been unsuccessful in their search. On the 4th the Osprey again left for the Prattas shoal to assist the ship Westminster, reported on shore at that place. On arrival she found that the weather was too rough to admit of approaching the shoal. Boats were however sent in to assist the wreck, and found a boat belonging to the Westminster with three men in her, who were placed on board the Osprey.

The Shooeyleen arrived at the scene of the wreck on the same day as the Osprey. In endeavouring to close she unfortunately got aground, but by the help of the master (Mr. Christian) and a boat's crew of the latter, was got off without damage. On Sunday, the 7th, a boat was sent from the Osprey to the Shooeyleen to convey the master of the latter ship back from the former, to which vessel he had repaired in the early part of the same day.

On returning from the Shooeyleen, the Osprey's boat observed one of the Shooeyleen's adrift with some men in her, and went to pick her up. The sea being high and the wind strong they were at first unable to effect their object, so another gig (the first) was sent from the Osprey with a couple of small hawsers veered astern so as to relieve the second gig from her heavy pull. This boat being unable to bring up, the first was in her turn assisted by the second cutter of H.M.S. Osprey, manned by twelve of the best men of the ship, and commanded by F. B. Christian, master. This boat was provided with another hawser to attach herself to the first gig, and went after the boats. The wind increased and also the sea, and it is presumed that the boats were unable to make head against it. The second gig (which first went in chase of the merchant boat) reached this port yesterday morning, having succeeded in saving the people in the merchantman's boat; of the other, viz., the cutter, we have as yet received no news. On finding that the boats did not return, the Osprey hauled up the first gig, got under weigh, and cruised to leeward in search of them during the 8th, 9th, and part of the 10th, but without success, although every means was used to make herself known, guns being fired and rockets and blue lights shown at night; on her return here she happily found the second gig, which, though only commanded by an A.B., had steered by the sun and stars, without food, without compass, and without anything, a distance of about 170 miles. We trust that the intelligence shown by the seaman William Tarrant, in charge of this boat, will not go unrewarded. The fate of the cutter is yet unknown, but the gunboat Janus was sent yesterday afternoon in search of her, and the sloop Osprey left this morning on the same errand. Two merchant ships, viz., the Alexander and the Florence Nightingale have been informed of what has taken place, and are on the look out for the boat. It is surmised that the cutter has borne away for the main land, as she had a compass on board, and though they had no food, the land might be reached in time to save all hands.

The short handedness of the ship from the loss of the men away in the boats and the exhaustion of the first gigs, who had been up all night, may be perhaps better understood when we inform our readers that the surgeons, paymasters, and their respective assistants fell in at the capstan and worked as ordinary sailors, every one on board being anxious to assist his shipmates in distress. The Osprey's very weak ship's company was also aided by four of the Westminster's, who fortunately happened to be good seamen.

COCHIN CHINA.

SAIGON.

We extract the following items of news from the *Courrier de Saigon*:—

A great number of curiosities are ready to be sent by the steamship *l'Orne* for the Paris Universal Exposition, and amongst this collection are several beautiful specimens of carving in ebony, which are remarkable not only for the workmanship, but also for the rare and precious wood that has been used in their construction.

The French ship *Oriental* will convey to the Island of Reunion about 150 convicts, who have been sentenced to transportation for rebellion. The authorities have allowed them to take their wives and families with them. No doubt they will be employed upon the different plantations in that island.

MALACCA STRAITS.

SINGAPORE.

Our advices from this port reach to the 23rd October. The English mail of Sept. 10 arrived out on the 12th Oct., and the French mail of Sept. 17 on the 19th.

The *Overland Straits Times* says:—"The political affairs of the Straits remain in abeyance, as it is needless to urge reforms or exclaim against evils in the present transition stage of the Government. According to general anticipation the inauguration of the new regime should take place on the first of the new year;

Digitized by Google

but this seems now very unlikely, in so far that we have been informed no official notification whatever has yet reached the Indian authorities here of the coming change; and but for the newspaper reports they might conclude that no alteration on the present system was dreamed of. The impression seems to be, that if the rule of the Colonial-office is not established on the 1st of January, 1867, it must bide over to the same date in 1868. History goes to disprove this, however, as no particular date seems to have prevailed for the foundatoin of the various colonies which are subject to the Imperial Government.

"Local interest during the fortnight has been centred upon the transactions of our criminal court. Two most important cases, one for murder and the other for barratry of a ship and cargo, occupied the chief part of the quarterly criminal session, and, singularly enough, in both cases the jury failed to arrive at a verdict, and had to be discharged. Had such an event been of exceptional occurrence, perhaps little attention would have been directed to the subject; but the failure of our juries on all important cases to arrive at a verdict has become notorious. there scarcely having been a trial involving extended interests or serious consequences in which a second jury has not had to be empanelled. The cause of this seems to be the heterogeneous material of our petit jury list, which as well as embracing the younger European residents includes a large section of the Eurasian population, whose intellects run in a groove peculiar to themselves. One of the cases in which a failure of justice has arisen from this cause, namely the charge of barratry against the master and mate of the British schooner *Erin*, may possess some interest for the insurance offices at home, in so far as, it is said, the cargo of the vessel was covered there to the extent of $60,000."

PENANG.

From Penang we have intelligence to the 25th October. The *Penang Gazette* informs us that Penang has not for many years had such a rainfall as this season. For several weeks there has been rain fall, night and day, sufficient to nearly swamp everything. When it will stop it is impossible to say. We are not in possession of particulars as to the amount of rain which has fallen, but the Malays say the province has not been flooded by the Muda, as it is now, for the last thirty years, or since Tunku Mahomed Said's flood. The effect that so much rain will have upon the paddy crops will be disastrous, and must cause ruin and starvation unless a particularly favourable season sets in soon. The Muda, which goes further into the interior, and whose source is farther inland than any of the province rivers, has been overflowed for a fortnight at its mouth. The heavy rains and heavy damps have also caused considerable deal of sickness.

Births, Marriages, and Deaths.

(Announcements for subscribers are made free of charge.)

BIRTHS.

BAYNE—On the 21st Sept., at Shanghai, the wife of William George Bayne, of a daughter.

BRODERSEN—On the 17th Nov., at Neumühlen, near Altona, Mrs. Charles Brodersen, of a daughter.

CROCKETT—On the 18th Oct., at Singapore, the wife of J. F. Crockett, Esq., of a son.

COLLIE—On the 23rd Nov., at 12, Kensington Palace-gardens, the wife of Alexander Collie, Esq., of a son.

CRIBB—On the 12th Sept., at Foo-chow-Foo, China, the wife of the Rev. Arthur W. Cribb, C.M.S., of a son.

D'ALMEIDA—On the 2nd Oct., at Singapore, the wife of J. D'Almeida, Esq., of a daughter.

DEACON—On the 11th Nov., at Ditchleys, Essex, the wife of Albert Deacon, of a daughter.

DICKINSON—On the 13th Oct., at Shanghai, the wife of Henry Dickinson, Esq., of a son.

KNEVITT—On the 19th Nov., the wife of Robert K. Knevitt, Esq., of The Glebe, Blackheath, of a son.

LAWRANCE—On the 27th Sept., at 3, Balfour-buildings, Shanghai. Mrs. Edward Lawrance, of a son.

LAWRENCE—On the 13th Nov., at 3, West Abbey-road, Kilburn. the wife of F. W. Lawrence, Esq., of a daughter.

OSMUND—On the 13th Oct., at Hong Kong, the wife of Mr. C. Osmund, of a son.

PEDDER—On the 14th Nov., at 14, Aldridge road Villas, Westbourne-park, London, the wife of William Henry Pedder, Esq., H.M.'s Consul at Amoy, China, of a daughter.

PARKES—On the 16th Sept., at Yokohama Lady Harry Parkes, of a son.

SKINNER—On the 2nd Oct., at Singapore the wife of Capt. A. Skinner, of a daughter.

SMITH—On the 3rd Sept., the wife of T. Smith Esq., of Foochow, of a daughter.

TOWSE—On the 9th Nov., at 13, Albert-road, Regent's-park, the wife of R. B. Towse, Esq., of a son.

MARRIAGES.

CARR—WINNETT.—At the Roman Catholic Cathedral, Hong Kong, by the Rev. Father Brogazzi, and at St. John's Cathedral, by the Rev. John Wilson, Colonial Chaplain, Henry John Carr, of Hong Kong, to Eliza Winnett, late of Manchester, England.

GOUGH—JONES—On the 15th Nov., at Trinity Church, Tredegar-square, Bow, by the Right Rev. G. Smith, D.D. (late Bishop of Victoria), assisted by the Rev. F. S. Lea, M.A., incumbent, the Rev. F. F. Gough, of the Church Missionary Society, to Ann Maria, widow of the Rev. John Jones, late Missionary at Ningpo, China.

KAVANAGH—FRIEDBURG.—On the 10th Nov., at the Catholic Church, Greenwich, by the Very Rev. Canon North, assisted by the Rev. Philip Kavanagh, brother of the bridegroom, Patrick Kavanagh, M.D., of Deptford, to Frederica Ellen, only child of J. M. Friedburg Esq., of Hatcham, Surrey. No cards.

PRESTAGE—SOUZA—At the Roman Catholic Cathedral, Hong Kong, by the Rev. Favini, Ward Prestage, third son of John Thomas Prestage, of Bellevue, Ironbridge, in the county of Salop, to Flavia Domecilla, the only daughter of J. M. da Silva de Souza, of Hong Kong.

TAYLOR—LEYS—On the 20th Nov., at the Manse, St. Fergus, Aberdeenshire, N.B., by the Rev. John Mitchell, guardian of the bride Joseph M. Taylor, Esq., formerly of Shanghai, China, to Jessie D. Leys. No cards.

DEATHS.

BOUCHARD—On the 2nd Oct., at the Seaman's Hospital, Hong Kong, George Bouchard engineer, aged 55 years

BULMAN—On the 2nd Oct., at Shanghai, Captain J. A. Bulman, of the Janet Mitchell aged 72 years.

CHALMERS—On the 11th Oct., at the Government Civil Hospital, Hong Kong, Richard Chalmers, seaman, unemployed, aged 26 years.

CAMPBELL—On the 8th Oct., on board H.M.S. Melville, John Miller Campbell, M.D., H.M.S. Jarus, aged 25 years.

CROIX—On the 24th Sept., at Shanghai, Ernest de St. Croix, aged 20 years.

DUNCAN—On the 1st Oct., at the Gaol Hospital, Hong Kong, John Duncan, seaman unemployed.

GRUGGEN—On the 8th Sept., at Yokohama, Japan, of typhoid fever, aged 16, Murray William March Gruggen, Midshipman of H.M.S. Pelorus, eldest son of the late Henry March Gruggen, Esq., M.D., of Chichester.

GIBB—On the 15th Nov., at Lancaster-gate, Thomas Augustin Gibb, Esq. (Messrs. T. A. Gibb and Company, London).

GOW—On the 21st Nov., at London, of consumption, Mr. D. Gow, of Silverwells-house, Bothwell, late of Hong Kong, China, aged 48 years.

HUDSON—On the 5th Oct., at Shanghai, Maria Hannah Hudson, aged 12 months and 11 days the beloved daughter of Joseph Hudson, of Ningpo.

JOHNSON—On the 2nd Oct., on board the s.s. Venetia, Edward Johnson, seaman.

MICHAEL—On the 19th Sept., at Hong Kong, Richard Michael, late master barque Carob I.

MUELLER—On the 5th Oct., at the Government Civil Hospital, Hong Kong, Charles Mueller, seaman unemployed.

STEABLES—On the 21st Sept., at Swatow, Thomas Steables, Bishop Wearmouth, Durham, master mariner, late of Dutch barque Palembang, aged 38 years.

STOREY—On the 22nd Sept., at Hong Kong, Charles Richard, son of R. Storey, Quartermaster 26th Regiment, aged 8 months and 15 days.

WHITE—On the 8th Oct., at Hong Kong, Charles White, Quartermastar, H.M.S. Salamis, aged 28 years; found drowned.

YINCK—On the 22nd Sept., at Hong Kong, George Yinck, seaman late barque Stirlingshire, aged 24 years.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents and is divided into decimal parts of ten.

EXCHANGES ON LONDON.

[For dates, see first page.]

		Bank.	Private.
At Yokohama . . .	6 months' sight.	4s. 7¼d.	4s. 8d.
At Shanghai (per Tael.)	6 ditto	6s. 3½d.	6s. 4d. to 6s. 4½d.
At Canton . . . At Hong Kong . . At Macao . . .	6 ditto	4s. 6⅞d.	4s. 7¼d.
At Singapore . . .	ditto	4s. 6d.	4s. 6½d. to 4s. 7d.
At Manila . . .	ditto	4s. 1d.	4s. 2d.

At Shanghai, bills on India, Rs. 302 per 1000 taels. At Hong Kong, Rs. 221 per $100. Bar silver at Shanghai, tls. 111·2; at Hong Kong, 10¼ per cent. prem. Mexican dollars at Shanghai, tls. 74 15 per 100; and exchange on Hong Kong, 27 discount. Hong Kong and Shanghai Bank shares, old, 6 per cent. dis., new, 2 per cent. dis.; Gas Company, 10 per cent. prem.; Hong Kong and Whampoa Dock, 15 to 20 per cent. prem.; Steam Shares, 7 per cent. dis.; Union Dock Company, 10 per cent. dis.

The latest telegrams, dated Shanghai 23rd, and Hong Kong 28th October, give Exchange at 6s. 3⅛d. and 4s 6½d. respectively

The following is from Messrs. Sharp and Co.'s Circular:—

GOLD.—Has arrived in fair quantity from Shanghai, the imports amounting to 320 000 dols., chiefly from that quarter—290,000 dols. have been sent away during the fortnight including the shipments per *Baroda* on the 27th ultimo and excluding those to leave by this opportunity. A new feature in this market is the remittance of pure gold to Japan and the receipt from thence of the mixed gold and silver Ichibous.

SILVER.—The receipts to date have been 480,000 dols. worth and the exports 360,000 dols. The shipments to India are being considerably curtailed by the advance in the rate for Rupees, and for the same reason the price of silver has fallen to one-half per cent.

DOLLAR CURRENCY.—Except in a few instances where orders are still peremptory to remit nothing but Dollars, we may expect to see an end to the great drain of coin to India that has been going on for some months past. The amount received is $420,000 and that sent away $380,000. The most part of the shipments during the fortnight have been for Shanghai and the Coast Ports.

EXCHANGE.—A slight advance has taken place both in Sterling and Rupees, but the business done has been comparatively small, the demand for rupees being limited by the dull state of the opium market.

DISCOUNT AND MORTGAGES.—Money is very scarce both amongst foreigners and Chinese, 12 per cent. being obtainable upon mortgages.

SHARES.—Union Dock is lower as no dividend is forthcoming for the previous year. Other shares are very quiet, and the market dull.

COMMERCIAL REPORT.

CHINA AND JAPAN EXPORTS.

TEA.—A rather quieter fortnight than usual has passed since the last mail. Advices from home have naturally had a depressing effect on the speculative tendency of buyers, and this has curtailed business at most of the ports, so far as shipments to Great Britain are concerned. Purchasers for the American market, however, have been operating on an extensive scale.

CANTON.—The continued depressing accounts of the home market has caused its effect to be felt on the market, and the business to report has been transacted with great difficulty, and certainly in favour of purchasers. There is, however, at time of writing, very little demand existing, and the market closes for the mail very flat and prices generally drooping, while stocks are daily increasing, both as regards Country Congous and district leaf. Country Congou: The stock has increased to 31 chops, and settlements for the fortnight consist of two chops at tls. 24½ and 27 respectively. Canton-made Teas: Settlements of Scented kinds comprise 5,000 boxes Scented Orange Pekoe at from tls. 20 to 34, and 3,000 boxes Scented Caper at from tls. 16 to 28; of these, rates have ruled decidedly in favour of Scented Orange Pekoes. Some 600 boxes packed Congou are reported at tls. 22, and 1,700 boxes Gunpowder at from tls. 22 to 28.

AMOY.—Congou: Arrivals have been small have been readily taken at former rates, say $18½ to $20 per picul, leaving a very small stock. Oolong: A steady inquiry for America. Some of the settlements of the better grades at $26 to $28 show a slight decline in value, but Ancois and Common Mixed Teas are comparatively dear at $20 to $23.

NINGPO.—Holders of Pingsuey leaf are becoming anxious to realise the remnants of their stocks and rates are declining.

FOOCHOW.—Congou: The fortnight's business has been considerably curtailed by the unfavourable news from home. The only alteration to notice in prices is for common flavory teas which are quoted 5 mace to 1 tael lower, but no quantity, at present, could be settled at this decline. The last few days arrivals from the country have not been coming in quite so freely. Souchong: Are comparatively neglected. Prices unchanged. Oolong: There are no transactions to report. Scented Teas: About 5,000 boxes settled, at rather higher rates. The supply to date is short of last season's, and it is confidently asserted that the total arrivals will show a falling off of some 20,000 boxes. The settlements of Congou reported are 4,584 chests, 12,032 half-chests, and 2,497 boxes at taels 7 to 25 7.5. Say 1,293 chests, and 2,852 half-chests at taels 7 to 12 5 for Dust and Broken Leaf; 1,591 half chests at taels 14 to 17 for Common to Good Common. 3,241 chests and 7,589 half-chests and 2,497 boxes at taels 17·6 to 25.7.5 for Flavory to Good Flavory. Souchong: Fair to second class, 447 chests at taels 23 to 33.7.5. Pekoe: Good to fine mixed leaf, 315 chests at taels 25 to 38 5. Scented: Dust and Leafy, 1,454 boxes at taels 8.7.5 to 14. Medium to good, 3,800 boxes at taels 22 to 23.

SHANGHAI.—Black Teas: Only a small business has been done in Congous since our last report but prices have been well maintained. Arrivals have come forward more freely, increasing the stock considerably, a large portion of which, however, is waiting shipment on owner's account. Advices from the river ports assert that supplies will only about equal those of last season, which, if true, the total export from here will only be a moderate one. Green: The market has continued active, and large settlements have taken place for shipment to America at irregular prices. Moyunes have come in to a fair extent, and finest chops have found buyers up to tls. 48 proportion. There is a quieter feeling at the close of business, and purchases no doubt can be effected at previous rates, except for finest, which is quoted at 2 tls. higher than last mail. Four chops of Pingsuey have been settled for England at rather easier rates, and the supply of this class being considerably larger than the demand, lower prices will probably rule. Settlements have been as follows:—23,100 half-chests fair Fowchow to finest Tcenkai and Moyune at tls. 35 to 48 proportion; 4,100 half-chests fair to fine Pingsuey, at tls. 37 to 40 proportion; total, 27,200 half-chests. Reshipments, 5,500 half-chests; stock, 14,500 half-chests Fowchow and Moyune, and 10,500 half-chests Pingsuey; total, 24,000 packages.

HANKOW.—Only a moderate business is reported; prices having advanced nearly two taels over previous rates. Settlements had chiefly consisted of third crop Oopacks, at taels 20½ to 23½ per picul; Oonams being neglected, owing to to the high prices demanded by teamer. The stock left did not exceed 5,500 chests. The Elizabeth Nicholson was still loading.

KIUKIANG.—Black Teas: Sales on the market comprised only about seven small chops of common to fair second crop Ningchow, at Tls. 22.5 to 25 all other arrivals being at once shipped to Shanghai on native account. Green Teas: These had come in freely, and been readily taken up on arrival at gradually advancing prices. Total settlements were,—10,500 packages common to fine Moyunes at tls. 33 to 40.5, and shipments 9,600 packages. Little tea was left on the market, but considerable supplies were close at hand.

YOKOHAMA.—A fair amount of business has been done in the tea market since the last report, and some parcels of the finer qualities have found buyers at high rates, in some cases even an advance may be quoted. Other qualities have been sold at rates which do not show any material variation from last quotations. The stock is moderately large, but teamen are very firm in their demand, and at present there seems no chance of lower prices. The purchases are for the American market. Good Common, $18 to 26, 1,200 per picul; Medium, $28 to 30, 1,400 per picul; Good Medium, $31 to 34, 1,000 per picul; Fine, $35 to 38, 900 per picul.

RAW SILK.—CANTON.—During the fortnight the market has been very quiet, and rates, if anything, have slightly receded. The fact is now established beyond any doubt that Tsatlee-reel this season is extremely coarse, while Loong-kongs and Kowkongs have been above the average in quality; the 5th crop is now coming down in moderate supply, and the quality is reported very good. Tsatlee No. 1 at $620, 100 bales.

SHANGHAI.—During the early part of the fortnight but few transactions were reported, until the Chinese dealers, finding that it was impossible to obtain an advance on last mail's quotations, became current sellers, and the result is that a fair business has been done, in some instances at prices rather below those quoted below, the decline being only on the lower qualities. About 500 bales, included in the settlements for the fortnight, must be on Native account. The latest telegraphic advices from London quote No. 3 Tsatlee of classical chops at 32s. 6d. Settlements for the past fortnight, 2,850 bales; stock, 6,000 bales; total settlements since 1st June, 17,370 bales. Tsatlees, chops No. 1, tls. 640. to 650 per picul; do., No. 3, tls. 600 to 610; do., market, No. 3, tls. 570

Digitized by Google

to 585; Taysaams, chops No. 1, tls. 560 to 565; do., No. 2, tls. 530 to 540; do., No. 3, tls. 500 to 520; do., Nos. 4, 5. and common, tls. 450 to 485; Yuenfas, No. 1, tls. 560 to 570; do., No. 2, tls. 540 to 550; do., No. 3, tls. 520 to 530; Hainins, tls. 500 to 560; Hangchow Tsatlee, tls. 500 to 520; Sewhings, tls. 410 to 460; Laeyongs, tls. 415 to 420; Szechuens, tls. 340 per picul.

YOKOHAMA.—The quality of the European crops being according to the reports hitherto received unsatisfactory, there is a great demand here for the finer sorts in all descriptions of silks, but they are scarcer than is usual at this period of the season, and the proportion of silk rejected after inspection amounts to nearly one-fourth of the purchases. Notwithstanding the unusually high range of prices now prevailing, supplies continue scanty; hardly 700 piculs have arrived during the fortnight, and the unsold stock consists of about 300 piculs, whilst last year at the same period, when the price of best Mybash was $770 to $785. it amounted to 2,300 piculs. However, in spite of those difficulties and the absence of news from home since the 10th instant, about 300 piculs have been settled at the prices quoted during the past fortnight, and the shipments by this mail consist of Mybash, Sinchu, Oshio, and Koshio. The other descriptions have not yet arrived and are only represented on the market by a few parcels of old silk, which, owing to their inferior quality and the high price at which they are still held, are entirely neglected. Quotations for the best Mybash and Sinchu are almost nominal, and with the exception of the medium sorts of hank silk, which forms the greatest bulk of the stock, all other sorts show an advance of from $10 to $33 on quotations for the last mail.

SILKWORMS' EGGS.—The importance of the arrivals is daily diminishing, and with very few exceptions buyers have had to content themselves during the past week with goods which, owing to their inferiority, apparent or real, had been hitherto neglected. Of annual green sorts, extra fine sell at 5¼, good at from 2¼ to 3½ boos. Superior white annuals fetch as much as 4¼ boos. Total settlements to this date amount to nearly 600,000 cards, and the unsold stock, which consists of the refuse of former purchases and of a certain quantity of Polyvoltini that are shunned as the plague of the market, is variously estimated at from 100 to 125,000 cards. Mybash and Sinchu—Best, $890 to $940 per picul; do., medium, $830 to $880.

DRUGS.—CANTON.—Cassia Lignea is slow of sale at the enhanced value of $19 to $19.50, only 500 piculs having been quitted at these figures; stock 4,500 piculs. Cassia Buds: Very dull at $39, no business, stock of 60 piculs. Galangal: $1.80, and 400 piculs continue offered thereat. China Galls show some firmness, 50 piculs have found buyers, and the stock of 150 piculs is held for $13. China Root: $3.50, but not any demand prevailing. Vermilion: $38.35 per box of 50 catties, for superior brands. Rhubarb: A small arrival of 20 piculs of very inferior quality is kept at an unreasonably high rate. Essential Oils and Star Anniseed not on the market.

CHINA IMPORTS.

HONG KONG.

RAW COTTON.—A large amount of business was done until the arrival of the last mail steamer. The advices brought on by her of extensive shipments for China account had the effect of checking operations. Shortly after these advices had come to hand, the Calcutta steamers above referred to arrived with large supplies and quite flooded the market, thus causing for a time a complete cessation of business. Added to this, we may shortly expect shipments from the North of the new season's native crop, which it is reported, will yield an abundant harvest. Prices declined from $2 to 3 per picul. We quote: Bengal, $18 to 22; Tientsin, $19 to 21; Shanghai, $21 to 21.50. Sales for the fortnight, 12,800 bales.

COTTON YARN.—A limited demand has prevailed for the lower numbers, and about 500 bales were taken by the trade at reduced rates. Other numbers have been neglected.

GREY SHIRTINGS.—8¼ lbs. have received but little attention, the total sales effected comprising 9,000 pieces, of which 3,000 were sea-damaged and sold at auction. Prices have given way 20 to 25 cents. For 7 lbs. a fair demand exists, and prices, owing to the great scarcity of the article, are well supported.

WHITE SHIRTINGS.—A few small lots of fine quality passed at $ to 7.80 per piece.

T-CLOTHS.—Very little has been done, and that little at a reduction of 15 to 20 cents per piece.

FANCY COTTONS.—The business of the fortnight has been confined to a sale of 1,200 pieces Dyed Shirtings at a shade below last quotations, 500 pieces of White Brocades, and 500 dozens Turkey Red Handkerchiefs.

LONG ELLS.—Scarlet Cloth is in eager request at $11 to 11.50, other colours are not wanted, and prices have slightly given way. Sales 480 pieces.

SPANISH STRIPES are again out of inquiry. Sales 300 pieces German at $1.05 to 1.10.

CAMLETS.—The market is overstocked, and the demand very limited. Sales 480 pieces at reduced prices.

LASTINGS.—200 pieces of heavy make are reported sold at $10; the lighter descriptions are out of demand.

METALS.—Nailrod Iron has been sold to the extent of about 10,000 bundles at rates ranging from $3.30 to 3.37½. Hoop Iron has been moderately taken at $3.35. Bar Iron has not been dealt in. Steel is inquired for at $4.25 to 4.75. 300 boxes of Tin Plates were sold at $6.20.

COALS have recovered the decline reported last, and considerable parcels of English and Welsh changed owners at $12 to 12½. Australian Coal has not advanced, owing to large shipments being on the way.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—From Amsterdam, Sept. 18, Princess Amalia.

At SHANGHAI.—From London, Sept. 27, Assyrian; 30, Tyburnia, Lammermuir. From New York, 29, Anita.

At HONG KONG.—From London, Sept. 26, Robin Hood, Lord Macaulay. From Glasgow, 26, Clifton. From Sunderland, 28, Charmian. From Newcastle, 28, Sea Bird. From Newport, Oct. 4, Edouard Marie. From Hamburg, Sept. 27, Feiga; Oct. 10, Magdalena. From Bremen, Johann Schmidt.

At MANILA.—None.

At SINGAPORE.—From Liverpool, Oct. 13, Panic. From Rotterdam 14, Ellina, 16, Vesta.

At BATAVIA.—From Glasgow, County of Bute. From Liverpool, Astrea.

At PENANG.—From New York, Oct. 22, Hooghly.

DEPARTURES.

From YOKOHAMA.—For New York, Sept. 12, Benefactor.

From SHANGHAI.—For London, Sept. 22, Polmaise; 24, Westminster (lost on the Pratas Shoal); 28, John Bull; 5 Oct., Agamemnon; 6, General Caulfield. For New York, Sept. 26, Lota; 28, Wild Gazelle; 29, Tycoon.

From FOOCHOW.—For London, Louisa, Northfleet, Beautiful Star, Scawfelk.

From AMOY.—For New York, Oct. 7, Drydens.

From HONG KONG and CANTON.—For London, Sept. 27, Kelso; 1 Oct., Solent. For Bordeaux, Sept. 26, Anam. For New York, 29, Royal Minstrel. For Havana, Oct. 4, Suonne, Loyola, Medoc; 7, Eugene and Adele.

From MANILA.—For Liverpool, Oct. 5, Mercia. For Falmouth, 4, Ellen Browse, do. (via Cebu); 3, Bolina. For Boston, Fearless.

From SINGAPORE.—For London, Oct. 8, City of Delhi. For Liverpool, 14, Blandina Dudley. For Bordeaux, 18, Gabrielle. For Boston, 10, White Squall.

From PENANG.—For Hamburg, Oct. 13, Amphton. For Boston, Rainbow.

VESSELS LOADING.

At YOKOHAMA.—For London, Wolloroo, Corea, John Bunyan; for New York, Lorten, Receife, Chaa Sze.

At HANKOW.—For London, Elizabeth Nicholson.

At SHANGHAI.—For London, Ajax (s.), Camillia, City of Quebec, Janet Mitchell, Juanpore, Ousuri (full), Red Deer, Scindia, Sir W. F. Williams; for New York, Fychow, Pegasus, Royal Diadem.

At FOOCHOW.—For London, Dunmail (full), Fontenaye, Ellenborough, John Temperley, Invincible; for New York, Queen of the Seas, Albatross.

At HONG KONG and CANTON.—For London, Herald, Cheetah, Cora Linn, Samuel; for New York, Charger, Albert Victor, Powhatton.

At MANILA.—For London, Etna, Congress; for Liverpool, Rinaldo; for Falmouth, Exonian; for Cork, Vicksburg; for New York, Arracan, Asa, Panther.

At SINGAPORE.—For London, Caldbeck; for Liverpool, Isabella.

At BATAVIA.—For Channel for orders, Johanna, Norah Greame, Sydney Eggers, Sparkenhoe, Henriette; for Rotterdam, Kortenaer, Garibaldi, Neptunus, Maria Adriana, Vrienschap, Preston; for Amsterdam, Fagel, Walcheren, Baltimore, Cleughs, Caroline, Joachim, Jacoba, Camperdown, Nydia; for New York, Dunmore.

At PENANG.—For London, Rockliff, York; for New York, Teesdale.

VESSELS EXPECTED.

From YOKOHAMA.—Thomas Dryden, Conference.

From NAGASAKI.—George.

From HANKOW.—Napoleon III., Mary Nicholson.

From SHANGHAI.—Star of China, Blencathra, Nelly, Illimani, Lansdowne, William Melhuish, Charlgrove, Challenger, John Paul, Knight of Snowdon, Marquis of Argyle, Trebolgan, Wild Deer, Queen of the East, Antipodes, Helen Nicholson, Ann Adamson and Dartmouth.

From FOOCHOW.—Ornate, Philomela, Marion, Monarchy, Naomi and Veronica.

From CANTON.—Island Queen, Victoria, Melbreck, Valdivia, and The Cedars.

FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London: Cotton and Tea, £2 10s. to £3.

At NAGASAKI.—To London: £2 10s. per ton. To New York: £3.

At HANKOW.—To London: £3 3s.

At SHANGHAI.—There is more inquiry for vessels for coasting purposes at an advance in rates. The rate to London remains at 30s. per ton, and to New York £1 17s. 6d. to £2.

At FOOCHOW.—To London: £2 per ton.

At HONG KONG and CANTON.—Coasting business to the North is almost at a standstill, and to the rice ports little is doing. Vessels loading are getting from 30s. to £2, and to New York £2. The circular of Geo. Holmes gives the estimated number of vessels disengaged at 60, representing 27,654 tons.

At MANILA.—For the United Kingdom the following are the settlements:—Rinaldo, for Liverpool from Cebu, at £2 10s. for Sugar, and £2 15s. per 20 cwt. for Hemp; Bolina, from Cebu, at £2 for Sugar, and £2 10s. per 20 cwt. for Hemp; Vicksburg, for orders, at £1 12s. 6d. for a full cargo of Current Sugar, and 10s. per ton extra if ordered to the Continent; Congress, for London has engaged Sugar at £2 for Unclayed, and £1 15s. for current.

At SINGAPORE.—Homeward freights remain dull; the two vessels on the berth are loading slowly, at £2 5s. dead weight, and £2 light cargo.

At PENANG.—The tonnage placed is abundant for present requirement, the rates are: 17s. 6d. to 30s. for tin, £1 5s. sugar, £2 10s. light freight, £3 measurement, and 2½d. rum.

REPORTED PER TELEGRAM.—The Ajax (str.) from Shanghai, arrived at Singapore.

CASUALTIES.

The Monteagle left Penang on the 6th Sept. for Liverpool, and put back again on the 1st Oct. leaky. The greater portion of her rice has been discharged, but the leak remains undiscovered. She will probably proceed to Singapore for repairs.

Digitized by Google

HONG KONG.

We have to report the following wrecks, which we noticed under Monetary and Commercial:—

The ship T. E. Boyd, from Foochow, bound for Melbourne, was totally wrecked on the Tortoise reef, Pescadores, on the 10th September. The captain and crew, after being plundered by the natives, and losing all they had saved from the wreck, succeeded in reaching Hong Kong Oct. 4.

The ship Westminster, from Shanghai to London with a cargo of tea, has also been totally lost on the Pratas Shoals. As soon as the vessel struck the captain ordered all sail to be taken in, and the boats lowered for the purpose of laying out an anchor. The vessel, however, remaining firm, and water rising to 4½ feet in the hold, in spite of the pumps, the captain left the ship in the hope of getting assistance from the natives. During his absence the vessel was boarded by them; they stripped the vessel and crew of everything portable, ordered the mate and the remainder of the crew to leave the ship at once. They accordingly left in two boats, and went in search of the captain, whom they met returning. On being informed of what had taken place, he determined to go on board again, and left the two boats, his boat's crew consisting of six persons—second mate, boatswain, steward, apprentice, and one seaman. The two boats laid off for about three hours, when it was decided that the gig should return to see what had become of the master and boat's crew; but on their return they stated that nothing could be seen of the boat or its crew, and that from the noise they heard whilst alongside their opinion was that the cargo was being disturbed in the main hold. The boats then put off and the next day they sighted a sail which proved to be the China, of Glasgow, bound to Batavia, by which conveyance both boats' crew arrived safely at Hong Kong. The captain and remainder of the crew also arrived on the succeeding day in a native junk into which two hundred tons of the cargo had been transferred. The captain and mate have returned to the wreck, but it is feared that the greater part of the remaining cargo will be lost.

The British steamer Douglas, which arrived at Hong Kong Oct. 6 from Foochow, reported the loss of the British barque Fanny, Captain Waters, on the 10th Sept. The Fanny was bound from Shanghai to London and on the 28th Sept. was met by a heavy gale of wind which parted her cables and turned her adrift. The vessel continued to drift until the 30th when she was abandoned by her crew, who proceeded in their longboat to Slut Island, which is at the entrance of the Hae-tan Straits. That night they slept in a joss house on the said island. On the morning of the 1st Oct. they were much surprised to find that the Fanny had drifted clear of the Norton rocks, and had gone ashore on a reef close to Slut Island. The Chinese wreckers were busily at work stripping the barque of anything that could be carried away. At the same time a party of natives landed on Slut Island, and robbed the poor crew of the little clothing they had managed to save. After some further difficulties the crew managed to get on board a west coast trading junk, where they met with kindness, and were given a passage to Foochow.

In addition to the above the *Hong Kong Evening Mail* of Oct. 11 has the following:—"By the Formosa we learn the occurrence of several shipping casualties. The Edward and the Willy, Bremen schooners, are lying wrecked near Tai-wan-foo. The Pylades is wrecked on the Formosa banks. The Perle, Bremen brig, is lying dismasted at Tai-wan-foo. The Shaftesbury has put into Amoy with damage to stern post. In addition to the above casualties at sea, we also learn the British brig Laura, from Foochow, was lost during the late gales in the Formosa Channel."

COMMERCIAL POSTSCRIPT.

A fine new China clipper named the *Titania* was launched on the Clyde on the 26th inst. This vessel has been built for Messrs. Shaw, Lowther, and Maxton.

A sale of bar silver has been made at 61d. A large quantity of silver and dollars is expected by the next steamer from the West Indies.

At the meeting of the General Credit Company held on the 27th inst., Mr. Bramley-Moore in the chair, the shareholders almost unanimously passed the resolution for winding-up the old and forming the proposed new company. The directors held proxies to the extent of over 126,000 shares, and the only question raised was with respect to certain portions of the articles of association. On this point, however, the chairman gave an assurance that the directors would be happy to take counsel with some of the principal shareholders, and all feeling of opposition was waived.

The scheme for the reconstruction of the Metropolitan and Provincial Bank has received the general support of the shareholders. A meeting is fixed for the 12th Dec. at which the proposals will be decided on. We believe this bank will then rise rapidly in public estimation.

The Agra Bank has not yet obtained release from the Court of Chancery, but the consent of Messrs. Reiss and Co. and other creditors who had opposed has now been obtained.

TEA.—The late arrivals of Kaisows and Monings are not of better quality, and dealers confine their purchases to immediate wants, quite as much from the fear of its "not keeping" as anything else. Their old stocks of last year they prefer to hold, but this season's teas must go into consumption or deteriorate by holding.

The Malta and Alexandria cable is again under repair, having broken in one of its sections.

The half-yearly meeting of the Ceylon Company (Limited) is called for the 18th December, to declare an interim dividend.

ARRIVALS NOT INCLUDED IN THE TABLES.—Nov. 24, at Deal from Canton, Taymouth Castle; 22, at Texel from Batavia, Dordrecht; at Liverpool from Manila, Echo; 25, in the Downs, from China, Peterborough; at Falmouth from Bassein, Alma; at New York, Nov. 9, White Swallow, from Manila; Nov. 26, at Deal, from Penang, Benvenue; 21, at Texel, from Batavia, Sinbad; 26, at Deal, from China, Lauderdale; from Foo-chow-Foo, Amberwitch; at London, from Ceylon, Scott; 28, at London, from Ceylon, Mary Ann; in the Downs, from Manila, Ironsides, Lochnagar.

DEPARTURES.—Nov. 24, from London for Colombo, Medway; 22, from Cardiff for Manila, Gentoo; from Hartlepool for Sourabaya, Kon. Ned. Yacht Club; 26, from Liverpool for Japan, *via* Cardiff, Nellie Hastings. Nov. 6, from New York, Luisa Carrevaro, for Shanghai; 27, from London, for Hong Kong and Canton, Min; 24, from Cardiff, for Hong Kong Boanerges; 25, J. W. A. Lorentzen.

LAID ON.—At Liverpool, for Batavia and Sourabaya, Java.

SPOKEN.—Avon, London to Colombo, Oct. 28, 8 N., 24 W.; Robt. Cushman (barq.), from Colombo, Oct. 21, 53 days out; Sailor Prince, Manila to New York, Sept. 5, 25 S., 52 E.; Java, Batavia to Amsterdam, Sept. 18, 34 S., 52 E.; Johanna, Sourabaya to Holland, Oct. 21, 7 N. 22 W.; Medea, Rotterdam to Batavia, Nov. 11, 22 N., 24 W.; Susanne, Bordeaux to Singapore, Nov. 12, 24 N., 23 W.; Engel, Liverpool to Batavia, Oct. 20, 7 N., 24 W.; Sailor Prince, Manila to New York, Sept. 23, 31 S., 11 E.

CASUALTIES.—The Dewa Gungadhur, which arrived at London from Foo-chow-Foo Nov. 19, reports having spoken on Oct. 29 the Annie Kimball, of Beverley, U.S., from New York to Shanghai, which vessel had encountered a hurricane on Sept. 22, when she sprung a leak, shifted cargo, and lost sails and half her fresh water.

MISCELLANEOUS.—At Algoa Bay, Oct. 19, Wilhelmina Johanna, from Batavia to Rotterdam, in distress.

At MAURITIUS.—Achilles (S.S.), Russell, from Liverpool and left for China.

The Admiralty have invited tenders for the conveyance of about 350 tons of Naval masts, and sundry shipping materials, from the River Thames to Hong Kong.

At ASCENSION.—Oct. 2, Anna Lucy, Wade, from Hankow, and sailed on 4th for London; 17th, Gebroeders, from Batavia, and sailed on 18th for Amsterdam; 24, Drusus, Hansford, from Sarawak, and sailed on 25th for London.

Off ASCENSION.—Oct. 16, Charles Jackson, from Shanghai; 19, Benvenue, from Penang, both for London.

At ST. HELENA.—Oct. 17, Amberwitch, Langlois, from Foo-chow-Foo and sailed for London; 22, Vyf Vrienden, Johan, from Batavia, and sailed for Rotterdam; 25, Quatre Bras, Nieuwenhurfs, from Java, and sailed on 26th for Amsterdam; 26, Ornate, English, from Foo-chow-Foo, and sailed for London.

Off ST. HELENA.—Oct. 8, Scott, Laycock, from Colombo; 27, Valdavia, from Hong Kong.

At MAURITIUS.—Oct. 7, St. Paul, Messanot, from Galle; 10, Paul Riquet, Jenevieve, from Hong Kong; 13, Kalahome, McMillan, from Singapore; 13, Elizabeth Douthwaite, Pearson, sailed for Galle.

THE RE-INFORCEMENTS FOR CHINA.—It is probable that the troops intended for despatch to China and Japan by the *Golden Fleece*, will be detained pending the expected Feenian riots.

THE RUSSO-AMERICAN TELEGRAPH EXPEDITION.—The American barque *Onward*, which arrived at San Francisco on the 12th instant, reports having left at Petropaulovski fifteen operators and constructors in the service of the Russo-American Telegraph expedition. Ice had commenced forming when the *Onward* left, but the men were comfortably housed for the winter. The people of Petropaulovski treat the party with great hospitality. Colonel Bulkley started for Anadyr Bay August 2, and is expected at San Francisco during the present month. The Russian war steamer *Variag* left the same day for Nicolaefski carrying Count Anasoff, the Russian Commissioner.

DEATH OF T. A. GIBB.—T. A. Gibb, Esq., the head of the well-known firm of T. A. Gibb and Co., in the China trade, of Old Broad-street, died on the 15th inst., at his residence, Lancaster-gate, at the age of 67. Mr. Gibb was a director of the Panulcillo Copper Company, British Shipowner's Company, Ocean Marine Insurance Company, and Overend, Gurney, and Co. He has suffered for many years from disease of the heart, and his death is said to have been accelerated by anxiety caused by his connection with Overend, Gurney, and Co. He was a large shareholder, and also a depositor in this unfortunate institution, and all his friends regret that he was induced to join it.

LETTERS FOR THE PHILIPPINE ISLANDS.—The Postmaster-General of Hong Kong has represented that he is unable to obtain receipts for registered letters sent to his office addressed to the Philippine Islands, and has requested that the practice of registering letters so addressed may be discontinued. No letters for the Philippine Islands will, therefore, in future, be accepted for registration.

THE BANK OF HINDUSTAN, CHINA, AND JAPAN IN LIQUIDATION.

The report of a preliminary meeting held on the 16th inst. is given in another column. The resolutions at that meeting were brought forward at the general meeting held on the 19th at the London Tavern, and ultimately adopted after three hours' angry discussion. The auditors' report, which was presented, was as follows:—

"We, the undersigned, hereby certify that we have closely scrutinised into the value of the assets of the bank, and regret that we have to report a very large estimate of losses at the head office and several of the branches. These losses have for the most part been made at the Bombay, Calcutta, and China branches, and appear to us to have occurred from the most reckless management, and in some cases in almost total disregard of the established rules of the bank, and in opposition to the special instructions of the head office. These remarks apply more especially to the Bombay branch, where the funds of the bank have been squandered in the most wanton manner, and money advanced to parties notoriously unworthy of credit, and upon worthless securities. More than one-half of the whole losses have been made at this branch. From the report of Mr. Stewart, dated 12th October last, who was instructed to make an investigation of the operations of the Bombay branch, and of the value of its securities, we make the following extracts:—'Hitherto deviations from your instructions appear to have been the rule—not the exception—hence the serious losses incurred at this branch. Had your general instructions as to local business alone been attended to, fully one half of the present estimated losses would have been avoided. Until within a few months past, very little attention appears to have been paid to the realisation of the outstanding debts owing to the bank, and it was only after my arrival here that active steps of a legal nature were adopted. I have endeavoured to ascertain whether there were any special causes to which to attribute such unfortunate results at this branch, but have been unable to trace any beyond mere mismanagement. The enormous operations during the half-year, to which you refer, appear to have been entered into without any definite object beyond that of doing a very large business. Little or no calculation would seem to have been made as to the probable results of the operations entered into, and so far as I can judge, provision for liabilities coming due from time to time was not generally made in advance, so that when large amounts became due, they had to be met by a sacrifice in rates of exchange.' We have sought from the latest returns received from the several branches, together with the report of Mr. Stewart referred to, and explanations from the general manager and other officers of the bank, to obtain the fullest information of the circumstances attending each account, and of the value of the general assets whereon we have based our estimate of the probable amount of losses will be sustained by the bank. The information and returns received in some cases are very insufficient; having, however, carefully examined all the accounts and statements available, we believe we have arrived as nearly as possible at a correct statement of the probable loss, which we estimate will amount to about £713,404 beyond the sum of £87,794 1s. 2d. written off the reserve fund of December, 1865. The capital account of the bank under this estimate will stand as follows, viz.:—Paid up, £892,247; estimated value of £26,753 calls in arrear, £15 000; balance of reserve fund, £20.605; total, £927,852. Deduct estimated loss as above, £713 404; balance remaining, £214,448. As the outstanding balances and past due bills at Calcutta and Bombay are much dependent upon the realisation of depressed securities and expected dividends from insolvent estates, it will take time and expense to recover them, but with a revival of commercial confidence in India the market for these securities may be improved, whereby the position of the bank will be correspondingly improved. Among the loans due to the head-office there are several amounts due from some of the directors, in all about £5,000, and a further sum of about £16,000, the liability to which on the part of some of the first directors and others is disputed; but the matter has been agreed to be referred to arbitration. So much as may be received from this amount will go in reduction of our estimate of losses. There is an item of £2,781 17s. 6d. included in the preliminary expenses arising out of the purchase of shares by the directors at the formation of the bank in 1862, and also a further item of expenditure in connection with the amalgamation of the Imperial Bank of China of £6.956 17s. 6d. that appears to us to require the confirmation of the shareholders. In conclusion we have to state we have had every assistance from the officers of the bank that they could give, and such books of account and papers as we desired were freely produced to us.—FRED. MAYNARD, GEO. MACNAIR, ARTHUR COOPER, Auditors.—London, Nov. 16, 1866.

"Balance sheet, 30th June, 1866. Dr.—To capital account: Authorised 40,000 shares, £4,000,000; to subscribed 36,760 shares, £3.676 000; to paid up, £892,247; to calls in arrear, per contra, £26,753, making £919.000; to reserve fund, £20.605 18s. 10d.; to current and deposit accounts, £272,496 6s. 5d.; to loans due by the bank against securities, £282 644 4s. 3d.; to bills payable (this amount includes all drafts in circulation, both unaccepted and in transitu), £3.635 812 0s. 8d.; to bills re-discounted, £1,519.166 13s. 3d.; to circular notes, letters of credit, and sundry other credit balances, £43,012 4s. 11d. Total, £6.692,737 8s. 4d.—Cr.—By cash in hand at bankers and bullion at head office and branches, £258 609, 17s. 4d.; by Government securities, £236,788 17s. 8d. (part of these securities were deposited to cover loans per contra); by calls outstanding per contra, £26,753; by bills receivable, £4.752,039 9s.; by bills due united at head office and branches, £174,047 12s 1d.; by past due bills (this amount is exclusive of dishonoured bills, the accounts of which were in transitu). £376,458 19s. 2d.; by loans and current accounts, £524 452 9s.; by balances of accounts between the head office and branches of the bank, £256,339 1s. 3d.; by bank premises in London per last account, £27.800, by since written off, £695; leaving, £27.105; by preliminary expenses, £6,500; by miscellaneous accounts, including furniture at head office and branches, stamps, insurance, &c., £22,851 7s.; by sundry small debit balances, £12 874 16s 9d; by balance of profit and loss account, £23,916 19s. 1d.; total, £6 692,737 8s. 4d

"Profit and Loss Account.—Dr.: To loss for half-year ending June 30, 1866, £47,404 7s. 3d. Cr.: By balance on December 30, 1865, £23 487 8s. 2d.; by balance, £23.916 19s. 1d.; total, £47,404 7s. 3d.

"Reserve Fund.—Cr.: By balance on 30th December, 1865, £17,805 18s. 10d.; by amounts since received on account of premium shares of third issue, £890; by amounts received on forfeited shares, £1,910; total, £20,605 18s. 10d.

"We the undersigned certify that we have carefully examined the above with the books and accounts at the head-office, and with the certified copies of the returns received from the branches, which as a matter of account we find correct, but with regard to its representing the position of the bank and for our estimate of the value of the assets, we refer to our report of this date—(Signed). FRED. MAYNARD, GEO. MACNAIR, ARTHUR COOPER, Auditors.—London, 16th November, 1866."

It will be observed that the balance sheet is only up to the 30th June, but up to the latest advices from India and China the liabilities are put down at about £1,000,000, though a few months since they were over £3,000,000. The chief creditors were the National Bank and the Thames and Mersey Marine Insurance Company. The Chairman (Mr. Mackrill Smith), in opening the proceedings, said:—

When his colleagues appointed him chairman in May last, he felt that the duties were of no ordinary character; but the financial storm had only then just commenced, and their anxieties increased every day, dating from the last meeting in that place, and disastrous as had been the results of the bank's operations, they had nevertheless striven hard against the torrent of misfortunes which had been poured upon them by the reckless conduct of some of the branch managers. They had, by the establishment of a daily committee, supervised everything that had been done at the head-office, or ordered to be done at the branches, and from that daily committee he had been absent for only one day since its establishment in May last. The auditors' report spoke to them so fully and so plainly that he need hardly make much reference to it, though he must add to the extracts from their very able inspector's (Mr. Stewart) letter, one from a private letter to the general manager, in which he spoke of the Bombay management in the following words:—"Things have been frightfully mismanaged here in every possible way; and if he (the manager) had only stuck to your orders from head-office he would have been all right, and the bank occupying a splendid position." These remarks referred to the late manager; and he regretted to say that the two former managers at that place had been equally guilty of disobeying orders; and further than this, had entered upon speculative transactions of a very objectionable character. One of the former managers had lately been arrested at the suit of the bank, but was unable to satisfy its claims, and had appealed to the Court of Bankruptcy. In Calcutta and Shanghai similar transactions took place, but none of those managers were now in the bank's service. He next referred to the petition filed in Chancery, and explained why such a step was taken between the date of calling this meeting and the date of its appointment. When their circular was issued, to receive audited accounts, and a proposal to reconstruct the bank with a view to reduce their liability, the directors were guided solely by their own and the general manager's valuations of the assets, the auditors' report and valuations not having been completed until Friday last, which explained the delay which had arisen in sending out printed copies, for they did not go to the printer's until Friday night. The petition in Chancery came about in this way. The rough statements were presented to them very early on Monday last, and the figures then showed that out of their capital and reserve fund only about £102 000 was left. A special board was summoned, and after a long consultation, which lasted nearly the whole day, is was resolved that in the interests of the shareholders he should file a petition in the Court of Chancery that the bank be wound up voluntarily; and this was done early on Tuesday morning. Their own estimates brought the valuations of assets up to more than £300,000, which upon the 35 000 shares current showed nearly £9 per share, exclusive of the call of £3, or £12 together. Had these figures been confirmed by the auditors they would have been justified in carrying on the bank until its future course had been decided; but when they learnt that they estimated our losses at more than three-fourths of the capital, it became imperative upon them to take action in the matter, and protect the property against any hostile petition, which most assuredly would have been presented by some one. The nomination of provisional liquidators was decided upon in this way. Messrs. Cooper and Maynard were auditors and accountants of their own choice, and they, therefore, thought them fit and proper persons to act as interim liquidators; and Mr. David Chadwick was named in the interests of their principal creditor. Since the rough statements were laid before them on Monday last, the auditors, at the request of the directors, went over their valuations with the general manager, and the result of their consultation was that the estimated value of assets (which included a clerical error which had crept in during the hurry necessary to complete the accounts) was improved by £112.000, making the total valuation £214.448, or say £6 per share, exclusive of the £3 call, which had not been taken into account at all by the auditors. This valuation gave £9 per share against their own estimate of £12. The auditors had been anxious to arrive at a safe valuation, but the directors believed that under a judicious liquidation fully £10 per share would be realised. The circular calling the meeting referred to a plan for reconstruction, with a view to the reduction of liability upon shares, and some leading shareholders who had long advocated such a plan requested the directors to confer with them upon so important a subject before submitting it to this meeting, and this led to a private meeting at the bank on Friday last. That meeting consisted of sixty to seventy of the largest shareholders, who were invited by the board in accordance with a promise to consult upon a plan for forming a new bank with small shares—say £25 each—crediting each with what might be shown to be the value of the present shares—say £9 to £10—and that the new bank should liquidate or purchase the assets of that which was now in liquidation, adding to its capital a further £2 10s. per share, and making, say £12 10s. paid upon £25—the old shares to be exchanged for the new, and their agreed value to be guaranteed by the old bank—but this scheme it was decided to postpone, and the attention of those gentlemen present on

Digitized by Google

Friday was directed chiefly to the question of the liquidation and the manner in which it should be carried out. After two hours' discussion, which was of a calm, dispassionate, and practical nature, the following informal resolutions were unanimously agreed to be recommended to the general meeting this day. The minute which was made was as follows:—"At a meeting of the principal shareholders of the Bank of Hindustan, China, and Japan (Limited), held at the offices of the bank, Lothbury, on the 16th day of November, 1866, the following resolutions were recommended for adoption by the body of shareholders convened to a general meeting to be held at the London Tavern on the 19th day of November:—1. That it has been proved to the satisfaction of this meeting that the company cannot, by reason of its liabilities, continue its business, and that it is advisable to wind up the same. 2. That this company be wound up voluntarily under the supervision of the Court. 3. That three directors be appointed to act with three shareholders, to be nominated by the general body of shareholders, and to form a committee for the liquidation of this bank, and that their remuneration be fixed at a subsequent meeting of the shareholders.'" These resolutions would therefore be submitted, and if approved the directors were legally advised that upon application to the Court of Chancery they might withdraw the petition, or so much of it as referred to the provisional liquidators already appointed, and ask for the substitution of the committee of six referred to. Should that committee be appointed, the liquidation might be conducted at a very small cost compared with that which would attend the services of professional gentlemen—(hear, hear)—and as the bank's affairs were daily coming into a smaller compass, the principal creditors would soon be paid off. When this had been done, the committee would consult with the shareholders as to the future prospects for a new bank, or a transfer of the remaining assets to any other bank, meanwhile, the expenses both at home and abroad would be very largely reduced; and should any proposals for amalgamation or otherwise be made, every day's delay would put them in a better position to avail themselves of it. Before sitting down he would say a very few words in reference to the National Bank, as he had notice of a question on that subject. That institution, like all well-conducted banks, had taken good care of itself during the late panic; but he was bound to add that they had treated them with prudent liberality; and although their acceptances on their account a short time ago amounted to not far short of three millions, they were now less than £500,000. In conclusion, he begged to move the adoption of the accounts and report of the auditors.—The motion having been seconded,

Mr. KINTREA said that he thought it extremely unadvisable at the present moment, and with their affairs in a complete state of ruin, to adopt any report or statement of accounts whatever. He blamed the directors and auditors for not bringing before the shareholders the statement of accounts to a much later period than the 30th of June. Mr. Stewart had given them a report of the state of the branches up to as late a period as the 16th of October.

Mr. MAYNARD rose to explain, but the meeting would not allow any interruption. (He subsequently explained, the latest information had reached them and had been embodied in their statement.)

Mr. KINTREA resumed, observing that it would have been most desirable to have known the condition of things up to the date of Mr. Stewart's report. No doubt it was a very melancholy thing to hear that their losses amounted to £713,000, but he should have been glad to have known by whom those bad debts were incurred, and especially how the head office stood in respect to bad debts and corrupt transactions, for which no one abroad was responsible, and which, until he knew the contrary, he must lay at the door of the board. He appeared there as a shareholder who had suffered grievous losses through the mismanagement of the directors, and he could not help thinking that they were victims of a gross delusion. They were therefore bound to inquire into all the circumstances of the case and to ascertain whether any persons, here or abroad, ought not to be brought to the bar of criminal justice. (Great cheering, with some cries of "Question." He trusted the liquidators would not allow any man to escape who could be made a public example. He would not charge anything against the directors which they did not deserve, but here was a statement from the auditors that out of a capital of £900,000 there had been a loss of £713,000, and yet only four weeks before the directors had stated that they would present a specially audited account, which they believed would be satisfactory to the shareholders. It appeared that on the 15th of October last they were wholly uninformed of the deplorable state of affairs when they sent out their circular. They having had years to inform themselves of the position of the bank, and after having dismissed Mr. Thompson months before, and well knowing the amount of the losses in India, it was marvellous to him that they could have issued such a circular. He charged it against the directors that they had for years conducted the affairs of the bank with a total oblivion of its real position, and allowed the company to drift into this melancholy state, involving them all in a gigantic ruin. He, however, looked with some anxiety to the prospect of getting back part of their capital, and his opinion was that the only way in which they could possibly hope to get anything was not to have any professional men employed in the liquidation—(cheers)—but that three directors and three shareholders should form the liquidation. He charged Messrs. Flux and Argles, the solicitors of the company, with having prepared warrants of attorney to send out to India with the object of keeping the power of dealing with the assets in the hands of the present authorities, or the liquidators appointed through their interest; and he also charged Mr. Argles with misconduct, inasmuch as that, after having attended the meeting alluded to by the chairman, and fully agreeing to the resolution recommending that a committee of three directors and three shareholders should be appointed as liquidators, he had told a gentleman that if he saw Mr. Chadwick, who was one of those named as an interim liquidator on the part of the principal, and, with one exception, the only creditor, to go to the National Bank and tell them that they must oppose the proposition that the liquidation should be placed in the hands of a committee of shareholders, and that they did not insist upon the liquidation being continued in the hands of persons named in the petition they never would get a shilling of their money.

This statement gave rise to warm expressions of dissatisfaction with Mr. ARGLES, who got up and denied that there was a word of truth in it; thereupon Mr. KINTREA stated that he had permission to give the name of his informant, and it was no less a person than the secretary, Mr. Tomlin.

The SECRETARY, on being loudly called for, said that Mr. Argles made use of the expressions almost exactly as Mr. Kintrea had stated them.

Mr. FLUX, a partner in the firm, attempted to make an explanation, and said that if five minutes were accorded him for that purpose, he would make it clear that the solicitors had studied the best interests of the company.

The meeting, however, refused to hear him further.

Mr. CHADWICK expressed his belief that the charge arose out of a mistake or misapprehension. At all events no such communication was made to him. He was appointed liquidator in his absence by telegram, and he said he would only act if every one desired it. A conference took place between the solicitors and manager of the bank and himself on Saturday, when it was communicated to him that the result of the meeting of the shareholders on the previous day was that the provisional liquidators were to be displaced by three directors and three shareholders, and to that proposition he cordially agreed. (Cheers.) He declined to be one of the six, because being a professional accountant, questions might arise between them in which he should consider his judgment ought to be deferred to. He had seen the authorities of the National Bank that day, and they had informed him that they would take no steps in the matter, but that if a committee of liquidators was appointed as proposed, they would cordially concur in it. (Loud cheers.)

Mr FLUX was then permitted to explain that the firm had cometo the couclusion that they would have a difficulty in inducing the Vice-Chancellor to sanction the appointment of six liquidators, but assuming that to be got over, they would have to make arrangements with the National Bank, because unless the National Bank would consent to the appoinment of the individual liquidators, their objection would be fatal. Their firm had done nothing whatever to prejudice the interest of the shareholders, but on the contrary had advised that steps should be taken to intercept the call now being paid into the National Bank, and get it paid by them into the Bank of England, and £30,000 on that account had been already so paid. With respect to the warrants of attorney, the object in sending them out was to prevent things getting into confusion, and to obtain the speedy payment of the debts. All debts collected by the agents abroad would pass to the liquidators.

A lengthened and acrimonious discussion ensued upon the question of the appointment of liquidators, in the course of which Mr. Vanderbyl and Mr. Alderman Allen were expressly excepted by the speakers from blame.

Mr. MAYNARD, one of the auditors and provisional liquidators, said that fault had been found with the instructions forwarded to the manager of the branches. It might be some time before the committee came into action, and it was therefore necessary to send out the instructions. He wished the meeting thoroughly to understand the position in which the provisional liquidators stood. They were appointpd by the Court of Chancery, and were prepared to do their duty, at the same time they would give every attention to any expression of opinion from the meeting, as that would in a great measure affect the action of the Court. It was their intention to execute power of attorney, and send out to Bombay and Calcutta that day; but it rested with the meeting to say whether or not they should stay their hand. If those powers were sent out, they would be open and available for anybody who might succeed them. With regard to the accounts not being brought down to the latest day, they would observe from the report that they had waited for the reports from the several branches in order to bring the accounts down to the latest point. From the latest accounts they could obtain they found that the debts were then £2,900,000, and the assets were in round numbers £3,200,000. Since the time at which those accounts were made up the debts had gone off and the assets had gone off in proportion, and probably at the present time the debt stood at a million or a million and a half. The estimate of losses had been taken rom the latest information which could possibly be obtained. With regard to Mr. Thompson, no expression as to his conduct could be too severe, for his exchange transactions in January, February, and March resulted in a loss to the company of £20,000.

Mr. HARRISON, a director, said that he had no objection to the resolution which had been proposed to take the management out of the hands of the present directors. A great deal had been said with regard to want of competency on the part of the directors. He had done all in his power for the bank; and with regard to losses, he said that the directors would lose a great deal more than any gentleman on the other side of the table. As the representative of a creditor for £25,000, he was authorised to say that that creditor would consent to the proposed course. The bank had but two creditors, one of which he represented, and the other was represented by Mr. Chadwick, who was also prepared to fall in with the proposition.

On the motion of Mr. PRICE, seconded by Mr. STEWART, it was agreed to appoint the following six gentlemen as liquidators:—Mr. Vanderbyl, Mr. Alderman Allen, Mr. Mackrill Smith, three directors; Mr. Kintrea, Mr. Macnair, and Capt. Engledue, three shareholders.

Capt. ENGLEDUE said that he would only consent to serve on the understanding that the present solicitors should not be appointed solicitors to the liquidators.

This led to a discussion which approached more nearly the character of an altercation, and a resolution was proposed by Mr. COURTENAY' seconded by Mr. MEDDAR, "That in the opinion of the meeting the gentlemen referred to ought not to be solicitors of the liquidation."

Mr. ARGLES again denied in the most pointed manner the statements made against him, and Mr. FLUX said that the whole charge was the result of a conspiracy; but the meeting would hear neither gentleman with patience, and their explanation was completely drowned in the noise and confusion caused by the shareholders, who were all on their feet, and most of whom were loudly expressing their opinion one way or the other, in addition to which the proceedings were enlivened by five or six private altercations which were going on in different parts of the room at the time.

Mr. COURTENAY expressed a wish to withdraw the resolution, but this course was indignantly opposed by Messrs. Flux and Argles, and the chairman decided that if they wished the motion to be put, it would be unfair to them to withdraw it. The resolution was put and carried by a large majority, but it is fair to state that by this time many shareholders had left, and were leaving the room, and that the whole scene was one happily not often witnessed at a commercial meeting. A hurried vote of thanks was given to the chairman, and the meeting broke up.

A subsequent notice appears under "Monetary and Commercial."

LONDON, WEDNESDAY, NOV. 28, 1866.

SATSUMA AND CHOSHIU.

Among the several Daimios who are becoming known to fame Satsuma and Choshiu occupy the foremost rank, and owing to the great interest now taken in Japanese politics their names have already become "familiar in our mouths as household words." The notoriety acquired by the last-named prince is indeed of a somewhat unenviable character, being derived chiefly from a series of unfortunate collisions with foreign Powers, and from the prominent part taken by him against the late Tycoon, or more properly Shiogoon,* in the civil war which we may suppose has just been terminated by the death of that potentate. At present we know so little of the personal character of Choshiu, that the opinions which have been hazarded regarding the motives of his apparently unreasoning acts of aggression against the treaty Powers, and his successful rebellion against the Shiogoon's supremacy, are perhaps premature; and it may be that on establishing closer relations with this prince we shall find that he has been more sinned against than sinning, and shall therefore have reason to form a more favourable estimate of his character. Of Satsuma, however, we have had better opportunities of judging. Our acquaintance with him could not well have commenced in a more inauspicious manner than it did; but whatever vengeful feelings the unhappy fate of Mr. Richardson naturally excited were soon subdued by the reflection that after all Satsuma himself could not justly be held personally responsible for the outrage. The gallant bearing of the defenders of Kagosima during the operations that followed could not fail to win our respect; and the spirit of true charity and unreserved forgiveness since evinced by the Daimio would have done honour to any Christian prince. The cordiality of his invitation to Sir Harry Parkes to visit Kagosima, and the unbounded hospitality received there by Sir Harry and his companions, are not the only evidences of this. A still more valuable testimony is contained in the statement of the three survivors from the wreck of the *Cyclone*, lately cast away on the rocky shore of Satsuma's domain. "The Prince "was most kind to us, supplying us with clothes and whatever "else we required. We were never without guards, and "wherever we went were treated kindly. We cannot refrain from "testifying our sincere thanks for the kind manner in which we "were treated, which we shall ever bear in remembrance." It is to be hoped that measures will be taken to let Prince Satsuma know that the gratitude expressed in the simple words of these poor sailors is fully shared in by their countrymen.

* "Tycoon" is a word actually unknown to the Japanese, and is in fact merely a corruption of two Chinese words, *Tai koon*, signifying "great ruler." Its use was adopted at a time when we had no direct intercourse with Japan, and were content to owe our imperfect knowledge of that country to the Chinese and Dutch; and having been retained by the English Press, the term is doubtless thought by a large portion of the general public to be the Japanese synonym of "Emperor." It is time to explain that the true title of this personage is "Shiogoon," and that he is in reality no monarch, but merely the generalissimo of the Mikado, or real sovereign, and chief of the Executive Government; although in negotiating the foreign treaties in his own name he undoubtedly usurped the Sovereign power.

PIRACY IN CHINA.

The accounts brought by the last mail of the attack on the *Lubra* have again called attention to this subject; and although the respective departments of Government, viz., the Admiralty and Colonial-office, are desirous of organising a more efficient check on the pirates, they find considerable difficulty in the way. There is no question but that the system adopted by us for the suppression of piracy has been open to considerable abuses. The officers and crews of gunboats have committed on many occasions most flagrant mistakes as to the identity of the piratical vessels, and in moulding a new scheme it is necessary to avoid a repetition of such. We understand that the Admiralty are not opposed to granting a vessel to be at the exclusive orders of the Governor of Hong Kong, but they hesitate to hold the responsibility of manning her. She must be considered a police cruiser, and be manned by the Colonial Government. An allowance for the expense of the service of £5,000, per annum has been sanctioned by the Treasury out of the £20,000 military contribution. Before deciding on the matter a report is awaited from Admiral King, who has lately been on a visit to Peking, in order to confer with Sir Rutherford Alcock on the subject in all its bearings.

THE BRINDISI ROUTE.

The steamers of the Adriatica Orientale Company continue to run between Brindisi and Alexandria, four times a month, in correspondence with the India and China mails. The passage is accomplished in 70 to 82 hours, and very seldom exceeds the latter. The question of proceeding on to Venice after landing passengers, &c., at Brindisi is not yet decided on. The route over Mont Cenis to Brindisi is still open, the only difference being that the journey from St. Jean de Maurienne to St. Michel—7½ miles—is performed by diligence until the railway bridges are completed. This causes a delay of a few hours. The diligence service from St. Michel to Susa, on the other side of Mont Cenis, will be continued until the railway is completed, which will probably be during the next summer. The connecting links between the German and Italian lines will also be shortly completed. Passengers will then have a choice of proceeding by way of Padua to Vienna by the Trieste and Cilli Railway, and from Vienna of course any part of the Continent may be reached, and the choice of routes also across the Channel to England.

THE EASTERN ASIA TELEGRAPH.

Some two months since we had occasion to notice that the scheme for connecting the Indian lines of telegraph with Penang, Singapore, Siam, Java, and China, had begun to assume a defined form, and that some preliminary steps were being taken to secure the co-operation of the several governments through whose territory the proposed new lines would have to be carried. The progress made has been more rapid than we could have expected, and thanks to the energy of some half-dozen Singapore merchants, who form the Provisional Board of Directors, we now have before us the preliminary prospectus of "The Eastern Asia Telegraph Company (Limited)." This company, we find, proposes to commence its operations by constructing (1st), a land line down the entire length of the Malay Peninsula, connecting the existing line, which reaches to Moulmein, with Penang, Malacca, and Singapore; (2nd) a branch line from this to Bangkok, and thence, eventually, to Saigon; and (3rd), a submarine cable from Malacca to Bankalis (in Sumatra), to connect this system with that of the Netherlands India Government. After the completion of these primary works, it is anticipated that there would be comparatively little difficulty in carrying a line from the Siamese frontier to Hué, on the Gulf of Tonquin, whence a submarine cable would complete the communication with Hong Kong. In course of time this will doubtless be accomplished, but it appears to us the most difficult part of the whole scheme, and one which even if successfully achieved will hardly rival the rapid means of communication with China we already possess *via* Kiachta. As regards the other portions of the undertaking, however, too much cannot be said in praise of the enterprising spirit with which it has been taken in hand, and we have little doubt that the needful capital, £150,000, in £10 shares, will readily be subscribed. Should this be the case, the year 1868 will certainly see us in direct communication with the Straits Settlements. There is of course a difference of opinion as to whether a submarine or land line would be best, and in another column will be found a letter from an engineer on the subject.

Digitized by Google

The following opinions upon the subject of submarine *versus* land lines were expressed in a paper read by Sir C. T. Bright, M.P., before the Institute of Civil Engineers :—

"The cost of a submarine cable in Europe, compared with a land line, is very great; but the cost of a land line in uncivilised countries, without the facilities for the conveyance of stores and workmen, is considerably increased, while the cost of maintenance and the chances of interruption and delay in re-establishing communication are also greater. The regularity of the working of a properly conducted line would soon compensate for the additional outlay involved in the adoption of a sea route by which also communication could be more speedily effected.

"Between Singapore and Hong Kong a cable can be readily carried in shallow water, touching at Saigon, or the connection with China may be made by crossing the peninsula with a land line at Mergui, and carrying a cable across the Gulf of Siam. A further portion of the route might be carried by land by way of Bangkok and Cochin China; but although a branch or loop line might be taken by land in this direction, the main line, on which the regularity of the Chinese traffic would depend, should be submarine.

"The failure of the Red Sea cable was not due to the nature of the bottom, but arose from circumstances quite unconnected with the locality. A cable could be successfully laid in the Red Sea and along the Arabian shore to the coast of India.

"When effected by submarine cables in shallow water the nature of the communication was always satisfactory. No complaints arose from the transmission through the submarine line to Alexandria or on the Persian Gulf line. Occasional interruptions undoubtedly occurred, but if a duplicate line existed, as was proposed, even that objection would be obviated. Submarine cables were of course more expensive; but while the Persian Gulf cable was earning more than £100,000 per annum, and the Malta-Alexandria had taken £3,000 per week, there could be no fear that they would not pay well, especially when they formed parts of a complete system.

THE BANK OF HINDUSTAN, CHINA, AND JAPAN.

[ORDER TO WIND UP.]

THE directors of this bank have, in the interest of the general body of shareholders and creditors, filed a petition in the Court of Chancery for the winding-up of this establishment. It has been known for some time that the disasters at the various branches were so onerous that it would be impossible to continue business in the present condition, but it was intended to leave the solution of the question to be decided at a general meeting called for the 19th. It appears, however, that some of the shareholders had private meetings and intended to present a petition to wind up, and hence the directors very properly took the initiative on the 13th and procured the order on the following day, but it was not known publicly until the 15th, when no doubt it was telegraphed to India and China. The termination of this bank's business is much less disastrous than the others that have fallen, inasmuch as the debts are all centred in the National Bank and one or two other institutions. The amount due to the general public on deposits and bills of exchange is very trifling indeed, and all these will be paid in full with very little delay. The sufferers are the shareholders. It appears according to the auditors' report, which will be issued this evening, that the total losses are put down at £713,404, out of a capital and reserve fund of £927,852, leaving £214,448 to be divided amongst the shareholders, numbering about 35,000 (of £25 each), which will yield a return of about £6 per share. This estimate is, we believe, the worst possible view of the assets, and that it is quite probable that the return will amount to £3 more. These figures are, it will be observed, quite irrespective of the £3 call made payable on the 7th, and which makes the share £28. The basis is taken on £25 paid up, as of course only a small portion of this call has reached the bank as yet. This, added to the auditors' £6, and the expected £3 surplus, would make a total return of £12 out of the £28. This position is of course lamentable enough, but is not so bad as the market value of the shares indicates, the price being only £1 to £2 for the £28 share. This is to be accounted for by the fear on the part of shareholders that creditors might insist on another call before the assets are realised.

At a private meeting of the shareholders on the 16th, the auditors' report and the conduct of the directors were freely discussed; and although it appears that some of the directors have made use of the bank in the way of loans the amount is not large nor likely to be lost, and on the other hand they have all lost heavily—Mr. HARRISON stating that he and his relations had lost about £50,000. Even eight months since the directors increased their holdings—fully convinced they would come out well in the end; but the whirlwind of May inflicted such a blow that all chance of recovery was rendered hopeless. Out of the £713,000 loss over £400,000 is at Bombay, that sink of financial demons and reclamation schemers.

After considerable discussion the following motion was passed —"Resolved that Mr. ALLEN, Mr. VANDERBYL, and Mr. SMITH "be appointed to act with three shareholders, to be nominated "by themselves and form a committee for the liquidation of "this bank." By this means all the expense of official liquidators will be saved. A proposal was made to reconstruct the bank with £10 shares, but it was agreed that this and other questions should be left to the committee. A notice of the meeting on the 19th will be found in another column.

NEW STEAMER FOR CHINA.

A very fine iron screw steamer for China is being built by Messrs. Hall, Russell, and Co., Aberdeen, and will be launched early in December. The following are her dimensions:—length between perpendiculars 170 feet, breadth 24 feet, depth 14 feet, tonnage 395 tons (gross). She will have a flush deck from stem to stern, with a house 90 or 100 feet long built thereon; will be schooner rigged, and fitted with direct-acting engines of 72-horse power (nominal), which it is calculated will give her an average speed of 11 knots. Although not of very large size, in speed, equipment and finish, she will in all respects be a first class vessel. Captain Roper, well known on the China coast will be her commander.

THE NEW GOVERNOR OF THE STRAITS.

WE announced in our issue of the 12th inst. that a new Governor under the Colonial-office had been nominated. We have now to announce that Colonel Ord, C.B., the present Governor of Bermuda, has accepted the appointment and will proceed to his post early in the ensuing year. The previous career of Colonel Harry St. George Ord, C.B., is as follows:—

Entered the Royal Engineers, 1837; lieutenant, 1839; captain, 1846; brevet-major, 1854; lieutenant-colonel, 1859. Served in the West Indies and on the coast of Africa, and as brigade-major in the combined French and English expedition to the Baltic in 1854. Was employed under the Colonial-office in 1855-6 as commissioner to the Gold Coast, and in 1856 and 1860 at the Courts of Paris and the Hague to assist the ambassador and Minister in carrying out negotiations with respect to the French and Netherlands possessions on the coast of Africa. Appointed lieut.-governor of Dominica August, 1857; and governor and commander-in-chief of Bermuda February, 1861.

THE EASTERN ASIA TELEGRAPH.

(To the Editor of the *London and China Telegraph*.

SIR,—Having read the number of the *London and China Telegraph* containing the prospectus of the Eastern Asia Telegraph Company, I propose to make a few remarks about it. In the report of the Committee on East India Communication which sat last session, you will find that Col. Robinson, the Director-General of Telegraphs in India, states that enormous practical difficulty would be encountered, from the wild nature of the country, in establishing a telegraph along the coast between Rangoon and Singapore (p. 14-29-46). I make the distance between Moulmein and Singapore 1,480 statute miles and not 1,085 as given in the prospectus. I do not believe that a line of telegraph, sufficiently good for the transmission of international messages, could be established at much less than £100 per mile, the estimate by the company being only £50. A private company would have no means of enforcing its concessions and securing the protection or even the proper supervision of their lines through wild and uninhabited districts belonging to an Asiatic Prince. As far as I can learn, no line of telegraph could for a moment be depended upon through that country. If at all practicable it could only be carried out by the Indian Government under formal treaties with the native Princes; but I very much doubt whether even then the proposed line would be sufficiently certain in its working and secure from interruption to transmit international messages, though it might possibly be useful for local purposes. I consider the scheme put forward in the prospectus as most immature both from an engineering and political point of view. There is nothing like a submarine line, laid at a depth where it is accessible for repairs, for the transmission of international messages. It is not liable to the numerous small accidents to which the best constructed and protected land lines are exposed, nor to fluctuations in the weather and temperature. The only reason that the telegraphs in India have so lamentably failed is because they were constructed too cheaply, without proper insulators, &c. The directors of the company would seem to propose the same course to be followed with respect to their lines.—Yours, &c.,

London, Nov. 17, 1866. AN ENGINEER.

THE WAR-OFFICE.

(To the Editor of the *London and China Telegraph*.)

SIR,—The writer of the article in the *Economist* is not very well up in the subject he writes about or he would have known that all questions of the nature he alludes to are decided by the professional officers at the War-office; for instance, the store question must have been decided by the principal storekeeper, or the Director of Stores; the artillery question would have been for Captain Galton or Sir E. Lugard. Military men are using their best endeavours to supplant civilians, and turn the War-office into a Horse Guards. I do not, however, expect they will be successful, as the public will have their eyes opened one of these days.—Yours obediently,

City, Nov. 27. A TAX PAYER.

CHINA STEAM AND LABUAN COAL COMPANY.

A special meeting of shareholders in this company was held on the 26th inst., at the London Tavern, Sir J. ELPHINSTONE in the chair, to consider the proposed reconstruction of the company, in accordance with the circular already published, and dated 4th October last.

The CHAIRMAN explained that circumstances had rendered it politic and expedient to reduce the nominal liability of the shareholders now that there was a fair prospect of the objects for which the company was formed being attained. The proposal would be to reduce the liability by reducing the nominal value of the shares, at the same time, however, retaining a capital fully adequate for carrying out all the purposes of the company, and providing for the payment of all debentures and debts due. As they were aware, the present company was constituted by the amalgamation of two companies, and by means of such amalgamation they had been able materially to reduce the expenses of management. The articles of association allowed £2,500 for the remuneration of the board, but the directors had not taken within £1,000 of that sum. Under the new arrangement it was proposed to reduce the number of the board to six or seven members, and he was happy to announce that Mr. Hamilton Lindsay had consented to act upon it. Soon after the amalgamation it became evident that their proper course was to confine their operations to the development of the coal-fields in Labuan and dispose of the ships which had been engaged in the China steam trade. To a certain extent this had been done, but the board having succeeded in obtaining from the Spanish Government a concession for the conveyance of the mails to Manila and Singapore, touching at Labuan, they had withdrawn two vessels from the China line for carrying on that service, and chartered another for that purpose By this new service, which promised to become valuable both to the company and commerce, the voyage from Manila to Madrid was reduced from 65 to 43 days, and by bringing Labuan on a main line instead of on a siding, as it were, the company were enabled to dispose of their coal to greater advantage. The quality of coal raised in the island had much improved, and ships came there now regularly for their supplies. With regard to the vessels employed in the service he had spoken of, one of them, the *Mona*, had paid 20 per cent. on her value, and the *Japan* paid double the sum for which she was chartered. By the last advices the yield of coal had increased to 2,000 tons a month. With regard to the proposed scheme of reducing the value of the shares, the great majority of the shareholders had intimated their assent to it, and holders to the extent of 4,000 shares had agreed to pay up their shares if the proposal were adopted by the present meeting. Certain resolutions would be proposed, authorising the voluntary winding-up and the appointment of liquidators, with full powers for liquidating the affairs of the present company, and the constitution of the new company upon the basis of the scheme as set forth in the circular which had been sent round to the shareholders; the title of the new company to be the Labuan Company (Limited). The following extract from the circular explains the proposed arrangement:—"1. That all the shares shall in future be of £5 each, instead of as at present £20. 2. That for each fully paid up share of £20 there shall be issued four shares of £5 each, and that for each £20 share, with £11 paid, a further call of £1 per share shall be made, thus making £12 paid up on each share, and that for each such share there shall be issued three shares of £5 each, with £4 paid, leaving only a further liability of £1 per share, of which only 10s. shall be called up at a period of not more than six months, and the other 10s. shall be left uncalled so as to form a reserve fund. The result of the above arrangement will be—The original capital was 27,000 shares of £20 each, £540,000; of which 4,030 shares of £20 each are fully paid up representing £80,600; and 20,335 shares, with £11 paid, £223,685. It is proposed—1st. To exchange the 4,030 full paid-up shares for 16,120 fully paid-up shares of £5 each, £80,600; 2nd. To make a call of £1 per share on the 20,335 shares £12 per share paid, £20,335, which will then be changed for three shares of £5 each, with £4 paid-up, which will represent 61,005 shares, £244,020; 3rd. A call of 10s. per share on the 61,005 shares, £30,502 10s.; 4th. Uncalled capital, £30,502 10s.

In reply to a question,

The CHAIRMAN said they had now no contract with Her Majesty's Government, having declined to contract upon the conditions which the Government insisted upon, and now the Government ships called at Labuan for coal, and paid for it at the rate of a guinea a ton without any contract. While the contract existed the Government returned coal upon their hands on the most frivolous objections; in one case the coal contained resin, which was just the thing it should contain—(a laugh)—and in consequence of these ridiculous objections, and the onerous conditions exacted, the company some six months ago threw up the contract, and refused to renew it, and now they got a better price, taking all things into account, than they had done under the contract.

Mr. PRICE, the manager, tendered some further explanations upon the same point, and to the same effect.

In reply to a further question,

The CHAIRMAN said he believed that not only was the capital of the company intact, but the assets very much exceeded the capital and the liabilities.

A SHAREHOLDER inquired what were the prospects of their receiving a dividend, and when? (Laughter.)

Mr. PRICE, in reply, stated (at the desire of the chairman) the result of the last four months' working of which they had received accounts under Mr. Sinclair's management. In June, the yield was 600 tons, or 200 more than under Mr. Fenwick's management. In July, the yield was 844 tons; in August, 992; for September the yield was not less than 2,000 tons, and it was the belief of the directors, based upon Mr. Sinclair's assurance, that before the end of the year they would reach a yield of 100 tons a day, or 30,000 a year. They had a ready sale for all the coal they could raise, and, in fact, had been compelled to decline contracts with various companies, being obliged at all times to keep in store sufficient coal to supply her Majesty's ships at a uniform rate. They had received for coal raised during the four months alluded to £3,075, or an average of 26s. per ton. The expenses of working, to be set against that had been £1,835, or on the average 14s. 6d. a ton, and £2,300 had been expended on capital during the same period. Supposing the price of coal should fall 5s. a ton, they would still on a yield of 100 tons realise, after deducting expenses, a profit of £15,000 a year. The extent of the petroleum springs Mr. Sinclair, whose time had been fully engaged in the development of the coal yield, had not yet had an opportunity of reporting upon. As to the production of oil from coal, the machinery for the manufacture was now arriving at Labuan, but the directors had decided upon confining their attention to utilising the waste coal in making oil, and he should add that an invention had been submitted to them for converting the refuse of the oil manufacture into a valuable kind of patent fuel. They had 300 tons of the waste coal from the present yield. As to timber, the marine manager was engaged in finding profitable outlets for it. They had sold a parcel at Amoy, and realised for it a dollar a cubic foot for teak, and 63 cents for hard wood, the cost of bringing it to the ships being only 10 cents, and the freight five cents per cubic foot. So far, then, there was every ground of confidence in the future of the company. The new line from Manila to Singapore, calling at Labuan, with alternate voyages to Amoy and China, promised to be very profitable. They carried all the passengers and a large amount of freight already, and no doubt it would increase. In May they put two steamers on this service, and the earnings of the *Mona* were 5,000 dols. a month, with an expenditure, including coals, insurance, and all charges, of 3,200 dols., and the *Japan*, which was chartered at 3,150 dols., and cost, with coal included, 4,500 dols., returned gross earnings of 9,000 dols. a month. With such results at the starting of a new line they could understand what might be expected when it was more known and developed.

In answer to a question,

Mr. PRICE added that Mr. Sinclair estimated that the yield of coal would be three hundred tons a day within two years.

Mr. H. H. LINDSEY, who had recently joined the board, said that he had closely investigated the company's affairs and he considered that the future was full of promise. The coal mines at Labuan must, when all the machinery was properly at work, prove a very profitable affair and it was to be regretted if the shareholders allowed the advantage of their expenditure to slip into other hands.

After some discussion, in the course of which Mr. Field questioned the policy of the board in making the proposed financial change, and other shareholders complained of the nonfulfilment of the promises and expectation held forth at the original formation of the company, and of the low value at which the shares stood in the market, the resolutions were put and carried without any dissent being notified, the solicitor of the company requesting that if any shareholders did dissent they would put down their names with the number of shares they held, in order that they might not be held pledged to the scheme. Sir James Elphinstone, Mr. Price, and Mr. Gibbons were, by one of the resolutions, appointed liquidators, with full power to do all necessary acts to wind up the present and constitute the new company, and, it having been stated that a confirmatory meeting would be held in fourteen days, the proceedings terminated.

THE AGRA AND MASTERMAN'S BANK (LIMITED).

A meeting of the creditors of this bank was held at the London Tavern, on the 12th inst., and was attended by not less than 400 gentlemen. It was confined to creditors of the bank to the amount of £100 or upwards—an arrangement having been previously adopted to the effect that a meeting of creditors to the amount of less than £100 should be held on the following day. The object for which it was convened was, as it appeared from a circular addressed to each of the creditors, to invite them to accept an offer for the payment of their claims in a series of instalments, the whole of the operations being conducted by new representatives of the Agra Bank, which it is proposed should at once be resuscitated. Under the arrangements suggested for this revival of the bank, the existing property would be held to be worth £600,000, at which sum, on a careful inquiry, it has been estimated, after the payment of all liabilities, and the creation of a new capital of £1,000,000, of which £400,000 would be immediately paid up in the shape of £10 on each of 40,000 shares. The authors of this proposal, acting under the sanction of a meeting of shareholders held on the 18th of last month, stated in their circular that they would undertake to repay to the creditors the whole of the sum due to them in the following instalments:—5s. in the pound in January, 1867; 3s. in the pound in July, 1867; 3s. in the pound in April, 1868; 4s. in the pound in October, 1868; making, with the 5s. in the pound already paid by the official liquidators, 20s. in the pound. But at the meeting on the 12th, it will be seen from the subjoined account of the proceedings, some change was made in the amounts and in the periods at which the instalments were to be forthcoming. The creditors, it was further proposed, should be paid 5 per cent. interest on the whole of the debt from the date of the stoppage of the bank on the 7th of June last; and they were reminded that they would under this arrangement have as a further security for the satisfaction of their claims the £400,000 of additional capital which is to be raised as one of the means of carrying into effect the projected resuscitation of the bank.

Mr. JAMES THOMSON, who filled the chair, explained at some length the objects of the meeting. He said that the fact that the bank was known to possess a large surplus over all its liabilities had suggested to a number of the shareholders the idea of its resuscitation, and considerable progress had already been made towards the attainment of that very desirable end. A careful examination of the condition of the bank showed that it would certainly have a surplus of at least £600,000 after meeting all its liabilities, while it was probable that the surplus might amount to £830,000, and it was possible that it might reach £1,000,000. (Hear, hear.) The plan, however, for the resuscitation of the establishment was based upon the lowest of these estimates; and to that sum of £600,000 would be added £400,000 of new capital. He believed that the bank would thus be enabled to offer to its creditors securities for the repayment of their claims which they could not possess under the present system of official liquidation. The value of the existing property would by that means be greatly increased; the whole of the property would still continue subject to every one of its past liabilities; and no inconsiderable addition would be made to its amount. The liabilities of the bank at the period of its stoppage might be taken in round numbers at about £7,700,000. The liabilities in this country amounted to about

Digitized by Google

£5,500,000 of that sum, and those in London alone to about £5,200,000. But from that latter sum there was to be deducted £1,300,000, which had already been paid off by the official liquidator in the shape of 5s. in the £1, so that there remained due at present in London about £3,900,000. The gentlemen who were engaged in the attempt to resuscitate the bank proposed that the 15s. in the pound still due should be paid off in the following instalments:—5s. in the pound in January 1867; 3s. in the pound in July, 1867; 2s. in the pound in October, 1867; 2s. 6d. in the pound in March, 1868; and 2s. 6d. in the pound in July, 1868. That would be a more favourable arrangement for the creditors than the terms suggested in the circular with which they had been supplied, but the managers of the project were convinced that it was an offer which they could carry into effect. They would also undertake to allow interest at the rate of 5 per cent. on the whole of the debt, including that portion of it on which 5s. in the pound had already been paid; and they would issue for the different instalments promissory notes of the bank, which would no doubt be negotiable in the money market, and might thus be productive of considerable convenience to the poorer class of creditors. (Hear, hear.) He trusted that that proposal would meet with the approval of the meeting, and he felt assured that it was calculated to benefit all parties who were in any way interested in the present or future condition of that property. (Hear, hear).

Mr. LILLY asked whether the whole assets of the bank were to be handed over to the new directors.

The CHAIRMAN replied in the affirmative.

Mr. LILLY said he hoped the creditors would not consent to any such arrangement. The existing assets were more than sufficient, according to the statement of the chairman, to meet all the liabilities of the bank, and he, as a creditor, should decidedly object to place the assets at the absolute disposal of any board of directors.

Mr. RALLI said he was exclusively a creditor, and not in any way a shareholder in the bank, and he gladly accepted the proposal which they had just heard stated by their chairman. He was convinced that the creditors might feel much more certain of being paid in full, and of being paid on an early day, under that arrangement, than if the property were left to the management of the official liquidator. (Hear, hear.) Entertaining this belief, he had much pleasure in moving the following resolution:—"Resolved,—That the creditors present agree to accept payment of the balance of their claims against the Agra and Masterman's Bank (Limited) by the instalments following, viz.:—1867—January, 5s. in the pound; July, 3s. in the pound; October, 2s. in the pound. 1868—March, 2s. 6d. in the pound; July 2s. 6d. in the pound; and otherwise, on the terms mentioned in the modified proposal submitted to the creditors, with reservation of all rights against third parties on securities, it being an express condition of this resolution that the liability of the present shareholders shall remain until the whole of the creditors' claims shall have been satisfied."

Mr. LYELL seconded the resolution.

Mr. HARRIS said he should be glad to learn what was the view taken of the proposal by Mr. Shipman, the official representative of the creditors.

Mr. Shipman said that from the best estimate he could form of the state of the liquidation it appeared that a dividend of 6s. 8d. or 7s. in the pound could be paid in January next, and a dividend of about 4s. in the pound before the end of July. But after carefully looking over the share list he could place but little reliance in the productiveness of any further call. Under all the circumstances of the case he had come to the conclusion that the proposal would be beneficial to the creditors if it should be arranged that the liability of the existing shareholders was not to be in any way diminished, and if a body of directors should be appointed in whom the creditors could place confidence. (Hear, hear.)

In reply to a question from Mr. WALLER,

Mr. MORRIS, one of the firm of proposed solicitors to the resuscitated bank, said that it was expressly provided in the resolution under the consideration of the meeting that the liabilities of the present shareholders should remain perfectly unchanged; and in drawing up hereafter the necessary documents means could be adopted for giving effect to that understanding.

Mr. JENKINS said he did not believe there was the slightest reason to apprehend that the existing shareholders would be released from any portion of their responsibilities. The creditors might rely upon the vigilance of the Court of Chancery in reference to that point.

Mr. WEBB said he wished to ask their solicitor whether the decision of a minority of the creditors with regard to the proposal would bind the majority.

Mr. MORRIS replied that that would be a matter to be determined hereafter by the Court of Chancery. The only question the meeting had then to consider was whether the proposal was likely to promote their interests.

Mr. LILLY wished to know what was the opinion of Mr. Canna the official liquidator, with respect to that offer.

Mr. CANNAN said he had only to inform the meeting that he believed a dividend of 7s. in the pound might be paid on the liquidation in January next, and that a further sum of about 4s. in the pound might be paid in July. He could not attempt to calculate what might afterwards be done. The fact was that the liquidation was for the moment somewhat paralysed by the attempt to resuscitate the bank; but he still believed that 7s. in the pound could be paid in January next.

After some further conversation the resolution was put to the meeting and amidst great cheering was all but unanimously carried, the only dissentient being Mr. Lilly.

The following resolution, proposed by Mr. BRAITHWAITE and seconded by Mr. FRASER, was next adoped by a considerable majority:—"That in the opinion of this meeting it is desirable that the claims of creditors under £100 should be paid in full as early as possible."

A resolution was then passed tendering the best thanks of the creditors to Mr. Shipman, their representative, "for his services during the liquidation, and for his assistance in the resuscitation;" and the proceedings afterwards terminated with the usual acknowledgment of the services of the chairman.

The following letter has appeared since from a creditor:—

SIR,—I see in your paper of this morning an account of the meeting of the creditors of the Agra and Masterman's Bank, and although I, as a creditor addressed the meeting, my remarks are not reported with those of the other speakers. My object in writing to you is not to complain of the omission of my speech, but as my remarks may have possibly led many of the creditors to infer that I feared the result of a winding-up by the present official liquidator, and preferred that of the resuscitated bank director, I wish to make public what I stated at the meeting on the 12th, viz., that a short time ago I was most anxious to press an immediate call on the shareholders, and should, but for the advice of our most able official liquidator, have exerted myself to have a call made regardless of any resuscitation. I think it due to Mr. Cannan to say for myself what I believe is felt by almost every creditor of the Agra Bank, viz., that we are indebted to him and to his watchful care of our interests not only for the five shillings we have received, but for the five we are promised in January next, and that so far from feeling any prejudice to our interests from the official liquidator retaining his post, I feel satisfied that unless both shareholders and creditors had had the benefit of his experience and advice in the whole matter, not only would the shareholders have had to have paid up to their last penny, but the creditors would, in all probability, have not had as good prospects of an entire, although deferred, payment. What I did fear was, that unless creditors and shareholders had come to some arrangement, some hasty creditor or ruined shareholder might have dragged us into litigation and a forced realisation of securities—the consequence of which, at all events to Indian creditors, is well known to those who had the misfortune to be concerned with the Union Bank of Calcutta, which failed in 1847. I was not a little surprised to find (except from myself) an entire omission of any expression of gratitude to Mr. Cannan for his most valuable and disinterested services. Speaking for myself, and, I believe, for a large majority of the creditors, I wish now to express my feeling as to how much we are indebted to him; and I do trust that if I ever have again the misfortune to be a creditor of a company in liquidation that I may fall into the hands of as able and disinterested a liquidator.—Trusting you will insert these remarks, allow me to remain, yours truly,

A. T. T. PETERSON.

2, Victoria Park, Dover.

ROYAL GEOGRAPHICAL SOCIETY.

The first meeting of the session of 1866-7 of this society was held on Monday evening, the 12th inst., at Burlington-house; Sir R. I. Murchison, president, in the chair. Sir Henry C. Rawlinson, M.P., proceeded to read his paper—"On the recent journey of Mr. W. H. Johnson from Leh in Ladakh to Khoten, in Chinese Tartary." He said the journey of Mr. Johnson was a most remarkable one, not only for the boldness with which it was undertaken into an almost unknown country many hundred miles distant from the British frontier, but for the scientific precision with which the places traversed were made known to us. Mr. Johnson was born and bred in India, and, having received his education in one of the Hill stations, was very early engaged on the Great Trigonometrical Survey, and instructed by Sir Andrew Scott Waugh and other officers of the survey. It was while carrying out the survey to the extreme northern limits of the territory of the Maharajah of Cashmere that he was enabled, at the invitation of the Khan of Khotan, to perform the remarkable service now under consideration. The city of Ilchi, or Khokan, had not been visited by any Europeans, except Marco Polo, Benedict Goez, and a few Jesuit missionaries in the last century. It was important as being in the line of one of the great commercial routes between Russia, India, and China. The brothers Schlagintweit had advanced from the Karakorum as far as Pushia, a few miles to the south of Ilchi, but did not reach the city. It was necessary to make this remark, as it had been asserted on the Continent that they had really anticipated Mr. Johnson in the discovery (as it may be termed) of Khotan. In ancient times Ilchi was the high place of the Buddhist religion in Central Asia, and in the 14th century some Chinese pilgrims found fourteen convents in the city, each of them containing 3 000 devotees. Till within the last few years the country had been in the possession of Chinese, but owing to the shock which the empire had received through the war with England, the whole of these Turkestan States had risen in rebellion and thrown off the Chinese yoke. The neighbouring city of Yarkand was at present in a state of anarchy, and Mr. Johnson gave an amusing account of the offer which the principal inhabitants had made to him while at Ilchi to take possession of the place on behalf of the English. This state of things had produced a favourable opportunity for opening up relations, especially commercial, with those Turkestan States; and the Khan of Khokan having formerly travelled through India and become an admirer of British rule, had shown himself most anxious to cultivate trade with us. The difficulty of communication between India and Central Asia had hitherto been not merely physical, but political, and a great obstacle still existed in the right maintained by the Maharajah of Cashmere, whose territory lies to the south and includes the mountain passes into Turkestan, of levying transit duties; these were so high that they almost paralysed commerce. Mr. Johnson, however, described a road, practicable for wheeled carriages throughout the year, which passes from Ilchi into India to the east of the Maharajah's dominions. If this information proved true, it would be one of the most valuable results of Mr. Johnson's expedition. The road is called the Polu Road, and crosses a depression in the Kuen Lun chain through Rudok towards the south. On the more direct route taken by Mr. Johnson the passes were from 15 000ft. to 18 000ft. above the sea level, and an elevated plateau had to be crossed about 16.000ft. high, occupying several days' journey. Sir Henry, in conclusion, expressed his regret that the adventurous journey of Mr. Johnson should have met with a sort of rebuke from the Government of India. Of course he had not authority to enter into political relations with this potentate, but being in his country he could hardly avoid receiving such communications as were addressed to him.

Lord Strangford was of opinion that the report of Mr. Johnson on his recent journey was one of the most important papers ever presented to the society. The political information brought by him was most striking; it was neither more nor less than that of the complete break up of the Chinese Empire in Central Asia. All these countries, formerly Chinese Turkestan, have thrown over the Chinese yoke, and now are eagerly

Digitized by Google

offering to enter into commercial relations with the rest of the world, especially with India. These countries are essentially Turkish, and those only who were familiar with the Turkish language and had conversed, like himself, with the half wild travellers from Central Asia, to be seen always at Constantinople, could realise the fact of the wide extent of country occupied by this people, all speaking the same language. The true *terra incognita* of Central Asia now lay to the east of Ilchi and between there and China Proper, along the northern boundaries of Thibet. The physical character even of this wide region was entirely unknown to us. The present revolution in Central Asia appeared to him to be connected with a wide-spread Mahomedan movement to throw off the Chinese yoke. With respect to the rebuke of Mr. Johnson's enterprise by the Government, he would appeal to the sense of the Geographical Society upon it. Whatever political interest might have to say to such enterprises, they, as a scientific body, would consider it unpardonable neglect if the opportunity thus opened to us of exploring these most interesting regions be not taken advantage of.

In answer to questions from Mr. J. Crawfurd, regarding the products of Chinese Turkestan available for commerce, Sir Henry Rawlinson read the enumeration of the productions of Khotan given in Mr. Johnson's report. These include gold, silver, and various other metals, jade, coal, cereals, cotton, and fine wool. Since their independence the trade of the people with China has been completely closed, so that they are anxious to receive products from India, including tea and all other articles formerly obtained from China. The chief commercial object of the Russians in advancing into Western Turkestan was cotton. He believed that the Chinese power in Central Asia was so much broken that it would eventually have to retire within the Great Wall. It was a most important political event that this great region should be thus thrown open. He believed that there was not the slightest danger from Russia in the line of country described in this paper. The mountain belts of Karakorum and the Kuen Lun offer formidable barriers between Chinese Turkestan and India. He confessed he should like to see Russian and English consuls established in all these cities of Central Asia, and good feeling and honourable emulation excited between the two European Powers.

Mr. Trelawny Saunders said that the country under consideration was the largest pastoral region on the face of the earth, and that wool would necessarily become the chief article of exportation if the people of Turkestan had free intercourse with India. He could not understand why Mr. Johnson should have been rebuked for opening up a communication which ought naturally to lead to results of great commercial importance to us.

RECOVERY OF TREASURE FROM THE WRECK OF THE "LIBELLE."

The British Consulate at Manila has forwarded to the Foreign-office a despatch, containing the circumstances of the total loss of the barque *Libelle*, having on board as passengers Madame Anna Bishop, Mrs. Charles Lascelles, and other English singers, which was wrecked on a new coral in the China Sea. The vessel was from Francisco and Honolulu for Hong Kong, and had on board nearly £40,000 in specie and quicksilver. The latter were saved from the wreck, but there being no means of taking it away the captain determined to bury it in the island, and to return for it at a future period. The boat containing Madame Bishop, Mrs. Lascelles, with the chief mate and twenty-three of the crew, succeeded in reaching one of the Marian or Ladrone Islands in safety; but the second boat, containing the master and about nineteen of the crew and passengers, were never heard of afterwards, and are supposed to have been lost. The Consul states on the mate's arrival he communicated the fact of the specie and jewellery being buried on the island to the governor of the Marians, who chartered the only vessel on the island in search of the treasure, he to receive two-thirds of the value recovered as a recompense for his services. The schooner proceeded with the mate of the *Libelle*, and on reaching the island found that the sea had washed away the marks where the treasure was buried: but after two days' digging they discovered the spot where the specie was buried—chiefly American gold, silver coin, and silver bar, about £30,000; the quicksilver, however, could not be found, and the exploring party, finding the weather was getting bad, and it was dangerous to continue on it, they returned in the schooner to the Marians. The island is situated in 19 25 N. and long. 166 20 E.; and Mr. Workman, the master of the schooner, states:—"I anchored on the west side of the island in 21 fathoms water; she laid about 100 yards off shore, and beyond that to seaward no bottom was to be found with a 35-fathom lead. It is a coral island, about nine miles in circumference, and no vegetation on it; there was very deep water all round it." He left a tin box on the island with a letter in it, stating to shipwrecked people that there was nothing on the island to subsist upon except a few birds and a quantity of fish; at the same time telling them that at the Marians was the nearest civilised port to that place, and advising them to make for it, where they would be kindly treated.

LAUNCH OF THE "GREAT REPUBLIC" FOR THE CHINA LINE.

(*New York Times*, Nov. 10.)

As we briefly stated yesterday morning, the Pacific Mail Steamship Company's new steamship *Great Republic*, the first of the ships now being constructed for the new line between San Francisco and China, was successfully launched from the shipyard of Mr. Henry Steers, at Greenpoint, in the presence of a large number of ladies and gentlemen, drawn thither by the public announcement in the *Times* and others of the city papers of the launch of the largest ship yet constructed in America.

Such, indeed, we found her, and as such deserving more than the passing notice we have given her, not merely, as one of our contemporaries states, the largest wooden ship, nor only, according to another, "a rival" in size of the "famous sailing vessel of the same name," but simply and actually the largest ship of any kind sent "down to the sea" from any American shipyard for any commercial purposes.

Tonnage alone forms no basis for comparing the size of a sailing-ship with that of a steamer, all the space occupied in the latter by the machinery being excluded in calculating her capacity in tons. The space so excluded in a steamer of this immense size would of itself contain bodily what, not many years ago, would have passed for a large vessel.

SIZE.

The first glance at the *Great Republic* as she stood on the stocks sufficed to impress upon us her great size, while her graceful lines and symmetrical proportions saved her from that mere look of bulk that was so conspicuously noticeable in the case of the *Great Eastern*, and which made the original name of *Leviathan* appropriate to that vessel. Feet and inches convey no idea to our mind, and cannot therefore to the minds of our readers, of what we saw. When we say that the *Great Republic* is 380 feet in length, who will receive the idea of distance conveyed by a walk, say from Fifteenth to Seventeenth-street, in reality only a few feet greater? As a matter of exact information for those endowed with experience in such matters, or gifted with an imagination graduated to the standard of the British inch, we give the dimensions of the new steamer as ascertained from the builder:—

Length, extreme	... 380 feet.
Length between perpendiculars ...	... 360 feet.
Width of beam, moulded... ...	... 48 feet 6 inches.
Width of beam, extreme... ...	... 50 feet.
Depth of hold	... 31 feet 6 inches.

It may assist our readers to say, that with the same breadth of beam the *Great Republic* is 35 feet longer than the *Adriatic*, once the pride of our mercantile marine, and is 94 feet longer, with 6 feet less beam than the old and still favourably known *Atlantic*.

STRENGTH.

The *Great Republic*, as we have heard from the lips of those present, well known in the community as veteran marine experts, is not only the largest, but what is specially to be praised in these days, the strongest ship yet built in this country. Our Americanism teaches us to claim as national not what is merely native but what is best; and in this point of view we have always taken a just pride in the magnificent fleet put afloat by the Pacific Mail Company during and since the war, beginning with the *Constitution*, in 1861, and having such ships as the well-known *Colorado*, *Golden City*, *Arizona* and *Henry Chauncey* for models. But the *Great Republic*, the pioneer of the new fleet for the China trade, surpasses all her predecessors. Her frame timbers are of white and live oak. These fastened with copper and iron are braced with straps of iron five inches wide and seven-eighths of an inch thick, crossing each other diagonally every four feet. Over this comes the inner planking, which is caulked and payed with pitch and then double-strapped as before, and outside this double-strapping comes the exterior double-planking of the very best Georgia yellow pine. The whole is so thoroughly braced and bolted and fastened together with treenails of locust, spikes of iron or composition, and bolts of copper, that it is difficult to imagine wind and wave combined of sufficient power to cause distress to so stanch a structure.

The *Great Republic* has three masts, and to meet the necessities of her route, on which it may at times be desirable to use sails, will be full ship-rigged, differing, however, from the familiar arrangement by having her foremast the tallest of the three, and her mizenmast the shortest. She has three full decks, unusually stout and strongly fastened, with an orlop deck fore and aft extending to the engine bulkhead. She has four stout water-tight bulkheads, dividing the hold into five secure compartments.

ENGINES.

After the launch the steamer was taken at once to the wharf of the Novelty Ironworks, at the foot of Twelfth-street, where, after being docked at the Erie Basin Dock and being coppered, she will receive her machinery.

The engines built by the works just named have been under construction for the last sixteen months, and are now for the most part completed and ready for putting together in the ship; yet that is an operation in which we are told some five months more will be consumed. The immense pieces of iron cover and obstruct the wharf on which they lie. The Novelty Ironworks, as we are informed, are now engaged in building the engines of four steamers, including the *Great Republic*, and as these are of the same class, a description of one will answer for all. The engines are vertical beam, having a single cylinder, in which the piston works, of 105 inches in diameter, nearly nine feet, and twelve feet stroke! Mr. Allen, the President of the Novelty Works, once conceived and executed the idea of having a party of friends to lunch in one of those cylinders while lying on its side. He had a table set with seats on either side, and twenty-one gentlemen sat down to that luncheon! Steam is applied to this cylinder by four horizontal tubular boilers, each heated by four furnaces, making sixteen furnaces in all, their grates having a surface of 560 square feet. The heating surface presented to the action of these furnaces is 15,100 square feet.

The paddle-wheels are to be 40 feet in diameter, having a face of 12 feet, and each wheel is provided with thirty-four oak buckets.

An impression seems to have obtained in some quarters that the new China steamers will be "slow" compared with those built and owned by the Pacific Mail Company, and now running between this port and Aspinwall and between Panama and San Francisco, the latter vessels, such as the *Golden City* or *Henry Chauncey*, maintaining a standard speed of thirteen knots, equal to over fifteen statute miles per hour, in all weather, and being able to reach seventeen knots or about twenty miles an hour with all safety. This fear is entirely groundless, for with the same displacement as the Pacific and Atlantic steamers, these new China steamers will have fully twenty per cent. more power, and will therefore be capable of even a higher rate of speed.

THE FLEET

built by the Pacific Company during the war numbers seven first-class ships, as follows:—

Name.	Register Tonnage.	Carpenter's Tonnage.	Builder.
Constitution ..	.. 3,675	.. 4,410	W. H. Webb.
Golden City ..	.. 3,590	.. 4,310	W. H. Webb.
Sacramento ..	.. 2,683	.. 3,351	Webb and Bell.
Colorado ..	.. 3,728	.. 4,230	W. H. Webb.
Henry Chauncey	.. 2,657	.. 3,200	W. H. Webb.
Arizona ..	.. 2,793	.. 3,353	Henry Steers.
Montana ..	.. 2,676	.. 3,192	Webb and Bell.

Digitized by Google

Of these the *Constitution*, *Golden City*, *Sacramento* and *Montano*, with the *Golden Age*, *St. Louis* and *California*, are on the line between Panama and San Francisco; the *Henry Chauncey* and *Arizona*, with the *New York*, *Rising Star*, *Ocean Queen*, *Northern Light*, *Ariel* and *Champion*, are on the Atlantic, engaged regularly or as extra or freight steamers in the line between this port and Aspinwall. The China line will consist of the *Colorado* (already advertised from San Francisco for Hong Kong *via* Yokohama, Japan, on the 1st of January next, and the following new ships:—

Name.	Register Tonnage.	Carpenter's Tonnage.	Builder.
Great Republic	.. 4,100	.. 5,200	Henry Steers.
Celestial Empire	.. 4,000	.. 5,000	W. H. Webb.
America ..	.. 4,100	.. 5,200	———
Niphon ..	.. 4,100	.. 5,200	———

It is understood that the *Costa Rica*, now in the Erie Dock, is destined for local service in China in connection with the same line. These twenty-two steamships, aggregating about seventy-two thousand tons, and including eleven new steamers, among the finest and largest in the world, tell a tale of enterprise, wealth and power, of which, as Americans, we claim the right to be proud.

The Pacific Mail Company was organised in 1848 with a capital of $500,000, to run steamers between Panama and our then newly acquired possessions in Oregon. In 1866, with a paid up capital of twenty millions, we find the same corporation running its lines on both oceans between New York and Asia, with a connection between this port and England or France already looming up as a necessary link in the same chain. Energy, capital, business talent; such seems to be the secret. So long as they continue, as this company has done, to employ their vast wealth and power for the public good and the advancement of American commerce, we shall wish them the full realisation of the success and prosperity which the future seems to promise.

Naval and Military.

The screw steamer Golden Fleece (one of the old line of steamers round the Cape to Calcutta) which has been chartered by Government for the conveyance of troops to Hong Kong, arrived at Portsmouth from the Thames, where she had been lying for a long time, on the 15th. Every provision has been made for the comfort and accommodation of the officers, the men, and their families, which are to accompany them, under the regulations of the Admiralty Transport Department. The system introduced by Dr. Edmonds, R.N., which has for some time been adopted by Her Majesty's Emigration Commissioners in all ships chartered by them, is now also applied to Government troopships. In the Golden Fleece provision is made for effective ventilation whether during the calms under the line or in stormy weather, when all ports or even hatches might require to be closed. This is effected without any machinery liable to derangement, but by the economical use of steam as a rarefying agent, or, when a more powerful action is desired, by its direct propulsive action. The five large transports now being built by contract on the plan of the Admiralty and Transport Departments are all to have Dr. Edmond's system of ventilation applied to them.

The Golden Fleece embarked at Portsmouth the following troops:—

For Hong Kong.—Detachment of Royal Artillery, including 1 drummer, 13 rank and file, 1 soldier's wife, and 2 children.

For Japan.—Detachment of Royal Artillery, consisting of three sergeants, 1 drummer, 46 rank and file, and 7 women and children. Detachment of 9th Foot, consisting of the 2nd battalion under the command of Captain Gipps; 1 drummer, 4 sergeants, 44 rank and file, and 15 soldiers' wives and children. The drafts for Japan will be conveyed from Hong Kong in another vessel.

At Queenstown she will embark for Hong Kong a detachment of the 73rd Foot, consisting of the following:—Lieut.-Colonel Burne, Major Barry, Captains J. C. Gawler, F. Reeve, J. W. Burnes, P. Gilbart, H. O. Farrington, T. M. Warren, H. F. H. Gibsone, J. T. B. Mayne, B. J. A. Monsell, E. J. Whitbread, W. Shaw, F. B. J. Benson; Lieutenants A. H. Sharp, W. Clarke, A. C. F. Armstrong, J. T. Turner, G. J. Holroyd, W. Gordon, E. B. St. John, J. W. Boden, H. Gunter, C. E. J. Parker, W. F. Hill, G. E. Earle, R. J. Edgcumbe, J. C. Ross; Ensigns H. J. Harrison, J. H. S. R. Carnac, G. C. Walker, J. B. Doncaster, R. Milford, T. Sherlock, H. Davidson, Paymaster Hely, Surgeon G. K. Hardie, M.D., Assistant Surgeon W. S. M. Price. Also 54 sergeants 21 drummers, 522 rank and file; 3 officers' wives, 4 children, 1 servant, 71 soldiers' wives, and 49 children.

The screw surveying vessel Sylvia, Commander Brooker, sailed on the 26th for China, Japan, Korea, &c.

The Rodney, now fitting for the flag-ship on the China station, and intended to relieve the Princess Royal, will shortly be ready for sea.

Satellite, 21, screw, fitted at Devonport, for the East Indian and China station, sailed from Plymouth on the 22nd inst.

The Fairy, screw yacht, for many years a favourite vessel of Her Majesty and the late Prince Consort, has, at last, been ordered into the fourth division of the steam reserve. This order is tantamount to placing the Fairy altogether out of use as a Royal yacht. Her plates have worn thin as tin in many places, and it is stated that she is not worth repairing.

Intelligence has been received at the Admiralty that Her Majesty's ship Griffon was lost on the evening of the 2nd of October, off Little Popoe, Bight of Benin; no lives lost. Commander Davidson, who comamnded the Griffon, entered the navy in 1846, and has been employed over fifteen years at sea, and has received four medals and five clasps for his services. While midshipman of the Hastings, he was frequently employed in boats against Chinese pirates, and as acting mate commanded the pinnace conveying troops to Prome, and partook in all the subsequent services in the Irrawaddy, in 1852. He was appointed mate of the Ajax, 58, at Cork, September 22, 1853; and on March 7, 1854, removed into the Prince Regent, 90, and sailed for the Baltic. On November 14 following he exchanged into the Royal Albert, 121, and was promoted to lieutenant April 20, 1855. He served in the Furious, 16, on the East India and China station, from March 11, 1857, to November 18, 1859; commanded the Janus, gunboat, on the same station from the latter date until October 25, 1861; and the Coromandel, tender to Imperieuse, also on the same station, from October 25, 1861, until promoted to commander, March 25, 1863.

Admiral Sir William Parker.—We have to record the death of the senior officer of the Royal Navy, Admiral of the Fleet Sir William Parker, G.C.B., first and principal naval aide-de-camp to the Queen, which took place on Monday. He entered the navy March 5, 1793, as captain's servant, on board the Orion, 74, Capt. John Thomas Duckworth, in which ship he served in the West Indies. On May 6 and June 24, 1798, he was successively nominated Acting-Lieut., on the Jamaica station, of the Magicienne frigate, and Queen, 98, flagship of Sir Hyde Parker; by whom, from April 29, 1799, until the receipt of his first Admiralty commission bearing date September 5 in the same year, he was intrusted with the command of the Volage, 22, and of the Amaranth and Pelican sloops. Attaining the rank of Commander on the 10th of October, 1799, Capt. Parker after immediately commanding the Abergavenny, 54, was appointed, on the 11th November following, to the Stork, 18, in which vessel, employed in the West Indies, North Sea, and Channel, he made prize of La Légère, French packet, of 14 guns and 50 men, laden with a valuable cargo, and contributed, in company with La Constance, 24, Capt. Zachary Mudge, to the capture of El Cantara, Spanish privateer of 22 guns and 110 men, and of her consort, a lugger mounting 10 guns. On the occasion of his promotion to post rank, October 9, 1801, Capt. Parker was appointed to L'Oiseau, 36; and on the 8th November, 1802, he joined the Amazon, 38. In that ship, at the commencement of the late war with France, he so distinguished himself on several occasions, particularly by his spirited conduct in chasing a French frigate into Toulon, that he excited the admiration and secured the friendship of Nelson; with whom, in 1805, we find him pursuing the combined squadrons to the West Indies and back. Previously to the latter event Captain Parker had had the fortune, July 16, 1803, to effect the capture of Le Félix privateer of 16 guns and 96 men. He afterwards, September 12, 1805, took the Principe de la Paz, Spanish privateer, mounting 24 9-pounders and four brass swivels, with a compliment of 160 men; and on March 13, 1806, he signalised himself by his meritorious and gallant behaviour throughout a long running fight, which terminated in the surrender to the London, 98, and to the Amazon, whose loss extended to four men killed and five wounded, of the Marengo, 80, bearing the flag of Rear-Admiral Linois, and 40-gun frigate Belle Poule. On March 23, 1811, he captured Le Cupidon, French privateer, of 14 guns and 82 men. Quitting the Amazon in February, 1812, he was next, October 11, 1827, appointed to the Warspite 76, from which ship, stationed in the Mediterranean, he was transferred, December 29, 1828, to the Prince Regent yacht. On May 1, 1831, Rear-Admiral Parker (who had attained the flag rank July 22, 1830, and been nominated a C.B., June 4, 1815) was invested with the chief command of the Lisbon station, which he continued to hold—occasionally commanding an experimental squadron—until July 11, 1834. On the 16th of that month he was created a K.C.B. He became ten days later a Lord of the Admiralty; and on resigning that appointment was constituted, May 12, 1841, Naval Commander-in-Chief in the East Indies, whither he sailed with his flag in the Cornwallis, 72. As a reward for his services in China, where he superintended all the operations from the taking of Amoy in August, 1841, to the pacification of Nanking in 1842, he was nominated a G.C.B. December 2, 1842, and raised, on his return to England in 1844, to the dignity of Baronet. Since February 27, 1845, Sir William Parker (he had become a Vice-Admiral November 23, 1841) has been in chief command on the Mediterranean station with his flag in the Hibernia, 104. He was awarded the Good Service pension of £300 per annum April 26, 1844; and appointed, December 19, 1846, First and Principal Aide-de-Camp to the Queen. By the death of Sir William Parker, Vice-Admiral Sir Thomas Sabine Pasley, the present Naval Commander-in-Chief at Portsmouth, becomes a full Admiral from Vice, Rear-Admiral the Hon. Joseph Denman becomes a Vice-Admiral, and Capt Astley Cooper Key, C.B., the Director-General of Naval Ordnance, takes promotion to Rear-Admiral's rank, and Capt. Sir Robert John Le Mesurier M'Clure, K.C.B., becomes senior Captain on the list.

Vice-Admiral Hamley.—Vice-Admiral William Hamley expired at the age of eighty years. He entered the navy in 1799, and during the succeeding thirty-five years saw much and distinguished service.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, Nov. 25.

At last the election fever has passed; yesterday the re-elections took place, and the definite result is that nine Liberals were duly elected against thirteen Conservatives and anti-revolutionists. The position of the parties in Parliament now is as follows:—thirty-nine Liberals, thirty-one Conservatives, and six Independents. A slight difference may occur by the fact that Mr. Thorbecke being elected in two districts he is obliged to choose, so that a new election must take place either in Assen or Groningen. On Monday next the Second Chamber will meet, but, notwithstanding the King returned to-day to the Hague, it is not probable that he will open the sitting personally, but that this will be done in his name by a commission. I need not add that the days of the Cabinet are counted, as they do not decide, after a vote of want of confidence, to dissolve the Second Chamber. For North Holland a new member for the First Chamber of the States General was elected. Jhr. Boreel van Hogelanden will be replaced by Jhr. D. C. de Dieu Fontein Verschuur.

The political news, of course, is very, very scarce, notwithstanding we are on the eve of matters of great importance. Nothing is published about the negotiations between the King of the Netherlands and Prussia about the question of Luyembourg, except some threatenings of some German papers which do not understand the point of the question. Only the King-Grand Duke is involved in it. Negotiations between our Court and that of Prussia have been opened about a new extradition-treaty, and another to prevent smuggling.

The solemn distribution of the medals and honourable mentions of the last exposition, which was held in the Crystal Palace at Amsterdam, took place on the 19th. A general discontent, however, prevails through-

Digitized by Google

out the country about the deeds of the jury, and in consequence thereof a great many of the exhibitors refused to accept the medals.

Mr. Overdyk, who in former years was a member of the commission charged with a natural inspection of the Netherlands Indies, has presented to the State's museum of National History a collection of 3 500 shells and horns, which he collected in Tjilatjap and the south coast of Java.

Some days ago the prospectus was issued of the Netherlands International Railway and Harbour Company, with a capital of fl. 14,160,000, of which already fl. 12,980,000 are already placed. The aim of this company is to strike a railway from Amsterdam to Almelo, in communication with Germany; another from Scheveningen to Amersfoort, and a harbour at Scheveningen, with a steam line between that watering place and Harwich. Amongst the managers appear Mr. Arthur Ballantine (director of the Great Eastern Railway), General Sir John Burgoyne, Mr. Cobbold, M.P., Lord Alfred Paget, Mr. C. H. Turner (manager of the Great Eastern Railway), and Captain Webb, Trinity-house. The success of this company is considered certain.

COMMERCIAL.

COFFEE.—In waiting for the monthly auction of the Trading Company there were no transactions. To-day the sales took place, 158 300 b. were offered and sold, the greenish sorts at ½d. to 1½d. under valuation; the good ordinary quality ¼d. to ½d. above valuation. The market closes very firm.

SUGAR.—Notwithstanding the Trading Company will sell, on the 22nd Nov., 34 306 mats, there is a good demand with very important transactions, including 779 mats Bezoekie, No. 8, ex Medea, at 26½f; 667 mats Passaroean, No 14¾, ex Medea, at 34f.; 104 mats Samarang, No. 11, ex County of Renfrew, at 31½f.; 3 492 mats Passaroean, No. 15¾, ex Bezoekie, at 35½f.; 1.498 mats Solo, No. 15½, ex Medea, 34½f.; 1 553 mats Solo and Sourabaya, No. 12¾, ex Ary Scheffer. The quotation now is 1f. to 1½f. under September prices, and undoubtedly these prices will be paid in auction (see "Latest Intelligence"). The private stock is much decreased.

SPICES.—Unaltered; Nutmegs, No. 1, 77c. Mace may be sold at last auction prices, but holders decline to operate under 97c. for D and 94c. for E. Cloves: No. 2, 30c. Pepper: 532 b. Sumatra, ex Alblasserdam, were sold at 17½c.

TOBACCO.—In waiting for the auctions, there are no transactions to report.

JAVA INDIGO.—Unaltered; very firm. 20 chests were taken, while the parcels imported, per St. Jan, Robert Dickson and County of Renfrew, would soon be brought into the market.

BANCA TIN.—Since our last report, the following parcels were sold:—5,200 slabs at 47½f.; 500 slabs at 47¾f.; 300 slabs at 48f.; 500 slabs at 47¾f., and 5,100 at 47½f.

RICE.—Since our last report no transactions have taken place. The position of the market however remains firm. The nominal quotation are:—Table, 16f. to 18f.; 2nd, 13f. to 15f.; Java, 9f. to 11f.; Rangoon, 7¼f. to 7⅜f.; Necransie 7¼f.; Bassein, 7¾f.

DRUGS.—Gutta Percha: 90 piculs per Macassar ex Kaap Hoorn were sold at prices which did not transpire. Gum Damar: 33½ to 34c.; Mother-o'Pearl Shells: 153c. pic., floating ex Maria Adolphine, were sold by inscription. Japan Wax: With a lively demand; the whole stock sold at 52 to 53 for A, 48 to 50 for B, 40 to 44 for D.

MONEY.—Since our last report the funds have shown further strength, being influenced by some good money purchases. Money was very easy, and there was a fair demand for discount. Messrs. Baring Bros. and Co., of London, and Messrs. Hope and Co., of Amsterdam, have announced a Russian Loan of £6 00 ,000 five per cent. stock at the price of 84¾—Dutch 2½ per cents., 54⅞; 3 per cents., 65½; 4 per cents., 87⅜; Trading Company, 136½; Expl. Railway (States), 70; Spanish 2½ per cents., 30; Portuguese 3 per cents., 41¾; Russian 5 per cents., 92; Austrian 5 per cents., 44⅜; E. I. Trading Bank, 77½ to 78.

CHANGE. London, 3 mo., f.11 67½; 2 mo., f.11.70; short, f.11.78¾. Paris, 3 mo., f.46.35; 2 mo., f.46.47½; short, f.46.75. Antwerp, 3 mo., f.46.25; short, f.46.55. Hambro', 3 mo., f.34.70; 2 mo., f.34 82½; short, f.35.10. St. Petersburg, 3 mo., 148f.

LOADING AT ROTTERDAM.—Maartin van Rossem, for Batavia; Helena and Anna, for Batavia; Elizabeth, for Batavia; Zeelandia, for Melbourne; Nederland and Oranje, for Sourabaya; Bremen, for Batavia; S. van Heel, for Batavia and Samarang; Ary Scheffer, for Batavia and Sourabaya; Corigene, for Batavia and Sourabaya; Copernicus, for Batavia and Cheribon; Nederlands Vlag, for Macassar; Johannes Lodewyk, for Melbourne and Sidney; Julie, for Padang; Constance, for Singapore and Hong Kong.

LOADING AT DORDRECHT.—Kosmopoliet II., for Batavia.

LOADING AT AMSTERDAM.—Bonie, for Batavia; Tweelingen, for Batavia; Kaap Hoorn, for Batavia; Cornelia Adolphina, for Batavia and Sourabaya; Cornelia, for Batvia and Sourabaya; Telanak, for Kanagawa and Decima; Gerreuina Wilhelmina, for Padang; Presto, for Samarang; Nicolaas Witten, for Samarang, Jupiter, for Samarang and Sourabaya; Hendrika, for Sourabaya; Louize, for Sourabaya.

SHIPPING.—Nov. 13, at Texel, from Padang, Henriette; 15, at Helvoet, from Batavia, Machtilda Simoneta; 15, at Texel, from Samarang, Robert Dickson; 20, at Brouwershaven, from Batavia, Lammina Elisabeth.

RUSSIA, GERMANY, &c.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, Nov. 21.

The Siberian journal *Eastern Coast* contains statistical data of the settlements in the Amoor territory, from which we gather that the great majority of the free settlers are located on the banks of the Seya, an affluent of the Amoor, and its tributaries, the Buhende and the Tom. There are thirteen villages on the left bank of the Seya and five on the right one. On the Amoor Proper are five villages between the Stanitza of Albasin and the town of Blagowessensk and three more on the River Savitava. The number of settlers on the Amoor is scarcely a quarter of the whole number of free colonists. This is explained by the fact that the best situations on that river are occupied by stanitzas of Cossacks. The population of the free colonists amounts to 3.962, of whom 3,022 belong to the Russian Church, the rest being heathens of different denominations. In addition to the above there are 233 of native nomadic tribes who have given up their wandering life and become colonists.

The *Siberian Messenger* complains that in the whole of the newly acquired territory on the coast of the Pacific Ocean there is not one single bay or inlet with the needful requirements for making a port. At Vladivostock there is a scarcity of sweet water, the military works of defence would absorb large sums of money, and the frequent fogs would make the navigation difficult and dangerous at all times of the year. The military port of Norgorodsky suffers also from absence of fresh water and, above all, of firewood, which is the more unfortunate as hitherto no indications of coal-beds have been discovered, besides which the station is exposed to the destroying influence of the north-west winds, and although it might be easily defended in an attack by sea, it is open to attack on the land side. The bays of Slavyanski, Novik, and Nachodka are quite unserviceable. Olga Bay offers some facilities, but is too narrow, and Vladimir is not safe, having but little depth of water, and being subject to heavy surf, which breaks with great fury on the coast, and would swamp any boat. The Imperial port is good, and De Castries Bay suitable for a port, provided the harbour were protected by a pier; but both are shut up by ice for from four to six months of the year.

A new iron screw steamer, called the *Peiho*, lately built at Messrs. Godeffroy's works, has been fitted out here for service in the Chinese waters as a steam-tug, and is well armed, so as to be able to resist successfully any attack from pirates. The command has been given to Captain J. C. Bobsien, a well-known and experienced navigator, hailing from this port. She goes in the first instance to Hong Kong. This vessel is we understand, owned by Messrs. Stammann and Co., of Tientsin.

The *Kali Maas*, Captain Kohn, hence to Hong Kong, reported in a former letter as having put to sea from Cuxhaven on the 28th of October, was caught in the late gales, and obliged to return with considerable damage, having carried away her foreyard and bowsprit, split her sails, and it is feared her hull is seriously injured as she leaks. She was towed up from Cuxhaven by the steam-tug *Hercules*, and has been placed in the floating dock for repairs.

As an ordinary Fellow of the Royal Geographical Society I fully endorse the remarks contained in an editorial article in the last issue of the *London and China Telegraph* relative to the suppression of the definite article "the" when speaking of Korea. It is contrary to the genius of our language to use it, and sounds like a translation from the French, where the article *la* is placed before the names of all countries. I can only account for its having been introduced in this case by the supposition of an association of ideas suggested in consequence of its similarity of sound to "the Morea;" though Lord Byron, who certainly well understood the English language, eschews the definite article in the beautiful opening lines of his "Curse of Minerva:"

> "Slow sinks, more lovely ere his race be run,
> Behind Morea's hills the setting sun;"

and not "the Morea's hills."

Another case has been tried in the Commercial Tribunal of this city having reference to a dispute in the Far East, which was shortly as follows:—Lorenzen and Dreyer v. J. Weyrell and Co.—Some time ago the plaintiffs bought from the defendants seven cases of leathercloth under guarantee that they would arrive out at their destination (Manila) without sticking together, the invoice price paid being 1,885 marks banco. According to a letter received from Messrs. Tillson, Hermann, and Co., of Manila (and produced in evidence), six of the chests arrived out in a sticky and unmerchantable condition, and sold at public auction at 7s. 6d. per yard, the net proceeds being only $445 87c. According to the *pro forma* account produced in court, it would have fetched $1,087 if in a good condition, and thus the plaintiffs claim the sum of 1,829 marks banco to indemnify them for the loss. The defendants maintained that they had given the same guarantee as they had received from the manufacturers; they knew nothing about the letter from Messrs. Tillson, Hermann and Co., and urged that the latter had no right to sell the goods by public action as they were not of a perishable nature, but they should rather have been warehoused for account of the shippers. Moreover, it would have been the duty of the consignees to call on the Hamburg Consul to appoint experts. The alleged spoiled state of the goods might easily have been remedied by opening the cases and giving the leathercloth a coat of varnish. The Court ordered the plaintiffs to bring proof within six months that the goods arrived out in a damaged state; and secondly, that if sound, they would have fetched the amount claimed as indemnity. Judgment deferred.

By Royal patent, dated Copenhagen, Nov. 10, Mr. C. S. Padday has been appointed Vice-Consul at Penang for H.M. the King of Denmark.

Mr. W. Pustau, of Altona, who lately purchased the house No. 19 on the Palmaille, fitted up as a military hospital by the Knights of St. John during the late war with Denmark, is having it demolished, with the intention of erecting on its site a magnificent mansion with five storeys.

The East Indiamen *Harburg* and *Nienburg*, belonging to the Harburg Ship Company, have been put up to auction, as the company has resolved to liquidate. The highest bid for the *Harburg* was 8,000 dollars and for

Digitized by Google

the *Nienburg* 10,000 dollars. As these bids were not considered sufficiently favourable the sale was not confirmed by the directors, and the vessels will probably be put up again to public competition.

The Hamburg steamer *China*, belonging to Messrs. I. C. Godeffroy, which vessel was recently in collision with a French ship outside the lightship at Shanghai, and the Hamburg barque *Civiale*, belonging to Messrs. A. I. Hertz and Sons, lately brought into Shanghai by a steam tug after being in collision with the British ship *Helen Nicholson*, lying at anchor in that harbour, are both fully insured here.

Mr. A. J. Hertz, the head of the above mentioned eminent firm of A. J. Hertz and Sons, died here on the 7th inst. after but a few days' illness, in the 66th year of his age. He was one of the oldest members of the Board of Trade in this city, and was universally respected. The business will be carried on by his sons under the same firm.

The Board of Trade of this city gives notice under date of November 5, that after the lapse of six months from that day an election will take place to fill up the vacant Hamburg Consulate at Rangoon. Applications accompanied by certificates to be made by candidates for the appointment to the Secretary of the Board of Trade at Hamburg.

The *Voladroa*, Capt. de Lorena, hence to Manila, that left Hamburg on the 29th ult., only sailed from Cuxhaven on the 12th inst.

COMMERCIAL.

COFFEE.—Purchases continue to be made at last week's quotations, and 18 000 bags changed hands.

SUGAR.—Both raw and refined calm, nothing doing, and prices merely nominal.

RICE.—Large transactions in cleaned grain, and prices 4 scho. bco. higher, the market closing very firm.

SPICES.—Cassia Lignea continues in favour, the late advance fully realised, and the article again looking up. Pepper is also much in request and prices firm.

SPELTER.—This metal is neglected. No sales during the whole week, but prices nominally without alteration.

DISCOUNT rather lower, and quoted at 3¾ to 4 per cent.

Monetary and Commercial.

China has sadly altered. The Chinese traders have been made familiar with failures, bankruptcy—dividends and no dividends—and all the other paraphernalia and mercantile refinement of the western world. The good old times when new Kaisow teas were bought and laid down in London at about 1s. 2d. and sold at rates bringing a good profit to the operator have gone. The infallibility of the mercantile houses is broken, and the Chinese have now to learn to put all those awkward questions which are familiar in London when a man wishes for credit. Not only have they been made cognisant of bad debts but they have also been made acquainted with downright rascality, and men who coolly get possession of their goods and then take their passage by the mail steamer never to be seen again in China. We have no objection to the passing away of the old times in as far as the restriction of our trade was concerned, but if such extension is to be purchased at the cost of the disasters now attending the shipments of tea, it were better to have retained the good old times. Still we by no means despair of restoring the respectability and the profit of the China trade. The banks which have been the chief cause of the present condition of things have suffered severely, and to a great extent they also are broken up. It will, we trust, no longer be possible for people who have just passed the Bankruptcy Court here to step out to China and ship teas to the extent of over £50,000, consigning them to persons who are not yet clear of the liquidation of their last failure. Let bankers and merchants confine their operations to safe and respectable limits, and the China trade will pay both.

The annual general meeting of the proprietors in the Peninsular and Oriental Steam Navigation Company, will be held on the 6th proximo, when the directors' report is to be received, and a dividend declared. Two directors are also to be elected at the meeting in place of Captain Alexander Nairne, H.C.S., deceased, and the Right Honourable Justice George, resigned. In conformity with the requirements of the deed of settlement of the company, the board have appointed Edward Thornton, Esq., C.B., and George Carleton L'Estrange, Esq., to fill the vacancies so occasioned, and these two directors will offer themselves for election on the day of the meeting.

Applications have been received for more than the whole amount of the new capital of £400,000 of the Agra Bank. Steps have been taken to obtain the sanction of the Court of Chancery and thereupon the resuscitation will be complete. A notice of the meeting of creditors approving of the new bank will be found in another column. The following payments will be made to creditors:—5s. in January next; 3s. in July; 2s. in October 2s. 6d.; in March, 1868; and 2s. 6d. in July, 1868; the present liabilities of the shareholders to remain until the claims are satisfied.

The Messageries Imperiales Company announces the payment from 1st December of 20f. per share on account of dividend of 1866.

The despatch of messages from London for China, via Kiachta, ceased on the 20th inst. until advice is received of the route by Chefoo being completed, or on the opening again of the port of Tientsin in February.

The committee of the Planters' Association of Ceylon have expressed the opinion that the six months' usance of British bills has been barely adequate to the requirements of estate operations, and urge, as a reason against the limitation, that it will inflict on the majority of cultivators a permanent injury, and so tend to restrict the cultivation of the staple produce. They add that there never has been any serious loss sustained by the banks through purchase of bills drawn on account of coffee estates, although for years a profitable business has been carried on, and that the shortening of the usance renders necessary additional capital, for which it would be in vain at present to look. A general meeting had been called at Colombo, to which resolutions embodying these views would be submitted.

The amount required to be subscribed for the Eastern Asia Telegraph Company at Singapore will not be put on the market until a London board of directors is formed.

At the meeting of the China Steamship and Labuan Coal Company (Limited) it was resolved to reduce the nominal liability on the shares, in accordance with the circular issued to the proprietors dated the 4th of Oct. last. The company will now be called the Labuan Company (Limited).

The dividend to be recommended at the annual meeting of the shareholders of the Peninsular and Oriental steam Navigation Company on the 6th prox. is 3 per cent. for the half-year and 2½ per cent. from the proprietors' underwriting account, making, with 3½ paid in June last, 9 per cent. for the financial year.

The biddings for bills on India took place at the Bank of England. The proportions allotted were to Calcutta, 12,52,000 Rs.; to Madras, 1,30,000 Rs.; and to Bombay, 2,51,500 Rs. The minimum price was fixed as before, at 1s. 11½d. on all the Presidencies. Tenders on Calcutta and Madras at 1s. 11½d., and on Bombay at 1s. 11½d., will receive in full. These results show that the demand for remittance to India has somewhat subsided.

The Bank of Hindustan meeting of shareholders was held on the 19th, and resulted in appointing three direc ors and three shareholders to liquidate the affairs of the bank. A full report will be found in another column. We understand that since this meeting the National Bank have objected to the proposed liquidators, and require an official liquidator. Another meeting is called for the 10th December, and the Court have ordered the hearing to stand over until the 11th.

Manchester advices announce the suspension of Messrs. Ormerod, Jervis, and Thomson, commission agents, with rather large liabilities. It is stated that their embarrassments have arisen from speculative transactions unconnected with their regular business.

The Crown Agents for the Colonies have disposed of Ceylon Government exchange by public tender for 500,000 rupees. The *minimum* was fixed at 1s. 11d. per rupee, and the whole amount was allotted at and above that rate.

M. F. de Lesseps, president of the Suez Canal Company, has suggested to the silk manufacturers of Lyons that they may obtain a considerable sale of their fabrics in China provided they adapt them to the tastes of the Chinese. At his request the Government has undertaken to present to the manufacturers samples of the sorts of silk fabrics the Chinese prefer.

A telegram has been received via Calcutta in reference to the loss of several vessels in China, but it is partly unintelligible. It runs:—

"T. E. Boyd lost Ispiscandores Editard wrechen Willy assone twanfoo Pylanders wrecked Laura lost Formosa."

The amount of bullion by the P. and O. Company's steamer *Ceylon*, from Southampton on the 20th inst., was:—Nil.

MANCHESTER MARKETS.

The shipments of shirtings for the month ending 16th inst. have been very heavy. To Shanghai the export is over 19 million yards. To Hong Kong over four, and to Japan about one million. The total shipments this year to Shanghai are estimated at about 110 million yards. To Hong Kong 36, and Japan 22, being largely in excess of previous years. The latest quotations from Manchester are,—7lb. shirtings, 11s. 6d. to 11s. 9d.; and 8¼ lb., 13s. to 13s. 3d. Cotton yarn Nos. 16-24 at 1s. 5½d. to 1s. 6½d.

ARTICLES OF IMPORT.

TEA.—There is still no improvement in our market; the same features are evident, a general desire on the part of importers to realise, and a determination on the part of the trade to buy only for immediate wants. As the arrivals continue very largely in excess of the demand, prices for medium kinds of Congou have again given way, and sales even at this decline are effected with great difficulty. The arrivals since the 9th inst. are about lbs. 14,000,000, and about twenty more will be due in a month, which is far in excess of demand. In Congous, sifting show no material change. Broken-leaf kinds have sold at previous prices. Fair to good common are quoted at 10½d. to 11d. per lb., showing ½d. per lb. decline. The low price ruling for fair flavory kinds, of old import, has led to a partial inquiry for them at slightly improved prices. Fair to good Kaisows show a further decline of ½d. to 1d. per lb. Fine to finest have been better supported. Pak Lings, of fair quality, have sold lower; fine remains firm. Common to fair black-leaf Congous have sold at from 10½d. to 1s., showing a further fall; very large quantities being offered without reserve at public auction. Fair to good qualities, of new import, have sold fully 1d. per lb. lower. Fine to finest have also sold at a similar reduction. New make Canton kinds have sold 1d. per lb. lower. Oolongs remain in limited demand at about previous prices. Souchongs have been sold at former rates. Flowery Pekoes are still in a nominal position as to prices. The sales of Scented Caper show but little alteration, though rather in favour of buyers. In Orange Pekoes there has been a further fall established at the public sales without reserve, some new import, of good quality, selling at 1s. 2d. to 1s. 4d. per lb., which has led to some inquiry for them, but most holders refuse to accept these rates. Fine Foochow kinds show no alteration. The sales of the 20th comprised only 9,386 packages, of which 8,117 packages were printed without reserve. They passed off with fair spirit at about previous prices. The Ping-sueys, so far to hand, have all been sold, and for some new Moyunes just to hand extreme prices have been bid. Uncoloured Japans have commanded more attention, and some 1,500 half-chests have been sold at 1s. 3d. to 1s. 4½d. per lb.

SILK.—At a decline of 1s. to 1s. 6d. from the highest rates of October, business has resumed in the market to a moderate extent, and quotations are now 31s. 6d. to 31s. 9d. for best chop No. 3 Tsatlee, 35s. to 36s. for best Japan. The deliveries are still very small, being as follows:—China Silk: 1866, 2,061, 27,103; 1865, 2,734, 28,246. Japan Silk: 1866, 371, 5,893; 1865, 675, 11,311. The quality of the recent arrivals from China has been decidedly inferior.

COTTON.—The dulness which has of late been experienced in this market continued without relief until the 19th inst., when an increase in the demand caused prices to advance ¼d. per lb. Since that time the demand has become active, and the advance maintained without indications of a relapse. The sales during the week ended 23rd inst. have amounted in London to 4,420 bales on the spot and 400 to arrive, and in Liverpool to 64,680 bales. No Dhollerah was offered but 820 bales Tinnivelly fully fair to good fair realised 10¾d. to 11¼d., and 300 bales China sold as follows:—middling fair 8¾d.; fair to good fair 9¼d. to 10d.; good and fine 10½d. At Liverpool fair Dhollerah is quoted at 10½d., middling Orleans 14½d. per lb. Telegraphic advices from New York up to the evening of the 21st inst. place middling upland 34½ cents. The Luzon arrived at Liverpool during the week from Hong Kong, having on board 1,949 bales China cotton.

COIR YARN.—The supply is scanty and consequently business limited. At auction 28 tons Ceylon were offered, out of which 20 tons sold, good, £41 5s. to £41 15s.; common to good common, £32 10s. to £34 5s. per ton. These prices show a decline of £2 to £3 on last report. No private sales have taken place.

COIR FIBRE.—This market ha also declined, and the only transaction during the week has been 176 bales fair Cochin at £31 5s.; coarse, £25 5s. to £25 15s. per ton.

COFFEE.—The market has been throughout the week steady at somewhat easier prices. The sales have been in fair quantities and at the opening of the market there was some competition for the better sorts of Plantation Ceylon, which ceased on a larger supply being placed on offer. During the week 1,376 casks, 153 barrels, 774 bags Plantation Ceylon have been sold, prices ranging as follows:—For gray, fine ordinary small to middling, 71s. 6d. to 77s.; for colory, fine ordinary to middling, 76s. to 81s. 6d.; good middling, 82s. 6d.; pea-berry, 82s. to 88s. 6d. Of Native Ceylon the sales have reached 1,500 bags, the prices being for ordinary, 59s. to 63s. 6d.; good ordinary 65s. to 66s. 6d.; fine ordinary to good bold, 69s. to 72s. In addition the following sales have taken place:—40 bags Java at 61s.; 1,035 bags Singapore ordinary brown, 44s. 6d. to 45s.; foxy, 59s., brown mixed to fine, ordinary even, 60s. 6d. to 63s.; and 212 packages (12 mats each) superior pale Manila, 71s. to 72s. 6d. per cwt.

COCOA NUT OIL.—No business of any importance. Ceylon, with three months' prompt, is worth £51, and Cochin £60 to £61 per ton.

HIDES AND SKINS.—There was a fair demand for East India hides at the sales, and a large proportion found buyers at from last sale prices to ½d. per lb. advance. Of 3,262 Singapore Buffalo offered, 1,860 sold, best 6¾d. to 6¼d., seconds 4¾d. to 5½d., light 5¾d. All the Batavia Buffalo (472 hides) offered was sold at 6¼d. and 6½d. per lb.

HORNS.—Of Rangoon Buffalo, 3 tons (1865 horns) sold at 45s. per cwt.

MANILA HEMP.—Up to the 22nd inst. the sales at auction amounted to 1,150 bales, which realised £51 per ton, one lot £51. 5s. Since that date 254 bales have been offered, and, with the exception of 64 bales, all bought in. These consisted of fourth to first-class sea-damaged, and sold at £44 to £50. 15s., one lot ordinary sound at £48. One parcel, consisting of 50 bales, at the Liverpool market realised £54 per ton.

PEPPER.—Black remains steady at former prices, the sales being 1,950 bags Penang at 3d. to 3¼d. per lb., and 3,088 bags Singapore at 3½d. At Liverpool 230 bags Singapore have realised 3¼d., and 100 bags Penang 3⅜d. The business done in White Pepper has been very trifling, the only offer at auction being 38 bags good and fine Penang, all of which sold at 6d. to 6¼d. per lb.

RICE.—There is great activity in this market, and prices have risen 6d., and in some instances 9d. per cwt. The market closes firmly, with a tendency to futher advance. The sales reported are as follows:—100 tons Necransie at 11s. 3d.; 35,000 bags Necransie Arracan 11s. 9d. to 12s. 3d.; 1,300 tons and 31,500 bags Rangoon 12s. to 12s. 9d.; 2,200 bags Bassein 11s. 7½d. to 12s.; 25 casks cleaned Java 25s. 6d.; 100 bags cleaned Moulmein at 14s. 6d. per cwt.

RATTANS.—Of Penang, 5,789 bundles sold at 3s. to 4s. 2d., and 1,935 bundles Singapore at 2s. 6d. to 3s. 1d. per hundred.

SUGAR.—The market since our last report has continued steadily improving. The sales are in fair quantities, and full previous prices are maintained. At the public sales 2,509 bags Mauritius sold, brown 27s. 6d. to 29s. 6d., yellow grainy 32s. to 35s., two lots white 41s.; 8,211 bags Penang, good ordinary to good brown 27s. 6d. to 29s.; fine brown to low yellow 29s. 6d., middling to good yellow 32s. 6d. to 33s. 6d.; 4,000 bags low dark Java 23s. 6d. to 24s. 6d.; 3,150 bags fine clayed Manila 28s. 6d.; 5,000 bags unclayed Manila 25s. per cwt. Privately the sales have been 3,000 bags brown and grey Mauritius at 27s. to 31s., and 100 tons unclayed Manila at 25s. 3d. per cwt.

SPICES.—Cinnamon: 92 bales and 11 boxes Ceylon, crop 1866, sold firmly, as follows:—First quality, 1s. 10d. to 2s. 1d.; second, 1s. 8d. to 1s. 10d.; third, 1s. 5d. to 1s. 7d.; broken, 1s. 4d. to 1s. 5d. Cloves: 4 cases Penang sold at 11d. to 11¼d. per lb., and 81 bags Penang Clove Stalks at 2d. to 2¼d. Mace: Common qualities sell at previous rates; fine and good at slight advance. Of Penang 24 cases were offered and chiefly sold; ordinary to middling, 1s. 4d. to 1s. 11d.; good pale, 2s. 6d. to 2s. 7d. The remaining sales were 8 cases ordinary Cochin at 1s., and 10 boxes middling Singapore at 1s. 10d. per lb. Nutmegs: The following sales have taken place during the week:—120 cases Penang averaging 67 to the lb., 4s. to 4s. 2d.; averaging 84 to the lb., 1s. 3d. to 1s. 5d.; 12 boxes Singapore, averaging 95 to the lb., 1s. 4d.; 77 to the lb., 2s. 2d.; and 173 boxes limed, 120 to the lb, at 1s. to 1s. 1d. per lb.

TIN.—This market is dull and inactive, with great downward tendency. The principal sales have been 1,000 slabs Banca at £81 10s., and 10 tons fine round bottom Straits at £79. Square Straits is quoted £80, at which price there has been a few sales.

TERRA JAPONICA.—Of Pegue 149 casks good sold firmly at 31s. 6d. to 32s. 3d., the most part at 32s. All the Gambier (542 bales) offered was withdrawn, with the exception of one lot, which sold at 22s. 9d.

MISCELLANEOUS.—Blacklead: 419 barrels Ceylon have sold at steady rates, good middling hard lump, 20s. to 21s. 6d.; middling, 18s. to 18s. 6d.; common, 16s. 6d.; very ordinary dull and small, 15s. 3d. to 15s. 6d.; dust, 9s. 3d. Ebony Wood: The quantity offered at auction was 469 logs (68 tons) Ceylon, of which a few lots sold at £10 to £14 5s., the remainder being bought in at £9 to £12 per ton. Isinglass: 7 cases Penang sold, good leaf, 3s. 9d.; middling tongue, 3s. 3d. Satinwood: 28 logs Ceylon sold at £12 5s. to £12 15s. per ton.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars £6s. 5s. to £6 10s. nail rod, £8 5s. to £8 15s.; hoops, £9 10s. to £10; sheets, single £10 10s. to £10 15s.; Staffordshire bars, £8 7s. 6d. to £8 15s.; rails, £6 5s. to £6 10s.

STEEL.—Swedish keg, £15 15s. to £16.

COPPER.—Sheet and Sheathing, £88 to £93 per ton; yellow metal, 7¼d. to 7½d per lb.

TIN.—£83 to £85 for block; £84 to £86 for common bars. Tin plates, best charcoal I.C., 32s. 6d. to 34s.

LEAD, &c.—English pig, W.B., £22 10s.; shot, patent, £23 10s. to £24; sheet, £21 5s.; spelter, £21 5s. 6d. to £21 10s.; zinc, English sheet, £28; quicksilver, £6 18s. to £7.

The following is from the Circular of Messrs. French and Smith:—The past week the metal market has been inactive. Iron: Is but in moderate demand. Scotch Pig is quoted rather dearer. Copper: Continues very dull, and it seems too probable now there will be no improvement this year. Tin: The consumption is good, but the late advance on foreign is not well maintained here. In Holland, however, it is stronger, 47¾ guilders being the actual dealing price. Tin Plates: The best makers continue full of orders, but others seem rather disposed to quote lower. Lead: Very firm, with but few transactions. Spelter: Rather cheaper.

EXPORT OF BULLION TO CHINA &c.

The following return shows the shipments of bullion from Southampton rom the 1st January by the P. and O. Company's mail steamers.

FREIGHTS AND CHARTERS.

Although there is a plentiful supply of ships, outward berth freights for general cargoes have not given way.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 40s. weight, 50s. meast. To Nagasaki: 50s. weight or meast. To Shanghai: 45s. weight, 45s. to 47s. 6d. meast. To Amoy: 45s. weight or meast. To Foo-chow Foo: 45s. weight or meast. To Hong Kong: 35s. weight or meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Manila: 40s. weight, 85s. meast. To Ceylon: 25s. to 30s. weight, 35s. meas.

The current quotations for coal, &c., are as follow:—From Wear or Tyne per keel. For Hong Kong: £43. For Singapore: £33. For Shanghai: £52. For Saigon: £50. For Yokohama: £50. From Newport, Cardiff or Swansea, per ton. For Hong Kong: £2. For Singapore, £1 11s. For Shanghai: £2 12s. For Saigon: £2 8s. For Yokohama: £2 8s. Batavia: £1 6s.

CASUALTIES.

The Grenada, Herd, from Singapore, which arrived at Liverpool Nov. 9, had thrown overboard a portion of her cargo.

The William Naizby, from Colombo to London, which put in at Mauritius Sept. 27 leaky, had experienced a succession of heavy gales during her passage. She had discharged and would go into dock.

The Stad Assen, Boer, from Batavia to Amsterdam, which put in at Mauritius Sept. 30 leaky, had experienced very bad weather on the 28th, in lat. 23 S., lon. 56 E., and was making ten inches of water per hour. She would have to discharge.

The Jan Van Schaeffelaar (Dutch barq.), van Duyn, from Batavia to Rotterdam, which arrived at Mauritius Oct. 8, leaky, has discharged part of her cargo there and would repair afloat.

The Confiance, Bolibo, from Batavia to Belle Isle, which put into Mauritius Sept. 22, to stop a leak, could not be repaired; her cargo had sustained slight damage, and some of it had been sold.

The Benvoirlich, Jenkins, which arrived in the Douro Nov. 19, from Singapore, had lost an anchor and chain, and was supplied from Deal.

The Kali Maas (barque), Kohn, for Hong Kong, put back for Cuxhaven Nov. 17, leaky, and with loss of bowsprit, foretopmast, and maintop gallantmast.

The Fortuna, from Shields to Singapore, which was towed into Ostend March 16, after being ashore, was sold by auction at Antwerp on the 10th November.

MISCELLANEOUS.

At Callao.—Sept. 28, Neuhof, Kross, from Hong Kong; Oct. 2, Teresa, Ball, from Macao; 3, Camilo Cavour, Landabasie, sailed for Macao.

At Mauritius.—Oct. 5, Kestrel, Davies, from Singapore; 23, West Wind, Blandford, sailed for Shanghai.

At St. Helena.—Sept. 30, Suzon, Robinson, from Hong Kong, and sailed Oct. 1 for Liverpool; Oct. 4, Anazi, Robson, from Ceylon, and sailed 5 for London; 5, Ironsides, Clave, from Manila, and sailed 5 for London; Comus, Black, from Batavia, and sailed 5 for Rotterdam; Yuk Shing, from Singapore, and sailed for London; Sept. 27, Susan Pardew, Davis, from Colombo, and sailed for London; Lammina Elizabeth, Pot, from Batavia, and sailed for Schiedam.

At St. Helena.—Oct. 6, Sinbad, Kooy, from Batavia; 22, May Queen, Gilfillan, from Canton, and sailed on 26th for New York; 27, Relief (U S.S.), Stimpson, from China, and left 28th for United States; 12, Elizabeth, Muller, from Batavia; 14, Balaklava, Stewart, from Penang; 17, Taymouth Castle, Hinds, from China; 19, Theresa, Denicke, from Manila; 24, Nagasaki, Horner, from Batavia; 25, River Eden, Valder, from Singapore; 27, Napoleon III., Mouat, from Shanghai; 26, Ornate, English, from China.

Report of the Ship "Coral Nymph."—Left Shanghai pilotage ground on Sunday the 29th of July; thence to Lombock Straits experienced light variable airs; passed through the Straits on the 8th of September and sighted Point Hood on the 1st of October; rounded the Cape of Good Hope on the 9th passed St. Helena on the 21st, Ascension on 24th; the Line on the 28th, and received the pilot on board off Dungeness on the 18th, making the passage from pilot to pilot in 112 days, from Lombock Straits in 68 days, and from the Cape of Good Hope in 38 days. Passed and spoke the Star of China off Dampier Straits bound to London, October 27th; the Dutch barque Zwann off the Cape bound to Cork, October the 8th, and the barque Peterborough on the 21st of October off St. Helena for London.

HOLLOWAY'S PILLS.—This medicine has resisted every test which time, prejudice, and vested interests could impose upon it, and it at length stands forth triumphant as the most reliable remedy for those derangements of the system so common at the change of seasons. When the air grows cooler and the functions of the skin are retarded, an occasional dose of Holloway's Pills will call on the liver and kidneys for greater activity, and compensate the system for diminished cutaneous action. As alteratives, aperients, and tonics these Pills have no equals. To every aged and delicate person whose appetite is defective, digestion infirm, and tone of health low, this medicine will be a precious boon, conferring both ease and strength.

PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power, ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer and a Blacksmith. Dry Godowns for the reception of vessels, stores, &c., when requiring to discharge them.

Amoy, March, 1865.

Office. 12, George-yard, Lombard-street, London E.C.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

DR. J. COLLIS BROWNE'S CHLORODYNE. Vice-Chancellor Sir W. Page Wood stated publicly in Court that Dr. J. Collis Browne was undoubtedly the Inventor of Chlorodyne; that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See *The Times*, July 12, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of any service in Cholera was Chlorodyne.—See *Lancet*, Dec. 31, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. Extract from *Medical Times*, Jan. 12, 1866.—"Is prescribed by scores of orthodox medical practitioners. Of course it would not be thus singularly popular did it not supply a want and fill a place."

DR. J. COLLIS BROWNE'S CHLORODYNE is the best and most certain remedy in COUGHS, COLDS, ASTHMA, CONSUMPTION, NEURALGIA, RHEUMATISM, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE is a certain cure in CHOLERA, DYSENTERY, DIARRHŒA, COLICS, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE. EXTRACT *from the* GENERAL BOARD OF HEALTH, *London, as to its efficacy in Cholera*—"So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. MONTGOMERY, Esq., *late Inspector of Hospitals, Bombay*.—"Chlorodyne is a most valuable remedy in Neuralgia Asthma, and Dysentery. To it I fairly owe my restoration to health after eighteen months' severe suffering, and when all other remedies had failed."

DR. J. COLLIS BROWNE'S CHLORODYNE. CAUTION.—None genuine without the words "Dr. J. Collis Browne's Chlorodyne" on the Government Stamp. Overwhelming medical testimony accompanies each bottle. Sole Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury, London. The immense demand enables the proprietors to reduce the price; it is now sold in bottles, 1s. 1½d., 2s. 9d., 4s. 6d., and 11s.

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.
Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor

Ditto ...	Abd. Medjid	402	AA 1 —	W.I.D.	W. des.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's.

HONG KONG and WHAMPOA.—Warran'ed First Ship.—The clipper barque DORA, A 1 ten years, 379 tons, C. BROWN, Commander; West India Docks. This fast sailing vessel (having made her last passage from Colombo in 94 days offers a favourable opportunity to shippers, and will shortly be despatched.

Apply to JOHN C. CAMPBELL 22, or to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, E.C.

Regular Line of Packet Ship.

FOR HONG KONG AND WHAMPOA, the very fast, new clipper JOHN MILTON, A 1, 14 years, 618 tons register, A. PIROUET, Commander; lying in the East India Docks. This ship, built last year, made the passage to China against the Monsoon in 104 days. Has good accommodation for passengers.

For Freight or Passage apply to SHAW, LOWTHER, AND MAXTON, 2, Royal Exchange-buildings, London E.C.

FOR SHANGHAI, to sail, full or not full, on the 1st December, the celebrated clipper ship SIR LANCELOT. A 1 14 years, 886 tons register, RICHARD ROBINSON, Commander, late of the Fiery Cross; lying in the East India Docks. This beautiful ship was built last year on the lines of the Ariel, by Messrs. Robert Steele and Co., of Greenock. Has superior accommodation for passengers.

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, E.C.

FOR SHANGHAI Direct (last shipping day 8th December), the magnificent China clipper ship LAUREL. A 1 thirteen years, 638 tons register, GEORGE MOODIE, Commander; lying in the East India Docks. This well-known ship (owned by Messrs. John Willis and Son (is strongly recommended to shippers of fine goods.

For Freight or Passage apply to GELLATLY, HANKEY, SEWELL, and Co., of 27, Leadenhall-street, E.C.

MALABAR COAST (Mangalore, Cannanore, Beypore, and Cochin), the beautiful clipper ship MILBROOK, A 1 nine years. 328 tons register, JOHN BARROW, Commander; West India Dock. This fast-sailing vessel has been especially selected to take the place of the Star of Ceylon, lately lost, and will have quick despatch.

Apply to JOHN C. CAMPBELL, 22, or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, E.C.

COLOMBO Direct, warranted first ship, the beautiful clipper ship ABOYNE; A 1 10 years, 445 tons register, J. GRANT, Commander; London Docks. This fast-sailing vessel, built in 1864, offers the best opportunity for shippers of fine goods, having room for light measuremen t goods only.

Apply to JOHN C. CAMPBELL, 22, or to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

Will meet with very quick despatch.

FOR SADASHIGUR, CANNANORE, BEYPORE, and COCHIN.—The beautiful clipper ship, ABDUL MEDJID, A 1 (owned by Messrs. Vanner, Prest, and Lythe), 402 tons register, J. PITON, Commander; West India Docks. This fine little vessel has been especially selected to follow the Millbrook.

For Freight or Passage apply to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate street, E.C.

To follow the "Aboyne." and will meet with the usual quick despatch.

DIRECT for COLOMBO, the beautiful China Clipper, SPIRIT OF THE NORTH, A 1, 10 years, 663 tons register, ALEXANDER MATTHEW, Commander, lying in the East India Docks. This splendid clipper ship, well-known in the China trade, having just re-classed and newly coppered, offers a first-rate opportunity to shippers of fine goods

For freight or passage apply to JOHN C. CAMPBELL 22, Great St. Helen's, Bishopsgate-street, E.C., or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

COLOMBO (CEYLON) Direct (to follow the Palestine), having all her dead weight engaged, and only room for light measuremeut goods, the new clipper ship BOYNE, AA 1, 618 tons register, R. P. JONES, Commander; loading in the West India Docks. This splendid vessel has a full poop, with magnificent accommodation for the comfort and convenience of passengers.

For passage apply to the owner, W. H. TINDALL, 5, Tokenhouse-yard, E.C.; or for freight or passage to F. TALLACK, 23, Birchin-lane, Cornhill, E.C.

FOR COLOMBO, CEYLON Direct.—Will have immediate despatch having the greater portion of her cargo engaged, the beautiful clipper ship CAPE CITY, A 1 12 years, 423 tons register, JAMES BAWDEN, Commander; loading in the West India Docks This magnificent vessel, built under special survey, offers an unusual opportunity to shippers of fine goods, and has a capacious and lofty cabin, replete with every accommodation for the comfort and convenience of passengers.

For freight or Passage apply to F. TALLACK, 23, Birchin-lane, Cornhill, E.C.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Since last advices from this port three mails had arrived out, namely, those of 10th, 17th, and 27th August; the latter was received on the 16th October, the day on which the present homeward mail left. No diplomatic news is recorded, except the departure of the Belgian Minister for China.

The *Japan Herald* says that Stotsbashi is confirmed as Shiogoon, and this is now proclaimed among the Japanese. He has placed himself at the head of his forces, and new spirit is infused into all the Government operations. There have been three engagements since he took command. One in the Province of Aki, and a second in Iwami. In both of these Choshiu's troops were routed. As, however, the idea prevailed in the Shiogoon's army that a large body of Choshiu's force was close at hand in each case, they did not pursue beyond a limited distance. At Kokura, Ogasawari-no-kami has had a decided advantage over Choshiu's invading force, driving them across the strait to Simonoseki, pursuing them, and taking the heads of upwards of two hundred men. Ogasawari-sama having obtained this victory, burnt the village or town of Kokura, and taking two of the men-of-war steamers, embarked with a large portion of his force, ostensibly for Nagasaki, but in reality to join the Shiogoon. Stotsbashi is showing the utmost activity in every department. He is getting his army into fine order and concentrating his forces. Ogasawari-Iki-no-kami has joined the Shiogoon with his contingent, and decrees have been issued respecting Choshiu. We are still, however, led to believe that the Shiogoon earnestly desires peace, and that his great energy is exhibited to this end.

The remains of the late Shiogoon have been conveyed to Yedo in the recently purchased steamer *Dumbarton*.

An embassy is to start by the next mail (English or French we know not) from Stotsbashi to the Emperor of Russia. The Envoy is Koidé Yamato no Kami, Governor of Hakodadi, and a newly appointed Governor of Foreign Affairs. He takes a portrait of Stotsbashi to the Emperor, and a letter stating that he would have desired to have seen the Czar in person, but as his affairs here are so very urgent he sends his Minister, who will present to his Majesty his picture. The object is to define boundaries, and arrange the Saghalien difficulties.

Kamakatsu Oomi-no-kami, long governor of the Japanese college at Benten, is appointed a Governor of Foreign Affairs, but will continue to reside principally in Yokohama. We rejoice in this appointment, as his acquaintance with the lights and shades of European character renders him capable of forming a more correct judgment than most of his compeers are able to do; and as he is a man of known integrity, high-minded and very intelligent, the best results may be expected.

The *Herald* says the following may be thoroughly depended upon as authentic respecting the death of the late Shiogoon:—

"The Shiogoon, although so young, was in a state of health for some months past such as to give cause for uneasiness. He had heart disease besides a tendency to dropsy. Added to these, lately, kake, the malady we have before described, had shown itself, but the real and immediate cause of his death was disease of the heart. He suffered very much from rheumatism three years ago, which laid the foundation of the complaint he died of. As every effort and all the skill of his native physicians had no beneficial effect, Dr. Bauduin, Superintendent of the Medical College at Nagasaki was sent for. He arrived at Osaca on the 22th August, but found that he was too late, as the Shiogoon died before he arrived. Finding his services were not required, Dr. Bauduin at once proceeded from Osaca to Yedo. The Shiogoon felt acutely the non-success of his army on the opening of the war; and this, operating on his spirits, the sufferings he endured from kake, and the general unhealthy state of his body, all helped to hasten the crisis. He was twenty-one years of age, and it is not surprising that with such accumulated infirmities he was unequal to the exertion the troubles of his Government called for.

The *Japan Times* says:—"The position of Stotsbashi at present is this:—He has been named as heir to the late Shiogoon, but has not received a commission from the Mikado to assume the vacant post. Kishiu, the late Shiogoon's uncle, and commander-in-chief of his forces has resigned his command which Stotsbashi has taken up, and he is now with the troops. The Daimios in Osaka are stated to be getting tired of the war, which keeps them away from their territories and forces them to retain large bodies of men in the capital at their own expense. Everything seems to portend a speedy termination to this unhappy civil war, which is desolating a fine part of the country, raising the price of provisions and labour everywhere and creating general discontent. Should its result be, as we have reason to anticipate, a radical change in the constitution and Government of Japan, it will be well for her and the rest of the world."

The *Japan Times* says:—"Our silk market has shown more activity during the past fortnight, as reference to our commercial record and to the cargo list of the *Labourdonnais* will show. We have to note the arrival by the last English mail of an agent of the Peninsular and Oriental Company. The position of this association here is not by any means satisfactory, and we cannot see how it will be able to maintain its line in the face of the French and American opposition, without what it should have received from its first start, a fair subsidy from our Government. It is true that the wants of the trade here at present would be fully supplied by two steamers a month, and if the P. & O. ran its vessels only alternately with those of the Messageries, the line might be made to pay. It certainly cannot do so at present, when one of its steamers which runs concurrently with the French ship almost invariably goes away with a freight which must leave a heavy loss upon the voyage. But at the same time it might, on occasion, be most prejudicial to English interests to ship the entire export of each alternate fortnight in a foreign bottom, and we trust that the company will succeed in obtaining the same assistance from our own executive as that given by its rivals by their respective Governments. But at the same time some radical change in its own management must be made; for, subsidy or no subsidy, merchants here will not ship silk in the P. and O. steamer when they have the opportunity of sending it by another which, starting only twenty four hours before it from this port, places its valuable freight in consignees' hands in England five or six days earlier. And when the American line is started, both English and French will have to cede to it all the freight from this port, so far as the carriage to Hong Kong is concerned. From Yokohama to Hong Kong direct is the natural route for Japanese produce, and the communication between Shanghai and this had better be left to private steamers."

NAGASAKI.

The following is from Messrs. Alt and Co.'s Market Report:—

IMPORTS.—A decided improvement has manifested itself in our import market during the month. Grey Shirtings, White Shirtings, and T-Cloths are in small demand at quotations; Dyed Brocades, Damasks, Turkeys Red Cambrics, and Prints are also in fair demand; White Spots, Brocades, and Fancy Prints are dull of sale, with large stocks of the latter. Taffechellas are also in heavy stock, but with improved inquiry. Camlets are saleable at quotations, but holders are firm stocks being light. Long Ells, Scarlet and assorted, Black Velvets, Figured Orleans, and Camlet Cords, are wanted, and stocks also light. Lustre Orleans are more inquired for. Metals share to some extent in the general improvement. Spelter and lead are wanted at quotations. Fine Nail Rods and Pig Iron are also in demand, but other descriptions are dull of sale. Of Coal there is no stock, but prices, which are to some extent governed by those current in Shanghai, are lower.

EXPORTS.—Produce continues in good demand at advanced rates for general staples, owing principally to the necessity some people are under of making purchases to fill chartered vessels. Vegetable Wax and Tobacco remain in demand at a further advance for the latter. Galls and Camphor have been settled to a small extent. In Copper or Cotton nothing has been done. Tea: Less anxiety being exhibited on the part of operators, our dealers show more inclination to quit their stocks, and prices may be considered about $2 lower. As supplies of good medium leaf, however, continue to arrive freely, a further decline may be anticipated. Settlements for the month are estimated at 1,800 piculs. Silk: No supplies have reached us.

EXCHANGE.—Doct. bills on London, at 6 months' sight, have been sold at 4s. 8d. On Shanghai, 10 days' sight, 1 per cent. prem. On Hong Kong, 10 days' sight bills are offering at 1 per cent. dis. Ichibous 310—nominal. Freights.—To London, £2. 10s. New York £3, nominal. Shanghai, $3.50 to $4. Hong Kong, $3.50 to $4. Tonnage is still equal to requirements. Vessels loading:—The *William Mitchell* and *John Bunyan*, for London, and the *Niphon* for Sydney, N.S.W.

EXPORT OF TEA FROM ALL JAPAN.—From 1st June to 30th September, 1866: From Nagasaki to United Kingdom 123,037 lbs.; to United States, 421,885 lbs.; from Yokohama to United Kingdom, 92,089 lbs.; To United States, 1,204,271 lbs. Total from all Japan, 1,841,282 lbs.; against same period last year, 1,114,899 lbs.

KOREA.

The truth of the telegram from Kiachta published in our issue of the 5th ultimo, is fully confirmed as far as regards the loss of the *General Sherman*, and the massacre of the crew; while that portion of it announcing war between France and Korea is amply justified by the fact that the French forces have actually been in hostile collision with the Koreans. Two Chinese junks which arrived at Chefoo on the 12th brought the following report:—

The captain of one of the junks was engaged by Mr. Thomas, the interpreter on board the *General Sherman*, to pilot her up the river Phieng, and thus became acquainted with that gentleman. Mr. Thomas, it will be remembered, came to China some years ago under the auspices of the English Mission, and has lately made a trip along the Korean coast for the purpose of obtaining some knowledge of their language and with the further object of making an exploring tour to the interior. The junk captain took the schooner up the river four tides. By this time an alarm had spread among the natives of the presence in the river of a piratical vessel with a large crew and having armament. The protestations of Mr. Thomas that the vessel was a peaceful trader were of no avail; business of all kinds was suspended, and the natives began to collect in large numbers on the banks of the river. The friends of the junk captain, whose vessel it would seem had followed the schooner thus far, demurred at his proceeding further up the river, saying that if he were killed they would not dare to return to Yen-tai. Yielding to their solicitations he left the schooner at a point opposite Little Phienganso. Those on board the schooner were determined to proceed. The junk then came direct to Chefoo, with the report that a foreign schooner had been wrecked opposite Phineganso, and all on board burnt, with the vessel. The *General Sherman* is the only schooner known to have been on the Korean coast, and it is certain that it is she who met this fate.

The French admiral returned from Korea to Chefoo early in October. The exploring squadron having reached the Bay of Prince Jerome, the Korean pilot on board pointed out the mouth of the river leading to the capital. The gunboat *Deroulede*, commanded by Lieutenant Richy, was immediately ordered off to sound, and if possible to reach the town of Kang Hoa, about one-third of the way up to the capital. The gunboat ascended the river against a current running five miles an hour, and found it practicable as far as Kang Hoa, and the commander, having made drawings of the island on which this town is situated, and also a plan of the river, returned to the Admiral. The next day the Admiral embarked on board the *Deroulede*, and in company with the *Tardiff* made his way up to Kang Hoa. It appears that the steamer *Emperor* had lately reached this place by another channel of the same river, which meets the stream ascended by the French gunboats at that spot, and a town on the other bank was taken by the captain of the *Emperor* for the capital. The French gunboats concluded the ascent of the river from the point where the *Emperor* terminated her observations and surveys, for about twenty miles; and then came in sight of the walls of the city of Say-ool, the capital and residence of the King. On their way thither they found great difficulties; continual shoals, rocks and sharp turnings, together with the rapidity of the current brought them to a stand several times. They found several stone forts along the river side, with guns mounted. On their way the Mandarins collected a fleet of junks to bar the passage, but after a warning and a round shot, they dispersed and left the road clear. The authorities came on board and presented the French with provisions, a fat ox amongst other things, and requested them to withdraw. After taking drawings, soundings, and plans, the Admiral gave orders for the *Deroulede* to turn her course down the river, but very soon after the *Tardiff* was fired at; both gunboats returned the fire and dispersed the soldiers. At Kang Hoa they were again fired at, and again were obliged to send a few shot in return. The forts seemed swarming with soldiers, with flags, and armed with muskets; the soldiers also wore Japanese swords. After some little trouble the gunboats rejoined the *Primanguet* which had been waiting for them at the mouth of the river, and the squadron returned to Chefoo. The expedition leaves for Korea immediately. While off the coast they heard that the American schooner *General Sherman* had been wrecked and all hands murdered; this has since been confirmed by a junk arrived from the Korean coast. The Koreans who held intercourse with the *Emperor* have all had their heads cut off.

CHINA.

CHEFOO.

Mr. Thomas L. McCready, of the firm of Allen and Co., has arrived at Chefoo in the *Nanzing* with a view of endeavouring if possible to obtain intelligence respecting the people on board the *General Sherman*. He will go on, if necessary, from Chefoo to Tientsin and thence to Peking; where he will obtain a passport from the United States' Legation and will then continue his journey to Moukden, where he will endeavour to procure the assistance of the Chinese authorities in tracing out the facts connected with this matter. It is believed by some to be not altogether without the bounds of possibility that the Koreans may have taken the foreigners to the barrier and have handed them over to the Chinese. Should such be the case there may be some difficulty in finding them out, as the Mandarins at Moukden have upon more occasions than one thrown foreigners into gaol to avoid the expense of sending them on to their proper authorities. It is not very long ago since Mr. Meadows, the British Consul at Newchwang, was instrumental in obtaining the release of four Russians, who had been for a lengthened time in prison at that place, and the attempt made to induce Captain McCaslin and the crew of the steamer *Surprise* to take up their quarters in a gaol, would probably have resulted in their being similarly detained, had they allowed themselves to get into the mandarins' power to that extent. The plan contemplated by Mr. McCready of going to the barrier in company with Chinese officials will probably prove the most satisfactory that could be devised; as the Coreans are familiar with the Chinese authorities, and their presence will secure the matter receiving attention at head-quarters.

SHANGHAI.

Dates hence are to the 21st October. The outward mail of August 27 was delivered on October 11. The only interesting item of news is a meeting of the Chamber of Commerce, at which the subject of railway communication was alluded to and a line by the sea wall to Hangchow recommended as the least likely to excite objection, as a first attempt. Another letter, written by the Chamber to Sir Rutherford Alcock, regarding the navigation of inland waters by small steamers, was laid before the meeting, together with a curt reply by the latter, simply saying that he saw no reason to change his previous decision. Resolutions were passed condemnatory of the shortening of the usance of bills, and pointing out the hardships of the present rule in reference to Custom-house seizures. The conduct of H.B.M.'s Consul at Canton in the *Prince Albert* case was blamed; and a resolution passed reducing the future rate of subscription to tls. 25. Messrs. Hargreaves, Bryans, Probst, Turing, Tyson, Duncanson, Johnson, and Iveson were elected to be the committee for the ensuing year.

The *North China Herald*, in commenting on the *Lubra* piracy and murder case, remarks:—"It is sincerely to be hoped that the efforts of the police to discover the perpetrators of the crime will prove successful; though the hope arises rather from a desire for vengeance than from any confidence that punishment will avail to prevent similar outrages in future. Exclusion of the piratical vessels which have hitherto found a refuge in Hong Kong harbour, and execution of every pirate who falls into our hands, will do little towards the suppression of piracy as an institution, or to save the lives of future captives. So long as pirates find immunity in the weakness of their own government, and a safe refuge under the eyes of their own officials, piracy will continue to flourish in Chinese waters. All the efforts of the English gunboats, which have now for years patrolled the Chinese waters, must utterly fail to eradicate a disease of which they cannot reach the fountain head. However vigorous a crusade may be carried on, many vessels may be captured or destroyed, others will continue to be equipped in their stead, so long as the native officials lack either the power or the will to control the movements of the piratical fraternity on shore, in their inlets and harbours. One object of Admiral King's visit to Peking is said to be to concert with Sir Rutherford Alcock measures for the repression of piracy. If the latter can impel the Chinese themselves to more vigorous action in the matter, he will have gained an important step towards their end."

HONG KONG.

The present mail brings advices to the 27th October. The English mail of September 10 arrived out on the 23rd of October.

(FROM OUR OWN CORRESPONDENT.)

Even at the present day,—when the boast of *Civis Romanus sum*, which was until so lately looked upon as the legitimate assertion with which a British subject might express his inviolability, has entirely lost the significance given to it by vigour of Lord Palmerston's policy,—it may be supposed that the intelligence from Korea which this mail takes home will not be looked upon with utter indifference in England. The news of the miserable fate that has befallen British and United States' subjects at the hands of the ferocious potentate who sways the Government of Korea has horrified even the apathetic communities of the Chinese ports, and but one sentiment—the desire for speedy vengeance—is expressed on all sides. Significantly enough, however, the results of the Russell-Gladstone policy are seen in the anticipations that are expressed of hostile action being taken by the French and United States' vessels of war, whilst the assertion of British power is looked upon as so very unlikely as to be scarcely discussed as a possible event. The destruction of the *General Sherman* in the river near the Korean capital has been ascertained almost beyond the possibility of mistake from two quite independent sources, namely, from a French missionary who accompanied the French exploratory expedition to the coast of Korea, and from a Chinese trader, who came forward recently at Chefoo and volunteered a statement of all he knew concerning the massacre of the Europeans and the destruction of the schooner on board which they had entered the river. His story has been published in the newspapers here, and will therefore reach you in full by this mail. There can be no doubt that the voyage of the *General Sherman* was a most foolhardy undertaking, and that those on board proceeded with their lives, it may be said, in their hands; but it is most fervently to be hoped that the British Government will not seek in this fact an excuse for ignoring the outrageous and murderous savagery of the Korean Government. It may be, however, that before orders for any action by the Admiral on this station can reach China the capital of Korea will be in the possession of a French naval brigade. The entire available force of French vessels of war in these seas is already assembled at Chefoo, and rumour has it that a portion of Korean territory is to be forthwith occupied, pending instructions from Paris which shall authorise an advance upon the capital for the purpose of avenging the massacre of the French missionary priests. The time has obviously arrived for reading an unmistakable lesson to this last of Asiatic tyrants, and great will be the pity if the British flag finds entrance into his dominions only under sufferance of our French allies.

As regards any commercial advantage to be derived from the "opening" of the country, no very sanguine expectations are entertained here, though it appears by no means improbable that under an enlightened and liberal regime both the productive capabilities of the country might be rapidly stimulated, and a market created for the consumption of texile manufactures.

In previous letters I have already mentioned that a memorial to the Home Government from the Hong Kong Chamber of Commerce, urging the opening of the port of Shuey Tung, on the west coast of the Canton province, has been talked about for some time past, and I now learn that the U.S. steamer *Wachusetts* has been sent down in the direction of Hainan for the purpose of reaching if possible the port of Kiung-chow (which, though included in the Treaties in the list of open ports, has never yet been formally declared open), and reporting on its capabilities.

The coolie trade at Macao continues to excite great attention, and the interior swarms with crimps, by whom hundreds of wretched Chinese are brought down in daily batches to the barracoons of that iniquitous settlement.

The commercial rumours here are so distressing and at the same time so vague that I refrain from doing more than alluding to their existence.

The latest mercantile quotations are as follows:—

Exchange Bank, six months' sight, 4s. 6¼d. to 4s. 6⅜d.; Credit, do., 4s. 7¼d.

Grey Shirtings: 8·4 lbs., $3.80 to $3.85; do., 7 lbs., $3.45 to 3.50.

Freight to London: £1 10s. per ton of 50 cubic feet.

Tea: Congou, small sales at Canton at tls. 27; S. O. Pekoe, tls. 24 to 27.

Silk: No. 1 Loong Kong, at Canton, 600 to 620; Tsatlee reel, 620 to 645. Small sales.

In a heavy gale experienced at Macao two vessels drifted from their anchorage. One of them, recently under the British, at present sailing under the Russian flag, called the *Avon*, was carried out to sea and went ashore some distance below Macao, was subsequently brought in by the steamer *White Cloud*, which

Digitized by Google

was chartered for the purpose. She had nearly completed taking in her number of passengers for Havana. The other craft, a French one, the *Sagittaire*, with a full complement of coolies, also drifted and has not yet been heard of, although the steamer *Fire Dart* had been out to search for her.

The arrival of the Chief Justice, the honourable John Smale late Attorney-General of this colony, determines the acting appointment so long held by Mr. Ball. During the four years that gentleman has been in the colony (says the *Hong Kong Mercury*) he has certainly been seated for three years and a half on the bench of the Supreme Court, and it would hardly be gracious to permit him to step down from the position he has so worthily filled without some acknowledgment by the public of his attention to the business of his Court, of his patience and urbanity, of his impartiality, and of the general satisfaction with which his judgments have been received. If any fault has to be found with him it is that he leaned too strongly to the side of mercy in criminal cases, and appeared to strain a point very frequently in favour of a prisoner. His unflinching application of the powers intrusted to him by the clauses of the flogging ordinance in every case to which they could possibly be made applicable merits the gratitude of all. He resumes, we believe, the duties of his appointment as Judge of the Court of Summary Jurisdiction, while Mr. Whyte devotes himself entirely to his magisterial duties. He too has done well in his acting appointment, and gave satisfaction to the suitors frequenting his Court by his general disregard of all legal technicalities, and his habit of deciding each case on its substantial merits. His decisions were very equitable.

Five-cent pieces (the *Mercury* informs us) are in course of manufacture at the Mint for some of the banks, for whom, too, the twenty-cent pieces, and in fact a large proportion of the small change, is being coined. A profit of ten or twelve per cent. will, we have been told, be derived by the banks from the investment, as the smaller coins are not intrinsically of the value they represent, but are only tokens circulating at a fictitious value. If this is the case—that is, if the banks derive a profit from the conversion of dollars or sycee into ten and twent-cent pieces even after paying the seigniorage and premelting fee, we cannot understand why the Government did not secure that profit for itself by calling in a proportion of the existing currency and having the amount so called in converted into small coin and issued at once. This operation, by no means a difficult one, would have had the effect of diminishing the heavy loss that must be incurred by the colony on account of the Mint. We may possibly be basing our remarks on unreliable information. The profit on the smaller coins may not be as considerable as we have been informed. No harm, however, can be done by calling the attention of the Government and the public to a matter which may be of importance in connection with the Mint question.

The report of the Bremen barque Perle shows the violence of the typhoon which raged on the 29th and 30th September. She left Taiwanfoo on September the 28th ; had a fresh gale of wind from the northward and a high rough sea from the same quarter, on account of which she could not discharge cargo ; about noon all communication with the shore was completely interrupted ; barometer going down, prepared for a storm, and were ready to slip ; vessels at anchor, Swedish barque Bengal, Hamburg barque Atalanta, Bremen barque Perle, three-masted schooner Japon and Willy. At midnight heavy northerly storm, the Willy and Bengal were dragging their anchors ; glass still going down.

The *Evening Mail* says :—"Mr. Tonnachy, the Registrar-General, has discovered the existence of a den of kidnappers, and brought up some twenty-five Chinese who had been illegally detained therein. The names of one or two 'eminent' Europeans are freely mentioned in connection with the existence of this disgraceful establishment, but we of course refrain from comment until the actual facts of the case are further elucidated. Hitherto the only firm mentioned publicly in court is that of Messrs. Bourjau, Hubener and Co., whose well known abhorrence of the coolie traffic is a sufficient answer to any who would endeavour to fix upon them the guilt of maintaining such an establishment. Some interesting details will probably be evolved when the case is heard. We congratulate Mr. Tonnachy on the zeal and sagacity he has displayed. No less than eight Macao crimps have been executed lately at Canton."

Linkee, a Chinese contractor, lately kidnapped, and for the detection of whose kidnappers a reward of five hundred dollars was recently offered by the Colonial Government, has at length returned. It appears that his kidnappers took him to a village some fifty miles above Canton, and there detained him until he agreed to pay up a ransom of $4,500, which, hopeless of gaining his freedom in any other way, he eventually consented to do. We trust that the Government will move the Chinese authorities to take steps to discover and punish the kidnappers.

Fourteen Chinese had been flogged in one day at the public whipping post, Queen's-road West. The ceremony attracted a large crowd, among whom were many countrymen of the culprits. We have had occasion lately to notice the diminution of offences by the Chinese, and it is possible that this public mode of punishment may have had a deterring effect upon them.

We are glad to learn that the assay question regarding the new dollars has been satisfactorily settled at Canton, and they will shortly be proclaimed legal tenders at that port in payment of Customs duties. We trust that the sagacious example shown by the Canton Commissioner will be followed at other ports.

Saturday the 29th, at 4 A.M., hurricane-like storm from N.W. and a tremendous swell from the West ; the glass rising, hoped for a favourable change in the state of the weather ; about 5 A.M., the Japan parted cables and was soon lost out of sight ; heavy showers of rain were fast succeeding one another ; at daybreak had only the Atalanta with us ; no change of wind and weather, glass being stationary. Struck topgallant masts and took every other possible precaution. About ten o'clock the storm commenced in hurricane-like squalls from the westward, the sea increasing at a fearful rate ; the ship was riding heavily, the sea continually washing over her ; at 10.30 A.M. in an awfully heavy sea parted our chain, when we were heading N.W. ; the westerly swell made the ship pay off to the northward ; hoisted immediately foretopmast staysail, loosed our topsails, sheeted some close reefed foretopsails ; kept close reefed maintop sail shaking, put the helm hard a port, hoisted the jib, and she fell off to NE. by E. All at once a heavy ground swell broke right over us in 5½ fathoms of water ; the ship broached to and drifted broadside on ; let go our second and third anchors, paid out all chain, shackled the ends round the foremast ; the windlass alone could no longer be trusted, although it had been sustained by stanchion tackles ; furled the sails, or what was left of them. The ship dragged her anchors at a rapid rate, breakers all around us ; had no other alternative left us but to cut away the masts, to prevent the ship being dashed to pieces within the next few minutes ; cut away the masts accordingly, when the ship ceased dragging her anchors, and ship and cargo could be considered safe. Heavy ground seas were still breaking all over the vessel, smashing to pieces the boat, watercasks, companion-ladders, gig, sty, hencoops, and many other things ; the rest of the day sea and rain as heavy as ever ; in the afternoon the storm gradually decreased, the glass rising ; made a raft to safe our lives if required.

Sunday, the 30th of September, moderate storm from west by south, soon dying away to a stiff gale of wind. Less swell and rain than yesterday. At daybreak saw to the southward of us the Willy high and dry, and another schooner close to her ; found our third cable was sprung ; the vessel was still knocked about most fearfully ; in the afternoon succeeded in rigging a jury mast on the fore deck ; kept the pumps sucking.

Monday, the 1st October. The weather moderating ; rigged a jury-mast on the poop. At nightfall took on board the shipwrecked crew of the Dutch barque Pylades, lost the night previous ; close to her a British barque was lost, and a 3-m. schooner capsized ; were towed towards our old anchorage on the following day and left Taiwanfoo on the 18th October, jury rigged ; experienced strong gales and heavy running sea from the northward ; anchored on the 20th, at 10 A.M. in the Lamma Channel ; at 8 P.M. in Hong Kong roads.

SIAM.

The *Bangkok Recorder* gives the following details of the rebellion in Upper Burmah. The intelligence from Mandalay is to the effect that on the 2nd August two sons of the King of Burmah murdered their uncle the Ein Shee Meng. After that by their orders two of their half-brothers, three of the Woongyees and other leading men were murdered. The Thongzay Prince, who formerly came to Rangoon, has escaped from the city. There appears every probability that no more bloodshed will take place. All Europeans are safe and unmolested.

Digitized by Google

No difficulty as respects intercourse between the Burmese and British Governments is anticipated.

Since the accession to the throne of the present King in December, 1852, his brother by the same mother, called the Elin Shee Meng, was regarded both by the Court and the population as the heir apparent to the Throne. The meaning of the Burmese title by which he was addressed implied this heirship. But as the King and the royal brother were both rising in years, the former being fifty-five and the latter fifty-two, the younger branch thought it high time to act as all their predecessors had done—to strike for the throne, A Burman monarch never dies in power. He is generally either put down by some conspiracy or placed in confinement. King Tharawaddee, the father of the late and present Burmese Sovereigns, was made a prisoner by his eldest surviving son, who mounted the throne and retained his father a captive during the remainder of his life. Similarly the Paghan Meng, the late King, was hurled from power by a rising of the people at the capital, during the late war with the British Government. He was considered a mere puppet in the hands of a few persons and utterly unfit to govern. The Men-doon Meng then mounted the throne, and has kept his half-brother, the Paghan Meng, a prisoner ever since. The deposed King has no sons.

By the events which have taken place at the Burmese capital within the last few days, the throne of the present and very popular King seems to be shaking. A rebellion is always a precursor of a revolution. The game for the throne lies between the Thongzay Prince and the Mengoon Prince. Both of these princes are half-brothers, being born of different mothers.

According to Burmese custom, the prince who aspires to the throne escapes as quietly and as quickly as he can from the Royal city. In the country, he and his followers raise the standard of revolt. They rally all the banditti and decoits throughout the country, and lure them on by promises of plunder. As the game is still playing, it is impossible to tell who will be the next King of Burmah. That the good and friendly King will be dethroned there is no doubt. His life will be spared, and the remainder of his days will be spent as a captive. As it is unusual to retain two deposed Kings at one time in the Royal city, the fate of the Paghan King may be considered as decided. He will be quietly put out of the way.

Two of the three Ministers of State who have been murdered are known, one was the Myadoung or Commander-in-Chief of the city, of the Royal troops, of the arsenal and palace. The other was Loungshay, the King's special and confidential friend and adviser in all matters pertaining to the welfare of the kingdom. The name of the third is not known. Among others who have been assassinated in the course of recent events is the celebrated Moung Oke, the ex Burmese Governor of Rangoon, to whose rapacity and ferocity toward Europeans the last war was attributable. He held no office, but his brother is Master of the Horse and Governor of Moke-so-bo, the district just north of the capital.

Lieutenant Bagge, of the Royal Engineers, who completed the demarcation of the north-east boundary between Tenasserim and Siam during the last dry season as far as the Amya Pass, will proceed to Bangkok for the purpose of getting assistance there, with which to recommence the work. Lieut. Bagge requires elephants and guides, which are more easily procured from the Siamese than in any part of our own territory, and will make an early start in November, beginning at the Pakchan river and will work up northward to the pass.

Births, Marriages, and Deaths.

(Announcements for subscribers are made free of charge.)

BIRTHS.

BURROWS—On the 23rd Oct., at Hong Kong, the wife of O. Hoffman Burrows, of a daughter.

CARST—On the 11th Oct., at Yokohama, the wife of Mr. J. Carst, of a son.

DICKINSON—On the 13th Oct., at Shanghai, the wife of Henry Dickinson, of a son.

GRAHAM—On the 21st Sept., at Bangkok, Mrs. Graham, of a daughter.

MARSHALL—On the 25th Nov., at South-place, Herne-hill, the wife of Gloster Marshall, of a son.

RAWLING—On the 26th Nov., at Beaumont House, Stoke, Devonport, the wife of S. B. Rawling, Esq., late of Hong Kong, of a son.

WOODWARD—On the 19th Oct., at Shanghai, the wife of R. H. S. Woodward, Esq., of a son.

MARRIAGE.

BUTTERY—KAY.—On the 29th Nov., at Dowanside, Glasgow, by the Rev. T. M. Lawrie, John Buttery, Esq., to Jane, daughter of Alexander Kay, Esq. No cards sent.

SCHUTZE—KELMERS.—On the 6th Dec., at St. Peter's Church, Hamburg, Franz S. Schutze, of Hong Kong, to Marie, eldest daughter of J. W. Kelmers, of Kiel. No cards.

DEATHS.

BAULSOM—On the 20th Sept., at Bangkok, of dysentery, W. Baulsom, 1st Engineer at Borneo Company's Rice Mill.

HALL—On the 16th Sept., at Bangkok, of dysentery, G. H. Hall, engineer.

JEFFREY—On the 12th Oct., at Shanghai, Captain Jeffrey, of the barque Camilla.

TURNER—On the 17th Oct., at Shanghai, the infant daughter of Henry Turner.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—From Sunderland, Oct. 8, Emperor; from Cardiff, Marmion; from Marseilles, 2, Johanna Maria.

At SHANGHAI.—From Newcastle, Oct. 19, Southern Cross; from Shields, 9, Chanticleer.

At HONG KONG.—From Newcastle, Oct. 25, Paramatta; from Cardiff, Twee Cornelissen; from Boston, Oct. 24, Autocrat.

DEPARTURES.

From YOKOHAMA.—For New York, Oct. 5, Recife.

From NAGASAKI.—For London, Sept. 28, Margaret Campbell.

From SHANGHAI.—For London, Oct. 15, Sir W. F. Williams; 17, Juanpore; for New York, 19, Royal Diadem; for London, 20, Red Deer.

VESSELS EXPECTED.

From YOKOHAMA.—Thomas Dryden, Conference.

From NAGASAKI.—George, Margaret Campbell.

From HANKOW.—Napoleon III., Mary Nicholson.

From SHANGHAI.—Blencathra, Nelly, Illimani, Lansdowne, William Melhuish, Charlgrove, Challenger, John Paul, Knight of Snowdon. Marquis of Argyle, Trebolgan, Wild Deer, Queen of the East, Antipodes, Helen Nicholson, Ann Adamson, Dartmouth, Polmaise, John Bull, Agamemnon and General Caulfield.

From FOOCHOW.—Philomela, Marion, Monarchy, Naomi, Veronica, Louisa, Northfleet, Beautiful Star and Scawfell.

From CANTON.—Island Queen, Victoria, Melbreck, Valdivia, The Cedars, Kelso and Solent.

CASUALTIES.

The Kwang Foong, from Newchwang to Canton, has been totally lost off the west coast of Formosa.

COMMERCIAL POSTSCRIPT.

At the annual meeting of the P. and O. Company to-day the report was adopted which, as already announced, recommends a dividend for the half-year of 3 per cent., with a distribution of $2\frac{1}{3}$ per cent. from the underwriting account, making, with the dividend of $3\frac{1}{2}$ per cent. declared in June, a total of 9 per cent. for the year. The assets of the company, including £3,043,163 for stock of ships, less the amounts deducted for depreciation, are £4,144,290, while the liabilities, including 2,300,000 paid-up capital and £626,500 debentures are £3,685,275, showing a surplus of £459,015. The company have contracted with Denny Brothers, of Dumbarton, for a new vessel of 2,167 tons and 500-horse power, which is to be ready in six months, and several of the finest of their old ships have undergone a complete renewal. The amount remaining to be called up on the new shares of the company having been absorbed, and the directors feeling it requisite to prepare to meet any invitation for tenders for new services which might lead to the necessity of building more vessels, an application has been made for a supplemental charter authorising an addition of £1,000,000 to the present capital by an issue of 20,000 new shares of £50 each. Three vacancies have occurred in the board of direction, and Mr. E. Thornton, C.B., and Mr. G. Carleton L'Estrange, together with Mr. Henry Bayley, now one of the assistant-managers, were elected.

Mr. C. E. Walduck, secretary pro. tem. of the Colombo Gas and Water Company (Limited), has issued a circular inviting capitalists and others interested in the proposed scheme to meet this day, to consider information recently received from Ceylon. It appears that a very advantageous contract has been made with the Municipal Council of Colombo for the supply of gas, and this will involve an outlay of £50,000 in the establishment of works. The capital of the proposed company is to be £150,000 in 15,000 shares of £10 each, and it is stipulated that 5,000 are to be reserved for Ceylon.

In Vice-Chancellor Stuart's Court yesterday Mr. Roxburgh asked that a petition of the National Bank to wind up the Bank of Hindustan, China, and Japan, which had been reserved for the 14th inst., might be ordered to come on with another petition for the same purpose which was to come on upon the 11th inst. The Vice-Chancellor said it would be inconvenient to bring the petitions on to be heard on Tuesday, the 11th inst., and directed them to be in the paper on the 14th inst. A notice has been issued that the extraordinary meeting convened to be held at the head office of this bank the 10th inst., at twelve o'clock, will be forthwith adjourned to the London Tavern, Bishopsgate-street, when the resolutions referred to in the secretary's circular notice of 23rd ult. will be submitted.

A telegram received yesterday from Bombay states that the proposed resuscitation of the Agra Bank has been assented to

Digitized by Google

by a meeting of shareholders and creditors held at Bombay on the 24th ult. A second telegram from the manager at Bombay states that shareholders and others desire to subscribe for the new capital. This, however, has already been allotted here, it having been considered by the new board desirable to have the whole of it secured before making the intended application to the Court for its sanction to the resuscitation arrangement. The matter came before the Chief Clerk in Chambers yesterday, and was by him adjourned into court, to come on on Saturday, the 15th inst.

Biddings for £350,000 in bills on India took place yesterday. The proportions allotted were—to Calcutta, £151,300; to Madras, £3,500; and to Bombay, £105,800. The *minimum* price was fixed at 1s. 11d, on all the Presidencies—a reduction of 1 per cent., and tenders at and above the *minimum* will receive in full. These results present a decline of 2 per cent. in the terms obtained for Calcutta and Madras, and of 1 per cent. in those for Bombay, and show that the demand for means of remittance to the East has experienced a further considerable diminution.

ARRIVAL NOT IN THE TABLE.—At New York, from Manila, Ann Holzberg.

DEPARTURES.—Dec. 5, from London for Shanghai, Sir Launcelot; for Yokohama, Eliza Shaw; from Amsterdam for Batavia, Telegram; Nov. 28, from Liverpool for Japan, Nellie Hastings; Dec. 4, from Sunderland for Shanghai, Elmstone.

LAID ON.—At Liverpool for Yokohama, Barracouta.

SPOKEN.—Henrietta, Amsterdam to Batavia, Oct. 31, 5 N., 24 W.; Jacoba and Christina, Batavia to Amsterdam, Oct. 27, 9 S., 13 W.

CASUALTY.—The Helena and Anna, van Aalborg, from Rotterdam to Batavia, arrived at Falmouth Dec. 4 with foreyard carried away and damage to stern (?), having been in collision that morning forty miles off the Lizard.

THE P. AND O. COMPANY'S SERVICE.

This Company has now publicly notified its intention (already announced in our issue of the 12th ultimo) of running two steamers every month between Bombay and Suez, as an experimental line, in addition to the existing fortnightly mail service, thus increasing the communication with Bombay to four times a month. These extra steamers will run to and from Suez in conjunction with the Calcutta, China and Australian mail packets in the Mediterranean. The first departure will take place by the steamer of the 20th January from Southampton, and on the 28th of January from Marseilles. The company has just adopted a step of a somewhat unusual character, having issued a pamphlet entitled "A Statement of the Position and Operations of the Company, from its Incorporation to the Present Time." The matter presented by the directors is divided into the following twelve heads, viz., the charters, the postal service, the passenger service, the transport service, the establishments at home and abroad, the consumption of coal, the consumption of provisions, the employment of agents, commanders, engineers, officers, and others, the expenditure and revenue, the shareholders, the direction and management of the company, the parliamentary committee of 1866. From the magnitude of the company's operations, this resumè naturally possesses considerable interest.

EASTERN ASIA TELEGRAPH.

(To the Editor of *The London and China Telegraph.*)

SIR,—Having read the letter of "An Engineer" in your issue of the 28th ult., and being desirous to counteract the tendency of said letter to mislead persons who would be disposed to invest money in the Eastern Asia Telegraph Company, I beg that you will allow me to place the following before your readers.

To show that I am competent to offer an opinion on the subject, I may be permitted to mention that I have just returned from Singapore, where I resided about ten years as engineer and contractor, and that I have travelled over a considerable portion of the peninsula along which the proposed line would pass; also that I erected the line of telegraph which has been several years at work in Singapore between that place and New Harbour.

1. Your correspondent "An Engineer" implies that the difficulty arising from the rudeness of the inhabitants would extend along the entire line from Moulmein to Singapore, instead of less than half that distance; the territories at both ends of the line being comparatively civilised, and in a great measure under the influence of Europeans. Of the middle portion in so far as uninhabited I say nothing, as I do not see from whom danger would be apprehended; and regarding the thinly inhabited districts, the natives are not wild savages, and I believe that the protection afforded by his Highness the King of Siam, his Highness the Tumungong of Johore, and other native princes, with whom provisional agreements are made on behalf of the company will be faithfully executed, and will be as effective a a Government treaty regarding a matter for which it is not supposed that our Government would not proceed to warlike extremities.

2. The cost of a land line is stated by your correspondent to be £100 per mile, and no doubt he would be glad to obtain a contract at such a rate (though perhaps a submarine line would please him still better), whereas lines can be shown in satisfactory working that did not cost half this sum and for the proposed line there is cheap wood for posts at hand, and water carriage for material available at short intervals along the entire line, in which particulars it contrasts favourably with some inland Indian telegraphs.

3. Fluctuations of weather and temperature are stated as objections, but any one can satisfy himself that such variations are less in the localities and latitudes in question than in any part of the known world, and are of no injurious consequence whatever to such a line of telegraph as is proposed.

4. Your correspondent is silent about the dangers, difficulties, and losses that so frequently beset submarine lines. A submarine line was laid from Singapore to Batavia which very soon became entirely useless, being cut up by friction upon coral. I have myself seen portions of it fished up that looked like an open umbrella skeleton. I cannot speak so confidently as to the causes of the damage of the Red Sea cable, but it is well known that the loss to those concerned has been very serious. The Malta and Alexandria telegraph is notorious for the frequent interruptions it is subject to, but it appears to be more easily repaired than the Red Sea cable, probably owing to the absence of such destructive coral in the Mediterranean. This objection is in full force between Moulmein and Singapore, and I consider it the most insurmountable obstacle to the success of a submarine cable there.

5. I have only to add that economy of working and repairing are on the side of a land line as well as economy of cost, and I have no hesitation in stating my belief that the Eastern Asia Telegraph will prove one of the most important and most remunerative ever constructed.—I remain, Sir, your obedient servant,

J. FISHER.

London, Dec. 5, 1866.

Naval and Military.

By the death of Sir William Parker, Sir George Francis Seymour, G.C.B., G.C.H., will be advanced to the dignity of Admiral of the Fleet, and will consequently be removed from the post of Vice-Admiral of the United Kingdom, in which he will no doubt be succeeded by Sir William Bowles, K.C.B., now Rear-Admiral of the United Kingdom, who in his turn will make room for Admiral Sir Phipps Hornby, G.C.B., one of the few survivors of Sir William Hoste's victory off Lissa. Sir Phipps is the maternal uncle of the Premier, but irrespectively of this claim on the consideration of the Government no fitter officer could be selected for the vacant appointment. The late Admiral of the Fleet, Sir William Parker, held the high appointment of first and principal naval aide-de-camp to He Majesty the Queen.

Vice-Admiral the Earl of Lauderdale, K.C.B., has been appointed First and Principal Aide-de-Camp to the Queen, in the place of Admiral Parker.

The flag of Sir Thomas Sabine Pasley, Bart., Naval Commander-in-Chief at Portsmouth, has been shifted from the fore to the main, in consequence of the gallant officer's promotion to the rank of full admiral, on the death of Admiral Parker. The St. George's ensign, on being hoisted at the main of the *Victory*, was saluted according to naval etiquette, the flag of Rear-Admiral George Wellesley, superintendent of Portsmouth Dockyard, being transferred to the *Duke of Wellington* for the occasion.

The Royal Warrant for the distribution of the Banda and Kirwee prize money has received, as we are credibly informed, Her Majesty's signature, and will forthwith be dispatched to India for publication in the Calcutta and other Presidential Gazettes. We believe that the distribution of the fund, in consequence of the arrangements which have been authorised by Lord Cranborne, will take place simultaneously in England and in India; and we may, therefore, at length congratulate the fortunate expectants on the prospect of an early realisation of the prize for which they have so strenuously and successfully combated.

Rear-Admiral the Hon. George Fowler Hastings, C.B., who has been appointed to succeed Vice-Admiral the Hon. Joseph Denman as Commander-in-Chief of the Pacific station, was born in November, 1813, and entered the navy in September, 1824. He obtained the rank of lieutenant Jan. 7, 1833, and, after serving at Portsmouth and the Mediterranean, became commander June 30, 1838. He commanded the Harlequin, 16, from August, 1841, to January, 1845, and while serving in that ship, besides sharing in the closing operations of the Chinese War, obtained the public thanks of the Commander-in-Chief for his conduct in landing her boats in conjunction with those of the Wanderer and the Diana in an attack upon the piratical towns of Murdoo and Quallo Batto, and was promoted to post rank, January 31, 1845. He commanded the Endymion, 44, from August, 1847, to January, 1848; the Cyclops, from July, 1848, to the spring of 1851; the Curacoa, from August, 1854, to April, 1857, in the Mediterranean; the Meander, 44, in Portland Roads, May to November, 1867; the Blenheim, 60, and the Hannibal, 91, at Portsmouth, November, 1857, to June 5, 1858, when he was appointed Captain-Superintendent of Haslar Hospital, which post he held until he attained flag rank, April 27, 1863. He went down to Woolwich on Wednesday afternoon and hoisted his flag on board the Fisgard, on his appointment as Commander-in-Chief in the Pacific, in succession to Vice-Admiral the Hon. Joseph Denman.

The screw sloop Reindeer, 7,953 tons, 200 nominal horse-power, Commander E. Nares, fitting for sea in Chatham harbour, is complete in her equipment and stores, and, in accordance with a telegram received at the dockyard, will leave to-morrow for the Pacific, on a four years' cruise. On reaching the Nore she will be detained for a few days to make her official trial of speed at deep draught, and to be swung for the adjustment of her compasses, and will be finally inspected by the Vice-Admiral Commanding-in-Chief.

The screw steam-corvette Satellite, 17, Captain Edye, left Plymouth on the 22nd for China.

LAUNCH OF A CHINA CLIPPER.—Messrs. Steele and Co. have launched a new China clipper, which was named *Titania* by Mrs. William Steele. The adjectives "handsome," "fine," "elegant," "beautifully modelled," &c., hitherto applied to the vessels lately launched by this and other firms for the China trade, are altogether inadequate for the ex-

Digitized by Google

pression of an idea of the build of the *Guinevere*, *Ariel*, and *Sir Lancelot*, whose models were such that the term "yacht-like" should be applied to each, and if to them, then specially so to the *Titania*, which may be aptly designated as an enlarged and improved copy of the lines of the schooner yacht *Selene*, whose triumphs in English and French waters are already known to our readers. The *Titania* is of the following dimensions:—length, 199 feet; breadth, 36 feet; depth, 21 feet. Her burthen is 1,225 tons, and she is registered in the highest class at Lloyds, being a composite ship, and, from her speciality of build, of very strong construction. She will be masted with steel spars and yards; fitted with every convenience for the saving of labour to the crew; and have a flush deck and low bulwarks, so as to lessen the action of adverse winds. The *Titania*, whose model cannot fail to augment—if this be possible—the reputation of Messrs. Steele for the construction of this class of traders, is the property of Messrs. Shaw, Lowther, and Maxton, a London firm eminent in the China trade, and owners of successful competitors for the prize awarded to the first teas of the season. She will be commanded by Captain Deas, an experienced gentleman long in their employment, and will load here for Shanghai. After the launch were proposed success to the ship, and the healths of the owners, to which Peter Maxton, Esq., responded, giving in a most complimentary manner those of the builders.

CENTRAL ASIA.—"An Old Indian" writes as follows to *The Times*, in allusion to the paper by Sir Henry Rawlinson published in our last issue:—"I think *The Times* has done a public service by its full report of the paper and discussion on Khotan at the Royal Geographical Society's *soiree*. I can perfectly trust the good sense of the public to steer between the extremes of Russophobia on the one hand, and utter neglect of Russian policy in Central Asia on the other, if it is well-informed of the facts; but not otherwise. The cause of all our errors and oscillations of opinion on the subject hitherto has been ignorance of the facts. Allow me to point out briefly in how clear a light our interest and our duty are shown by the two leading facts communicated to the world at the above *soiree*. Firstly, that the cities and vast region of Chinese Turkestan, emancipated by force of arms from the Chinese empire, and too distant from both Powers to be occupied by Russia or England, are eager to trade with the two empires, especially with ours, as the millions of Mahomedans, to whom tea is a necessary of life, must look to India for their supply, now stopped from China, and are offering to exchange their gold, silver, and other metals, their jade, fine wool, horses, &c., for many of our products besides tea. Secondly, that the much abused Rajah of Cashmere (who would have a good deal to say for himself if he could attend a Geographical Society's *soiree*) does not really oppose any obstacle to the prospect of trade thus opened, as the road through his dominions is impracticable to an extensive commerce; the tract of Thibet between Cashmere and Turkestan being nearly as high as Mont Blanc in its plains, while its 'passes' are from 16,000 to 20,000 feet above the sea; whereas there is an old and really good road, with wood, water, and provisions at every station, and paved in the time of the Maghul emperors, practicable for wheeled carriages throughout the year, and which leads through a pass in the Kuen Lim chain, far to the east of Cashmere, straight down to the North-West Provinces, and thus opens this vast region of Chinese Turkestan to British commerce in the safest and most desirable way. Who can help feeling that it is a relief to know these two facts; and who is not ready to join in the wish expressed by Sir Henry Rawlinson, 'to see Russian and English consuls established in all these cities of Central Asia, and good feeling and honourable emulation excited between the two European Powers?'"

THE P. AND O. COMPANY'S STEAMERS.—During the year 1865 the steamships of the Peninsular and Oriental Company performed 384 voyages from Southampton and Marseilles under their India and China mail contracts. This represents a total distance of 1,023,792 miles. The number of first-class passengers conveyed outwards was 2,891, and homewards 2,448, at an average charge, including all provisions, wines, &c., of from 2¼d. to 3¼d. per mile for each passenger. These vessels are found to consume more coal, and to travel slower, when transferred from the Mediterranean to the Indian seas, the increase in consumption of fuel averaging about 1 cwt. per mile for each ship, the average decrease of speed being from 1 to 6 furlongs per hour. During the last seven years this company has added 28 ships to its fleet, which represents collectively a carrying capacity of 48,986 tons, and a propelling force of 10,190-horse power. During the past year these ships have conveyed outwards from Southampton 746 tons of mails, consisting of 17,839 packages, at an average speed of from nine to ten nautical miles per hour.

WRECK OF THE "CYCLONE."—The following despatch has been received at the Foreign-office from Her Majesty's Consulate at Nagasaki, transmitting the official deposition taken on oath of the three survivors of the British ship *Cyclone*, belonging to Aberdeen, which has been totally lost on the south-west coast of the Island of Tanega Tima, and twenty of her crew drowned:—"We left Sydney on the 22nd of last June, bound to Shanghai, and experienced strong fair winds until about latitude 6 south; afterwards winds light and variable. On the 12th of July, in lat. 12 north, lost our fore and main topmasts. On Thursday, August 8th, it was blowing a gale from S. to S.E. with a very low glass and heavy sea, steering W. ½ N. At 4 P.M. gale increasing; hauled to the wind on the port tack, under close-reefed fore and maintopsails, and foretopmast-staysail. During the night wind still increasing, very dark, with vivid lightning and heavy rains; glass 29.30; corpusants flying about on the yardarm. At about 1.45 A.M. on Friday, the 9th, was roused out of bed with the cry of land to leeward. Jumped on deck, the captain going up at the same time. The ship having scarcely any headway on her, tried to wear her, but whilst hauling in the weather main braces she touched on a reef, but went over it, and the next sea was broadside on against the rock, the lightning showing it to be about fifty feet high, completely smooth, and up and down; the second sea the masts went; and the third she turned over on her beam ends, deck towards the rock, and went down, she being then almost entirely broken up. Not more than five minutes elapsed from the time she first touched till she was completely broken up. I was in the water about three-quarters of an hour on some of the spars, when I managed to reach another island at daylight; found that I was on one of a group of five small islands close to the main land, and the rock on which we had struck was about half a mile to seaward. I managed with the help of a spar to reach the mainland. As soon as I landed the Japanese went off in their boats, and found Thomas Guymar, A.B., and George Brown, the cook, on another island. All of us were badly bruised. All that we saved from the wreck was two shirts and a pair of trousers, which the natives picked up on the beach and brought to us. On Saturday we found the body of Joseph Macnamara on the beach, and we buried him in the afternoon, the natives digging the grave for us. On Sunday afternoon, the sea having gone down considerably, the Japanese officers took me off to the rock the ship struck on, and likewise to the other islands. There were no pieces of wreck on or about the rock; but the weather bays of all the other islands were full, even the lower masts and beams being splintered up into small pieces, and some of the wreck jammed into the crevices of the rock forty or fifty feet high. During the three days we stopped in the village no other bodies were washed on shore. On the 12th we went in a junk to another village along the coast, and from there took ponies across the island to a town on the other side. We stopped there, living in a temple till Monday, August 26th. We then started in two junks to Prince Satsuma's head town, Kagosima. It took us three days to get there. Left Kagosima for Nagasaki in a Japanese steamer belonging to the Prince of Satsuma, on Tuesday, Sept. 10th, and arrived in Nagasaki on the 12th. The Prince of Satsuma was most kind to us, supplying us with clothes and whatever else we required, and forwarded us at his own expense, to the Consul at Nagasaki. We were never without guards, and wherever we went the people followed us in hundreds and treated us kindly. We cannot refrain from testifying our sincere thanks to Prince Satsuma and his people, for the affable and kind manner in which they treated us during the time we were in their country, which we shall ever bear in remembrance.—(Signed) FREDERICK TAYLOR, Second Mate; THOMAS GUYMAR, A.B.—"Declared before me, at this Her Britannic Majesty's Consulate, Nagasaki, Sept. 15, 1866.—(Signed) MARCUS FLOWERS, Her Majesty's Acting Consul."

A JEWISH COLONY IN CHINA.—An American missionary in China writes to a New York paper to say that the famous Jewish colony in Kai-fung-fee, the ancient capital of the Celestial Empire, is scattered, and their synagogue demolished. He visited the site of the latter, and found a stone had been placed on the spot. On one side of the stone was an inscription commemorating the erection of the synagogue in the reign of the Sung dynasty, A.D. 1163; and referring the first arrival of the Jews in China to the dynasty of Hon, A.D. 200. On the other side was a record of its rebuilding in the dynasty of Ming, about 300 years ago. He found out some of the descendants of the colony, and learnt that they now numbered about 300 individuals. They stated that they had been obliged o sell the materials of their synagogue to purchase the necessaries of life. They were all poor, some were money-changers, others sold fruit and cakes, and others again dealt in old clothes. They possess a few copies of the Jewish scriptures, and a roll of the law, but they are ignorant of the Hebrew language. The missionary saw the son of the last Rabbi, with whom perished the knowledge of a sacred tongue. The individuals forming this most interesting remnant were unable to trace their tribal pedigree; they kept no register, they never assembled as a congregation, and their children are growing up without the seal of the covenant. They remembered the names of the feasts of tabernacles, and unleavened bread. The missionary found a large tablet that adorned the synagogue, on which could be traced the name of Israel, in a Mahommedan mosque in Kai-fung-fee.

THE ATLANTIC AND PACIFIC RAILWAY.—This line, from New York to San Francisco, will be 3,200 miles long. It passes through St. Louis, Kansas city, the heart of New Mexico, and gets into California, near the head waters of the Colorado river, by a low pass in the Rocky Mountains. The railway is rapidly being made from both termini. By January, 1868, it will be extended 1,870 miles from New York to within 200 miles of the Rocky Mountains. In two or three years' time a person will reach San Francisco from England in little odds of a fortnight, and he will have made during that period an ocean voyage 3,000 miles long, and performed a land journey of greater length. When the Atlantic and Pacific railroad is completed the route to Japan and China via New York and San Francisco from this country will be much the best and quickest one.

RE THE AGRA AND MASTERMAN'S BANK (LIMITED).—This was a motion on behalf of Mr. Alexander Dunlop Anderson (of the firm of Thompson, Anderson, and Co.) for the purpose of restraining the official liquidator from enforcing payment under the winding up of a bill of exchange for £1,565, accepted by Mr. Anderson, who claimed a right of set-off in respect of an overdue bill of exchange for £1,500 accepted by the company in December, 1865, the balance of £65 having been paid to the official liquidator pursuant to an order made when the motion was first brought on at the end of last July, when Mr. Anderson was also ordered to give security for £1,500 as the condition of obtaining possession from the liquidator of the jute, in respect of which the bill for £1,500 had been accepted by Mr. Anderson. Mr. Giffard, Q.C., and Mr. Druce, in support of the motion, contended that if an action for the £1,565 had been brought by the official liquidator, and Mr. Anderson had paid into court the £65 and then pleaded set-off as to the remaining £1,500 it would have been a good legal plea, and it would be inequitable for this Court to deprive Mr. Anderson of his right of setting off this amount from the pendency of the winding-up order, and the circumstance that the official liquidator was resorting to his equitable remedies (under the winding-up) for payment of a legal debt. Mr. Roxburgh (with whom was the Attorney-General), on behalf of the official liquidator, contended that to allow the set-off claimed by Mr. Anderson would prejudice the rights of the creditors, for whose benefit, as well as that of the contributories, the winding-up order, which was equivalent to a decree for the general administration of the estate of the company, was made; and that the Companies Act of 1862, from the absence of any provision to that effect, must be construed as negativing any right of set-off in a person indebted to a company which was being wound up. The Vice-Chancellor held that the right of set-off was not interfered with by the proceedings under the winding-up order, and that the case must be regarded as if no such order had been made, and Mr. Anderson and the bank stood to each other in the ordinary position of debtor and creditor. The official liquidator must deliver up the acceptance of Anderson, and Anderson must deliver up the company's acceptance. The bond given by Mr. Anderson, pursuant to the order made in July last, would be cancelled.

REMOVAL OF OFFICE.

NOTICE.—On the 1st of January next, the Office of the LONDON AND CHINA EXPRESS and LONDON AND CHINA TELEGRAPH will be removed to No. 2, Cowper's Court Cornhill (over the JERUSALEM).

NOTICES TO CORRESPONDENTS.

No notice can be taken of anonymous correspondence. Whatever is intended for insertion must be authenticated by the name and address of the writer, not necessarily for publication, but as a guarantee of good faith.

A REGISTER is kept of the addresses of all persons connected with the FAR EAST and reference can be made to the same by personal application at the office or by letter.

Any information required by Subscribers, in reference to Commercial or General matters in CHINA, JAPAN, SINGAPORE, *and other parts of the* FAR EAST, *will be supplied on application at the Office, where files may be seen of the Journals published in those countries.*

THE LONDON AND CHINA EXPRESS.

PUBLISHED on the departure of the Mails *via* Marseilles on the 10th, 17th, and 26th, contains a Summary of European, American, and General News; Commercial and Shipping Reports, and Special notices of Trade with the FAR EAST.

Subscription 54s. per annum, including Postage. Export Supplement 12s. extra.

The London & China Telegraph.

LONDON, THURSDAY, DEC. 6, 1866.

THE SAN FRANCISCO, JAPAN, AND CHINA MAIL ROUTE.

THE West India and Pacific Steamship Company of Liverpool, have issued a circular announcing that they have concluded arrangements with the Pacific Mail Steamship Company for the conveyance by the latter's new line of vessels, of passengers, goods and specie, from Liverpool to Japan and China, and *vice versa*. The steamer already announced to leave San Francisco on the 1st January, and due at Hong Kong on the 29th January, will start thence for the return voyage on the 18th February, arriving at San Francisco on the 17th March. From this place the passengers and cargo will be brought on by a steamer in connection with the one leaving Colon on the 1st April, and due at Liverpool on the 25th April, making the entire passage from Hong Kong to Liverpool in sixty-six, and from Yokohama to Liverpool in fifty-eight days. The second departure from Liverpool will be on the 10th February, arriving at Hong Kong on the 2nd May. The rates of passage money from Liverpool to Yokohama (first class) will be £110 10s., and to Shanghai or Hong Kong £120 10s. Freight on general merchandise will be £18 5s. per ton of forty feet to either port, free of primage. This applies however to the outward voyages only, as the homeward freight will be fixed by the agents of the Pacific Mail Company at those ports.

AUSTRIAN EXPEDITION TO THE FAR EAST.

ENCOURAGED, probably, by the success which has attended her late antagonists, the Italians, Austria has now resolved on despatching a treaty-making expedition to the Eastern seas. Admiral TEGETHOFF, the hero of Lissa, is the officer appointed to the command, and it is generally believed that a worthier selection could not have well been made. A frigate and a corvette are already undergoing special preparation for the service, and will be ready to sail in February next. The Admiral will be furnished with magnificent presents for the King of SIAM and the Shiogoon of JAPAN, including marble statues of the Emperor of AUSTRIA, richly bound books and pictures from the Imperial collections, sets of Chinese and Japanese works published by the Academy of Sciences at Vienna, portraits of the Imperial family, photographs of Austrian scenery, and specimens of all the principal productions of the Empire. Besides the diplomatic element the mission is to include commercial experts and scientific men. A sum of 200,000 florins has been appropriated for its expenses, which, it is remarked, is a handsome allowance for such a purpose from a State supposed to be on the verge of national bankruptcy.

THE MESSAGE OF SIR HERCULES ROBINSON TO THE CEYLON LEGISLATURE.

IT has never fallen to the lot of a Governor of Ceylon to address the Legislature of the colony under more auspicious circumstances than those which attended the opening of the present session. A larger revenue than any previously raised, and an excess of income over expenditure which, with former surpluses, leaves an unappropriated balance of nearly a quarter of a million sterling, is certainly encouraging, especially when taken in connection with the improvement of trade and the rapid progress of the public works. The slight extent to which Ceylon has been affected by the financial crisis, due mainly to the soundness of its commercial relations, sufficiently indicates the character of that improvement. The balance on hand affords the stronger ground for congratulation that so considerable a portion of it is available for disposal. Exchequer surpluses are by no means new to Ceylon, but the difficulty has been to secure any portion of the golden fruit for her own use. As with Tantalus, it has been within reach, yet not to be appropriated or enjoyed. The vivifying effect of a more enlightened administration in the Home Colonial-office is already apparent. With the unexpended balance put out to interest, and a large portion of the principal made immediately applicable to public improvements, the leading grievance of undue restraint in the control of the public moneys is removed. Now, however, that Imperial demands are satisfied, it is time that the entire control of these balances should lie with the Government and Council. Nothing else will satisfy the just demands of Ceylon; nothing else remove the impression that the Home Government is but lying in wait for another "seizure." We trust the Ceylon League will make another effort to achieve its aim in this as in other matters during the present administration, encouraged by the promptitude with which colonial Acts now receive the Royal sanction, subject of course to modifications suggesting themselves as advisable. We find even the telegraph called into requisition in giving power to expend a further portion of the Treasury balance than had previously been released from home control. Sir HERCULES, by his official acts no less than by his announced policy, indicates the wisdom of the choice which placed him at the head of affairs in Ceylon. Far from averse to change, if change be but improvement, he would yet rather improve than reconstruct the several departments; and what Ceylon requires is a change in their efficiency rather than their organism. His Excellency is evidently greatly aided by the spirit shown by the whole European community in favour of these public improvements, now being carried actively forward—a spirit showing that those jealousies have been set aside which elsewhere spring up when vested interests are interfered with or the field is widened for individual competition. There appear to be those who think that the Governor's address should have been nothing less than a treatise on political economy; but what we look for in an Executive is the practical application rather than the abstract exposition of sound principles. Ceylon is yet to some extent the victim of mere theory—the theory that would deny an effective representation of the popular views and will in the Legislative Council, the subject yet of Imperial reservation, to which she should not, for her own dignity, much longer submit. We are far from coinciding in the view expressed in some quarters, that native interests should have been dealt with in this address separately from those of European colonists. What progress is there for any Asiatic race apart from European progress? Just so far as Asiatics are subordinated to our aims, just so far they improve their real condition. Our interest is their interest, and our success their gain. It is to be regretted that in dealing with the subject of rice production and the question of Governmental expenditure on irrigation, Sir HERCULES should have left wholly out of view the inducements that exist for individual capitalists to apply themselves to rice-growing; his argument that in the event of such expenditure the natives would not avail themselves of the advantages offered, assumes quite a different aspect when European co-operation is taken into account. The fact of 4,000,000 bushels of rice having been imported last year provides, one would think, sufficient inducement, in connection with the fact that Asiatics are ever ready, where certain pay is offered, to engage in rice cultivation. The results of leaving Government outlay on irrigation solely to idle natives are too apparent; and, to use the words of Sir HERCULES, "could have no material influence on the importation." But why was the opportunity omitted to invite the application of capital in this direction, especially with the high

Digitized by Google

rates ruling and the steadiness of the current demand? Ceylon must not be satisfied with one great staple, still less with a dependence for the very existence of her native population on Indian supplies. We would have been glad to have found the subject of tea cultivation adverted to. Before the session passes we trust the experiments now being carried out will be so far successful as to place tea at an early period on the list of important exports.

THE NEW FRENCH AMBASSADOR TO PEKING.

THE Comte de LALLEMAND is appointed Envoy Extraordinary and Minister Plenipotentiary at the Court of China, in place of M. BERTHEMY. The Count has just been raised by the Emperor to the dignity of Commander of the Legion of Honour, for his services in the international sanitary conference of Constantinople, which lasted for more than twelve months, and of which M. de LALLEMAND was first French commissioner; the same honour has been paid to SALIH EFFENDI, first Turkish commissioner and President of the conference. Dr. BARTOLETTI, second Turkish commissioner, and M. PINTO DE SOVERAL, Portuguese commissioner, have been made officers of the Legion, and M. KALERGI, Greek, Dr. MUHLIG, Prussian representative, as well as Dr. NARANZI and BARON DE COLLONGUE, secretaries of the conference, chevaliers of the same.

FOREIGN TRADE WITH CHINA.

(SECOND NOTICE.)

IN our issue of the 30th ultimo we reviewed briefly the opening contributions to the recently published *Reports on the Trade at the Ports in China opened by Treaty to Foreign Trade, for the Year* 1865, *Published by order of the Inspector-General of Customs*, comprising extracts from a despatch addressed to the Tsung-li yamên by Mr. HART, and a report on the trade of Ying-tzu and the surrounding districts by Mr. MACPHERSON. Continuing our review we now arrive at the report on the trade of Tien-tsin for the same period, drawn up by Mr. BAKER. It is well known that Tien-tsin supplies a very large extent of country, and that in the north of China the products of Western looms, as well as opium and metals, find a ready market amongst the natives of Chih-li, Shan-si, and Southern Mongolia. Reliable statistics of the Tien-tsin trade are available for the last four years only; that is to say, since the establishment of the foreign inspectorate at the port. As might naturally have been expected, the year 1861 witnessed a "roaring trade" in imports, which encouraged several merchants to settle down in the place, and led most of the wealthy and time-honoured European and American firms to open agencies. In 1862, however, a serious falling-off was noticed, and 1863 seemed to threaten a total extinction of the trade, so far as foreigners were concerned. The heavy coast freights were in themselves sufficient to check the demand for foreign produce, and insurance, commission, &c., tended to swell the charges on each article until its value was so enhanced as to place it practically out of the reach of native buyers. Added to this was the increased price of goods caused by the American struggle, and hence it was hardly to be wondered at that many of those who, full of trust, had opened establishments at Tien-tsin, were reluctantly compelled to cease the pretence of business and migrate to some more favoured locality. For the past two years the imports of cotton and woollen goods and metals have largely increased, and there seems to be good ground for hope that, although the earlier anticipations with regard to the importance of the trade at Tien-tsin will not be realised, there will at least be a respectable share of the total imports into China absorbed by Northern consumers. But it must be borne in mind that the imports to Tien-tsin include very little shipped on speculation. There is no such thing as a market for foreign imports, the native merchants being in the habit of making their purchases in Shanghai and shipping their stocks thus acquired for their own use and benefit. Thus Chinese owned imports are offered to the small country dealers at rates with which foreigners cannot compete, and the entire trade of the place is in the hands of native hongs. The apparent trade of Shanghai is therefore swollen to the advantage of vendors at the latter port, but the system presses heavily upon those whose business is confined to Tien-tsin alone, and who are thus driven out of the market by the well-sustained competition of the natives. The great importance of Tien-tsin as a mart for the sale of European cotton goods will be most clearly understood from the following figures, which exhibit at a glance the relative consumption of those goods at the six most important open ports. In 1864, at Shanghai the import of cottons of all kinds amounted to 1,022,437 pieces; at Tien-tsin to 293,802 pieces, chiefly re-exported from Shanghai, which also exclusively supplies the river ports; to 128,471 at Foochow, 123,598 at Canton, 51,452 at Amoy, and 39,983 at Swatow. Tien-tsin therefore stands second to Shanghai, with which, however, it must not be compared, as Shanghai supplies, as we have stated, not only Tien-tsin, but Chinkiang, Kiu-kiang, and Hankow, as also, to a more limited extent, Ningpo. Mr. BAKER suggests the advisability of opening a trade with Europe direct in vessels of from 200 to 300 tons burden. Were this suggestion carried out, foreigners might, it is true, supply the Tien-tsin market at prices not sensibly higher than those now paid by native buyers in Shanghai; there would be no transhipment, and the vessels might make directly for the mouth of the Peiho, and under favourable circumstances discharge their cargoes alongside of the foreign settlement nearly forty miles up the river. But the power of selection which the native buyers now enjoy, and which forms one of the attractions of the existing system, would then be lost; and moreover the cost of towage up the Peiho, or, failing this, the wearisome and expensive delays in ascending the river under sail, and the great risk run by any vessel attempting to navigate the stream, are sufficient in our mind to outbalance any possible advantages to be gained from shipping directly from a European port to Tien-tsin. The Peiho has not been the scene of many accidents to shipping, but this result is principally due to the fact that sailing vessels of large or even average tonnage never attempt to pass Taku. If, however, it became the rule for foreign shipping to encounter the dangers of the passage from the Taku to Tien-tsin, we have little doubt that the rates of insurance on Tien-tsin bound vessels would speedily be raised. It is also a matter for question whether it would pay to despatch vessels from England for the Tien-tsin trade alone, even under the undoubtedly favourable circumstances of avoiding the present heavy coast freight from Hong Kong and Shanghai. Comparing the year 1865 with 1864 we notice a large increase in the imports of manufactured goods and opium. In the former case we have 822,350 pieces against 335,324 pieces imported in 1864, and in the latter 5,625 piculs against 2,879 piculs. Grouping into one list all the metals imported for two years, we find 22,473 piculs, as compared with 10,880 piculs imported in 1864, and in like manner foreign needles (used chiefly in Korea) rose from 141,563 thousand to 309,575 thousand. It is to be regretted that Mr. BAKER has not given comparative *value* tables, for after all we derive a much clearer and more satisfactory view of the trade of a port when the different items which make it up are represented in taels or in pounds sterling than when it is, as in the present instance, conveyed to our minds in the shape of "piculs" and "pieces." We are, it is true, informed that the total value of the imports for 1865 amounted to Tls. 11,852,437, or in round numbers £3,950,000, showing an increase of £1,400,000 over 1864; but in this are included the very important items of native produce and Japan imports. We are therefore left in the dark as to the value of the foreign trade, or at best have to depend upon a laborious and tentative calculation for the result upon which when found we can place no dependence. In this respect as in many others Mr. MACPHERSON in his luminous reports offers a shining example to the other commissioners.

We now turn to the export trade. Tien-tsin and the districts of which it forms the most natural exit and entrance are essentially consumptive and hardly if at all productive. The grass lands of Mongolia, the sterile soil of Shansi, and the almost equally unproductive plains of Chih-li, offer little of value to the exporter. Hence the balance is sustained by treasure, of which one million and a half of taels was during 1865 shipped to Shanghai, Hong Kong, and Chefoo. Taking into consideration the nature of the surrounding country there is little reason to hope for any largely increased development of resources except in the case of minerals. Coal is found in extensive fields to the north and north-west of Peking, and its quality leaves little to be desired. It is, however, possible that when the mines shall be worked on scientific principles the quality may improve and render the mines of China as renowned as are those of England and Wales. It is at least consolatory to reflect that when the bugbear of British croakers shall at length have arrived, and England is literally "out of coals," an inexhaustible supply will be obtainable in China,

Digitized by Google

which may by that time have changed hands or in some other way have become more accessible to European nations. At present the Government levy so heavy a duty upon native coal, and so persistently discourage any attempt at developing the mineral wealth of the country, that the mines are worked in a most unsatisfactory manner by persons totally unacquainted with the means of avoiding the ingress of water in deep excavations, and who are in consequence compelled to content themselves with merely tunnelling along the faces of the coal-producing hills. Amongst the principal exports are cotton, which is grown all over Chih-li, medicines, grain, and soap. Furs, skins, and felt are also prepared and exported, but the chief staples have been already enumerated. Taking a comprehensive view of the export trade for 1865, we find that it amounted in value to £563,987, as against £570,262 for 1864. The return of shipping is satisfactory, showing a steady increase since 1862, in which year there was a falling off from easily explained causes in the tonnag as compared with 1861. The figures are as follows :—1861, 111 vessels, 26,561 tons ; 1862. 87 vessels, 21,921 tons ; 1863, 134 vessels, 36,276 tons ; 1864, 185 vessels, 45,968 tons ; 1865, 209 vessels, 60,049 tons.

Mr. Baker appends to his report some interesting general remarks regarding Mongolia and the prospects of trade at Tien-tsin. The Mongolians are described in terms similar to those used by Abbé Huc, as simple in their habits, peaceful and hospitable. They are indifferent to the luxuries of civilised life, and consequently have no idea of the value of money. Their transactions are conducted on an equitable principle of barter, brick tea being the most valuable and most readily exchangeable commodity. The country they inhabit is subject to all the vicissitudes of climate which prevail between the arctic and torrid zones, but in spring and autumn the sky is without a cloud and the air pure and buoyant. The traveller who leaves Tien-tsin for a holiday-run into Mongolia finds abundant attractions in the peculiarities of the natives, the primitive modes of conveyance, and the pastoral life so different from anything he has been accustomed to in Europe or during his previous residence in China. Mongolia may be regarded as the head quarters of Bhuddism, or at any rate as the field wherein the tenets of the great Indian apostle have received their fullest and noblest development. There are also not wanting places of historic interest ; amongst others Ichol, the site of the Imperial winter palace.

The causes which operate in the disfavour of Tien-tsin as a great centre of trade are, according to Mr. Baker, few in number and easily surmountable. The bar at the entrance of the Peiho is not a dangerous one, but the lowness of the land around the mouth of the river renders it a matter of difficulty to find the entrance without running the risk of grounding on some one of the many banks which extend for miles in all directions. When the forts have actually been passed a new difficulty arises in the circuitous course of the stream. The entire river from Taku to Tien-tsin is a series of reaches, inclined to one another in general at acute angles. Sailing vessels therefore find themselves at a vast disadvantage, especially when the water is low. At spring tides steamers of eleven feet and a half draught can ascend without difficulty, but this, as will readily be seen, is an exceptional case, and forms no argument for the navigability of the river. Besides this, another element of danger is introduced by the presence of southern junks moored sometimes thirteen abreast off the village of Kokow, which is situated at a most impracticable bend in the river. Collisions are therefore of frequent occurrence in spite of the care and skill of the steamer captains. Of course sailing vessels which, comparatively speaking, are totally unmanageable, run even greater risks in such cases than do steamers. The water communication between Tien-tsin and the trading centres in Honan, Shensi and Shansi, is almost perfect, and hence the great demand for foreign manufactures. Chih-li absorbs but little of the imports brought into Tien-tsin, but this is due to the grinding poverty which prevails over the greater portion of the Imperial province, which will probably be removed if the growth and production of cotton in coming years fulfil the promise made during 1864 and 1865. The peasants will thus find themselves in possession of money, which they will gladly expend in the purchase of foreign merchandise. Tien-tsin, like Newchwang, labours under a serious disadvantage in the closure of the port by ice during nearly three months of the year, but as this is beyond human power to remove, it is vain to speculate upon what might be the result were the phenomena of nature in this respect altered.

Our remarks on Mr. Baker's report have run to so great a length that we can afford but scanty room to that which follows next in order. Proceeding southwards we arrive at Chefoo, in the province of Shantung, which was placed under the foreign inspectorate in 1863. We are glad to notice that the Acting Commissioner, Mr. Luson, adopts the plan of assigning the *values* of the various items of import and export trade, and thus conveys the clearest possible idea of the mercantile importance of his port. We briefly summarise his results. Foreign imports, exclusive of opium, treasure, and re-exports, amounted in 1865 to Tls. 800,274 (increase over 1864, Tls. 123,857). Opium, Tls. 1,569,799 (increase, Tls. 788,653). Exports to foreign countries, Tls. 535,065 (*decrease* from 1864, Tls. 355,082). Exports to native ports, Tls. 1,993,941 (increase, Tls. 125,541). The total import trade for 1865 amounted to Tls. 4,521,390, and exports to Tls. 2,529,006, or an aggregate of about £2,350,132 against £2,000,000 sterling the total value for 1864. This progress although not very strongly marked is encouraging, and leads us to hope for much better things when the crisis through which the commercial world has just passed shall have been obliterated even in its effects. Opium shows a marked increase, probably in consequence of the Imperial edict promulgated early in 1865 prohibiting the cultivation of the poppy in Shansi. The design of the framers of the edict has been completely frustrated, as is evidenced by the increased imports from India ; we can only hope that the soil hitherto devoted to the culture of the poppy is now put to the more praiseworthy purpose of producing grain and cotton. Within the last year considerable quantities of manufactured goods have been shipped from Chefoo to Korea, where they are bartered for ginseng, timber, and paper. The trade is as yet in its infancy and is carried on solely by native junks. The exports from Chefoo resemble those from Newchwang, and consist chiefly of pulse and pulse cake. The quality is superior to that obtainable at Newchwang, and there is in consequence a steadily increasing demand for those articles at Chefoo. Cotton was produced in large quantity during 1864, but the settlement of the American difficulty lowered the demand and brought the exports from Tls. 61,805 to Tls. 19,142. Chefoo supplies, as we have seen, Korea, and also of course the province of Shantung. Goods intended for consumption in the interior are carried by junks to Ta Tsing-ho, where they are transhipped to lighter craft and are then carried along the tributaries of that river and the canals which, as at Kiang-su, run in every direction. By this means they reach Chi-nau-fu, the capital of Shantung, Tung-chang-fu, Yen-chow-fu, Tsao-chow-fu and Tung-ping-chow, all important cities in the same province. They are said to find their way even to Ta-ming-fu, in the pro-Chih-li, on the borders of Shantung.

We had hoped to receive accurate details regarding the Grand Canal from the Commissioner either at Tien-tsin or at Chefoo, but we are still in ignorance of the actual state of that great channel. Mr. Baker informs us that in former times when the Grand Canal was in good order throughout its course from Chinkeang to Tien-tsin, the southern grain junks used the inland route exclusively, but that since it has become no longer of use for this purpose, grain is transported by long sea. This we knew before, but for the past two years the English papers published in China have from time to time reported the commencement of active operations for the restoration of the canal to its ancient state of efficiency. Whether the projected improvements have or have not fallen through we cannot say, but *apropos* of this subject, we would suggest to the framers of future reports as well as to the journalists in China, to collect as many facts as possible regarding not only the Grand Canal but the Yellow River, and the subjects of interest which are indissolubly connected with the past history of the Celestial Empire.

SILKWORMS SET ASIDE.

If report speaks the truth, for which however she is not universally celebrated, Lyons, France, and indeed all the world will be able to laugh at the silkworm disease, and the West will once more become independent of the East for raw material for the looms. A gentleman named Trocol, who resides at a place called Bourg-Argental, near Saint Etienne, is said to have discovered the means of producing silk without worms or cocoons! Having arrived at the conviction that the silkworm was a mere mechanical agent in the matter, a middle man to be got rid of, and that the silk resided in the mulberry and only required extracting (a position which may be true, much in the same sense as that every block of marble contains a Venus, provided the sculptor have only the talent to relieve the goddess from her bondage), M. Trocol set to work, and, we are told,

Digitized by Google

after endless trials, disappointments, and renewed efforts, has succeeded in coaxing the silken Venus out of the heart of the mulberry. The *Memorial de la Loire*, a respectable journal, says that it is assured the thing is done. "We cannot be expected (says the writer) to explain the process by which M. Lucien Trocol treats the young shoots of the mulberry tree, and reduces them to the condition of bundles of filaments, but trustworthy witnesses assure us that these filaments are of irreproachable whiteness, are in no way to be distinguished from cocoon silk, and submit like that to all the necessary operations for working the material."

It is a magnificent discovery and only requires confirmation; but it will be awkward for our friends who are engaged in the Chinese silk trade. Perhaps, however, the invention of M. Trocol will not come into general practice so rapidly as to leave no time for getting off old stock and avoiding new engagements. We shall watch the new process with considerable interest.

THE CHINA STEAMSHIP AND LABUAN COAL COMPANY.

(MONEY MARKET REVIEW.)

The coincidences that may be found by a very slight inquiry between industrial, commercial, and scientific progress in the West, may also be distinctly traced in the ruder civilisations of the East. In the West, the introduction of steam was followed by a wonderful advance in the arts of locomotion. The use of steam, by the necessities it created, stimulated geological science to the search for and the discovery of carboniferous deposits in localities previously unsuspected of containing such elements of power and wealth. Then the advance in material facilities of interchange, by some hidden law in our mental nature, created a state of restlessness for still more rapid intercommunication of thought and intelligence that was only satisfied by the recent perfection of ocean telegraphy. As a decade or two is but little in the life of a nation, and still less in the life of the world, these advances may be regarded as synchronous, and so entitled to the designation of coincidences, though, chronologically they were separated from each other by what, from a small point of view, might be regarded as long intervals of time. Such having been the progress of the West, a little reflection will show that the like coincidences are being exactly repeated in the East; and that they are, perhaps more rapidly than in the West, fulfilling the inevitable law of progress, though operating upon civilisations inferior to our own. Take the case of India. Five-and-twenty years ago—a period as nothing in the life of the country—there was not an inch of railway in the whole Peninsula. Now most of its chief cities and marts are connected with each other and with the ports on all its coasts by the iron band, and the mileage is constantly increasing. The necessity for the production of steam led to the discovery and development of coal deposits in quarters where the older race of geologists would have pronounced the search as waste of time and labour. And then India received nearly if not quite simultaneously the gift from the West of the inestimable advantages of inland and ocean telegraphy. The material progress which India has made from this combination of coincidences is only an example of what is certain to happen from the like causes among all the other countries of the East. Indeed, it is evident already that it is not in the Indian Peninsula alone that the East is advancing on the civilisation of the West through the agencies of material progress. The same inevitable law is now in operation in several of the bordering countries. The rate is not the same, but the movement has commenced. A special development is taking place at the hands of the company whose name stands at the head of these remarks, and which is at once both a steamship and a coal company. Here we have at once the two great elements of progress—coal and steam—in practical combination. The coal is a deposit in a small British possession—the island of Labuan. The steam is needed to increase intercommunication in the Malay Archipelago, and with the world at each of its sides. It is already used to convey the mails to and from that other settlement of ours, Singapore—the "City of the Lion"—to the Spanish possession of Manila, of the trade of which we conduct fully three-fourths. Without the coal of Labuan there would not be steam mail communication, on anything like reasonable terms, between Singapore and Manila, and British trade would feel the difference. But with two such mighty agencies at work, each animated by the irresistible motive of commercial profit, it may well be affirmed that the East is surely following the progress attained in the West. The configuration of the Archipelago suggests at a glance the conviction that nature intended its position as a focus for trade to diffuse its beneficent influences among the surrounding populations. It was through this Archipelago that the ancient trade was carried on between India and China. Coal and steam, while multiplying the political advantages of the position, have extended them as a commercial route even to Japan; and, by-and-bye, submarine telegraphy will further increase their utility.

No mean part is being played by this company in its double capacity as coal-owner and mail-carrier. Labuan is about half way between Singapore and Manila. Steamers coal there either or both ways; and we observe that while the quality of the coal is improving as the surface deposits are removed, the Royal Navy in those waters as well as mercantile steamers constantly resort to the island to replenish their fuel. Labuan is thus becoming a scene of incessant movement, as may be expected from the increasing trade between Japan, China, India, the Islands, and the outer world, as far as England. Such a geographical position, accompanied by such natural resources, among which is to be reckoned the finest water in the East, is unrivalled in that part of the world. It is not surprising, therefore, that the trade of the company, especially in coal, is increasing; and it is specially satisfactory to learn that by the end of the year the yield will be increased to 3,000 tons per month, for every ton of which there is a remunerative demand. In their character of shipowners and mail-carriers the company are stated to be realising good profits.

It is satisfactory to learn that the shareholders have adopted a policy well calculated to make the most of the advantages they possess. Their liability on account of uncalled capital has been reduced to a merely nominal point. The details of the new arrangement we described in our number of the 13th ult. (p. 418), and we need not repeat them; it will suffice to remark that they have been unanimously adopted.

Literature.

Dictionnaire Francais-Anglais Japonais. Vol. I. 8vo. Paris: DIDOT. —This is the first volume of a very important work, the second and last of which is promised in the course of the coming year. The Dictionary is compiled by the Abbe Mermet de Cachon, and published with the assistance of Capt. A. Le Gras, of the French Imperial Navy, as regards the English portion, and of the learned professor M. Leon Pages with respect to the Japanese. The work is, moreover, published under the patronage of Monsieur Drouyn de Lhuys, late Minister of Foreign Affairs, and of the Marquis De Chasseloup Laubat, Minister of Marine and of the Colonies; it therefore comes before the world with the highest recommendations literary as well as official.

M. Abbe Mermet de Cachon has resided in Japan for twelve years. Captain Le Gras is the author of various hydrographic works, and particularly of nautical directions for maritime regions in the Far East. M. Leon Pages is an acknowledged authority with respect to the Chinese and Japanese languages, and is now engaged in a translation, from the original Portuguese, of the "Dictionnaire Japonais-Francais" of the Jesuits, a portion of which has been published.

M. Pages gives a short explanation of the combined system of Chinese and Japanese writing adopted in the Dictionary under notice. The Japanese language, in itself syllabic, admits in speaking, and still more when written, a considerable number of Chinese words which have been introduced by the learned. These words are written in their proper Chinese characters, but are pronounced in a manner somewhat differently according to the genius of the Japanese tongue. The construction of the phrases however is always Japanese, and the Chinese words have particles affixed which indicate the inflections of the nouns and verbs. The more elevated the style of the composition the more these Chinese words abound in the Japanese composition. Sometimes the Chinese word is not represented by the Chinese sound rendered in Japanese but by the synony min the latter language. The Dictionary is printed in two columns, one containing the word or phrase in French and English, the other the same in the Japanese and Chinese symbols with the pronunciation beneath them. The following specimen will show the plan of the work:—

A, prep.	(Symbols.)
To.	Ni; hòni; ie; outkini.
Aller d'un lieu à Paris.	(Symbols.)
To go from one place to another.	Hitotsouno tocoro iori tocoroni ioucou.
Vivre à Paris.	(Symbols.)
To live in Paris.	Parisni ozai-kiò sourou.
Etre blessé à la tête.	(Symbols.)
To be wounded in the head.	Atamani kizzou-o fiki-oukerou.
C'est à vous de parler.	(Symbols.)
It is for you to speak.	Sorewa anatani made iou becou arou
ABAISSEMENT, n.	(Symbols.)
Lowering; falling; taking down.	Chitani otkirou coto; sagarou coto.
Abaissement volontaire.	(Symbols.)
Self-abasement.	Mizzoucara heri-coudarou coto.
Abaisser, v. a.	(Symbols.)
To lower; to bring low.	sagherou; ocou.
—— mettre en bas.	(Symbols.)
To let down.	Orosou.

We will add a few of the instances in which the Japanese presents the most curious contrast with the English as regards brevity, or the contrary:—

To stun.	Mimi-o tohocou sourou.
To debase.	Chò-o achicou sourou.
To degenerate.	Mizzoucara-o socondò; *or*, Mizzoucara iyachicou narou.
Dejectedness.	Cocoro-o otosou coto.
Abdication.	Teino courai-o iouzzourou.
Abnegation.	Onore-o oite fito-o tasoukerou.
A subscriber.	Cane-o caketa hito.
Misemployment.	Achicou motkirou coto.
Accessible.	Awarerou mono; *or*, tkicazzoucou beki.
To agree.	Yacousocou-o sadamerou.
To tune.	Fiochi-o awacherou.

It must be understood that the sounds of the Japanese are rendered according to those of the French language.

The Dictionary is prefaced by a list of Japanese signs with their pronunciation, and a table of the vocal forms with their equivalents in French. It is remarked in a note to this table that while the Japanese have the letter R and not the letter L, the contrary is the case with the the Chinese. We have noted but very few faults in the English translations and those, generally, of no importance. The work is printed by M. Victor Goutry, of Paris; the Japanese symbols are remarkably clear, and the work in all respects admirably executed. The commercial as well as the learned world ought to be grateful to the authors and all concerned in the production of this Dictionary, which represents an immense amount of work of the most difficult description and which must have been a labour of love rather than one from which much profit was expected. The volume before us, which reaches to the word *Exploiter*, contains four hundred and forty pages.

Monetary and Commercial.

The outgoing mail conveys £50,000 bar silver, purchased here for the use of the Hong Kong Mint. This operation caused a monetary rise in the market of ½d. per ounce, but there is at present no further demand, and the quotation remains at 60⅞d. Mexican Dollars are still without inquiry for China, and the price is unchanged at 4s. 11⅛d. per oz.

The allotment letters of the Agra Bank (Limited) have been

Digitized by Google

issued, and, looking at the intense and daily increasing depression in all classes of investments, it is highly satisfactory that the applications were not only considerably in excess of the amount required, but were mostly from new investors, the proportion of new subscribers to old shareholders being five to two. The arrangements for the resuscitation of the bank have, it is stated, made rapid progress. The replies from the shareholders have been unanimous in favour of the proposal, and the assents from the creditors in this country now exceed £4,000,000 out of about £5,000,000. Application will be made to the Court of Chancery on the earliest day that can be obtained for its sanction to the plan.

With reference to the resignation of Messrs. Flux and Argles of their appointment as solicitors in connection with the Bank of Hindustan, China, and Japan, the directors of the bank have passed the following resolution :—

"That the board hereby expresses its regret that circumstances have occurred to induce Messrs. Flux and Argles to send in their resignation as solicitors of this bank, in which capacity they have, in the judgment of the board, always evinced the greatest zeal and ability, and in accepting the resignation the board believe that it will, nevertheless, be for the interests of the bank that they be allowed to carry on all pending proceedings."

The application made on the 30th ult. in Vice-Chancellor Kindersley's court on the part of Mr. Charles Oppenheim, that the money now in the hands of the liquidators of Overend, Gurney, and Co., amounting to £1,200,000, should be divided amongst the creditors, was ordered to stand over until the 8th inst. for the decision of the Vice-Chancellor. The solicitor to the Defence Association was present to oppose any division until after the pending motions respecting liability shall have been disposed of, as in the event of the shareholders being successful, they would not only claim the amount paid in respect of the £10 call, but also nearly £1,500,000 paid in respect of their shares. It transpired during the argument that the claims of creditors to the extent of over £1,000,000 in respect of guarantees are disputed, and from this it would appear that the liquidation of the company, through its intimate connection with the acts of some of the partners of the old firm, is likely to be involved in very serious litigation. The members of the Defence Association have, through the advice of the committee, decided upon paying their money into Chancery, and have remitted the funds for that purpose.

The half-yearly meeting of the Ceylon Company (Limited) is called for the 18th December, to declare an interim dividend.

At a meeting of the Eastern Bengal Tea Company (Limited), on the 27th ult., it was resolved to wind up the company voluntarily under the supervision of the Court of Chancery, and Mr. F. B. Small was appointed liquidator.

The directors of the China Steamship and Labuan Coal Company (Limited) have issued a circular announcing a call of £1 per share in accordance with the terms of the circular of 4th October last, and urging punctual payment, in order to enable the reconstruction plan to be carried out without delay.

In a late issue we noticed the return of the acceptances of Messrs. J. B. Cumming and Co. We understand that telegrams have been received announcing the suspension of the house in Singapore, Messrs. Cumming, Beaver and Co.

The premises of the old Agra and Masterman's Bank, in Nicholas-lane, Lombard-street, covering a very large area, have been put up at auction, but were bought in. It has been suggested that these premises, from their peculiar situation and extent, comprising a frontage in Lombard-street as well as Nicholas-lane and Clement's-lane, would form an admirable site for the city Post-office, which is at present confined to very inconvenient dimensions.

The Union Bank of Australia has issued a notice inviting tenders for £400,000 six per cent. Queensland Government debentures, the first portion of £600,000 entrusted to their charge. The disposition of late on the part of investors has been decidedly towards colonial securities, and the present transaction it is believed will be successful. The issuing price is £91 per £100 debenture, including interest from the 1st of July last, and payments will be required between the present date and the 8th of January.

The prospectus has been issued of the Union Hill Silver Company (Limited), (Nevada), with a capital of £60,000, in £6,000 shares of £10 each. The deposit on application is 10s. per share; on allotment £1 10s. No call is to exceed £1 per share, and only at intervals of two months. The property, it is stated, consists of three extensive silver mines in the best part of the richest district in Nevada. The Northerner, the Morning Glory, and the Blazing Star, are the names of the mines. The owners take payment in 3,000 fully paid-up shares, and these shares are not to be entitled to any dividend until and after 20 per cent. per annum has been paid to ordinary shareholders.

The prospectus of the Nicaragua Railway Company (Limited) has been issued. The object is to open a transit route between the Atlantic and Pacific Oceans, through Nicaragua, as projected by Captain Bedford Pim. The nominal capital is £1,000,000, in shares of £10 each, one-half to be now issued. The first shareholders are to receive, from the free grants of land conceded to the company, in perpetuity ten acres for each share allotted. There is a highly respectable provisional committee, including Captain Bedford Pim, R.N.; Mr. Charles Bell (Thomson, Bonar, and Co.), Admiral Young, director of the Royal Mail Company; Mr. Eden Colvile, director of the Panama, New Zealand, and Australian Steam Company; Capt. Maury, LL.D.; Mr. Parke Pittar (P. Pittar and Co.), Mr. A. A. Pollock, &c. Mr. Hawksley, C.E., and Mr. Collinson, C.E., are the engineers.

The liquidators of the Scinde, Punjab, and Delhi Bank Corporation have issued a circular stating that they have £200,000 available toward a part return of capital to the shareholders. This capital, under a provisional arrangement with the National Bank of India, was to have been handed over to that institution, which was to issue shares at par for the amount; but some of the Scinde shareholders were promised, at one of the public meetings of the company, the option of taking such shares or of receiving cash, and as the National Bank of India object to the arrangement being carried out, except in its entirety, a request has been addressed to the Board of that bank at Calcutta to authorise the cancelling of the scheme, in which case the liquidators will be enabled forthwith to distribute the funds in hand. A further distribution of about £70,000 is hoped to be ultimately made.

Mr. John Stuart, Secretary and Treasurer of the Bank of Bombay for twenty years previously to 1860, and whose management of its business is considered to have been most successful, has been reappointed by the directors, and will proceed to Bombay by the steamer of the 18th of December.

Advices from Liverpool announce the failure of a firm of wine brokers, owing, it is stated, to transactions in the China trade. The assets are expected to produce about 10s. in the pound.

The Board of Trade Returns for the month of October, 1866, and for the ten months ended 31st October, have been published. The month of October, 1865, was one of extraordinary activity in our export business, but the returns for the past month show an increase of nearly nine per cent. over the totals of that date. Compared with the corresponding month of 1864, there is an increase of about 31 per cent. The improvement over last year is chiefly under the heads of cotton and woollen manufactures and miscellaneous or "unenumerated" articles. In the shipments of cotton yarn there has been an increase of 28 per cent. in value and 39 per cent. in quantity, and in cotton manufactures an increase of nine per cent. in value and 17 per cent. in quantity. Woollen goods figure for a falling off in quantity, but an increase of 10 per cent. in value. The value of the exports during the month of October of this present year was £16,895,894, against £15,547,225 in the same month of 1865, and £12,871,491 in October, 1864. For the period of ten months ended 31st October the total value of the exports from this country was:—For 1866, £158,832,792; for 1865, £135,264,602; and for 1864, £136,275,652. These figures show an increase in value for 1866 over 1865 of £23,568,490, or about 17 per cent.; and an increase over 1864 of £22,557,140, or 16 per cent. Of the enumerated imports we have returns up to the 30th September, the total value for that month during the three years being as follows :—For 1864, £19,961,633; for 1865, £21,632,731; and for 1866, £18,305,015. For the nine months ended September 30, 1864, their value was £160,974,110; for the same period of 1865, £137,303,165; and for 1866, £174,167,605. It will be observed that there is a decrease in value of £3,276,716 in the imports for the month as compared with 1865, and of £1,605,618 as compared with September 1864; but for the nine months there is a steady increase, the amount being as follows :—Increase for 1866 over 1865, £36,864,440; and over 1864, £13,193,495.

Digitized by Google

Unless these operations have been persistently carried on upon unremunerative terms, a supposition for which there is not the slightest ground, there must already have been some progress towards the accumulation of new wealth in the country to repair the disasters of the panic, and when we consider the enormous amounts yearly received in the shape of foreign and colonial dividends it will be seen that the process of accumulation must be going on at a rate which will not long remain without forcing some new channel for investment, if all the old channels are to be distrusted and abandoned, as would seem to be the present resolution of the public. The extent and value of our trade with the ports and countries in the Far East contribute the following figures to the Returns before us :—

EXPORTS TO CHINA AND HONG KONG.

	1864.	1865.	1866.
Quantity for the Month ended 31st Oct.			
Cotton yarn	40,000	4,000	637.600 lbs.
Cotton manufactures	2,504,781	11,035,749	24,460.664 yds.
Worsted stuffs	599 225	1,125,570	1,044.598 „
Woollen & worsted cloths.	109,565	71,571	153,552 „
Lead	542	449	585 tons
Quantity for the Ten Months ended 31st Oct.			
Cotton yarn	1,762,893	921,178	4.244.196 lbs.
Cotton manufactures	57.626,503	98,354.228	152,511.977 yds.
Worsted stuffs	11,883,246	13,522,332	16,880.242 „
Woollen and worsted cloths	1,505,488	1,382,802	1,596 639 „
Lead	6,639	1,702	4,596 tons.
Value for the Month ended 31st Oct.			
Cotton yarn	£4,907	£500	£53,568
Cotton manufactures	68,772	242,981	524.141
Worsted stuffs	47.575	79,240	64.961
Woollen & worsted cloths	27,257	9.549	21,578
Lead	8,407	3,312	6.718
Value for the Ten Months ended 31st Oct.			
Cotton yarn	£218,660	£87,966	£389,113
Cotton manufactures	1,626 207	2,142.340	3.632,797
Worsted stuffs	786,701	1,004,020	1,070,086
Woollen and worsted cloths	260,291	229,700	265,146
Lead	145,340	36,182	100,980

The quantities and value of Cotton Yarn exported to other countries in the Far East are given as follows :—

To	1864.	1865.	1866.
Quantity for the Month ended 31st Oct.			
Ceylon	15,200	47,100	128,400 lbs.
Singapore	11,416	37,700	95,950 „
Quantity for the Ten Months ended 31st Oct.			
Ceylon	759,318	1,074,400	1,379,144 lbs.
Singapore	161,026	267.200	735,976 „
Value for the Month ended 31st Oct.			
Ceylon	£1,425	£4.155	£6,018
Singapore	1,570	5,572	15,371
Value for the Ten Months ended 31st Oct.			
Ceylon	£26.081	£23.451	£78,243
Singapore	92,167	100,864	137,225

The quantities and value of Cotton Manufactures during the several periods of the respective years are as follows :—

To	1864.	1865.	1866.
Quantity for the Month ended 31st Oct.			
Ceylon	1,068,919	2,343,715	2,256.913 yds.
Singapore	463,145	2,736,803	2.143 461 „
Java	957,833	2,769,518	5,953.521 „
Philippine Islands	3,126,223	3,188 519	3,252,329 „
Quantity for the Ten Months ended 31st Oct.			
Ceylon	11.282,761	11,753,720	20,911,215 yds.
Singapore	20,909.540	36,973,228	45,123,876 „
Java	18,082,605	25,242,053	47,752,868 „
Philippine Islands	19,900.645	25,714,866	23,253,746 „
Value for the Month ended 31st Oct.			
Ceylon	£35.104	£56,295	£50,615
Singapore	12,047	61,917	46,753
Java	27,796	65,148	119,367
Philippine Islands	88,740	76.484	80,593
Value for the Ten Months ended 31st Oct.

FREIGHTS AND CHARTERS.

Considerable inactivity still prevails in the export trade; nevertheless outward berth freights remain steady at our last quotations. In homeward business we have no transaction to report.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 40s. weight, 50s. meast. To Nagasaki: 50s. weight or meast. To Shanghai: 45s. weight, 45s. to 47s. 6d. meast. To Amoy: 45s. weight or meast. To Foo-chow Foo: 45s. weight or meast. To Hong Kong: 35s. weight or meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Manila: 40s. weight, 85s. meast. To Ceylon: 25s. to 30s. weight, 35s. meas.

The current quotations for coal, &c., are as follow:—From Wear or Tyne per keel. For Hong Kong: £43. For Singapore: £33. For Shanghai: £52. For Saigon: £50. For Yokohama: £50. From Newport, Cardiff or Swansea, per ton. For Hong Kong: £2. For Singapore, £1 11s. For Shanghai: £2 12s. For Saigon: £2 8s. For Yokohama: £2 8s. Batavia: £1 6s.

MISCELLANEOUS.

At CALLAO.—Oct. 19, R. Pratalongo, Bretunn, from Macao; Oct. 22, Lima, Monkwell, from Macao; Oct. 15, Forest King, Jones, from Monte Video, and sailed Oct. 17, for China.

CASUALTIES.

The Dewa Gungadhur, which arrived in the river on Nov. 19, from Foo-chow-Foo, reports that on Oct. 29 she spoke the Annie Kimball, of Beverly, United States, from New York to Shanghai, which vessel had encountered a hurricane on Sept. 22, during which she sprang a leak, shifted cargo, and lost sails and half her fresh water.

The Wilbelmina Johanna, Albert, from Batavia to Rotterdam, which put into Algoa Bay on Oct. 19, leaky, had lost bulwarks, &c., and thrown overboard 150 bags of coffee.

Accounts from Brouwershaven state that the Elizabeth, Muller, which sunk there during a gale on Nov. 24, was bound from Batavia to Rotterdam, and that the crew were saved, but three passengers drowned.

The Raphael, Winslade, from Marseilles for Yokohama, put in at Pernambuco on Nov. 9, having been in collision on Oct. 28, when she sustained the loss of mizenmast and other damage.

The Ann Lucy, Wade, from Macao, which arrived at New York on Nov. 18, had lost sails, maintopmast, &c., in the China Sea.

The Wave, Henderson, from Nagasaki, which arrived at New York on Nov. 19, had split sails, stove bulwarks, sprung rudder, and had been on her beam ends during a typhoon in the Pacific Ocean from June 23 to 25.

The Java, Mann, from Batavia, which arrived at Texel on Nov. 29, had encountered heavy gales in the North Sea from Nov. 25 to 27, and had sustained much damage to sails and rigging.

PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power, ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer and a Blacksmith. Dry, Godowns for the reception of vessels, stores, &c., when requiring to discharge them.

Amoy, March, 1865.

TO IMPORTERS.

The undersigned beg to remind Importers o Wearing Apparel, and Boots and Shoes, of the many advantages which their long experience as Manufacturers and Shippers, their vast resources, and their intimate knowledge of the requirements of Foreign and Colonial Markets enable them to offer.

THE CHINESE COMMERCIAL GUIDE.

CONTAINING Treaties, Tariffs Regulations, Tables, &c., useful in the trade of China and Eastern Asia, with an Appendix of Sailing Directions for those Seas and Coasts, by S. WELLS WILLIAMS, LL.D. Fifth Edition.

Hong Kong, SHORTREDE and Co.; London Agent, F. ALGAR, 11, Clement's-lane, E.C. Price Two Guineas.

"CHINA MAIL" OFFICE.

No. 2 WYNDHAM-STREET (back of the Club) :—

1.—THE EVENING MAIL,

A DAILY PAPER.

PRICE.—2 dols. per month.
TERMS OF ADVERTISING.—First insertion, Ten lines and under, 1 dol.; each additional line, 10 cents. Subsequent insertions, per week, 50 cents and 5 cents—"Auction" Notices are excepted, for which only One Charge per week is made).

2.—THE CHINA MAIL,

AN ORIGINAL WEEKLY PAPER.
(Every Thursday Night.)

PRICE.—15 dols. per annum; Single Copies, 44 cents.
ADVERTISING.—First insertion, Five lines, 1 dol.; each additional line, 20 cents. Subsequent insertions, 50 cents. and 10 cents.

The "China Mail" has been permanently enlarged in size, namely, from 4 to 6 full pages. It is the only weekly paper published in China which contains a complete summary of Hong Kong news as well as that from the treaty ports of China and Japan, and from Manila, Australia, India, and the Straits. Its circulation, which has of late considerably increased, extends throughout the coasts of those countries as well as to various parts of Europe. Great facilities are thus afforded to advertisers in this newspaper.

3.—OVERLAND CHINA MAIL.

Containing 8 FULL PAGES, and consisting of a reprint of the articles in the EVENING and CHINA MAILS, with Summary of News and Commercial Summary.

ONCE A FORTNIGHT.
(The Morning of the Mail's despatch.)

PRICE.—To Subscribers to the Weekly issue, 8 dols to Non-subscribers, 12 dols. Single copies, 50 cents.
ADVERTISING.—The same as in the Weekly. All "Notices of Firms" appearing in the Weekly will be inserted in the *Overland*, and charged for, unless otherwise ordered.

A. SHORTREDE & CO.
Hong Kong, May 17, 1866.

REVUE ORIENTALE,

Conducted by M. LEON DE ROSNY,
Professor of Japanese in the Imperial School of Living Oriental Languages of Paris.

DEVOTED specially to Ethnography, History, Literature, and Commerce of Asia, Africa, and Oceana.

The last issue (No. 57) contains, amongst other matters,—

THE INEXORABLE COURTESAN, a Hindoo Story translated by M. Garcin de Tassy, Member of the Institute of France.

COMMERCIAL RELATIONS of the EAST and WEST in Ancient Times, by M. A. Castaing.

OCEANIC STUCIES, by G. Delonore.

VOYAGE in the HOLY LAND, by M. F. de Saulcy, of the Institute.

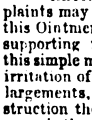
MISCELLANEOUS NEWS relating to the East.

Agents in London: TRUBNER AND CO.

To follow the "Aboyne," and will meet with the usual quick despatch.



DIRECT for COLOMBO, the beautiful China Clipper, SPIRIT OF THE NORTH, A 1, 10 years, 663 tons register, ALEXANDER MATTHEW, Commander, lying in the East India Docks. This splendid clipper ship, well-known in the China trade, having just re-classed and newly coppered, offers a first-rate opportunity to shippers of fine goods

For freight or passage apply to JOHN C. CAMPBELL 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

HOLLOWAY'S OINTMENT. — Throat Affections.—All varieties of these distressing complaints may be readily and effectively treated by rubbing this Ointment twice a day upon the neck and chest, and supporting the strength by suitable nourishment. By this simple means diphtheria, ulcerated and relaxed throat, irritation of the windpipe, quinsey, and all glandular enlargements, will have their progress arrested and the destruction they have caused repaired. Holloway's Ointment is the most trustworthy remedy for all internal and external throat ailments, and may be safely and effectively employed in every case, without regard to season, sex, age, or constitution. It is highly extolled for its ready cures of spasmodic coughs, chronic hoarseness, and all disagreeable discharges from the throat and nose.

Per P. and O. steamer, from Marseilles, Jan. 20.—To Hong Kong, via Bombay: Mr. Hitchcock.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

We have no later dates from this port than those brought by the French mail.

The *Japan Times* denies that Stotsbashi is confirmed as Shiogoon. It says, "The death of the late Shiogoon has been officially proclaimed. Stotsbashi, second son of the late Prince of Mito and Prime Minister to the defunct Shiogoon, was named heir by his dying master. He has not yet, however, received his commission from the Mikado. We hear from authentic sources that he has himself taken no steps towards assuming the dignity, and it is reported that he has announced his intention of deferring the question until the conclusion of the war with Choshiu, when he will solicit the votes of the Daimios for the young Owari, a boy of eight years old and legitimately the next in succession to the Shiogoonate. This is by no means improbable, as Stotsbashi is perfectly well aware that at the present juncture the accession of another minor is almost out of the question, and he will therefore, while disarming opposition by this move, stand a good chance of having the shiogoonate pressed upon him by the great Council and the Mikado, and succeed peaceably to that high office. It is, on the other hand, however, quite possible that a change in the whole system of the government of the country may take place, and that the Mikado may resume the command of his own armies. The war continues, but Choshiu's troops have been twice routed.

The opening of Osaka, now imminent and certainly not to be deferred beyond January, 1868, will of course bring the representatives of foreign Powers into closer connection with the potentate whom we have lately discovered to be the real sovereign of the country; and it is quite possible that this event may initiate a new era in the history of Japan. It is otherwise difficult to account for the undeniable fact of the present *interregnum* for which certainly the necessity of finishing the war with Choshiu is not a sufficient reason. It appears more likely than ever, by the way, that this war will have to be ended by the Shiogoon's representatives accepting the terms offered to them by their enemy, which we detailed last mail."

NAGASAKI.

Private advices from this port mention the existence of some apprehension on the part of the Governor lest some of Choshiu's forces should make a raid on the place, and that, in anticipation of such a movement, he has sent his wife and family to Yedo to be out of danger. It is generally believed, however, that Choshiu's anxiety to avoid any further collision with foreigners will prevent his sanctioning any such measure.

The Dutch brig *Duodecima* has been totally lost in Van Diemen's Straits, only three Japanese were saved,

CHINA.

HANKOW.

From this settlement there is no news whatever, and the columns of the *Hankow Times* are filled with lamentations over the rapid decadence of the port. The only observable symptom of social vitality is the publication of the subscription list for the proposed church, comprising seven names, with a sum of Tls. 200 against each. "The amount, per Hong," says the *Times*, "speaks well for the liberality of the community. There appears to be no doubt that all will give towards this most desirable object. We hear that the reason of so few names as yet being placed on the list is that agents here have not received their instructions from Shanghai; and we shall be glad if this short notice calls attention to the matter from principals at that port."

SHANGHAI.

The autumn mail of 10th Sept., was expected on the 28th Oct., having arrived at Hong Kong on the 23rd. The dates are now down to the 25th.

The following items are from a letter dated Oct. 25:—The news brought down from Chefoo of an attack having been made upon the American schooner, the *General Sherman*, in the Korea, has been the chief topic of conversation for some time past, and people are speculating upon the probable results of the affair. It is thought in some quarters that America will be forced to make a warlike demonstration, and it is also imagined that England may be induced to join in it. This latter contingency is, I think, highly improbable, as, though a British subject was among one of the unlucky victims, the vessel was under American colours, so that, as a point of honour, Great Britain is not bound to interfere. I need scarcely say, however, that as yet all is speculation, there being no means of ascertaining what the probable course of the foreign Governments will be. The River Seoul is announced as blockaded by the French, who seek redress for the murder of the three missionaries; but whether England and America will join her it is now impossible to surmise with any degree of certainty. It may be, however, that with so good an excuse for putting in an appearance, they may avail themselves of the opportunity of watching the doings of the French.

Some underhand transactions of a somewhat serious nature have been discovered to be going on with respect to the collection of some of the French Municipal Revenue; and a Mr. Agostini, Assistant Superintendent of Police, being found implicated in an arrangement for squeezing the Chinese residents on the French Concession out of a considerably heavier amount of taxes than legal, has been arrested by the Consul General and sent off to Saigon for trial. The matter seems to have been going on for some time, and its disclosure has caused no little sensation, and, as in all such cases, rumour is active in suggesting that there are more revelations to be made.

Sports are now occupying some attention. The regatta wil come off to-morrow, an event which has been looked forward to with some excitement, as there will be a race between an English and an American crew, and of course some little international feeling has been got up. The races this year seem likely to be rather poor, the more so as a loss has been sustained from Traveller, a promising animal quite broken down.

The Hon. Anson Burlinghame, United States Minister, leaves per *Sze-Chuun* this day for the North.

A rumour was current in the settlement that intelligence had been received by telegram *via* Kiachta, of the death of the Emperor Napoleon. No information to this effect has, however, been received in official quarters, and it appears probable that the rumour originated, like many others among the Chinese.

HONG KONG.

The outward mail of September 17 (French) arrived on October 28. The dates are now down to November 1.

(FROM OUR OWN CORRESPONDENT.)

No little excitement has been caused here in mercantile circles by the disappearance of two brothers, natives of Hamburg, who have been doing business in Hong Kong and Canton for some year or two past, and who are believed to have absconded on the morning of the 29th inst., taking the steamer for Canton but stopping at Whampoa, whence they got away the following morning to Macao. In this place they will be safe from legal pursuit. The amount of their liabilities is as yet unascertained, but that of assets left behind is *nil*. [We believe their names to be E. and J. Meyer.]

The Kiachta telegraph has been playing its usual pranks in a manner decidedly suggestive of foul play somewhere. A message received by that line was brought down some ten days since from Shanghai, in which the Oriental and Union Banks were declared to have stopped payment in London. Panic was universal for a day or two and a run actually took place on the Oriental Bank, but the arrival of the English mail with dates to Sept. 10 fortunately exposed the falsity of these malicious rumours.

An assay of the Hong Kong dollar was held at Canton last week, for the satisfaction of the Chinese Government, in the presence of several native officials and of the British Consul. The result has not yet been published, but it is understood to have been favourable; and it is stated that a Proclamation will shortly be issued, declaring the dollar receivable in payment of Customs' dues. Meanwhile it is still looked upon with doubt by all classes of Chinese in the colony, whose distrust, in the event of the Mint continuing in operation, it will take a long time to overcome. The issue of 20-cent. and 5-cent. pieces, which took place last week, is a very popular measure, on the contrary, as the unmistakable convenience of these coins recommends them to all. The first prosecution for counterfeiting has already taken place, a Chinaman having been arrested the day before yesterday whilst endeavouring to pass a copper imitation of the dollar, which I hear was by no means badly got up. These coins are doubtless struck near Canton, where large manufactories of false Mexican dollars are known to exist.

The latest phase of the Chinese emigration question is the detection of a barracoon for kidnapped females in the midst of Hong Kong, which was discovered by accident on the 27th inst. by Mr. Tonnochy, the Sheriff and Registrar, who, on forcing his way into the interior, found twenty-five women confined in an upper storey, and awaiting shipment for the Dutch colonies. These females had been brought down singly from the interior by means of the usual false pretences, and a prosecution was forthwith instituted against a German named Lobscheid, an ex-missionary, who acts as agent for a German firm very actively engaged in the coolie traffic, and by whose Chinese brokers these women had been brought to the colony. This is by no means the first time that the names of these parties have been brought before the public in the same connection, but it is to be hoped that the occurrence will result in a complete revision by Sir Richard MacDonnell of the system under which so-called Chinese emigration is carried on from Hong Kong. No good results can be expected until the matter is taken entirely out of the hands of private speculators.

Since writing the above I learn that the Europeans implicated in the affair have been discharged from lack of evidence, but the Chinese keepers of the barracoon are committed for trial.

From the *Government Gazette* we learn officially of the appointment of Mr. Smale as Chief Justice; and of Mr. Smale, junior, as Secretary and Clerk to the Judge. The public are informed, we observe, by the same official organ, that they can obtain 20 cent, 10 cent, and 5 cent silver pieces, along with one cent pieces and cash in bronze, at the Treasury office, in exchange for dollars and notes.

The following report of the fire is from the *Daily Press* of Oct. 31: —"Such a fire as is rarely seen, even in great cities where the food for the conflagration is stacked in unlimited quantities, took place last night in Tai-ping-shan. From the Praya up into the town as far as Gap-street and from Sutherland-street, close by the P. & O. Company's coal depot on the west, to Morrison-street on the east, what was yesterday a closely packed district of the Chinese quarter, is now a desolate heap of ruins, with gaunt fragments of wall standing up in all directions, but no sign of a living town remaining. How many hundred houses have been burned down, how many bales of cotton and bags of rice helped to make that wonderful blaze which half the colony must have seen last night is of course unknown as yet. The population in the region where the fire took place was of course so numerous that there must have been an immense quantity of hands at work saving property, and in this way no doubt a greater proportion of the goods, furniture and so forth threatened when the flames began to spread, was saved than would have been rescued at a fire of corresponding magnitude in England. At the beginning the swarms of boats which collected along the Praya to receive the property which the Chinese were hastily bringing out of their houses, were in themselves a sight to see. This of course was early in the proceedings, later on when the fire had claimed its whole territory the Praya was all but impassable.

"The conflagration began somewhere near the British Hotel in the Queen's-road. That building was saved, though the destruction overlapped it on both sides. All who could be of service gradually accumulated at the scene of action. The

Digitized by Google

police, detachments of men from the 20th and the Royal Engineers, the native fire brigade, parties of sailors from the men-of-war in harbour, came up as the fire announced itself all over the town and bay by rolling clouds of brightly illuminated smoke. Very soon, by half-past seven or eight, the flames had obtained such a hold upon the thin rows of China nouses which stood on each side of the Queen's-road, that the fire began to burn brightly, and clouds of vivid flame to leap up amongst the smoke. Some of the houses which first took fire must have contained cotton or equally inflammable merchandise, for the fury of the blaze at eight o'clock was already terrible. Roofs then began to fall in on all sides with a curious smothered crash which sounded at a little distance like the rush of a rocket, and wherever they went, of course the flames hau free play and mounted higher in the sky. A great many engines were brought down, and besides the fire brigade and police there were numberless volunteers, the young men of the colony generally, ready to work with any amount of courage and energy at the tasks going forward. The Governor moreover was present in the thick of the engagement, lending a hand to the workers and stimulating the enthusiasm; but as in a large battle field the troops engaged at one part have no idea what is going on in another, so it was last night, and it was through the equal readiness of all to do anything and go anywhere that so much was done. For a great deal was done in drawing a limit past which the fire was not allowed to go, though the idea of putting it out was simply ridiculous after its magnitude became apparent. Thus the coal depot of the P. and O. Company was saved, forming the the boundary of the fire in that direction. There were more than seventeen thousand tons of coal stored there, and had the mass of fuel ever taken fire it could not have been put out for a week or a month. The engineers stopped the progress of the fire in another direction by blowing up some houses, a feat they performed at about eleven o'clock.

"To do anything, more especially in the hurry of writing this morning, towards describing the scene is out of the question. It seemed a town on fire. You looked through lines of streets flooded with fire, you saw through a gap of ruins a region where spectral walls were subsiding with sounds faint in the general uproar of human voices and flame, on to incandescent piles of rafters, fountains of sparks shot up in all directions, and the atmosphere generally seemed red hot. The effect to eye, the magnificence of the display, considered from a merely æsthetic point of view, was past the power of words to paint.

"After about two o'clock this morning the rage of the fire was expended, but it must be burning now, though danger of its expansion is long since over."

Mr. Hart, the Inspector-General of the Chinese Imperial Maritime Customs, who arrived yesterday by the French mail, brings with him Professor Gumpach of Berlin, the well-known astronomer and combatant of Professor Airev's theories, and Professor Badham, of Trinity College, Dublin. These gentlemen will take the posts of professors for German and English in the new college at Peking for the instruction of native Chinese. A French professor follows by the next mail.

The charge brought against the Rev. William Lobscheid at the instance of the Acting Superintendent of Police, has happily fallen to the ground, the summons having been dismissed after the examination of one or two witnesses whose evidence failed to support the complaint. We sincerely hope that the reverend gentleman and his prosecutor will both take the hint to be derived from the day's proceedings. Mr. Acting Superintendent Deane, by way of being very energetic, has acted precipitately and unwarrantably, and may learn a lesson of discretion. Mr. Lobscheid if he act wisely will drop all connection whatever with an institution which gives occasion for such proceedings as were evidenced in court by the Chinese females examined for the prosecution of the first six prisoners. Nothing could be more disgraceful than the *expose* made yesterday of the modes in which emigrants are obtained.

Ten men and a woman, who were arrested on a charge of being concerned in the *Lubra* piracy, were brought up for examination before J. C. Whyte, Esq., but both Mrs. Hawes, the widow of the murdered captain, and Mr. Hall, late chief mate of the vessel, failed to identify any of them as the actual pirates. Two were pointed out by Mrs. Hawes, one as the cook who was discharged at his own request a few days before the vessel left this port, and the other as the stevedore who was working on board. Mr. Hall also identified two more, as part of the gang employed by the stevedore in stowing the cargo Mr. Jarman stated that he still had hopes of bringing proof against the tenth and eleventh prisoners, who were well known to the Macao authorities as notoriously bad characters, and also that he expected in a few days to get hold of some men whom Mrs. Hawes would be able to recognise. The case was in consequence further remanded, and all the prisoners allowed to bail with the exception of the tenth and eleventh. The cook who disappeared from the vessel on the evening of her arrival here has not been heard of as yet, in spite of all exertions on the part of the police to trace his whereabouts. This circumstance throws a grave suspicion on him as having been connected with this diabolical affair.

Captain Maxwell, 80th Regiment, has been appointed Deputy Assistant Adjutant-General, to relieve Major Samwell, and is expected to arrive in Hong Kong by the next mail.

A serious accident had occurred to a party of sailors employed in repairing the rigging of the flag-staff at the French Consulate. One of them was in the cross trees, and others were about ascending, when the staff snapped near the bottom and fell. Fortunately for the man in the cross trees, its fall was broken by some bamboos, or he must have been killed on the spot. As it is, he is very severely injured. There was no wind at the time of the accident, which is attributable simply to the decay of the foot of the staff. It was erected in 1859.

Mr. James Smith, a gentleman lately in the employment of Messrs. Dent and Co. at Chinkiang, was one evening going rapidly up the steps leading from Wyndham-street into Arbuthnot-road. He had hardly reached the top when he fell with tremendous violence from the top to the bottom. Whether his foot slipped on a stone, lost his balance, or was attacked by a fit, does not seem to be known. Lifted up into a sitting posture by some gentleman passing, he was found to be insensible and bleeding. Dr. Huyvenaar, a medical man residing close by, was promptly fetched, and every assistance given. A messenger was despached to the Central Police Station for help, and after a brief delay the unfortunate gentleman was placed in a chair and taken to the Civil Hospital, where he died, having never recovered consciousness, nor spoken a word from the moment of his fall. An inquest was held on the body at the Civil Hospital. Mr. Jose da Silveira and Mr. Gutierrez testified to the circumstances attending the accident. Dr. Cochrane was examined as to the cause of death, and the brief record closed with a verdict of accidental death. Had the jury inspected the site of the accident, they would probably have appended to their verdict a sharp reproof on the negligence of those who have left the steps and road leading from Wyndham-street to Arbuthnot road in a state of disrepair that render it dangerous to attempt to pass up or down it at noon day. Among other improvements grand juries might, with advantage, be re-introduced into Hong Kong. A presentment about the state of the roads might have some effect.

A notice has been issued by the Russian Vice Consulate in this city, to the effect that the Cabinet of St. Petersburg declares all Russian subjects who engage in the Chinese emigration business to forfeit all claims to protection from the Russian Government. Would that all the nations of the West would follow the example set them by the Imperial Russian authorities.

His Excellency Senhor Horta, the new Governor of Macao, accompanied by his aide-de-camp, arrived by the mail steamer, and were the guests of the Portuguese Consul. His Excellency and suite left for Macao in the Portuguese gunboat *Don Carlos*.

The following announcement in reference to the City Hall has appeared:—

It is hereby notified for the information of the shareholders and subscribers that Pang Awah, whose tender for erecting the City Hall was accepted at the meeting held on the 29th August last, has refused to enter into a contract, and in consequence a contract has this day been entered into with Chung Yee, for the construction of the building, the amount being $85,000.—P. RYRIE, on behalf of the City Hall Committee.

Captain Noelke, of the Prussian three-masted schooner *Vampyr*, recently from the Soloo group, situated between Borneo and the Philippines, has brought from the Soloo Sultan a communication, in the shape of a large document enveloped in silk. What this epistle purports we, of course, are not prepared to state, but it is supposed to convey a proposition to King William I. to assume the powers or Royalty over the Sultan's domains, inasmuch as the Soloonese are tired of the control at present exercised by the Spaniards over them. The document in question is to be transmitted to Berlin. Captain Noelke has in his possession several large pearls of more or less value from the said islands, the banks in the vicinity of which are well known to contain numbers of those precious productions.

PHILIPPINES.

MANILA.

We learn from Manila that on the 16th October a severe storm passed to the South, and was felt there. The Government steamer *Animosa* ran down the private steamer *Cebu*, and they both went down, close by Cavite. Several accidents are reported, amongst them the *Ygnacio* with a valuable cargo from Hong, Kong on shore at Punto Sangley. On the evening of the 18th a second typhoon visited Manila, and lasted two days. Only two Spanish vessels were driven ashore, and the English steamer *Japan* lost an anchor, and was said to have been aground but got up steam and got off again; she was to have sailed for Singapore on the 20th, but was delayed till the 22nd. It is expected the news from the provinces will be bad. The *Patino*, with the new Governor General, was expected daily. There have been great public rejoicings for the victory (?) at Callro. The officials of the navy have had a public reception from the city, a dinner and ball.

COCHIN CHINA.

The French transport *Eugene-et-Adele*, which left Macao on October the 4th for the Havana, with 466 emigrant coolies on board, put into Saigon on the 14th in consequence of a mutiny of these men. On the 10th of October a number of the Chinese suddenly rose, disarmed the guard, and mortally wounded the captain. The next in command, Lieutenant Mazieres, then ordered his men to fire, when thirteen were killed on the spot, and the leaders laid down their arms and were ironed.

STRAITS OF MALACCA.

SINGAPORE.

The London Mail of 26th September reached Singapore on the 30th October. Dates from this port are to the 8th November.

The return of his Highness the Tumongong from his visit to England, says the *Straits Times*, was the occasion of a very friendly display towards him, both on the part of his fellow-countrymen and on that of the European residents here, by all whom he is personally well known and well liked. There seems a desire on the part of some of his friends to change the title under which he is ordinarily designated from that of Tumongong to Maharajah, the latter being the one which appears to have been generally accorded to him while at home. Perhaps there is no reason why this should not be conceded, for, though his family was originally, and still is nominally, subordinate to that of the Sultan of Johore, the substantial possession of the sovereignty of that territory has been in the Tumongong's family since 1855, when the Sultan sold his supremacy, though singularly enough not his title, to the then Tumongong, father of the present. However, in possession of the substance, his Highness the Tumongong can well afford to dispense with the titular shadow which still clothes the unenterprising Sultan with royalty. His Highness appears little changed by his trip, but whatever change there is, is in the way of improvement. We believe he was attired in similar costume to that which he wore on the occasion of his presentation at Court; and no one can deny that he must have made a very favourable impression and given a high conception of the Malay feature and, physique. To a military suit of dark blue embroidered, but not too richly, with gold lace, were added the characteristic sarong and a turbaned head dress,—the latter not so graceful we think as a rich embroidered saputangan tied in Malay fashion would have been. On his breast was the coveted Star of India, the prize after which so many brave men have sighed, and sighed in vain, and which it shall doubtless be the endeavour of the Tumongong's life to maintain in honour and respect. His attendants were not less becomingly attired, English broadcloth and Regent-street tailoring having worked a world of reform in the national garb. We believe his Highness proceeds shortly to Johore where a great reception awaits him.

Judgment on a somewhat nice point was given by Sir Benson Maxwell, Recorder, in Court, a few days since. A claim was preferred by a London firm against the trustees of the estate of Hamilton, Gray, and Co. to recover the value of a quantity of produce which they had sold for the benefit of the general body of creditors, but which the plaintiffs averred was their property, in so far that it had been purchased by Hamilton, Gray, and Co. on their account, with funds in hand and so advised, and was in store only awaiting shipment when Hamilton, Gray, and Co. suspended. The Recorder ruled that the trustees were justified in selling, and that the special purchase and allotment by Hamilton, Gray, and Co. did not suffice to pass the property to the plaintiffs. The judgment was an interesting one.

The fortnight has produced but one other event of importance. It will be remembered by some of our readers that a small vessel named the *Katijah* left Singapore with a valuable cargo on a trading voyage to some of the island in the Archipelago, and was never afterwards heard of. Intelligence has just been received that the supercargo of the vessel (a Chinaman) is alive and a slave on one of the piratical islands of Sooloo. No statement has been made regarding the fate of the vessel herself or the rest of the crew; but if the supercargo is recovered, as it is expected will be the case, we shall be able to learn full particulars and thus set at rest many painful doubts.

In commenting on the prospectus of the "Eastern Asia Telegraph Company," the *Straits Times* says: "The importance of the scheme is too modestly put forward. It is not that a most important link is an ultimate chain of communication to China will have been established; for it is more than probable that both the Russian-American wires will have been at work before that by way of British India—will have reached even Singapore, or Bangkok; but it is the connection—the only practicable one—which this peninsular route will effect between Great Britain and her vast Australasian possessions; besides the important consideration that, whatever other lines of telegraphic communication may extend to China, that proposed by the present company is the only one that will be independent of American, Russian, and Continental influence. Altogether, the scheme is one which, commercially, offers a most promising investment for capital, and the great and political importance of which it is impossible to over-estimate."

On the 24th October the steamer *Bintang* was successfully put into the Bon Accord Dock at Pulo Brani, she being the first vessel docked. The caisson was found to answer well, and the whole undertaking reflects great credit on Messrs. Buyers and Robb, the constructors, who in spite of the unusual quantity of rain that has fallen this year have been only a little more than two years in completing their work.

His Excellency the Governor-General of the Netherlands India arrived from Batavia on the 1st of November by the *Ardjoeno*, and visited the Governor at the Court-house. His Excellency remained on board, having declined all invitations to stay on shore, in consequence of his late bereavement.

Births, Marriages, and Deaths.

(Announcements for subscribers are made free of charge.)

BIRTHS.

ANDREWS—On the 19th Oct., at No. 2, West-terrace, Hong Kong, the wife of W. B. Andrews, Commander, P. and O. Co.'s Service, of a daughter.

ALSTON—On the 10th Dec., at 69, Eccleston-sruare, the wife of Francis B. Alston, Esq., of the Foreign-office, of a daughter.

BRADWELL—On the 22nd Oct., at 20, Provost-road, Haverstock-hill, N.W., the wife of J. Bradwell, Esq., of a son.

GARRETT—On the 25th Nov., at Buckau, near Magdeburg, Prussia, the wife of John Dunnell Garrett, Esq., of a daughter.

LAIRD—On the 10th Dec., at Claughton, Birkenhead, the wife of John Laird, jun., Esq., of a son.

MARSHALL—On the 25th Nov., at South-place, Herne-hill, the wife of Gloster Marshall, of a son.

OSMUND—On the 13th Oct., at Hong Kong, the wife of Charles Osmund, Esq., of a son.

PURVIS—On the 4th Nov., at Singapore, the wife of John M. Purvis, Esq., of a daughter.

RAWLING—On the 26th Nov., at Beaumont House, Stoke, Devonport, the wife of S. B. Rawling, Esq., late of Hong Kong, of a son.

MARRIAGE.

CHICK—AINSWORTH—On the 13th Oct., at St. John's Cathedral, Hong Kong, by the Rev. John Wilson, R.N., Acting Colonial Chaplain, Mr. William Chick to Miss Emily Ainsworth.

HIGSON—RAYNER.—On the 27th Nov., at Christ Church, Lancaster-gate, Hyde-park, by the R. Wood, the rector, assisted by the Rev. P. Aubertin, rector of Chipstead, Surrey, John Frederick Higson, Esq., of Manchester, late of Hong Kong, only child of John Higson, Esq., of Hamburg, to Marian Eliza, eldest daughter of James Rayner, Esq., of 26, Lancaster-gate. No cards.

PRESTAGE—DA SILVA E SOUZA.—On the 2nd Oct., at the Cathedral, Hong Kong, by the Rev. — Favini, Ward Prestage, third son of Mr. J. T. Prestage, of Madeley, Salop, to Flavia, only daughter of M. J. M. da Silva e Souza, of Hong Kong.

DEATHS.

ANDRRWS—On the 14th Oct., on board H.M.S. Melville, Hong Kong, Richard Andrews, armourer, H.M.S. Janus, aged 34 years.

ATKINSON—On the 20th Oct., on board the American ship Tennyson, in Singapore Harbour, from the effects of an accident, George B. Atkinson, eldest son of Dr. Josiah Atkinson, Newburyport, Mass., U.S.

RANNATYNE—On the 6th Dec., at St. Leonard's, James Guthrie, Esq., of Craigie, Forfarshire.

FLEMING—At the Seaman's Hospital, Hong Kong, Thomas Fleming, master, British ship Briton.

HARPER—On the 17th Sept., at Hong Kong, John Cuff Harper, Esq., M.R.C.S., of Whampoa, eldest son of the late Edwards Harper, Esq., of Mortlake, Surrey, in the 47th year of his age.

HUFFAM—On the 30th Oct., at Hong Kong, Henry Seymour, infant son of F. S. Huffam, Esq.

JONES—On the 20th Oct., at Singapore, on his way home from China, Robert Bynur Jones, aged 25, second son of Owen Jones, Esq., Castle-square, Carnarvon.

MARTIN—On the 9th Dec., at the residence of his father, Melville-street, Edinburgh, John Bell Martin, Esq., of Greenwich, eldest son of Dr. M. J. Martin, formerly of Singapore.

SINCLAIR—On the 13th Oct., at Labuan, after a short illness, Sophia, the beloved wife of Edward Sinclair, Esq.

SMITH—On the 24th Oct., at Hong Kong, James Smith, clerk to Messrs. Dent and Co.

SHEPHARD—On the 14th Oct., at the Government Civil Hospital, Hong Kong, Henry Shephard, police constable, H.M.'s Naval Yard, aged 26.

Digitized by Google

EXCHANGES ON LONDON.

[For dates, see first page.]

		Bank.	Private.
At Yokohama	6 months' sight.	4s. 7½d.	4s. 8½d. to 4s. 8¾d.
At Shanghai (per Tael.)	6 ditto	6s. 2d.	6s. 2⅛d. to 6s. 3¼d.
At Canton, At Hong Kong, At Macao	6 ditto	4s. 6¾d.	4s. 7¼d.
At Singapore	ditto	4s. 6¾d. to 4s. 6¾d.	4s. 6¾d. to 4s. 7¼d.
At Manila	ditto	4s. 1d.	4s. 2d.

At Shanghai, bills on India, Rs. 301 to 302 per 1000 taels. At Hong Kong, Rs. 221 per $100. Bar Silver at Shanghai, tls. 111·2; at Hong Kong, 10½ per cent. prem. Mexican dollars at Shanghai, tls. 74·35 per 100; and exchange on Hong Kong, 26½ discount. Hong Kong and Shanghai Bank shares, old, 5 per cent. dis., new, 2 per cent. dis.; Gas Company, 10 per cent. prem.; Hong Kong and Whampoa Dock, 15 to 20 per cent. prem.; Steam Shares, 7 per cent. dis.; Union Dock Compaay, 16 per cent. dis.; China Traders Insurance, 3 per cent. prem.

The latest telegrams, dated Shanghai 8th, and Hong Kong 15th Nov., give Exchange at 6s. 1½d. and 4s. 6¾d. respectively.

The following is from Messrs. Sharp and Co.'s Circular.

GOLD.—The aggregate transactions during the fortnight have been large, including considerable amounts from Shanghai. The receipts are $570.000, and the exports including the Rangoon's cargo and excluding the Salsette to-morrow are $610,000.

SILVER.—Our supplies of this bullion have been almost entirely from Shanghai and the coast during the fortnight amounting to $850,000. The total sent away by the Calcutta steamers and the last Bombay mail, but not including the present opportunity, is $670,000.

DOLLAR CURRENCY.—Some shipments of coin to Calcutta are still taking place, thus further diminishing the short supply which we have here. The formal assay by the Chinese authorities of the dollar from the Hong Kong Mint has resulted in their report that teals 100 Haiquan Duty Sycee are equal to teals 111.1.1 of the Hong Kong dollars. It is probable that an edict will be issued authorising their acceptance in payment of duties at this rate. A similar essay is about to be made at the Mint here, of the Haiquan Sycee. Amounts of coin inwards $380,000, outwards $860.000.

EXCHANGE.—There has been no alteration since our last Circular. The business done has been rather larger but is still limited, although the drawing rates seem advantageous.

DISCOUNT AND MORTGAGES.—The money market although not active is very firm, and money is in strong demand upon fixed securities.

SHARES.—China Traders' are better in prospect of a good dividend, but generally very little has been done.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents, and is divided into decimal parts of ten.

TEA STATISTICS.

(FROM A CORRESPONDENT.)

The Hong Kong Overland Trade Report dated Oct. 15, 1866, contains a great mistake. It gives the export of Tea to 30th Sept., 1866, correctly, say 72,691,791lbs., but the comparative exports for 1865, 1864, and 1863 are erroneously printed, the figures that correspond to Aug. 31 instead of Sept. 30. The following is the correct list:—

30 Sept. 1866	..	72,691,000lbs.	via T. R.	15 Oct.	1866
„ 1865	..	61,068.000lbs.	„	„	1865
„ 1864	..	68,433,256lbs.	„	„	„
„ 1863	..	66,379,270lbs.	„	„	„

The following are the actual returns for 1863-4 and 1865, and estimated for 1866 to

	Oct. 31.		Nov. 30.		Dec. 31.
1866	77,750.000	..	—	..	92,000,000 lbs
1865	78,538,000	..	90,917,000	..	101,720,000 „
1864	83,032,000	..	90,162,000	..	100,727,000 „
1863	80,814,000	..	90,854,000	..	98,679,000 „

By telegrams it is known the exports to end of October were about 77¼ million lbs., which already brings this season's supply lower than at same date for the last three years and the very bad accounts which each mail carries and will carry to China should have the effect of still further reducing the comparative exports for 1866. Taking into consideration all the known dates bearing upon the point, the estimated exports to 31st December, 1866, should not exceed 92,000,000 lbs., which allows of 20 cargoes, average 700,000 lbs. each, being shipped in November and December, which should be more than ample.

COMMERCIAL REPORT.

CHINA AND JAPAN EXPORTS.

TEA.—FOOCHOW.—A large business has been done since the last report of the 6th instant, more especially the last day or two. Teamen have lowered their demands, and common to good common is quoted 5 mace to 1 tael, and flavoury to good flavoury 1 to 1½ tls. cheaper. Broken leaf teas have been taken to some extent for America; prices for these are consequently maintained. The excess in supplies has slightly fallen off, but a considerable stock is reported in Kin Yang. Souchong: A few chops of first crop have been settled at lower prices, but the depreciation in quality makes them of no better value. Fair to good, second and third crops, is quoted 2 to 3 tls. lower. Pekoe: There has been some inquiry for the Bombay and Continental markets. Prices remain unchanged. Oolong: Settlements of inferior to fair cargo have been made at very irregular rates, from tls. 19.2.5 to 22.5; and fair cargo may be fairly quoted at tls. 20, establishing a fall of about tls. 4. The few parcels taken, of good to superior, show a decline of 2 to 3 taels. Scented: Transactions have been confined to dusts and leafy, at former rates. Souchong: Fair, 628 chests at taels 19 to 23.5. Good to second class (1st crop), 2,524 chests at taels 26 to 33.5. Pekoe: Common to fine mixed leaf, 540 chests at taels 17 to 32. Fair to good even leaf, 350 chests at taels 25 to 33. Oolong: Inferior to fair cargo, 2 547 half-chests at taels 19.2.5. to 22.5. Good to superior, 1,374 half-chests at taels 26.7.5 to 28.7.5.

SHANGHAI.—Advices received have almost stopped operations in Congous, and business is not likely to be resumed, except at a decline. An attempt on the part of buyers to bring down prices for Green Teas has been unsuccessful, and a fair business has been done at former rates. Black Teas: The market has been extremely dull, and the few purchases reported show a decline of one tael on previous rates. The stock is large, and chiefly composed of common Teas. Green Teas: There has been a fair business done in Fychow and Moyunes for America, at previous rates. Teamen are very firm for all good and fine grades, which they assert will be in under-supply this season. Seven chops of Pingsuey have found buyers at a decline of one tael.

HANKOW.—The market had been very inactive the only settlements being 3,400 chests chiefly taken in barter for imports, or on Russian account. The Elizabeth Nicholson had gone to Kiukiang to complete her cargo. Settlements are as follows:—Oonams, common to medium, taels per picul 14½ to 17½; Oopacks, fair to medium, taels per picul 20 to 26½. Arrivals, 1866, 350,000 chests: settlements, 342,000 chests; stock, 8,000 chests. Arrivals, 1865, 308,000 chests; settlements, 293,000 chests; stock, 15,000 chests.

KIUKIANG.—Black Teas: About 15,000 packages had arrived in the fortnight, of which 2,000 had been sold, at taels 20 to 23 for common to medium Ningchows, and taels 15 to 18 for common to medium Hokows, and about 11,000 shipped on to Shanghai on native account. The market closed easier. Green Teas: Arrivals had been considerable, and of them about 3,000 half-chests had gone forward to Shanghai, and 7,000 had been taken at fully previous rates. In addition to these settlements, the "Mow-kee" series of 5 chops, or 6,000 half-chests, had been bought by one of the leading American firms at tls. 40 all round. Further supplies were not expected before the beginning of November.

YOKOHAMA.—The transactions in the Tea market have been very few, and confined to only two or three buyers who have paid rates which apparently show no variation from prices previously paid. The teamen are firm in their demands, and strongly resist any attempts at a decline, while buyers hold off in the hope of obtaining the Tea on somewhat more reasonable terms. At present a scarcity of any article fit for export is the leading feature in the market, and the quantity of inferior grades is very great; under these circumstances it is not at all surprising that the business is limited and likely to continue so until the quality of the Tea on offer improves, and prices become cheaper. Quotations and stocks are as follows:—Good Common, $18.00 to 26.00, to 700 piculs; Medium, $28.00 to 30.00 to 1,400 piculs; Good Medium, $31.00 to 34.00 to 1,600 piculs; Fine, $35 00 to 38.00, to 700 piculs.

RAW SILK.—The amount of Silk by the present mail is 560 bales for Southampton.

CANTON.—The fifth crop is now coming freely to market, and the quality generally is considered good, intending buyers have been somewhat holding back, and transactions for the fortnight are limited. Silkmen, who in many cases paid large prices for the staple up country, are getting rather uneasy at the absence of demand and daily increase of supply, and rates close for the mail as follows:—Tsatlee No. 1, $620; Loongkong No. 1, $600; Kowkong, $540 to $550; Re-reeled Cumchuck, $640.

SHANGHAI.—Since the last report a small business has been done in China Silk, little more than 1,000 bales having been added to settlements. Prices remain much as before quoted, but had it not been that telegrams, dated London, September 25, advising the price of Chop No. 3 Tsatlees at 32s. per lb., were received here, it is probable that the firmness of holders might have forced up rates for the finer classes. Supplies from the country continue small, and the original estimate of the extent of the export for this season will probably not be exceeded. The French steamer took 855 bales Chinas and 923 bales Japans. The Ajax, for London, took 19 bales Chinas, and the Rona, for Hong Kong, 25 bales Chinas. Tsatlees, Chops No. 1, tls. 645; do. No. 2, tls. 625; do. No. 3, tls. 605 to 610. Taysaams, Chops No. 1, tls. 555 to 565. The French mail brought—Cocoons: From Yokohama, 64 b.; Shanghai, 44 c.; Hong Kong, 95 b.; Calcutta, 10 b.; total, 213. Silkworms' Eggs: Yokohama, 1,472 c.; Shanghai, 25 c.; total, 1,497.

YOKOHAMA.—The news brought by the mails of the 10th and 19th of August have had anything but a depressing influence on this market, and business here has been as active since the last report as the poorness of the stock could allow it to be. The crop of the year having been effected under unfavourable circumstances, and cocoons of good quality being scarce, labour being dearer, and the producers apparently finding it more profitable not to reel fine, the finer grades in all descriptions of silks continue so scarce that prices for good and medium sorts have further advanced, and a parcel of superior Mybash has fetched $970. Settlements during the past fortnight amount to 850 piculs, consisting chiefly of hank Silk and Oshio of medium and inferior quality, and a few of Koshio. Sodai are scarce, and the other descriptions are still wanting. Arrivals have kept pace with the settlements, so as to leave us with a stock not exceeding 850 piculs.

SILKWORMS' EGGS.—Total settlements since the beginning of the season have reached the figure of from 750,000 to 775,000 cards, and the unsold stock is reduced to 30,000 or 50,000 cards, the great bulk of which consists of inferior goods which sell at from 8 to 20 tempos. The annual sorts, white and green, a few lots are occasionally picked up at from 2 to 5 coos according to quality. It is said that exports from Hakodadi will amount to less than 100,000 cards, and that nothing has been done this year in this article at Nagasaki. The season here is drawing towards its end, and it seems probable that the whole export of Japan will not exceed 900,000 cards; that is to say, less than one-third of that of last year.

DRUGS, &C.—CANTON.—Cassia Lignea has been dealt in to the extent of about 1,000 piculs for shipment to North German ports, stock 3,000 piculs, quotation $19 to 19·50, being unaltered. Cassia Buds rather dearer, 50 piculs have found buyers at $40 which almost clears the market of stock. Galangal very quiet, the stock of 400 piculs continuing to be offered at $1·80. China Galls tend upwards, 30 piculs have been purchased and the remaining 100 piculs are kept for $13·75. China Root $3·50 to 3·75, nothing doing. Vermilion $38·50 per box of 50 catties for genuine qualities. Rhubarb: The market is poorly supplied with inferior qualities; no business done.

CAMPHOR.—HONG KONG.—No sales reported during the fortnight. Further supplies are expected. The price asked for stock on hand is more than what buyers are willing to pay. Nominal value $27 per picul.

CHINA GRASS. — SHANGHAI — There are no supplies of How-kockchow kind at present in the Hankow market, and inferior quality is held at taels 12.2.0 per picul; Green sorts, taels 10 per picul. Shanghai price, for best quality offering, taels 13 per picul; finest kind, not in the market.

CHINA AND JAPAN IMPORTS.

HONG KONG.

There is no improvement to note in the market for Manufactured Goods, and quotations for both Plain and Fancy Cottons are about 5 to 10 cents lower all round. What little demand has existed among Chinese has been fully satisfied by considerable sales of sea-damaged goods at auction.

RAW COTTON.—A further decline of $1 to $2 per picul has taken place, and clearances are about on a par with last fortnight's. The news from home of expected small supplies of American Cotton has had no effect on this market as yet and foreigners still refrain from buying.

WOOLLENS.—Demand continues very slack, but there is no material decline to note in rates; sales have been principally of damaged goods at auction.

METALS.—Nail Rod Iron has declined in consequence of a good supply having come on in late arrivals. In other sorts there is no change to note.

COALS.—Rates are unchanged save for Australian Coal, which, in consequence of numerous arrivals, is somewhat weaker. In view of the small supply on the way out holders of English and Welsh are very firm.

RICE.—Stormy weather in the middle of the fortnight caused the market to become suddenly very firm, and holders would not sell for less than 25 to 30 cents over last quotations. A brisk demand ensued, but only lasted for a day or two, and the market has returned to its former range, with little or no inquiry save for consumption.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—None.

At SHANGHAI.—From Cardiff, Oct. 8, Ontario; from Newcastle, 11, Thos. Bell (reported by telegtam), Albuera, Kate Carnie; from Sydney, Dundonald.

At HONG KONG and CANTON.—From London, Oct. 27, Tavistock; from Sunderland, 28, General Havelock; from Newcastle, 30, Tynedale, Pembrokeshire.

At MANILA.—None.

At SINGAPORE.—From London, Nov. 5, Falcon, Sree Singapura; from Liverpool, Nov. 4, Germania, Silvercraig; from Cardiff, 29, Sumatra; from Glasgow, Oct. 24, Bothwell Castle; from Hamburg, Oct. 28, Hans; from Marseilles, Nov. 4, Birman.

At PENANG.—None.

DEPARTURES.

From YOKOHAMA.—None.

From SHANGHAI.—For London, Oct. 8, Orsuni; 9, Janet Mitchell; for New York, 9 Pegasus; 19, Royal Diadem.

From FOOCHOW.—For London, Oct. 7, Seawfell; for New York, 23, Queen of the Seas; 11, Albatross.

From AMOY.—For New York, Oct. 13, Amazone; 19, Broadwater.

From HONG KONG and CANTON.—For New York, Oct. 31, Acapulco.

From MANILA.—For London, Oct. 9, Ena; For Liverpool (via Cebu) Rinaldo; for Falmouth, 7, Oxonian.

From SINGAPORE.—For Falmouth, Oct. 23, Cecrops; for London, Nov. 2, Caldbeck; for New York, Marion.

From PENANG.—None.

VESSELS LOADING.

At YOKOHAMA.—For London, Corea; for New York, Lorton, Chaasze, Banda.

At NAGASAKI.—For London, Wm. Mitchell, John Bunyan.

At SHANGHAI.—For London, City of Quebec, Scindia, Camilla, Elizabeth Nicholson, Charlotte, Cissy: for New York, Andreas, Assyrian Fychow (full), Anita (full).

At FOOCHOW.—For London, Banian, Ellenborough, Gauntlet, Invincible, John Temperley, Fontenaye.

At AMOY.—For New York, Gresham, Florence Nightingale.

At HONG KONG and CANTON.—For London, Samuel, Cheetah, Cora

Digitized by Google

Linn, Bankside; for New York, Albert Victor, Charger, Powhatton, Acapulco.

At MANILA.—For London, Cilminar, Congress; for Cork, Vicksberg, Charlotte; for New York, Arracan, Asa Aldridge, Belvedere, Panther.

At PENANG.—For London, Amersham, York; for New York, Elizabeth.

VESSELS EXPECTED.

From YOKOHAMA.—Thomas Dryden, Conference.

From NAGASAKI.—George, Margaret Campbell.

From HANKOW.—Napoleon III., Mary Nicholson.

From SHANGHAI.—Blencathra, Nelly, Illimani, Lansdowne, William Melhuish, Charlgrove, John Paul, Knight of Snowdon. Marquis of Argyle, Trebolgan, Wild Deer, Queen of the East, Antipodes, Helen Nicholson, Ann Adamson, Dartmouth, Polmaise, John Bull, Agamemnon, General Caulfield, Sir W. F. Williams, Juanpore, Red Deer.

From FOOCHOW.—Philomela, Marion, Monarchy, Naomi, Veronica, Louisa, Northfleet, Beautiful Star and Seawfell.

From CANTON.—Island Queen, Victoria, The Cedars, Kelso and Solent.

FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London: Cotton and Tea, £2 10s. to £3; Silk, £4 to £4 10s.

At SHANGHAI.—There is no improvement to report; the rate to London remains at 30s. per ton, and to New York £2.

At FOOCHOW.—To London: £2.

At HONG KONG and CANTON.—There are no fresh charters for home to report. The circular of George Holmes estimates the amount of disengaged tonnage in harbour at 40,117, representing 77 vessels.

At MANILA.—To London: Sugar, £1 15s.; Hemp, £2 5s.

At SINGAPORE.—There is little inquiry for tonnage to Europe; rates remain at £1 tin, £1 15s. to £2 gambier, and £2 5s. light freight.

CASUALTIES.

NAGASAKI.

The schooner Flash, from Shanghai to Nagasaki with a cargo of coal, was wrecked about forty miles south-west of Nagasaki. The captain and crew, who took to the boats, were picked up and taken to Nagasaki by a Japanese fisherman.

HONG KONG.

The Bremen 3-masted schooner *Willy* reports having experienced very severe weather, and had to cut away the fore and main-masts to save the ship.

The British barque *General Havelock* reports being bound to Shanghai, but when off Chelang Point, experienced a heavy typhoon in which she lost boats, bulwarks, &c., had the deck stove in, and was compelled to heave cargo overboard to save the ship.

The Prussian schooner Christine reports at Hong Kong that she experienced on the 20th of October a very heavy typhoon, beginning in N.E., veering round to the westward; in the strength of the blow the ship was hove on her beam-ends, with the water up to the main-hatch; to get the ship out again they had to cut fore and main-topmasts and jibboom, after that the ship could not right again, therefore were obliged to throw part of her cargo overboard. The ship making much water at the time of the gale, in consequence of which were obliged to put back to Hong Kong. Arrived here on the 28th.

COMMERCIAL POSTSCRIPT.

With reference to the failure of Messrs. Mitchell and Aspinall, tea brokers, we understand that arrangements are in progress for liquidating their affairs by a composition, and that a new firm will shortly be established by some of the partners, including Mr. Cumming. Messrs. Podmore and Co., of Mincing-lane, have also suspended. There are rumours current of the probable if not actual suspension of a large firm and two smaller ones, whose bills have not been duly honoured during the past week, and some of which will be returned the drawers. Telegrams from China also announce the difficulties of some houses and of one of the banks, but we cannot trace the rumours to any definite source. The telegrams in regard to Messrs. Dent and Co. could not arrive out until the 25th Nov., while our latest telegrams only reach to the 15th. Should Messrs. Dent and Co. suspend, it will no doubt lead to others, and this event appears to be looked forward to as the turning point in the China trade.

TEA.—The market remains in the same languid condition, and it is next to impossible to sell, except the finer sorts, which are in fair demand.

SILK.—There is more business doing, chiefly in China, at the easier rates last quoted, which appear to have tempted foreign buyers again into the market. Good and fine Silk is becoming scarce, and is much looked after; there is every prospect of such qualities becoming relatively higher before long on that account.

ARRIVALS NOT INCLUDED IN THE TABLES.—Dec. 9, at London, from China, Valdivia; at Liverpool, from Singapore, Huntly Castle; 6, at Texel, from Batavia, Henrietta Geertruida; 7, Heldin; 6, at Brouwershaven, from Batavia, Van Artevelde; 9, Noach; 7, at Helvoet, from Batavia, Vyf Vrienden; 12, in the Downs, from China, Challenger.

DEPARTURES.—Dec. 8, from London, for Yokohama, Medina; 7, from Shields, for Hong Kong, Deerfoot; 10, for Galle, Palestine; 6, from Glasgow, for Sourabaya, Sea Wave; 12, from London, for Shanghai, City of Aberdeen; 13, from Liverpool, for Batavia and Sourabaya, Caroline.

LAID ON.—At London, for Shanghai, Star of China; at Liverpool, for Singapore, Lanercost; at Glasgow, for Batavia and Singapore, Filipino.

SPOKEN.—Akbar, London to Ceylon, Nov. 2, 5 N., 25 W.; Maria Christina, Batavia to Amsterdam, Oct. 14, 21 S., 45 E.; Fort Regent Swansea to Shanghai, Nov. 1, 5 N., 24 W.; Euretta, Hong Kong to New York, 63 days out, 34 S., 15 E.; Willem and Carel, Batavia to Amsterdam, Oct. 20, 35 S., 21 E.; Gananoque, Singapore to London, Nov. 12, 10 N., 26 W.; Mary en Hillegonda (Dut. barq.), Rotterdam to Batavia, Nov. 1, 5 N., 25 W.; Willem, Kroon pr. der Nederlanden, Batavia to Rotterdam, Oct. 26, 13 S., 9 W.; Padang Packet, Amsterdam to Padang, Nov. 4, 33 (?) N., 26 W.; Clio, Amsterdam to Singapore, Nov. 27, 46 N., 10 W.; Daybreak, Manila to Falmouth, Oct. 16, 30 S., 14 E.; Stad Lepden, Amsterdam to Samarang, Nov. 1, 9 N., 26 W.

CASUALTIES.—Advices from Amsterdam, dated December 7, report that the Gebroeders (Dutch brig), Duin, from Java to Amsterdam, was stranded near Wykaan Zee. Advices from Port Elizabeth, dated Oct. 31, state that the Wilhelmina Johanna, Albert, from Batavia to Rotterdam, which put in there leaky, &c., Oct. 19, was discharging her cargo, a considerable portion of which was more or less damaged.

Advices from Havre, dated the 7th of December, state that the cargo of the Confiance, Bolibo, from Batavia to Belle Isle, which put into Mauritius on September 22, to stop a leak, will be brought on to its destination by the Cadichrome, Gauriet.

The Elmstone, Templeman, from Sunderland for Shanghai, arrived at Deal December 10, and was supplied with an anchor and 30 fathoms of chain in lieu of others lost.

Advices from Amsterdam, dated December 7, report the Gebroeders, Duyn, from Java to Amsterdam, as having been wrecked near Wykaan Zee; the vessel and six bodies, including that of the master, were subsequently washed on shore. A chest, containing wearing apparel and articles of considerable value, supposed to have belonged to Mr. W. H. Willemse, of Batavia, had also come on shore.

Intelligence from St. Petersburg, dated December 4, states that the Sochalva (ship), from that place to the Amoor River, had been wrecked near her port of destination; crew saved, vessel and cargo totally lost.

MISCELLANEOUS.—At St. Helena, Oct. 30, Noach, Lupcke, from Batavia, and sailed for Rotterdam; 31, Stad Delft, v. d. Wald, from Batavia, and sailed for Rotterdam; Nov. 2, Æolus, de Vries, from Batavia, and sailed for Rotterdam; 4, Alcyone, Kruisinga, from Batavia, and sailed on the 5th for Amsterdam. At Table Bay, Oct. 21, Alert, Petersen, from Hamburg, and sailed on the 23rd for Shanghai.

IT is said that Vice-Admiral de la Grandiere desires to return home on account of his health, and that it is expected that Rear-Admiral Roze will be appointed Governor-General of Cochin-China.

THE MURDERS AT KOREA.

As considerable anxiety is felt as to the course our Government will pursue with reference to the British subjects killed or burnt on board the American schooner *General Sherman*, in one of the Korean rivers, including Mr. THOMAS, a missionary of the London Missionary Society, and who it will be remembered visited Korea in a native junk about twelve months since, and sent us a very interesting journal on the country and people; we understand that it is not the intention of Her MAJESTY'S Government to demand any satisfaction for these atrocities, committed under the American flag, and we believe that the French Government have also instructed the Admiral not to make any attack at present for the murder of the French Bishops. It is not yet absolutely certain that Mr. THOMAS was killed; there is a hope that as he dressed in Korean style and spoke the language, he might have escaped, and we most sincerely hope such is the case.

BANK SHARES.

The directors of the Chartered Mercantile Bank of India, London, and China have declared a dividend for the half-year ending the 31st inst. of 5 per cent. (free of income tax), payable on the 1st January. Notwithstanding this notice the shares continue to decline, owing chiefly to a considerable number having been sent from India for sale here. In the present times there are comparatively no buyers, and consequently a fall in prices

Digitized by Google

is inevitable. The shares of the Chartered Bank of India, Australia, and China have also been depressed from similar causes. The Oriental maintain their price better. The quotations will be found in our share list. Of course it is but reasonable to assume that all the banks will be losers by firms in the India and China trade, but the reports become so exaggerated in these times that shareholders who are not acquainted with the peculiarities of the trade rush away to sell. On the refusal of Messrs. Dent and Company's bills it was known that the Chartered Bank of India held some which were refused, but the amount, although very small, was sufficient to induce some holders to rush in and sell, and they have declined from par to 5 discount; this price is quite unreasonable, and puts down for nothing the long-established and careful management, its reserve fund and all other similar securities. There is no question that the Oriental has suffered in consequence of the unfortunate connection of the chairman, Mr. H. G. Gordon, with Overends, and it would have been better had he resigned his post pending the examination about to take place as to his acts as a director of Overend, Gurney, and Co. (Limited), and the shareholders would be most happy to restore him should he pass through the ordeal satisfactorily. It is not too late to adopt this course now, and we mistake if it will not prove of service in these times of distrust.

FALSE TELEGRAMS.

It is necessary that we should explain that the false telegrams forwarded to Shanghai by the Kiachta route and alluded to in our Hong Kong correspondent's letter, did not pass through our hands, and they are believed to have been sent from Hamburg. We trust that the Oriental Bank and Union Bank of London will have taken steps to bring the offenders to justice.

LAUNCH OF THE "TAIWAN."

The steamer noticed in our issue of the 28th ult. has been successfully launched and named the *Taiwan*. Her tonnage is 400 tons net register, and she is classed A 1 for twelve years. Her dimensions are—length, 175 feet; breadth, 24 feet 6 inches; depth, 12 feet 6 inches. The engines and boilers are already on board, and the vessel will leave Aberdeen under steam for Hong Kong direct early in January, under the command of Captain Alfred Roper, who formerly owned the *Salamander*, Abberdeen clipper, built by the same firm. The *Taiwan* is a saloon steamer, having all her cabins on deck, and is fitted with every appliance for ventilation and convenience which Captain Roper's experience enables him to suggest. The vessel is specially designed for navigating the rivers in China and Japan, and will prove to be an advantageous coadjutor to the larger steamer *Douglas*, lately sent to China by the same parties. The total length of her saloon deck is 155 feet, and she has accommodation for 16 first-class passengers and 120 Chinese.

THE BANK OF HINDUSTAN, CHINA, AND JAPAN.—At the meeting of shareholders of the Bank of Hindustan, China, and Japan, held on the 10th at the London Tavern, the following resolutions were adopted:—1st. That five liquidators be appointed, namely, Captain Engledue, Messrs. Geo. Macnair, A. Kintrea, D. Chadwick, and Alderman Allen. 2nd. That any powers vested in the liquidators may be exercised by any three of their number. 3rd. That the shareholders' committee be allowed any expenses incurred by them not exceeding £100. The proceedings closed with a vote of thanks to the chairman, J. Mackrill Smith, Esq.

THE NEW COMMERCIAL DEPARTMENT OF THE FOREIGN-OFFICE.—Of late years we have observed with pleasure indications that the attention of our diplomatists has been more systematically directed to the commercial questions which are so intimately connected with the well-being of British interests. The commercial reports of British diplomatic and consular agents, to which we have from time to time called the attention of our readers, afford gratifying proof of the zeal and ability which have been devoted to a subject of considerable national importance, and we are glad to learn that since the seals of the Foreign-office were entrusted to Lord Stanley he has given his attention to the subject with a view to place the matter on a footing of permanent efficiency. Within the walls of the Foreign-office a special department has been created and placed under the charge of Mr. Charles Spring Rice, as superintendent, which will be charged with the correspondence relating to commercial matters; and we cannot but hope that the interests of the country at large will derive benefit from an arrangement which should put an end to that uncertain or divided responsibility which has been a source of complaint on the part of our commercial bodies, to such an extent, indeed, as to have led to the appointment of a Committee of the House of Commons to inquire into the subject.

THE CONCLUSION OF THE AUTUMN PLOUGHING MATCH SEASON.—The season for these matches is now virtually over, as one or two more at the most will be held before the end of the year. The last match of which notice has been received was that held at Goxhill, Lincolnshire, on the 28th ult., when a spirited contest took place, the palm being carried off by James Barker, Messrs. Ransome's well-known ploughman; thus increasing the position of that firm by winning their thirty-third prize this season. Messrs. Ransome have competed at thirty-six matches this autumn, of which number twenty-seven have been won by their own men, and two by local men using their ploughs. These, with four matches (at which Messrs. Ransome did not compete) won by district ploughmen, make up the thirty-three prizes above mentioned.

FOREIGN TRADE WITH CHINA.

(THIRD NOTICE)

PURSUING our rapid review of the official Reports of Foreign Trade with China for the year 1865, we come next in order to Hankow. With the geographical position of this great mart our readers are sufficiently familiar; we merely remark *en passant* that it derives much of its importance from its proximity to Wuchang, the provincial capital of Hupeh, which stands directly opposite to it. Wuchang is the central city of China, and to it flock traders from every portion of the empire, who bring with them not only the produce of their several districts, but a variety of tongues or dialects which modified by attrition one with the other combine to form a common language or *koine dialektos*, the most serviceable if not the most elegant form of the Chinese language which a new arrival can set himself to study. Hankow is not a walled city, and its dimensions put it out of the category of villages. It may best be described as a vast sempiternal fair whereof the booths have been transformed into permanent structures.

In foreign imports, piece goods form the staple, and each year shows a largely increasing demand. Thus against 447,427 pieces placed on the market in 1864, 723,914 were offered in 1865, or an increase of more than 60 per cent. Opium also shows an annual improvement, due in a certain measure to the edicts prohibiting the cultivation of native drug in Shansi and Szu-chuan. With regard to exports we have to note a decrease of tls. 763,000 as compared with 1864, but this may be ascribed to the deficiency of last year's tea-crop, a deficiency most salutary to the interests of stock-holders in England. Nothing was done in cotton, and indeed almost every article of export shows a falling-off more or less important, with the solitary exception of oil, in which there was an increase from piculs 92,952 in 1864, to piculs 173,796 in 1865. It is well-known that the carrying trade of the Yang-tsze is almost exclusively in the hands of American firms, whose steamers have driven the junks and lorchas out of the unequal competition. During 1865 three British steamers joined the river fleet and having made several voyages raised considerably the total of British tonnage registered at Hankow. Twelve sailing ships were laden against eight in the preceding year, and thus the total tonnage of British ships and steamers rose from 59,744 tons (1864), to 90,758 tons (1865). The American flag distances all its rivals in commerce in this particular instance, and the tricolor as yet floats over nothing more important than a few junks, mostly used by private houses for trade excursions into the interior. The tea districts of Hupeh are contained in the prefecture of Wuchang—a triangular space, two sides of which are formed by the Yang-tsze, and the base by a line joining Yochow with Kiukiang. In Hunan they are more scattered, but lie for the most part along the Hupeh boundary. Hankow furnishes three descriptions of coal, known respectively as "dry coal," "smoke coal," and "white coal." The average price of these varieties ranges between 600 and 800 cash per picul of eighty catties. The first is fit for house use, and the latter two for steam purposes. The coal fields are situated in the Hunan province, on the banks or in the neighbourhood of the Hsiang Kiang, but it is supposed that plentiful supplies are obtainable much closer to Hankow, where the hills present the appearance of being rich in mineral treasures.

We now pass on to Kiukiang, the statistics of which port have been condensed into the smallest possible compass by Mr. Commissioner WHITE. The import trade for the past three years may be said to have been stationary, piece goods and opium showing, on the whole, a gradual increase counterbalanced by a falling off in the less important staples. The value of exports for 1865 exceeded that for 1864, although both together barely make up the value of the export trade for 1863. We notice an increase of 70,000 piculs of Black and Green Teas as compared with 1864, and on the other hand, a falling off to the extent of 34,000 piculs in Chinaware, 8,600 piculs in hemp, 28,500 piculs in paper, and 22,200 piculs in red earth. 451 steamers entered and cleared during 1865, of which 129 were British and 322 American, being a falling off from the previous two years, although we are not informed to what extent. Kiukiang, unlike Hankow, is not in itself a place of importance, but derives all its advantages from its proximity to Wuchang, the centre of the wealthy districts that surround the Poyang lake. Communication between Kiukiang and Wuchang is however constantly interrupted, inasmuch as junks have to wait at Hukow for a favourable wind before they can attempt to stem the rapid current which sets into the river through the exit of the lake. Until, therefore, the prejudice

Digitized by Google

of the Government are so far overcome as to admit of steamers of light draught plying between Wuchang and Hukow or Kiukiang little advance in the prospects of Kiukiang can be reasonably anticipated.

Leaving then the consideration of Kiukiang, which promises little for the future, we turn to Chinkiang, and mark with satisfaction the gradual rise of this hitherto insignificant port. At one period Chinkiang was the seat of an enormous native trade, due to its situation close to the embouchure of the Grand Canal and its nearness to Nanking and Yang-chow. Of late years, since the rebel occupation, the city has so frequently changed hands, and the outlying districts have so constantly been made the battle-field of Imperial and Taiping legions, that the peace-loving traders have deserted their former homes, while poverty and silence have usurped the place of wealth and energy. But since the capture of Nanking the prospects of Chinkiang have been looking up, and there now appears to be some hope that the time and attention together with no inconsiderable amount of capital already expended by foreign merchants will at length bear fruit in the establishment of a lucrative trade. In 1862 large sums were invested in land, and a proposition was made two years later to build a wharf for the lading and discharge of steamers. The latter plan has not been carried out, and the proverbially bad anchorage off the city and foreign settlement militates against the trading capabilities of the port. The Governor-General has attempted to remedy this evil by digging extensive docks for native craft, and already numbers of Shanghai and coast junks repair to Chinkiang, and avail themselves of the advantages newly offered to them. Figures will display the growing demand for imports more satisfactorily than any mere verbal description. Thus under opium we note 4,910 piculs imported in 1865 against 1,716 in 1864; sugar, 45,000 piculs against 8,310; and shirtings 13,437 pieces against 2,193. These statistics, when taken in connection with the facts that Chinkiang stands at a distance of no more than one hundred and twenty miles from the sea, and that flood tides make up as far as the port, confirm the opinion that it is eminently adapted for supplying the plain of the Yangtze with foreign produce, and needs only favourable circumstances to ensure its development. By the Grand Canal it is brought into close relationship not only with the southern provinces, but with the wealthy and populous districts that stretch away to the north and north-east as far as the Yellow River. The confident anticipation of a lucrative trade so soon as the effects of the recent rebellion shall have completely passed away are therefore well grounded, and in the highest degree likely to be realised.

We now pass on to Ningpo, a port whose name at least is more familiar to the general public than is that of any other city in China, with the exception perhaps of Canton. Here again we are met by sad tales of rebel devastation, resulting in the almost total extinction of a once rich and remunerative business. Doubtless the growth of Shanghai has had an injurious effect upon Ningpo, but this alone would not account for the present insignificance of the trade as compared with its former importance. During 1865 a large quantity of Fychow tea, which had in previous years found its way to Kiukiang, was shipped from Ningpo, and so long as tranquillity continues, we may expect that, so far, the trade of the port will be an increasing one. Hopes are entertained with regard to the silk crop in succeeding years, the export since 1861 being represented as follows:—1861, 6,655 piculs; 1862, 1,507 piculs; 1863, 57.63 piculs; 1864, 948 piculs; 1865, 1,914 piculs. Although we have comparatively little hope of seeing Ningpo restored to its former opulence, we must allow that for the last six years it has not had a fair chance of asserting itself. The Taiping disturbances and their immediate consequences are sufficient to account for the decadence of trade during the period of 1860-1864, and the general aspect of the commercial world during 1865 furnishes an explanation only too satisfactory of the present state of depression.

Mr. MAY contributes a very minute report on the trade of Foochow, furnishing elaborate tables, wherein the imports from Hong Kong and each of the Chinese ports are carefully differentiated and assigned to their proper heads. We confess that a formidable array of tabular statements has upon us a confusing effect rather than otherwise, and as we wander from table to table we seem to ourselves ever on the point of clutching the information of which we are in search, yet ever failing in our endeavour. For reference, however, these tables are most valuable, and will no doubt find well-merited favour with critics who desire to be more minutely accurate than we are. The importance of Foochow dates from 1855 when the smuggling of opium, for which the port was since 1842 chiefly employed, gave place to a more legitimate if somewhat less profitable trade. It was in 1855 that some small cargoes of tea were shipped as returns for opium which had up to that time been invariably paid for in specie. Thence to 1860 the tea trade steadily increased in importance, but opium formed the only staple import. Even now, although manufactured goods and metals are not neglected, opium far outbalances them, as may be seen from the subjoined figures which also display comparatively the import trade for 1864 and 1865:—*Foreign Manufactures* (1864) value 1,011,833 dollars; *do.* (1865) 724,177 dollars; *Metals* (1864) 262,975 dollars; *do.* (1865) 305,397 dollars; *Opium* 1864) 4,347,338 dollars; *do.* (1865) 3,312,364 dollars. Almost all these goods are imported through Hong Kong. The tea season lasts from the middle of May to the end of January, the larger portion of the crop being shipped direct to Europe and America, while a few cargoes find their way to the coast ports and Hong Kong. Of 65,545,036 lbs. shipped as estimated during the season 1865-66 all but 8,888,076 lbs. was destined for Great Britain and British possessions, the Continent and the United States absorbing the extra nine millions. The tea most in demand for England is Congou, together with Souchong and a smaller quantity of Oolong. On the Continent Congou is likewise in most favour, the highly scented teas once popular in France and Germany being now discarded, and in consequence finding their way to England. Three-fourths of the tea shipped to the States consists of Oolong and the remainder of Congou and Souchong with a small quantity of green. Under the head of shipping we are supplied with the following information regarding the Foochow tea ships:—In 1864 103 vessels, of a gross tonnage of 58,114, cleared in tea for Great Britain, the United States, and Australia, but in 1865 the number fell to 95, representing 51,722 tons. In the former year 83 were British, and in the latter 84, the tonnage, however, fell off to the amount of 2,476 tons. We gladly close this article with the words in which Mr. MAY winds up his report, expressing at the same time our wish that the opinions he expresses were equally applicable to all the ports open to foreign trade in China:—"In "conclusion, it may be remarked that the present commercial "relations of this port seem to promise an increase in prosperity. "The native authorities are always willing to uphold the interests of foreign merchants, while the latter readily conform to "the trade regulations."

Our labours have now brought us as far down the coast as Amoy, where, as at most of the other ports, the gratifying fact is brought to light that foreign trade is gradually but steadily upon the increase. During 1864 the presence of a Taiping garrison at Chang-chow-fu interfered with the legitimate trade, but the recapture of that city was quickly followed by a renewed activity among the native mercantile classes. Thus while the returns for the quarter ended 31st March, 1865, exhibited a total trade amounting to tls. 87,899, those for the quarter ended 31st December, showed an increase of one hundred per cent., namely, tls. 168,854, the rebels having been compelled to evacuate Chang-chow in the month of April. At Amoy as well as at Newchwang and Tientsin the bulk of the trade is in the hands of natives, who while they appreciate more and more the advantages of shipping goods in foreign bottoms learn at the same time to dispense with the assistance of foreigners. Hence, while the agencies of Hong Kong and Shanghai houses are one by one in process of removal, a large increase is noticeable in the amount of shipping and tonnage. In 1865, 802 vessels, registering 276,319 tons, entered the port, against 661 vessels of 210,539 tons which entered in 1864. The total value of imports for 1865 was $12,974,724, of which $3,060,550 was due to opium. The arrivals of rice and drugs showed a large increase upon the preceding year, and the excess of value in 1865 over 1864 amounted to $3,555,099. In exports we note a falling off to the extent of $1,074,453, due principally to a diminution in the quantity of sugar and tea shipped. Although in estimating the total trade for 1865 there at first appears to be a deficit of $2,931 as compared with 1864, this is due to an unprecedented delay in the shipment of tea, a large portion of the 1865 crop not having been embarked until the early months of this year. We may therefore confidently expect a corresponding abnormal increase in the nominal returns for 1866.

Digitized by Google

Crossing to the little-known island of Taiwan, or Formosa, we encounter a remnant of the prohibitive system which for so long paralysed the trade with China. Rice, which is largely produced, can be exported only under pass to Amoy and Foochow. It might prove the source of a lucrative trade, but the necessary steps must be taken by the Chinese Government before any such result can be expected. Formosa now exports sugar, turmeric, aand sesamum, and consumes opium and piece goods. During 1865 a slight increase in all the more important imports was noticeable, and exports, with the exception of turmeric and lung-ngaus, displayed an advance upon the preceding year. So in tonnage; the entries for 1865 were 152 vessels (27,648 tons) against, 135 vessels (25,450 tons) in 1864. Mr. FISHER, who has compiled the report on Formosa, had at the time of his writing been but for a short period at his post. We are not, therefore, surprised to find nothing but bare tables of statistics; but we trust that the next volume of official reports will contain some reliable information regarding the physical features of the island.

The neighbourhood of Swatow was during 1865 seriously, disturbed by the rebels, who held the city of Chai-ying-chow and thus commanded the most direct route into the province of Kiangsi. As the latter province absorbs nearly all the opium imported into Swatow, the effect of this occupation was severely felt. Hence a certain depression in trade which did not, however, altogether mask the rising tendency of the port. The year under review showed a total increase in trade over 1864 to the amount of $2,314,191, and this, taken in connection with the facts just stated, promise well for the future now that the neighbourhood of Swatow is tranquillised.

Those who love to look back upon the good old times, and still entertain fond reminiscences of the faded glories of Canton, will be disappointed in the trade of that port. Still, we have to note an increase in 1865 of $7,352,000 due in great measure to large imports of cotton from Bombay, which, during the American war, had been diverted into other channels. In shirtings also a largely increased business was done, but this is accounted for by the short import of the preceding two years. Opium appears in the report as 2,371 chests, accompanied, however, by the significant note that these figures represent about one-tenth of the actual import, the remaining nine-tenths being smuggled. Mr. Commissioner Glover ALONE furnishes us with any details regarding Coolie emigration, although this subject, besides being of great interest, would appear to come naturally under the cognisance of the custom's officials. During 1865 ten vessels cleared from Canton for the British West Indies, Havanna and Peru, taking with them 3,443 Coolies. Shipping entered increased from 847 to 893 vessels, and the clearances from 855 to 886 vessels. The growth of Hong Kong has necessarily proved detrimental to Canton, but the transference of the tea emporiums to Hankow and Amoy has completed the work of destruction, and we therefore fear that Canton must for the future be content to accept the position of a third-rate port, having been fairly distanced in the race by its more successful rivals.

Having thus disposed of twelve of the ports open to foreign trade, we now turn to the appendix to the Reports, and take up the certified translation of M. GIQUEL'S voluminous memoir upon the trade of Shanghai. Commencing with a sketch of the condition of trade at the opening of the year, the writer points out the causes which led to the many heavy losses suffered by the mercantile community, as well as the unforeseen conjunction of circumstances which brought about satisfactory results, and gave encouraging promise for the future. It were hardly fair to criticise M. GIQUEL'S views after the fact, else we might point to the calamitous event of the last few days which contradicts the hopes entertained at the close of 1865 and commencement of 1865. During 1864 speculation had been rife, and enormous consignments of China produce were forced upon markets already glutted. Mail after mail brought accounts of ruinous losses upon tea, of cotton lying without demand and of the crash of old and universally respected firms. Meanwhile eager buyers were making purchases at enhanced rates, for the spirit of competition was not to be checked even by the anticipation of impending loss. Thus, as an example, black teas which opened at tls. 32 per picul were quoted towards the close of the season at tls. 38, but a partial failure in the crop and an increased care in preparation fortunately stepped in to avert the threatened calamity, and for the most part they sold at a profit. The Report before us is divided into chapters, bearing the following titles:—Imports, Division of Imports amongst Foreign Countries, Exports, Coast Trade, Shipping, Treasure and Duties Nationalities Established at Shanghai, and Summary. Imports showed an increase of five millions of taels, or thirty-five millions, against thirty millions. This was chiefly due to cotton and woollen fabrics and opium; in the latter the same cause operating that we have already noticed, namely, the prohibition of the culture of the poppy in Szuchuan and Shansi. The total opium trade of Shanghai for 1865 was 36,680 piculs, valued at eighteen million of taels, or one half of the value of imports for the year. A remarkable fact is elicited apropos of the opium trade, namely, that it has been but slightly benefited by the provisions of the Treaty of Tientsin. In 1856 the deliveries at Shanghai amounted to 33,672 chests, while in 1865 they had fallen off to 33,348 chests. Judging therefore from opium, it would seem that the opening of the treaty ports has done nothing for foreign trade, but the instance is an exceptional one, as a glance at the returns of all the other staple imports will fully manifest. With regard to cotton goods attention has of late been drawn to the "mildew," which during the opening months of 1865 was found to have damaged fifteen per cent. of the grey shirtings landed at Shanghai. Investigations into which we need not here enter led to the discovery that the state of the bales was due to the manufacturers having adopted silicate of soda as a stiffener in place of starch, which did not give a sufficiently white colour to cloth manufactured from inferior cotton. Complaints from this cause have gradually died away, but the inconvenience to merchants in China still continues, as Chinese buyers will no longer purchase by muster, but insist on opening the packages and inspecting each piece. In minerals there will be a constantly increasing trade until the mines of China shall be worked upon scientific principles. As, however, the Government has of late established arsenals and workshops for the production of guns and ammunition, it is to be expected that the folly of importing iron, copper, and the other metals and minerals used in the arts will be recognised, and the resources of the country be developed with the aid of European skill and enterprise. At present Chinese iron cannot be produced at so cheap a rate as foreign bar and nail rod, although the mines of Tien-tsin and Wanchow (in Chekiang) produce a metal fully equal to Nos. 1 and 2 Swedish. Coals are imported from England, Australia, America, Japan, and Formosa. The dearness of the three former has diminished the demand; Formosan coal has hitherto been produced in very inferior qualities, but Japan promises well. Up to last year the sale of coal in that country was a Government monopoly, and consequently the worst descriptions were sold at a fixed rate far above their comparative values. Now, however, many of the mine-owning Daimios offer excellent samples, the mines of Saka-sima and Okisima being the richest and most productive. The rice trade has fallen off in consequence of the extension of cultivation in the province of Kiang-su; but while this inflicts a direct temporary loss upon foreigners, it may reasonably be expected that the increased wealth and prosperity which it indicates will have their due effect upon other branches of trade, and leave a permanent impression upon shipping alone which cannot fail to suffer from the withdrawal of its chief source of employment. Great Britain takes the lead in the import as well as in the export trade, and this in virtue of the resources both of the mother country and of India. The latter derives an annual income of something like five millions sterling from the export of rice and opium absorbed by China, but for the future a diminution may be expected in consequence of the lessened demand for grain. This income is net, as India takes no produce in exchange from the Middle Kingdom. Manufactured goods and metals swell the importations from Great Britain direct and from Hong Kong, so that for the year 1865 fifteen millions of taels may be set down as a rough estimate of the total value of British imports into Shanghai. We cannot form a fair judgment of the American trade inasmuch as the war interrupted to a great measure mercantile operations. In 1865 about half a million of taels would probably represent the value of American goods placed on the Shanghai market, and a little over a million may be placed to the credit of the continent of Europe. The principal exports are, as is well known, tea, silk, and cotton. In teas and cotton there was a very considerable reduction, balanced, however, by an increase of 20,000 bales in the export of silk, which brought the value of goods exported in 1865 to very nearly the figure attained in 1864. When treating of the tea trade M. GIQUEL draws attention to the circumstances which brought about the losses suffered in 1864, and offers

Digitized by Google

an explanation which should induce us at least to pause before passing a sweeping condemnation upon foreign buyers. Thus the merchant, being ignorant of the language, is compelled to have recourse to native agents, who fix the opening quotations at their discretion, but who make it a rule that the price shall, at any rate, not be lower than during the preceding season. Knowing then that the earliest arrivals in London leave a large margin of profit, fierce competition sets in, of which the brokers (and not the producers) derive the benefit. When the first rivalry has died away and the clippers are loaded and despatched, it might be expected that prices would fall. But the Chinese are too "canny" for this, and by combination contrive to maintain the opening rates, and frequently even obtain an advance towards the close of the season. There are but two remedies; either to transact business without the intervention of native agents, or to form a counter-combination, and by holding out long enough defeat the brokers. The former is practically inadmissible on account of the difficulties of the language and the peculiar usages of the natives. The latter is in like manner not to be thought of; partly because it would be opposed to the liberal spirit of the age, and partly because English merchants have not the faculty of combination, possess only individual interests, and, as a rule, acts each one for himself without reference to the advantageous relations in which he might stand to his fellows. In every respect, therefore, the foreigner is at the mercy of the native, and the latter uses his power ruthlessly. Such were the general causes which led to loss in the tea trade. In 1865 another and special cause was introduced, namely, the opening of an immense number of small hongs presided over by men who were perfect novices. Their speculations, which were regulated by chance alone, overset the prudence of the practised hands, and hence "absurd "prices, inferior qualities, and a miscalculated export." The banks offered facilities to these rash operators; but experience has taught a useful lesson, and the first generation of inexperienced traders having been swept away by bankruptcy, there is little danger of a second generation obtaining money on easy terms. The transactions in Green teas were most satisfactory. Prices had fallen so low in consequence of the doubtful aspect of affairs in America, where most of the crop is absorbed, that dealers were anxious to realise at any terms, and exporters were then allowed to operate with security in making their bargains. When peace was proclaimed the stocks in hand and those yet unshipped were eagerly sought for, and prices of course immediately flew up. As it turned out, however, the requirements of America were so considerable that all the Greens exported were sold at a profit. Cotton proved a fertile source of ruin to many. During the American war the export was enormous, and even towards the close of the rebellion the eagerness of shippers may be judged of from the fact that in January and February, 1865, the export from Shanghai alone amounted to 90,000 piculs. Its high price and inferior quality marked China cotton as the first victim to the restoration of the American trade, and hence a rapid collapse among the foreign and native houses whose transactions for the past year had been for the most part in cotton. Silk, on the other hand, was most successful. In this as well as in tea and cotton buyers were rashly impatient at the opening of the season, and prices ranged accordingly. As it happened, the quality was fair, and it had been kept in good condition. But what saved silk merchants from participating in the calamities of the cotton exporters was the sudden failure of the continental crop in consequence of some terrible but unknown disease amongst the worms. Now that this has passed by purchasers should consider whether the exceptional circumstances under which their speculations for 1865 and 1866 have turned out will justify them in entering the market in 1867 and the ensuing year with the same confidence. The total export of Shanghai silk for 1865 was 43,000 bales, but would probably have reached 60,000 had not the occurrence of heavy and continuous rains in the mulberry districts destroyed the second crop. These figures are, of course, exclusive of 12,000 bales of Japanese silk, which during the same period passed through the port but was not landed. The coast trade for 1865 may be summarised in the following figures:—Native produce imported into Shanghai, 26,000,000 taels; whereof foreign countries took fifteen millions and a-half, Chinese ports five millions, while the rest was kept for local and provincial consumption. The export of Chinese produce to other ports reached eight millions of taels, a decrease of nearly two millions from 1864. As to shipping, it is to be feared that the days of high coast freights are among the things of the past. Steamers have to a considerable extent taken the place of sailing vessels, the import of rice and the export of cotton have fallen off, and thus, without any corresponding increase in the junk trade, foreign ships lie idle in Shanghai and the other ports. Perhaps on none will this alteration have more effect than upon the storekeepers, who derived a large profit from the supply of necessaries to the imposing mercantile fleet that in years gone by lay at anchor in the Whangpoo. Between thirty and forty steamers ply regularly between Shanghai and the coast and riverine ports, together with Hong Kong, Nagasaki, and Yokohama; but, so far as the storekeepers are concerned, these badly supply the place of the sailing vessels. In 1865 1,740 vessels making up 848,456 tons entered, as against 2,137 with a tonnage of 899,331 which entered in 1864. We cannot enter into the elaborate statistics of specie imported and exported; the results, however, are as follows:—The value of native and foreign merchandise imported into Shanghai from the coast fell far short of that exported, and hence large returns were made in specie. Local speculations in land, &c., lay dormant, and by these means conjoined large quantities of silver were received and retained, exchange ranging very low. The Bank treasuries were crammed with bullion during the greater part of the year, and, in order to get rid of it, considerable sums were sent by each mail steamer to India, there to be minted by the Government.

The most generally interesting chapter in M. GIQUEL'S report is that wherein he takes a bird's-eye view at the nationalities established at Shanghai. He classes the foreign community under English, American, German and French, Dutch being included under German and Swiss under French. In all, the settlements contain about 2,500 foreigners and 120,000 Chinese; an estimate which, though framed for December, 1865, fairly represents the present population. The British are *facile principis;* they are in fact the only importers; but while they introduce goods to the amount of thirty-six millions of taels, they take away no more than twenty-two and a-half millions. It is not to be wondered at, therefore, that they are able to appropriate the greater portion of the business in China, while at the same time London is regarded by the whole world as the general mart for Eastern produce. The Americans form the next important section; they are pre-eminent in shipping —that is to say, in steamers employed upon the coast and rivers. It is to be expected that when the Pacific line shall be opened a large proportion of the silk now passed through London *en route* for New York will be transported direct, but we have little fear of a serious diminution in British trade, as the demands of consumers and the wealth of the producing districts will in all probability keep pace one with the other now that tranquillity has been restored. The Germans and Dutch will suffer severely from the lowered rates of freight, as the greater portion of the coasting trade was carried on under their flags. Some unimportant continental goods are imported, but as a rule the commercial transactions of German firms consist in ordering manufactured goods from England and returning Chinese produce. France brings nothing to China, and takes away but little more. Out of 43,000 bales of silk shipped in 1865 France purchased 7,300 bales, of which no more than 2,500 were shipped by French houses. French piece goods cannot compete with the produce of English looms, and even if a market were found it is probable that such cottons and woollens would in the first instance be sent to London to be forwarded to China. The fact is that the French are not migratory; they are great, generous and noble, but commercial—*jamais!* We have seen that at several of the ports the native merchants have succeeded in establishing a foreign trade on their own account without the intervention of foreigners. In Shanghai this is not the case; foreigners and natives work together in harmony, and each class is satisfied with the trade which falls to its share. "Situated as Shanghai is near the silk dis- "tricts, and connected with them by magnificent canals—occu- "pying on the coast a central position which necessarily makes "it an *entrepot* for the ports of the Yangtsze as well as for the "North, Ningpo and Japan, trade made by foreigners has a "vitality of its own and rests upon such foundations that pro- "gress it must; whereas at second-rate ports it would decrease, "and be absorbed by native hongs. A crisis, however terrible "it might be, could not therefore deprive this port of its title "of 'The Commercial Capital of China;' nor will the cosmo- "politan republic, thanks to the good sense and practical spirit "of its citizens, ever cease to merit the appellation of 'The "Model Settlement.'"

REMOVAL OF OFFICE.

NOTICE.—On the 1st of January next, the Office of the LONDON AND CHINA EXPRESS and LONDON AND CHINA TELEGRAPH will be removed to No. 2, Cowper's Court, Cornhill (over the JERUSALEM).

NOTICES TO CORRESPONDENTS.

No notice can be taken of anonymous correspondence. Whatever is intended for insertion must be authenticated by the name and address of the writer, not necessarily for publication, but as a guarantee of good faith.

A REGISTER is kept of the addresses of all persons connected with the FAR EAST and reference can be made to the same by personal application at the office or by letter.

Any information required by Subscribers, in reference to Commercial or General matters in CHINA, JAPAN, SINGAPORE, *and other parts of the* FAR EAST, *will be supplied on application at the Office, where files may be seen of the Journals published in those countries.*

THE LONDON AND CHINA EXPRESS.

PUBLISHED on the departure of the Mails *via* Marseilles on the 10th, 17th, and 26th, contains a Summary of European, American, and General News; Commercial and Shipping Reports, and Special notices of Trade with the FAR EAST.

Subscription 54s. per annum, including Postage. Export Supplement 12s. extra.

The London & China Telegraph.

LONDON, THURSDAY, DEC. 13, 1866.

THE BISHOPRIC OF VICTORIA.

THE Bishopric of Victoria (Hong Kong) has at length, after a vacancy of nearly two years since the resignation of Bishop SMITH, been filled up by the appointment of the Rev. C. R. ALFORD, M.A., formerly of Trinity College, Cambridge, and now incumbent of Trinity Church, Islington. The reverend gentleman was successively appointed to the incumbency of St. Matthew's, Rugby, in 1841, and to that of Christ Church, Doncaster, in 1846. He subsequently for some years filled the important post of Principal in the Metropolitan Church of England Training College, at Highbury. Possessing a high reputation as an able preacher and a zealous promoter of the educational movement, he appears to have commended himself to the ecclesiastical and civil powers as specially fitted for the varied and multiform duties of the Anglican bishopric at Hong Kong. He has been known as a prominent member of the Evangelical body of clergy in London, and his nomination to the see of Victoria has been pronounced by the *Record* to be "a very excellent appointment."

We are authorised to state that a plan is under consideration of subdividing the English bishopric in China into two portions. We believe that the measure has received the approval of his Grace the Archbishop of CANTERBURY, and has probably ere this been officially submitted by him to the Foreign-office authorities, whose consent on behalf of Her Majesty the QUEEN is previously required in accordance with a recent Act of Parliament for the consecration of missionary bishops in foreign territories beyond the British realm. It is proposed that the Rev. W. A RUSSELL, B.A., of Trinity College, Dublin, and for nearly fifteen years a missionary of the Church Missionary Society at Ningpo, be consecrated bishop over the Anglican clergy in the northern parts of China, and possibly also in Japan; and that the British colony of Hong Kong, with the three southern ports of Canton, Amoy, and Foochow, remain under the jurisdiction of the Bishop of Victoria.

It will of course be understood that the latter portion of this scheme is still far from being definitively settled; and that at present we are only enabled to give this brief outline of the probable course of arrangements for two English bishoprics in China. It is probable that the consecration will take place in Canterbury Cathedral soon after Christmas, and that the new Bishop of Victoria will embark for his Eastern diocese in one of the Peninsular and Oriental mail steamers in the month of March next.

INTOLERANCE IN CHINA.

WE have yet much to learn regarding the secret springs which actuate the conduct of the Chinese officials and people. Metaphysical philosophers assure us that our powers of generalisation are the measure of our actual knowledge, and that the guiding principle of all research is accurate analysis. For nearly a century European observers have been engaged in the task of collecting and collating facts regarding China and the Chinese, while the more modern speculators have felt themselves justified in taking the results of these observations, and building a theory upon them. It is somewhat humiliating to have to confess that hitherto all such attempts at evolving general principles from an array of isolated facts have proved failures. We are still in that initiatory stage of inquiry which confines itself to the accumulation of individual instances. Future writers may perhaps arrive at "classification," "experiment," and finally "generalisation," but our task evidently is to collect materials for our successors. Any one holding the opinions ordinarily entertained with respect to Chinese character would be disposed to scout the idea that under no special provocation a movement would be set on foot having for its sole object the injury of foreigners. All classes have so much to gain from foreign intercourse, and the power of the foreign arms has been so fully asserted, that an opposition based upon nothing more solid than the old feeling of rivalry or the exploded theory of superiority, would seem almost incredible. We have just cause to boast that, having opened China by force, we are in a position to hold our own without further recourse to violence; that our motives and our practice are so well understood as to justify us in withdrawing our soldiers, and despatching our fleet to scenes where its presence is more immediately required. From the highest to the lowest, throughout all classes, whether official or mercantile, friendly relations upon both sides are maintained through the means of mutual concession and forbearance. Such is the condition of affairs as it is ordinarily presented to us; such also is the condition that we would naturally expect.

We have now, however, to contemplate a new manifestation of Chinese feeling displayed simultaneously in the north and in the south. At Canton the lower classes are, by our latest advices, described as in a state of ferment caused by the old grievance—the presence of the *Fan-Kwei*. The newly appointed Governor of Kuangtung has raised hopes that in the process of time he will annex Macao (and doubtless Hong Kong) and drive the barbarians from his quarter of the Celestial Empire. In no country is the intellect of the lowest class remarkable for brilliancy, and the Chinese coolie mind is unable to see the hopelessness of any such attempt, while at the same time is quite awake to the prospective advantages of any measure likely to produce confusion. Hence the popularity of the newly conceived opinion. Again, in the province of Hunan the ultra-Conservatives have published a proclamation abusing foreigners and recommending their expulsion. Taken for what it is intrinsically worth, this production may be characterised as a farrago of ignorant declamation and obscene abuse. While some clauses are so grossly indelicate as to forbid their reproduction in an English dress, others are exquisitely ludicrous. The baptismal oil used by the Catholics is described as an ointment boiled down from the corpses of priests; the immediate effect of conversion is the production of insanity developing itself in breaking ancestral tablets, attacking idols, and destroying temples. "But what is "most extraordinary," continues the writer of the proclamation, "is that the speed wherewith this madness takes effect depends "upon the distance a man is from his home. If he be one or "two days' journey, the madness breaks out after one or "two days. If he be only one day's journey the madness "takes place after one day; but it is sure to break out "a few hours after he reaches home." And so on through a dreary maze of folly and superstition. All this has a ludicrous side. Knowing the faint interest taken by the Chinese in any discussion of a controversial character we are disposed to smile at the misrepresentations so boldly made. The proclamation to which we refer goes farther than this, however. It closes in some such strain as the following:—"These obstinate bar- "barians and religious trampers engage in trade under the pro- "tection of the treaties and deceive the national authorities. "They may not be examined at the barriers or stopped by the "mandarins, yet all the while their hearts are sympathising with "the lawless banditti. The religious emissaries who are scat- "tered everywhere are merely spies, and as for us who now put "up with their pride and haughtiness we shall some morning "find it too late to save ourselves. It is reported that these "vagabonds have visited the tomb of CONFUCIUS, which along with "the temple they have destroyed. The descendants of the sage "feeling deeply aggrieved rallied together under the command of

Digitized by Google

"one Mao and succeeded in driving them out and destroying "them, since which event they have not dared to show their "faces. Let everbody, whether he be a scholar, a farmer, "a mechanic, or a merchant, draw his sword for combined "vengeance. Should any one hold back he is to be ac- "counted as one of these strange beings."

When the existence of this extraordinary document was made known to foreigners an attempt was made unsuccessfully to trace it to the officials. We are not disposed to think that it bears any internal evidence of having emanated from the authorities. More probably it is an attempt either to create a commotion for the mere sake of the commotion itself, or to excite distrust and dislike of the existing Government which stands pledged to foreigners. Chinese revolutionists are as sagacious as their fellows in the West, and seek first for a good watchword before they commence a popular movement. At one time it is "Tartar oppression and the restoration of a native dynasty;" at another it is "Mandarin exaction;" now it is "Death to the barbarians." In England such faction cries as the "Corn Laws" and "Universal Suffrage" are less formidable, but no less characteristic. It matters little to us as a general rule what tumults occur in China provided our political relations remain intact and the producing districts are not invaded; but when an appeal is made to the worst passions of the lowest class of society, and that appeal is directed against the presence of foreigners, we are constrained to notice an occurrence which may produce the most disastrous consequences to ourselves. Although for the most part foreign residents are confined within the narrow limits of the settlements, there are many in the interior of the empire, and their safety should be no matter of chance or speculation. But beyond this, the most serious aspect of this proclamation and others like it is the opposition thereby displayed to the extension of foreign influence. We shall not always be content with the means of intercourse with China that we now possess, and we are therefore the more anxious to clear out of the way of our further advance the decaying prejudices and wanton misrepresentations of an ignorant but formidable section.

KOREA.

A LETTER from Toulon says:—"Important news has been circulating here on the subject of events in the China and Japan Seas. The French Government entirely disapproving of any immediate attempt at an expedition against the kingdom of Korea, directed Rear-Admiral ROZE to undertake nothing more till further orders, as the massacre of the French missionaries required an exemplary chastisement which would be better deferred to a more opportune moment. Vengeance, though tardy, would only be more terrible on that account. There was an objection to engage in a hazardous operation before obtaining a full knowledge of the approaches and resisting power of that mysterious country."

The Paris press is silent about the intentions of the French Government for the very good reason probably that they have no information, but letters from the East appear from time to time in some of the provincial journals; thus a correspondent of the *Nouvelliste* of Rouen writes:—

"This is what occurred with respect to Korea. M. Bellonet, when the news arrived of the execution of our missionaries, sent a letter to Prince Kung, in which he pointed out the probability of French intervention in Korea. The Prince, who to the ordinary finesse of a Chinese diplomatist adds the enlightenment of a European, replied that the communication could not concern his Government, the vassalage which united the kingdom of Korea to the empire of China being purely nominal; and that consequently if France thought fit to interfere in Korean affairs, China had nothing to do with the affair. Our charge d'affaire, if my information is correct, then addressed himself to Admiral Roze, commanding the French squadron in China, and begged him to do what was best for French interests in Korea. Admiral Roze having but small means for attempting a landing, confined his action to the exhibition of the French flag on the coast of Korea, in order by such demonstration to prevent further persecutions. He maintained otherwise strict neutrality, waiting instructions from his Government."

The *Messager du Midi* says that the Government could not of course engage in an adventurous undertaking without well knowing the coasts and means of defence of this mysterious country, and then gives an account of Admiral ROZE's visit. It appears that the small flotilla (consisting of the *Primauguet*, steam corvette, and several small gunboats) was in great jeopardy; the soundings often varied five or six fathoms in a few hours, and the ADMIRAL found himself suddenly upon the coral rocks. A catastrophe seemed imminent, when a great wave carried the vessels into deep water again. The ADMIRAL'S vessel was at one moment in the greatest peril, perched upon a ridge of rock, with twenty-five feet of water all round, while the rest of the flotilla were in the mud, and unable to render any assistance. Having escaped from this perilous position, the ADMIRAL, steering by the chart of Captain GUERIN, which, it is said, was found to be remarkably accurate, made for the mouth of a river which was set down as one of the principal outlets of Korea. The vessels proceeded slowly up this river, and at four leagues distance came upon a large village where a number of soldiers were engaged in making defensive works; the ADMIRAL attempted to communicate with the people on shore, but they proceeded with their work without attending to him; so, finding his efforts fruitless, he knocked down a stockade with his guns and put the Koreans to flight with grape shot. It was remarked that the Korean soldiers were barefooted, that the greater part of them were armed with bows and arrows, but that some carried pikes and sarbacanes. The correspondent adds, rather naively, that the ADMIRAL, having no other object than the making of a *hydrographic reconnoissance*, in order to facilitate ulterior proceedings, quitted the inhospitable shore.

MR. FRANCIS BEILBY ALSTON is appointed to succeed Mr. G. Lenox Conyngham as chief clerk of the Foreign-office. Mr. Alston commenced his probationary career in the diplomatic service in December, 1839, and obtained the rank of senior clerk in April, 1857. He has for some time had charge of the China Department, and his loss will be very much felt in this special quarter.

A DEPUTATION of directors of the Telegraph Construction and Maintenance Company, and other gentlemen interested in submarine telegraphy, have had an interview with the Secretary of State for India with a view to the improvement of telegraphic communication between England and India. Lord Cranborne received the deputation with the utmost courtesy, and showed a just appreciation of the importance of this great question.

THE P. AND O. COMPANY'S SERVICE.

(THE TIMES.)

If England is gravitating towards Calcutta, and if the high road to India is now, as people say, the only remaining object of the foreign policy of Great Britain, some interest will naturally be felt in a history of the establishment by which the direct communication between England and the East is principally managed. Our immense commerce with India is conducted by a prodigious mercantile fleet, but the mail service and passenger service are specially performed by a single well-known company now just a quarter of a century old. The present year, in fact, has been taken as a species of anniversary, and the Peninsular and Oriental Company has embraced the opportunity of presenting to its shareholders and publishing to the world a connected history of its origin, development, and transactions up to the present time. We shall find some curious statistics in this narrative, and we shall find also some information of a character highly interesting at this period of financial derangement and commercial mistrust. The Peninsular and Oriental Company is an old joint-stock concern, claiming to have been administered with a due combination of discretion and enterprise, to have been "fairly remunerative" to its proprietors for five-and-twenty years together, and to be in a state of perfect solvency, unquestionable efficiency, and hopeful growth at the present moment. Such an example deserves, if only for its rarity, to be studied with some attention.

This great company, representing the largest and most important firm of carriers between England and India, now possesses a fleet of steamships equal to the navy of a second or third rate State. It owns no fewer than fifty-three excellent steamers of large tonnage and commensurate power, besides a squadron of auxiliary tugs and sailing transports. It has regular stations at almost every important seaport in the Eastern hemisphere. It carries upon an average about 16,000 first-class and 3,000 second-class passengers every year over a route of many thousand miles. It pays every year upwards of half-a-million sterling for coals, and keeps about 100,000 tons of this fuel constantly in stock. It feeds as well as carries its passengers, and its expenditure of stores in a single year comprised 15,000,000lb. weight of provisions, 1,500,000 bottles of wine, beer, and spirits, and 180,000 head of cattle and poultry. These figures will appear prodigious, but the fact is that upwards of 10,000 persons are victualled daily on board the company's vessels. Every now and then, in great national emergencies, the company performs transport service for the Government. During the Crimean War the Peninsular and Oriental steamers carried 60,000 men and 15,000 horses to their destination, and the same vessels at the time of the Indian Mutiny carried regiment after regiment to the East with rapid and timely despatch.

Let us now, however, look into the financial history of the company, and see with what practical results all this business has been conducted. The enterprise was originally projected on a modest scale, probably without any expectation of its actual development. A capital of £1,000,000 was thought sufficient in 1841 for the purposes in view, and though provision was made for a supplementary stock to the extent of £500,000 it was not until 1847 that this resource was employed. Seven years later, however, authority was sought and obtained for increasing the capital stock by another million, making a total of £2,500,000, represented by 50,000 shares of £50 each. The company was also, even in those early days, invested with the privilege of "borrowing powers;" but its limits in this

Digitized by Google

respect were not wide, and they have not been exceeded. Debentures to the amount of £800,000 must be added to the stock, so that the share and loan capital together amount to £3,300,000. Now, upon this capital, calculating the shares at par, the company has paid an average dividend of 9½ per cent. during the whole period of its existence—a return which, if not extravagant, may certainly be deemed satisfactory. The gross expenditure of the company is somewhere about £2,000,000; its gross revenue about £2,200,000, leaving the odd £200,000, or rather less, divisible as profit.

But now we come to the curious point in the story, which is that nobody is satisfied. The public, as our readers well know, breaks out periodically into complaints of the service as performed by the company. Anglo-Indians and Australians growl over the "monopoly" employed, like all monopolies, for the profit of the few, and protest angrily against delays, slackness, high charges, and indifferent fare. Other people talk of the magnitude of the subvention paid by Government for the mail service, and at the poor performance of the work. Last of all, the very shareholders grumble, so that the directors' narrative, though describing a marvellous establishment and a commercial success, is devoted from first to last to a deprecation of objections and discontent. The explanations offered to each class in turn are exceedingly amusing. It may well be asked what a proprietor can complain of who gets all but 10 per cent. for his money; but the truth is that this is an exceptional case. The dividends paid by the company represent this rate of profit only when the shares have been purchased at par, whereas many shareholders bought at a premium, sometimes of 60 or 70 per cent., and their receipts therefore bear a far more moderate proportion to their investments. At present the share list comprises 2,122 names, and of these proprietors, we are told, 689 are ladies and 153 clergymen; showing a considerable proportion of steady if not contented investors.

With respect to the complaints of the public, something, perhaps, is due to our natural propensities in this matter, but the directors are at the pains to explain to us that their passengers, if not of a peculiar class, are habitually in a peculiar humour. The traffic on this route is no pleasure traffic. Nobody would go to India if he could help it, even in a first-class cabin. "The company have not to deal with those who have made up a purse for a holiday and a run abroad, but with those who are engaged in the real battle of life, and who struggle to husband their resources accordingly." So, the customers are exacting, querulous, and hard to be pleased. They haggle over prices, estimate charges, and measure costs by performances, especially on the outward voyage. Coming home they are a good deal happier, and prepared to take things more easily. The directors, however, declare for themselves that they have kept pace with the times, and that the passengers have nothing to complain of either in charges or treatment. Fares have been reduced and comforts have been multiplied. Twenty years back, for instance, passengers never thought of ice as an article of the first necessity; now the luxury is expected as a matter of course, and furnished by the company at a cost of £7,000 a year.

We suppose most people will come to the common conclusion that something is to be said on both sides, and that though exiles on their way out may not be the most accommodating customers, a great company with a practical monopoly of business would be likely to look to its own interests rather keenly, and not to become liberal except under a little pressure. No doubt the Peninsular and Oriental Company has done good service, and will do good service again, but it has probably been for the advantage of the public that a stimulus was now and then applied to its "enterprise" as contrasted with its "discretion." It is, however, a real representative establishment of the country, and it might be hard indeed to find any other with which so many households have been brought, as it were, into personal and familiar contact. There is hardly, say the directors, "a family among the gentry of the United Kingdom" but has its name upon their books, and the fact itself is enough to communicate a more than ordinary interest to the history which we have thus related.

PENINSULAR AND ORIENTAL STEAM NAVIGATION.

The annual general meeting of this company was held on Thursday, the 6th inst., at the offices, Leadenhall-street; Mr. P. D. Hadow, the deputy-chairman, presided.

Mr. C. W. Howell, the secretary, read the report, which stated that the company stood possessed on the 30th September last of stock in ships, less the amounts deducted for depreciation, £3,043,164; also of leasehold and freehold property in England and docks and premises at Calcutta, Bombay, Hong Kong, Singapore, and other stations, £259,090; stock of coals, naval and victualling stores, amounting to £473,856; also cash at bankers, investments, bills receivable, balances in agents' hands, and debts due to the company, £368,181, making the total assets £4,144,290. The capital received from proprietors at that date amounted to £2,300,000, on debentures to £626,500, and in anticipation of the ninth and tenth instalments £34,605;—total capital £2,961,105. The liabilities of the company in bills payable and otherwise amounted to £724,171, making the total capital and liabilities £3,685,276, showing a surplus of £459,015. The revenue account showed that the gross revenue or income of the company, from freight, passage-money, postal service contracts, and other sources, amounted for the twelve months ending the 30th September last to £2,243,076. The expenditure and charges on revenue, including interest on debentures, with the reserve for insurance, and outlay for wear and tear, and renewal of ships, for the same period, amounted to £2,094,493, leaving a net profit of £148,583. From this was deducted £77,000 for dividend of 3½ per cent. for the half-year ending the 31st of March, and £67,500 for the half-year's dividend, now recommended at 3 per cent., leaving a balance of £4,083. The annual premium of 5 per cent. on the estimated value of the floating property of the company, covering ordinary sea risks and credited to the proprietors' underwriting account for the year ending 30th September, 1866, was £110,000. From this was deducted value of steamship *Jeddo*, wrecked on the Choul Kader Reef in February last (less depreciation) £53,200; also damage to the company's property at Calcutta by the cyclone in October, 1864, £770; leaving a balance of £56,030, out of which it was proposed to pay the proprietors at the rate of 2½ per cent., leaving £363 for the reserve fund, which would then amount to £459,015. The tabular statement of the company's fleet showed that there were 10 ships—five screw and five paddlewheel—on the Mediterranean service; seven screw on the Calcutta and Suez line; 18 screw on the Bombay and Suez and Bombay and China lines; four screw on the Ceylon and Sydney line; and two paddle and five screw on the Hong Kong and Shanghai, China Coast, and Japan lines, making together 46 ships, aggregate tonnage 74,341 tons, and 16,580-horse power. There were five ships under repair of an aggregate tonnage of 8,928 tons and 2,300-horse power. These, together with steam-tugs, transport, store, and coal ships, amounted in the aggregate to 95,963 tons Customs' measurement, and to 19,655-horse power. The *Surat*, after performing a complete voyage on the Southampton and Mediterranean lines, during which she steamed 8,858 miles, at an average rate of 11 knots per hour, was despatched to Calcutta, *via* the Cape, on the 7th ult., for service between that place and Suez. The *Arcoca*, *Malacca*, and *Sunda* had likewise been finished, and sent to the East. The *Arcoca* made the passage from Southampton to Bombay in 65 days, the *Malacca* in 55 days, and the *Sunda* in 58 days. The *Geelong* left Southampton for Bombay on the 9th June, and arrived out on 30th July in 51 days. All those voyages were made under easy steam. The *Candia*, *Nubia*, and *Delta* were again in active service, each having received new boilers and a thorough repair refit. The first brought to Suez, two days within the contract time, the Calcutta and China mails, delivered on the 27th ult. The *Granada* had been sold to one of the princes of Japan on advantageous terms. The number of vessels under extensive repair had of late been unusually large. This had arisen from the circumstance that many of the company's ships were built about the same time and the necessity for new boilers and a general refit came round at nearly the same period. Several of the finest ships,—among them the *Pera*, the *Simla*, the *China*, the *Ceylon*, the *Nubia*, the *Candia*, the *Nepaul*, the *Benares*, the *Emeu*, the *Salsette*, and the *Delta*—had now undergone a complete renewal, and some had still to be laid up for the same purpose. The repairs and renewals of the last nine of the ships came into the accounts for the financial year, and the consequence was that the amount expended in that way had exceeded the total of that spent in repairs and renewals, together with the sum set apart for depreciation in former years, when the repairs had been of the average amount. For the year 1865 the cost of repairs stood at £294,459, and the amount set apart for depreciation was £115,000, making together £409,459. In the accounts for the present year the amount expended in repairs and renewals alone reached the unusual sum of £439,400, but as the vessels repaired and renewed during this and the preceding year had been rendered in many respects as good as new, the directors had not considered it necessary to charge any reserve for depreciation against the revenue of the last financial year. The Board looking forward to the possibility that the company might soon be invited to submit tenders for new services, they consequently petitioned Her Majesty in Council for a supplemental charter, authorising an addition of £1,000,000 to the present capital of the company, by the creation and issue of 20,000 new shares of £50 each. The directors greatly regretted the loss by the death of two members of the Board in the last half-year, Mr. Plowden and Captain Nairne, who had discharged their duties with great assiduity. The vacancies, in accordance with the deed of settlement, were filled up by the appointment of Mr. E. Thornton, C.B., and Mr. G. C. L'Estrange, subject to the approval of the proprietors. The Board proposed, prior to the half-yearly meeting next June, to nominate Mr. H. Bayley, now one of the assistant managers, to the post of director. The Indian and China mail contracts, taken in 1853 and 1854, were terminable by the Government or the company on 12 months' notice, and the existing Australian contract, which commenced in February last, was terminable in like manner on two years' notice. Those contracts comprised the whole of the mail services now worked by the company. The Parliamentary Committee of 1866, after a most searching inquiry, recorded their "opinion that the services under the several contracts to which reference had been made had been well performed," and the directors felt that the facts and evidence submitted to them could have led to no other conclusion. The subject was now under the consideration of the several departments of Her Majesty's Government. The directors had completed their arrangements for a trial of extra voyages between Bombay and Suez; the first steamer would leave Bombay on the 19th of January, and Suez about the 5th of February next, in correspondence with the steamers to leave Southampton on the 20th, and Marseilles on the 28th of January. A service four times a month would then be temporarily established. In the face of the existing stagnation of trade with the East, the directors congratulated the proprietors on the fact that they were enabled to recommend a dividend of 3 per cent. for the last half-year, making, with 3½ per cent. declared in June last, and 2½ per cent. from the underwriting account, a total of 9 per cent. for the year. The amounts now available would be—for dividend 3 per cent., and underwriting account 2½ per cent., together 5½ per cent., free of income-tax, payable in one warrant on Friday, the 28th inst.

The Chairman, in moving the adoption of the report, expressed regret that Mr. Anderson, the chairman, was unable to attend in his place that day in consequence of illness. It was an interesting meeting in respect of its being twenty-five years since the first annual meeting of the company was held in St. Mary-axe, when the company had a much smaller undertaking than at present. It had been carried out from the commencement with prudence in every way, and with due enterprise. The founders of the undertaking would, he trusted, be always held in grateful remembrance. The company had been of vast importance to the country by extending commerce to the East. His worthy friend, the secretary, had compiled an account of the progress of the company up to the present time, for which he deserved the thanks of the proprietors. It showed how the Government had assisted them to the undertaking, and the parsimonious conduct of the authorities. They never had a tender accepted by the Government through favour to the company, but because it was the lowest, except in one or two cases when another company tendered for contracts and came to an untimely end. They owed nothing to the Government for their support; all the company had obtained had been fairly earned and fairly won. The capital account was now larger than ever it was before, owing to the call on the new shares, but the money had been judiciously expended on property abroad and would be remunerative to the company. The ships that had been renewed were now as good as new ships the company's fleet was in a perfect state of efficiency, and he

Digitized by Google

could say that commanders and officers were able and efficient in every respect. The new capital they proposed to get power to raise would not be lightly expended. They would only expend what was requisite for the purposes of the company. When they got the supplemental charter they would call up £5 a share, and he might mention that the ratio of the new share capital to the old would be as 2 to 5. The business of the company had suffered to some extent from the late panic and the commercial crisis, but he was glad to say that recent advices from the East showed that things there were improving. The experimental service had long been thought of by this company. The experimental line from Suez to Bombay had been proposed to the Government eighteen months ago, but owing to official delays the matter had been allowed to remain in abeyance. They were, however, going to put the vessels on the route to see how the service could be conducted with advantage in case it should be adopted. He then adverted to the Parliamentary Committee on Communications with the East, before whom many rash statements were made, being the reverse of accurate, and those were completely refuted by their excellent secretary, who had compiled facts and figures in support of his statements. Their company had come out of that searching investigation with credit, and it was acknowledged by the committee that the service by the company was well performed. Their establishment in Bombay had been enlarged for the repair of ships, and was of considerable value to them.

The motion for the adoption of the report having been seconded,

Mr. GLIDDON called attention to the comparatively small sum paid by the Government for the conveyance of the mails, which he stated was at the rate of a penny per ton per mile, being the same rate as that paid for the conveyance of coals on the railway.

The SECRETARY remarked that according to measurement it was little more than a halfpenny a ton per mile.

Mr. JONES suggested that greater facilities might be afforded to second-class passengers in their ships, or that, if that could not be done, a separate service might be organised by the company for that purpose; at the same time he thought the present very efficient service of the company and speed of the ships could not be performed at less expense. He referred to the excellent conduct of Captain Hector in one of the company's ships during a typhoon, which he thought proved they had not only able commanders but efficient crews.

A discussion ensued, and after explanations by the CHAIRMAN the report was unanimously adopted. A dividend of 3 per cent. for the past half-year was declared, together with a payment of 2½ per cent. for the year ending the 30th of September last out of the underwriting account, making together 5½ per cent., payable on the 28th inst.

On the motion of the CHAIRMAN, Mr. E. Thornton, C.B., and Mr. G. Carleton L'Estrange were unanimously elected directors of the company.

On the motion of Dr. EVANS, seconded by the CHAIRMAN, the best thanks of the meeting were unanimously tendered to Mr. Howell, the secretary, for the important facts he had compiled in respect of the public services performed by the company.

The proceedings concluded with a vote of thanks to the chairman.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, DEC. 6.

The sections of the Second Chamber are still busy with the examination of several Bills, which will be partly discussed on Friday next. In the first place will be brought forward the Bill by which it is proposed that the State should lend to the company of the State Railways, which is for the moment in monetary difficulties, a sum of two and a-half million of guilders. This proposal meets with much opposition, so that it is not at all improbable that it will be rejected. As to the Budgets, they will not come on for discussion this year, and credit laws are to be granted to all the departments. This resolution resulted from the fact that there remains too little time before the 1st of January, when, according to the fundamental law, the budgets must be settled, to discuss them thoroughly, and the new members, who are brought into the Second Chamber by the last elections, cannot have a sufficient knowledge about this matter to give fundamental motives for their vote. The future of the Cabinet is not very bright. Again, the Liberal party was reinforced by the election that took place yesterday at Groningen. One of the old Liberals, Mr. W. H. Dullert, was duly elected. The other Liberal candidates, Messrs. van Bosse and Cremers, resigned some days ago.

Much sensation was created here by the news, which was brought by the last East India mail, that Mr. Sloet van de Beele, the ex-Governor of the East Indies, had not published the resolution of Mr. Myer, the Minister of the Colonial Department, suspending the former resolution of Mr. Fransen van de Putte, abolishing the forced services of the Indian natives to the Heads. Although I sincerely regret that the order of Mr. Mye, was given, I however think that it was the duty of the Governor-General to publish the resolution. I am of opinion that the Liberal papers are wrong in defending such an act, which is vehemently disapproved of by the Conservative papers. You know that Mr. Sloet will return homeward within a few days, and it is with much regret, that we were informed by the telegraph from Messina that his wife died on the voyage. I do not think that he will be received here very kindly by the Cabinet, notwithstanding he took the above mentioned measure, undoubtedly in the interest of Java.

The great masonic festival to celebrate the 50th anniversary of the appointment of Prince Frederick as national Grand-master, took place on the 20th of Nov., in the Crystal Palace, Amsterdam. A very large number of brethren, comprising deputations from lodges in England, Germany, France and Belgium were present, and not less than 1,500 of them sat down to a banquet. The chair was filled by Mr. I. C. van Lennep. After dinner the usual loyal and masonic toasts were proposed and responded to with great spirit. Magnificent cadeaux were presented to the Grand Master, who resigned that day the honourable dignity, and amongst them appeared large and beautiful contributions from the lodges of the Far East. The Prince himself presented to the Grand Lodge a masonic bibliotheke, comprising more than 5,300 books, several medals and prints, and 2,000 autographs. The successor of the Prince is not yet known.

The Minister of War has taken the very important resolution to pull down several of the fortified towns, amongst which appear the fortresses of Maestrichs. You will know that this town is the capital of Limburg, and certainly the Ministry could not give a more essential proof that it despises the threatenings of Prussian semi-official papers, than to take this measure. Nothing is heard of the negotiations between the Court of Prussia and our King as Grand Duke of Luxembourg, notwithstanding they have continued since the 15th of last month.

You will remember that the question of the Easter Scheldt with Belgium mentioned in my former letters is still unsettled. The Belgian Government now has proposed to submit the question to an international commission. Our Government, however, declined to accept that offer.

I sincerely regret that I am obliged to convey very bad news about the rinderpest, which is increasing now in a frightful degree. According to the last official returns not less than 3,257 heads of cattle were attacked in one week in three provinces, against 1,595 cases in the preceding week. The cattle plague is also now spreading in the other provinces. The resolution of the Minister of the Financial Department that no cattle will in future be appropriated for the purpose of being slaughtered to prevent the spreading has created much regret. The expenses, however, become so very heavy that the Minister felt himself obliged to apply this measure. The sanitary condition of the country is also bad. The cholera epidemic has not yet disappeared, and during last week 89 cases occurred in several places.

From Amsterdam we hear very bad news; not only is it officially stated that the finances of Mr. Sarphati, the well-known banker, who died some time ago, are *en deconfiture*, but also that Mr. Heshuizen, the president of the Amsterdam North Sea Canal Company, member of the Amsterdam Council and of the provincial states of North Holland, has disappeared, leaving a deficit of 9,000,000f. Others, however, estimate it at only 2,000,000f. It remains, however, whatever the amount may be, a very regretful fact. Amongst the debts of Mr. Sarphati is one to the Crystal Palace of 130,000f. You know that he was the erector and president of that building.

Comp aints are made from the district Almelo, that briberies took place at the last election in that district. A judicial inquiry is now being made there. This is the first time that such an inquiry has taken place in this country.

Some days ago the first Bible was published here by the E.I. Missionary Society in the Soenda language. The translation was made by the missionary G. I. Grashuis, from Rotterdam.

The *Tyd*, a Roman Catholic journal has again opened a subscription in behalf of the Pope; but it has not the same success as last year; up to this time only 11,500.. have been subscribed.

By the stormy and very dirty weather that has prevailed here during the last few days, we have to regret many shipping disasters on our sea coasts. The greatest loss experienced is that of the East Indiaman *Elizabeth*, which ship, with a full and valuable cargo, sunk on the 27th of November in sight of Brouwershaven. The crew, except four military passengers, was happily saved. The ship and cargo were insured for an amount of 5,000,000f. by Rotterdam brokers.

Last Saturday the Japan war steamer *Kayoo Maroo*, which was built here for account of that Government, sailed from Flushing for Japan, First Lieutenant Dinauy being commander.

COMMERCIAL.

COFFEE.—Since our last report the market remained in a very favourable position. There is much demand for the parcels sold in the last Trading Company's auction, but holders decline to operate without a further advance. The private transactions are but of little importance, there being want of stock. That of the Trading Company is 345.616 b., against 252,209 b. in 1865, whilst the total in Holland stock is 375 200.

SUGAR.—For Raw Sugar the market is firm, but a few parcels are offered. In refined some transactions took place. The unsold stock of raw Java (Trading Co.) is 20,695 mats, against 21,647 mats in 1865, whilst that on warrants amounts to 82,077 mats. The private stock is 9,462 mats.

RICE.—Nothing of importance occurred since my last report.

SPICES.—The Trading Company delivered very great quantities, especially of Mace, for which article there was much demand. LD was willingly paid with 98c., but nothing can be bought now under 99c. The unsold Trading Company's stock amounts now: Nutmegs, 271 casks; Mace 50 casks; Cinnamon 214 fard.; Pepper 983 cases. The stock on warrants consists of 5,054 cases Nutmegs, 882 casks of Mace, 3,141 casks of Cloves, 1,055 fard. Cinnamon, 183 b. of Pepper.

JAVA INDIGO.—There is still a good demand at former prices. Some parcels will be brought in the market shortly.

BANCA TIN.—The market has been very active last month, and a good business was done at advancing prices. Since our last report 500 slabs were sold at 47¼f.; 500 at 47½f., and 1,200 slabs at 47¾f. The unsold Trading Company's stock on the 1st of November was 60.634 slabs, against 90,300 slabs in 1865; the stock on warrants was 177.855 slabs.

HIDES.—The following parcels were sold here by inscription, at prices which did not transpire:—1,674 p. Sourabaya Rinder ex Van der Palm; 174 p. do. ex County of Lanark; 92 p. do. ex Sandringham. Stock of East India, 25,776 p.

ARRACK.—A good business was done in this article; the following parcels were sold:—100 casks Batavia O.L. ex Marinus; 50 casks Batavia ex Lady Alice; 14 casks do. O.G.L. ex Lumina Elizabeth; 80 casks Batavia ex Advance.

COCOA-NUT OIL is kept at higher prices; prime Ceylon is paid with 35f.

RATTANS.—The following parcels were sold:—170 piculs ex Zeemanshoop; 100 piculs ex Van der Palm; 452 piculs ex India.

DRUGS.—Camphor: Without transactions, while buyers decline to operate at the actual high prices; the nominal quotations are 80c. for Japan and 75c. for China. Cubeben: 472 b. were sold at secret prices. Cassia Lignea: By want of stock there are no transactions to report; the nominal quotation is 73c.; Cassia Vera: 21 to 24c. Japan Wax: There is want of fine qualities. Ginger (preserved): *Ad idem*. Gum d'Amar: 35 to 36c.

TOBACCO (JAVA LEAVES).—Since our last report very important auctions took place, which gave the following results:—

On the 20th inst. the Trading Co. will sell in auction 3,332 b. Java, trade marks, Havana, PAJV, AJZ, and BW. The rest of the private stock, consisting of about 9,000 b. Java, will be offered on the 29th inst.

MANILA CIGARS.—150 mille 2 a Cortados 1865, offered in auction, were sold at 31f. to 32f.; 75 mille 2 a Habanos, 1865, offered in the same auction, were bought in, whilst 480 mille 2 a Habanos, 1865, more or less damaged, sold at 15½f. to 33½f.

MONEY.—The different funds showed greater strength since our last report under the satisfactory state of the money market. Dutch funds made a rise of 1 to 1½ per cent., which was firmly maintained; foreign funds however continued somewhat dull, except some speculative sorts. Dutch, Two-and-a-Half per Cents., 53½; Three per Cents., 63 9-16ths; Four per Cents., 86⅜. Spain, Two-and-a-half per Cents., 30 5-16ths. Portugal, Three per Cents., 41. Russia, Five per Cents., 92.

CHANGE.—London: 3 months, f.11·66½; 2 months, f.11·69; Short, f.11·76½. Paris: 3 months, f.46 35: 2 months, f.46·47½; short, f.46.75. Hambro: 3 months, f.34·70; 2 months, f.34 82½; short, f.35·10. Bremen: 3 months, f.188. Berlin: 3 months, f.170 50; short, f.173.

INSURANCE PREMIUMS.—The insurance brokers have raised their premiums and fixed them as follows:—For Java and Sumatra, from 1½ to 2¼ per cent.; from Java and Sumatra, 2½ to 3 per cent.; for China direct, 3⅜ to 3¾ per cent.; via Java, 3½ to 3¾ per cent.; from China direct, 4 to 4¼ per cent.; via Java, 4¼ to 4½ per cent.; for Japan direct, 3¼ to 3½ per cent.; via Java. 3½ to 4 per cent.; from Japan direct, 4½ to 4¾ per cent.; via Java, 4½ to 5 per cent.; for Australia, 2½ to 2¼ per cent.; from do., 3½ per cent.

SHIPPING.—ARRIVALS.—Nov. 22, at Texel, from Batavia, Dordrecht; Nov. 23, Susanna Johanna; Nov. 25, at Hellevoet, from Batavia, Comus; at Texel, from Batavia, Baron van Hardenbroek; Nov. 29, from Sourabaya, Java; Nov. 30, from Batavia, Johanna; Dec. 3, from Batavia, de Vrede; Dec. 5, from Mauritius, Dex Genii, with the cargo of the disapproved ship Jan Daniel from Batavia.

DEPARTURES.—Nov. 29, from Brouwershaven, for Batavia, Nederland and Orange, Helena and Anna, Elizabeth, and Maarten van Rossem; Nov. 30, from Texel, for Kanagawa, via Batavia, Zelanak; for Batavia, Azia, and Boni; from Zierikzee, for Melbourne, Zeelandia; Dec. 2, from Texel, for Batavia, Aegidia, and Pauline; Dec. 1, from Flushing, for Japan, the Japan war steamer Kayoo-Mar.

PASSENGERS OUTWARD.—For Java, per Elisabeth, Mr. Fraissines and family, Mr. Douselaar and family, Mr. Valkenhoff and family, Mr. Van Vauren and family, Mr. Bruno and family, Mr. Feikens and family, Misses Gerson and Cohen Stuart; Messrs. Moulin, Spanjaard, Sturzenegger and Knirim; per Telanak, Messrs. N. J. van Gent, J. H. Heyman, L. Rozette, F. van Heumen, H. Catenius, L. Dingsman, J. E. Henneman, G. F. Hagen, and J. Bouger; Mrs. A. Becker, Misses H. Becker, E. A. Collard C. E. Sorg, and E. H. Popken; per Azia, Mr. J. d'Hamecourt; per Boni, Mr. W. Ter Harr.

PASSENGERS ARRIVED.— Per Dordrecht, Mr. Hinze and family, Mr. Brouwer and family, W. Dart, V. D. Henvel, and Strengnaert.

RUSSIA, GERMANY, &c.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, DEC. 7.

A communication made to the Russian Geographical Society states that in consequence of the unsettled state of Affairs in Western China, owing to the revolt of the Dunganes, the immigration of Chinese to Siberia is largely on the increase, so that the number in August last amounted to more than 20,000 souls, most of whom have settled in the district of the Seven Rivers, and belong to the Chinese clans of Sibo and Solon.

The recent discoveries of gold in the vicinity of the Amoor have attracted hither so many greedy persons from the surrounding districts that agriculture has suffered severely, and the prices of all provisions have risen to a fabulous height; to prevent which for the future the Government have thought proper to interfere, and a notice has been issued that all persons intending to seek for gold to the eastward of Nertschinsk, in the direction of the Argoon, must first obtain permission from the local authorities. This measure has made a favourable impression.

From Vienna we learn that the long-projected commercial and political expedition to the Far East is finally decided on, and will sail from Trieste early in the spring. It will consist of a screw frigate and a corvette, and be placed under the command of Vice-Admiral von Tegethoff, who distinguished himself in an action with the Danes two years ago off Heligoland, and defeated the Italian fleet this last summer in the naval affair off Lissa, in the Adriatic. The expedition will take out several valuable presents for the potentates of Siam and Japan, among which will be a marble statue of the Emperor of Austria, a splendid album containing photographic views of various cities of Austria, a collection of modern arms, and an assortment of Austrian textile and other manufactures, including specimens of glass and crystal, porcelain, leather, carpets, damask, perfumery, stearine candles, clocks and watches, musical instruments, basket work, parquet flooring, saddlery, cooking apparatus, wine, toys, and painted window-blinds. At first, some demur was made by the Emperor on the score of expense, but as it is an object of great national importance, and it was further shown that the two ships of war hitherto employed on the coast of Mexico, and at the disposal of the Emperor Maximilian, were under orders to return home, he was induced to give his consent.

A gun manufacturer at Bremen has invented a new light cannon, which is spoken of as eminently practical for arming merchant vessels exposed to attacks by piratical junks. Experiments made in the presence of some of the leading shipowners of that city were considered so highly satisfactory that a number of these guns have been ordered for arming their vessels employed in the Chinese seas.

Accounts have been received by the underwriters of this city of the total loss of the Bremen brig *Edward*, Capt. Zinke, as well as the Bremen barque *Perle** and the schooner *Wille* in the typhoon of the 29th of Sept., near Taiwan-foo, on the coast of Formosa. These vessels were heavily insured here. Perhaps the above may afford some explanation of the mysteriously worded and unintelligible telegram mentioned in your last issue.

The Board of Trade here gives notice that after the lapse of six months from the 24th of November last an election will be held to fill the vacant Hamburg Consulate at Sourabaya. Applications from candidates, accompanied by testimonials, to be sent in to the Secretary of the Board of Trade.

A Hamburg sailor who deserted two years ago from the Hamburg ship *Bruno*, Capt. Haufe, (belonging to Messrs. A. J. Schoen and Co. of this city) at Hong Kong, having found his way back, surrendered himself voluntarily to the authorities a few days ago, and was condemned to a month's arrest. When one considers the inconvenience to which shipowners are exposed from the desertion of their seamen in foreign ports and on distant stations, and the difficulty and expense of finding capable substitutes, or the danger of going to sea short-handed, the leniency of the Hamburg laws cannot but be considered as extremely out of place.

Another iron steamer has just been successfully launched from the building yards of Messrs. J. C. Godeffray and Co. of this city, and is fitting out for employment in the China coasting trade. She has been christened the *Samoa*.

The President of the Hamburg Association for the Relief of Sick and Wounded German Soldiers, victims of the late war, acknowledges in the local papers the receipt of $332 50 cents., producing 955 marks and 15 schillings banco, collected from 36 donors (whose names are given) at Swatow, and remitted by Herr H. A. Dirks, the Hamburg Consul at that port.

COMMERCIAL.

COFFEE.—A fair amount of business has been done at full prices, and several cargoes now at sea were sold for arrival. Sales 20,000 bags. Present stock, 15,000,000 lbs.; imported this year 72,300,000 lbs.

SUGAR.—Raw, calm, and prices drooping. In refined but few transactions, owing to the almost total absence of stock.

RICE.—The late advance is fully established, but the business done was not so active.

SPICES.—There have been no sales made by importers, and only a few transactions of no magnitude by dealers for the execution of consumptive orders.

SPELTER.—Since last report a favourable reaction has taken place. At the beginning of the week various parcels (together 12,500 centners) were taken at 14 mks. 3 sch. bco. to 14.4 for spring delivery, since which the following sales are reported:—

2,000	centners, ex warehouse at ..	14	Mks.	3	Sch. Bco.
1,000	„ per March and April	14	„	4	„

Naval and Military.

We are informed that Sir Harry Keppel, K.C.B., has been appointed to the command of the India and China station, in the place of Admiral Thirz. We trust that vigorous dealings with pirates in the China waters will prove Sir Harry to be the "right man in the right place."

Capt. James G. Goodenough, R.N., appointed to the Victory, flagship at Portsmouth, for service in the iron frigate Minotaur, has joined the former ship and entered upon his duties in superintending the outfit of the Minotaur, as flagship of the Channel squadron on its assembling at Spithead in May next. Captain Goodenough, who is only 36 years of age, has been employed over 19 years at sea. He entered the navy in 1844, and after serving some time in the Excellent, gunnery ship, was advanced to lieutenant June 23, 1851, and from September following until May, 1854, served on the south-east coast of America in the Centaur. He was next employed for a short time in the Calcutta, 84, at Devonport, and from February, 1855, to the close of the Russian War served in the Hastings. From Sept., 1856, to August, 1857, he was senior of the Raleigh, 50, on the East India and China station, and from the latter date until promoted to commander, February 26, 1858, served in the Calcutta, 84, on the same station. He continued in the Calcutta as second captain until July, 1859; and in September following was appointed to command the Renard, which he retained until September, 1861. He was second-captain of the Revenge, 73, attached to the Channel Squadron, from July, 1862, until posted, May 9, 1863, and at the close of that year was despatched to America to report on the artillery used in the contest then going on. From November 1, 1864, to April 19, 1866, he commanded the Victoria, 102, flag-ship, in the Mediterranean.

The screw steamer Golden Fleece (which we announced to be chartered for the conveyance of troops to China), after landing the detachments of troops for China and Japan, at Hong Kong, will embark the 2nd battalion of the 20th Foot for the Cape of Good Hope. This detachment will consist of the following:—Lieut. Col. Browne, in command; Majors Cobbe and Francis; Captains Ord, Munro, Rochfort, Egan, Blount, Johnstone, Fahie, Adams, Harcourt, Burne; Lieutenants, Webster, Wahab, Harris, Whiteford, Barlow, Wroughton, D'Arcy, Doorley, Leening, Power, Morley; Ensigns Goldsmith, Duncan, Cook, Beaumont, Beecher, Robinson, Pinching; Paymaster de Lasalle; Quartermaster Storey; Surgeon Woodward; Assistant-Surgeons Hyde and Hensman; and the non-commisioned officers and rank and file.

From the Cape of Good Hope the Golden Fleece will convey to England the 2nd battalion of the 5th Foot, consisting of Major Carden, in command; Captains J. G. Harkness, S. B. Kekewich, H. Walpole, P. Fitzroy, H. H. Taylor, G. E. Massy, S. Richards, J. C. Wadling; Lieutenants, J. J. Robinson, G. N. Shegog, F. D. A. Mackinlay, F. H. D. Brame, F. A. Forsyth, W. F. Langbourne, W. A. Wilmot, W. F. Hunsley, J. B. Booth, O. Harrison, E. H. Ruddach; Ensigns W. H. Major, C. H. Broad, F. R. Carleton, C. J. Hackett, J. P. Spring, W. M. Carlisle, C. L. N. Trafford, H. Kilgour, C. G. Heathcote; Paymaster Manning; Adjutant Wilmot; Surgeon Bell, M.D.; Assistant-Surgeon Close; and the non-commissioned officers and rank and file.

The Urgent, screw iron troopship, Capt. J. H. Henderson, is coaling in the steam basin of Portsmouth-yard for trial of her machinery, in preparation for further foreign service. The Urgent has undergone very extensive alterations and repairs to her machinery and her hull. After her trial and the completion of her stores, the Urgent will sail on troop service to China, calling at the Cape of Good Hope on the voyage out.

Monetary and Commercial.

A special general meeting of the Comptoir d'Escompte has just been held for the purpose of doubling the capital of the society, which was voted with only eight dissentient voices, representing 110 shares out of 15,000 represented at the meeting. The capital of this company was originally 20 millions of francs; it was doubled in October, 1860. Great anxiety was felt by the shareholders on two points—the Mexican loans, and the late transactions of the Comptoir in the East. With respect to the former question the directors declared that the society was completely disengaged; the contrary was very generally believed with respect to the second loan, as it had acted entirely on commission, but that it would defend the interests of the subscribers by all the means in their power. As regards the East, it was stated that the operations of the society during the first half-year, the account of which had just arrived, exhibited a clear net profit of £76,000, the losses made having been covered by former gains. It was added that the society's drafts were received in China and India on a par with the best English paper, and the directors congratulated the shareholders on French commerce being thus relieved from the heavy commission formerly paid to the bankers of London, and on the fact that the merchants in the East would be thereby habituated to treat directly with France.

The accounts of the Ceylon Company (Limited) for the half-year ending the 30th of September last have been made up, and exhibit an available balance of £16,800. 5s. 1d. at the credit of profit and loss. The directors propose to pay an interim dividend at the rate of 10 per cent. per annum (being 9s. 3d. on each original, and 2s. on each A share), on the 20th day of December inst., free from income-tax. This dividend will absorb £12,812. 10s., and leave £3,987. 15s. 1d. unappropriated. The accounts have been examined and approved by Mr. John Ball, the auditor of the company. The above balance does not include any part of the profit derived from produce of the company's own estates, as some of the accounts could not be made up in consequence of the late arrival of a considerable portion of the coffee.

The amount of bullion by the P. and O. Co.'s steamer *Ripon*, from Southampton on the 4th inst., was—In gold, to Madras. £331; in silver, to Hong Kong, £50,357; to Shanghai, £475. Total, in gold, £331; in silver, £50,832.

MANCHESTER MARKETS.

During the fortnight prices have shown a slow but gradual tendency in favour of buyers. The market is quiet with the following quotations:—Grey Shirtings, 7 lbs., 10s. 6d. to 11s.; 8 lbs. 4 oz., 13s. Yarn, Nos. 16 to 24, 1s. 5d. to 1s. 6d.; 28 to 32, 1s. 6½d. to 1s. 7½d.

PRODUCE MARKETS.

TEA.—Although there has been rather less pressure on the part of importers to sell, yet the arrivals have been so heavy that we can quote no improvement in the tone of our market, with the exception that rather better prices have been obtained for finest Moning and Wopak Congous. The quantity offered at public sale without reserve has again been much smaller than of late, but, notwithstanding, the sales passed off very heavily, and at a further decline in good medium Kaisow and blackish-leaf kinds of this season; the trade, as is usual at the close of the year, buying only for immediate wants. Congous: Siftings have been saleable to a limited extent at from 7d. to 9d. per lb., according to quality. Broken-leaf kinds show no change. Teas with leaf command full prices for export. Fair to good common and fair flavory kinds, of old import, show no alteration. Fair to good Kaisows have sold at a further decline of about 1d. per lb. Fine to finest are firm, but with only a limited business passing. Pak Lings remain as last advised. Common to fair black-leaf Congous show no change. Fair to good qualities, of this season, have been sold at a decline of 1d. per lb. Fine to finest have met with rather more demand at about 2s. to 2s. 2d. per lb., at which latter figure a small portion has been sold. New-make Canton kinds remain difficult of sale. Oolongs have met with a limited sale at about previous prices for good to fine kinds. Fair Souchongs are in request for export; fine are also wanted, and a few sales have been made at full prices. In Flowery Pekoes there is nothing new to report. Common to fair Scented Capers have been in demand at full prices; good to fine show no change. Foo-chow kinds of Orange Pekoe have sold about 1d. per lb. lower. Canton make are difficult of sale except at low rates. In Green there has been a good demand, and prices have been well supported; some new Moyune kinds ex Vigil have sold at full prices, and Ping Sueys, of which large supplies have come to hand, at 2s. 4d. to 2s. 8d. per lb. for No. 1 or finest Young Hyson, and other grades in proportion, 3s. 6d. to 3s. 10d. for extra fine or No. 1 Gunpowder, 3s. 2d. to 3s. 4d. for finest or No. 2, 2s. 8d. to 3s. for fine or No. 3, and 2s. 4d. to 2s. 8d. per lb. for finest or No. 1 Imperial. In uncoloured Japan leaf there have been a few transactions at 1s. 4d. to 1s. 5d. per lb. for fair quality; coloured sorts have sold in public sale at 1d. per lb. decline. The public sales have been small, comprising 11,832 packages, of which 11,361 packages were sold, 11,238 packages being printed without reserve.

SILK.—We have had a miserably flat fortnight in the Silk market; buyers generally have shown great reluctance to operate, while at the same

Digitized by Google

time many importers have been anxious sellers. Prices of both China and Japan Silk have exhibited a drooping tendency, though the better qualities have been much less affected than ordinary and inferior descriptions. Some large arrivals now being landed will no doubt, when sold, determine the market rates for a time. Quotations are nominally—Tsatlee, No. 1, 33s. to 33s. 6d.; No. 2, 32s. to 32s. 6d.; No. 3, 31s. to 31s. 6d. Maibash, No. 1, 35s. 6d. to 36s.; No. 2, 34s. to 35s. Ida and Sodai, No. 1, 31s. to 33s.

COTTON.—This market since our last report of 26th ult. has been generally inactive, and former prices have been maintained with some difficulty. A slight advance of ¼d. per lb. was experienced at the opening of the market, but a slack inquiry caused its loss, and, with few exceptions, prices remain the same as at our last report. The sales of China amount to 1,500 bales, the greater part being of "fair" quality. Of Dhollerah about 600 bales have been taken off, the quality being also fair. The London Cotton Brokers' Association give the following as the closing quotations:—China middling fair, 8¼d.; fair to good fair, 9d. to 9½d.; good to fine, 10d. Dhollerah: ordinary to mid. 8¼d. to 9d.; mid. fair, 10¼d.; fair to good fair, 10½d. to 11d.; good to fine, 11¼d. to 11½d. At Liverpool fair Dhollerah is quoted 10½d. and middling Orleans 14⅛d. per lb. Telegraphic advices from New York to the 6th inst. place middling upland at 33½ cents. The stock of China and Japan cotton in the United Kingdom on the 6th Dec. amounted to 3,255 bales, against 2,096 at the same time last year.

COIR YARN.—The supply still continues scanty and the business limited. The bulk of the small quantity offered at auction was withdrawn, and the only sale reported is of 20 tons Ceylon at £32 to £35 5s. per ton.

COFFEE.—There is little change to report, the market for Native Ceylon being still inactive, and for Plantation steady at former rates. During the week ended the 1st inst. the sales were as follows:—Of Plantation Ceylon, 1,505 casks 37 barrels 637 bags offered at auction was all sold, triage, 34s. to 62s. 6d.; gray, fine ordinary to middling, 70s. to 76s. 6d.; colory, low middling small to middling, 77s. to 80s.; good middling bold, 84s. 6d., pea berry, 87s Of Native the sales were 25 casks, common realising 57s., good ordinary 62s, and bold 67s. 6d. Out of 534 bags offered 300 were bought in at 64s. to 66s., and the remainder sold, low ordinary at 57s. 6d., good ordinary 64s. per cwt. During the week ended 8th inst. the following transactions took place:—Of Plantation Ceylon the offers were 3,000 casks, 457 barrels and 2,380 bags, which sold firmly; low garblings at 5s. 6d., to 14s.; triage 36s. 6d. to 56s.; gray, fine ordinary to middling 71s. to 76s. 6d.; colory, low middling small to middling bold 75s. 6d. to 82s., good middling 83s. 6d., to 86s. 6d., fine bold 88s., pea berry 80s. to 87s. Of Native 66 casks at auction were all bought in at 62s. to 66s., and of 2,231 bags about half sold, good ordinary 63s., bold 70s. 6d. The only other sale is of 617 bags Singapore at 44s. to 48s. per cwt. The stock of Coffee in the United Kingdom on the 1st inst. was 15,900 tons, against 14,600 tons at the same period last year.

COCOA-NUT OIL.—At auction 92 casks Cochin very ordinary to fine, in pipes sold at £58 to £61, in hogsheads £59 to £62 10s. per ton.

DRUGS.—Anniseeds: 3 cases China Star, rather mouldy, sold at 87s. 6d. Cubebs: At auction 17 bags Singapore realised 70s. Cardamoms: The only sale reported is of 10 bags Ceylon at 3s. 6d. Camphor: In public sale 100 tubs Japan were placed at 132s. 6d., and 50 cases China 132s. 6d. to 135s. Dragon's blood: The sales have been 15 cases middling to good fair lump at £8 to £10 5s.

GUMS.—Benjamin: Of Siam 28 cases in block sold; good bold almond £32 5s small almond £27 10s. to £29 5s. Of Sumatra 8 cases rather dark seconds sold at £10 5s. to £10 15s., 16 cases dark brown thirds £4 10s. to £4 12s. 6d., and 16 cases ordinary fourths at 30s. to 32s. 6d. Copal: At public sale 166 cases Singapore realised, ordinary 25s., fair mixed coated and dusty 29s. to 29s. 6d., and 28 cases Manila were bought in at 35s.

GALLS.—For this import there is very little inquiry, no public sales have taken place, and the business doing privately is very trifling. The stock of China and Japan amounted on the 1st December to 2,030 cases, against 944 at the same period last year. The imports during the eleven months have been 5,815 cases, against 3,705 in the same period of 1865.

GUTTA PERCHA.—The market is extremely flat, and the transactions so limited that no reports have been issued.

JAPAN WAX.—At auction 71 boxes were offered, of which 10 boxes ordinary mixed saucers sold at 60s.

MANILA HEMP.—Good fair roping is quoted at £50 15s. per ton. The business doing is very limited.

PEPPER.—Black: The market both for Singapore and Penang is quiet, with steady business doing at slight variation from former prices. About 1,497 bags of Singapore sold at auction at 3⅛d., one lot 3⅛d. per lb. Of Penang 1,561 bags were placed, sound 3d. to 3⅛d., sea-damaged 2⅞d. to 3d. Privately the transactions have been larger than usual, 3,200 bags Singapore and Penang having changed hands, the prices realised being the same as at the auctions. White: The demand has slightly improved, and an advance of 1s. 8d. to 1s. 4d. per lb. has been established. At auction 350 bags Singapore were bought in at 6d., and privately 560 bags Singapore sold at 5¾d. to 5⅞d. per lb.

RICE.—The previous brisk demand at the advanced prices formerly experienced has entirely ceased, but holders refuse to sell at a reduction, consequently little business has been done. At the sales about 10,000 bags Rangoon were disposed of at 12s. 3d. to 12s. 9d. per cwt., and 500 bags first class sea-damaged at 11s. 6d. per cwt.

RUM.—Of Penang 20 puncheons were offered, and all sold at 1s. 5d. proof.

SUGAR.—Considerable firmness prevails in this market, and the business done has been of good amount at full rates, extending in some cases to an advance of 6d. per cwt., more especially for the lower descriptions. Mauritius.—At auction 1,850 bags good brown was bought in at 29s. 6d. to 30s. 6d., and 160 bags grainy and crystallised sold at 35s. 6d. Privately, 2,800 bags good brown sold at 27s. to 29s. Penang.—Of 4,528 bags offered at auction the whole sold at firm rates—good brown to low yellow (duty, 9s. 4d.). 29s. 6d. to 31s. 6d.; middling to good yellow (duty, 10s. 6d.), 32s. to 34s. per cwt. By private contract the following sales have taken place:—21,000 bags clayed Manila, 27s. 6d. to 29s.; 22,000 bags common to good unclayed Manila, 24s. 6d. to 25s. 6d.; 1,500 bags low brown Java, 24s. 9d.; and 650 bags very low Singapore at 23s. per cwt.

SAGO, &c.—Arrowroot: 55 bags Penang bought in at 2½d. Sago: 283 bags common to fair small pearl sold at 16s. 6d. to 17s. 6d.; 41 boxes large pearl at 15s. 6d. to 16s. Sago Flour: 500 bags good sold at 15s. 3d. Tapioca: 27 bags large pearl sold at 28s.

SPICES.—Cinnamon: Importers have offered 438 bales, 10 parcels, and 22 boxes recent landings Ceylon, of which about 70 bales fine was bought in at 2s. to 2s. 6d., the remainder selling at previous value. Cloves: At auction the offers were 50 cases good bright Penangs, and a few sold at 1s. Ginger: Of Cochin 82 cases common realised 67s. to 68s. Mace: 13 cases ordinary red to medium dull Penang sold at 1s. 4d. to 1s. 9d., and 12 casks Java at 1s. 2d. Nutmegs: The market is active, and for the lower qualities some competition is displayed. The quotations are, for very ordinary (148 to the lb.) 10d. to 11d.; ordinary (120 to 108 to the lb.), 1s. to 1s. 2d.; bold but mouldy (68 to 67 to the lb.) 3s. 9d. to 3s. 10d. Of Java, 11 casks (122 to the lb.) sold at 1s. 4d. per lb.

TERRA JAPONICA.—Cutch: Of Pegue 100 boxes fine sold at 33s. 6d. Of Singapore 54 boxes mixed were bought in at 31s. Gambier: Prices show a slight decline. At auction 169 bales soft and healed were offered, of which one-third sold at 20s. 9d.; 4½ tons also sold at 19s. Privately there is small business doing at 21s. 6d. for good qualities.

TIN.—There has been a small but steady business doing in fine round bottom Straits at £80, and in fine square at £82 per ton. Banca is quoted £82 10s. to £83 per ton.

MISCELLANEOUS.—Aloe Fibre: 41 bales Manila bought in at £32. Blacklead: Of 176 barrels Ceylon offered at auction 110 sold as follows: Good middling lump, 20s. 6d.; middling, 16s. 6d. to 17s.; very ordinary, dull, 13s. 3d. Of dust 553 barrels sold—middling, 9s. 3d. to 9s. 6d.; common, 8s. 3d. to 8s. 6d.. Ebony, 342 logs (46 tons) Ceylon was offered, and about one-third sold at £7 to £7 17s. 6d., the remainder being bought in at £7 to £9 per ton. Isinglass: 18 cases Manila sold at 1s. 2d. and 4 cases Penang good tongue at 3s. 3d. to 3s. 6d.; medium, 2s. 9d. Musk: Out of 54 caddies Tonquin offered at auction 38 sold—inferior to fair shaped pods, 17s. 6d. to 27s.; one lot good, 34s. Sapanwood: At auction the following were the sales:—17 tons Siam at £9; 10 tons Ceylon at £9 10s.; 17 tons Manila at £8; 14 tons Cochin were withdrawn.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars £6s. 5s. to £6 10s nail rod, £8 5s. to £8 15s.; hoops, £9 10s. to £10; sheets, single £10 10s. to £10 15s.; Staffordshire bars, £8 7s. 6d. to £8 15s.; rails, £6 5s. to £6 10s.

STEEL.—Swedish keg, £15 15s. to £16.

COPPER.—Sheet and Sheathing, £86 per ton; yellow metal, 7d. to 7½d. per lb.

TIN.—£83 to £85 for block; £84 to £86 for common bars. Tin plates, best charcoal I.C., 32s. 6d. to 34s.

LEAD, &c.—English pig, W.B., £22 10s. to £22 15s.; shot, patent, £23 10s. to £24; sheet, £21 5s.; spelter, £21 15s.; zinc, English sheet, £28; quicksilver, £6 18s. to £7.

The following is from the Circular of Messrs. French and Smith:—We continue to suffer severely in this market from the general depression in trade. All metals more or less are dull of sale, except at lower prices. Iron: For Scotch Pig there is a moderate demand for export and consumption, and the price has slightly improved during the month. The quotation for warrants is 53s. 9d. For Staffordshire the demand is slack. Welsh masters also complain of much dulness, and many of them are badly off for orders. Copper: This metal is more depressed and at a lower comparative value than any other. The price is now lower actually for Raw Copper than can be remembered by the oldest in the trade. It is difficult to believe this low rate can continue for long. We quote for second-hand parcels, English Tough, £79; Burra and Wallaroo, £81 to £82; Kapunda, £87; Chili Bars, £73 10s. to £74. Since writing the foregoing we have received advice that the smelters have declared a reduction of £5 per ton on Copper, making the price for Tough £81, but still second-hand parcels come lower. Tin: English has been taken in fair quantities both for home consumption and export, although a great deal was sold several pounds under official quotations. Foreign also has been steadily inquired for. Banca in Holland advanced to 47¾ guilders, and is now 47½, buyers. Here we quote the market, strong for Banca, £82 10s.; Straits, £81 to £81 10s. The deliveries from Holland during the year, to the end of November, were 177,855 slabs, against 126,152 slabs same time in 1865. The quantity of Straits Tin afloat for Europe is about 711 tons, against 1,524 in 1865, and 864 tons in 1864. Price of Straits on 30th November, 1866, £81 10s., against £96 10s. in 1865, and £93 in 1864. Tin Plates: Are still difficult to obtain for early delivery, and prices are well maintained. The shipments for November were 84,000 boxes, against 95,000 in the same month last year. Lead: The price is well maintained, but the demand is but quiet. Spelter: Is quoted £21 15s., and there seems some inquiry, more especially for forward delivery. The stock here on the 1st inst. was 4,168 tons, against 6,807 same period last year.

MERZE, London to Japan, 9 S., 125 E.

FREIGHTS AND CHARTERS.

Outward berth freights continue steady. There is a fair demand for tonnage, and suitable vessels, being rather scarce, are readily taken up. In homeward business there is nothing doing.

Considerable inactivity still prevails in the export trade; nevertheless outward berth freights remain steady at our last quotations. In homeward business we have no transaction to report.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 40s. weight, 50s. meast. To Nagasaki: 50s. weight or meast. To Shanghai: 45s. weight, 45s. to 47s. 6d. meast. To Amoy: 45s. weight or meast. To Foo-chow Foo: 45s. weight or meast. To Hong Kong: 35s. weight or meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Manila: 40s. weight, 85s. meast. To Ceylon: 25s. to 30s. weight, 35s. meas.

The current quotations for coal, &c., are as follow:—From Wear or Tyne per keel. For Hong Kong: £43. For Singapore: £34. For Shanghai: £53. For Saigon: £50. For Yokohama: £50. For Batavia, £30, From Newport, Cardiff or Swansea, per ton. For Hong Kong: £2. 2s. 6d. For Singapore, £1 12s. For Shanghai: £2 12s. 6d. For Saigon: £2 8s. For Yokohama: £2 8s. Batavia: £1 15s. Coke.

MISCELLANEOUS.

At CALLAO.—Oct. 19, R. Pratalongo, Bretunn, from Macao; Oct 22, Lima, Monkwell, from Macao; Oct. 15, Forest King, Jones, from Monte Video, and sailed Oct. 17, for China.

At ST. HELENA.—Nov. 1, Ravensbourne, Cooper, from Zebu, and sailed for London; Equinox, Hogg, from Manila, and sailed for London; Oct. 29, Challenger, from Shanghai, to London; Nov. 3, Jacmel Packet, Davis, from Singapore, and sailed for St. John's, N.B.; Nov. 9, Philomela and Archer, from Foo-chow-Foo, for London.

At MAURITIUS.—Oct. 21, Ker Aimel and Mouchy, from Galle; Oct. 27, Barossa (s. s.) Boys, from Singapore.

CASUALTIES.

The Dewa Gungadhur, which arrived in the river on Nov. 19, from Foo-chow-Foo, reports that on Oct. 29 she spoke the Annie Kimball, of Beverly, United States, from New York to Shanghai, which vessel had encountered a hurricane on Sept. 22, during which she sprang a leak, shifted cargo, and lost sails and half her fresh water.

The Wilhelmina Johanna, Albert, from Batavia to Rotterdam, which put into Algoa Bay on Oct. 19, leaky, had lost bulwarks, &c., and thrown overboard 150 bags of coffee.

Accounts from Brouwershaven state that the Elizabeth, Muller, which sunk there during a gale on Nov. 24, was bound from Batavia to Rotterdam, and that the crew were saved, but three passengers drowned.

The Raphael, Winslade, from Marseilles for Yokohama, put in at Pernambuco on Nov. 9, having been in collision on Oct. 28, when she sustained the loss of mizenmast and other damage.

The Ann Lucy, Wade, from Macao, which arrived at New York on Nov. 18, had lost sails, maintopmast, &c., in the China Sea.

The Wave, Henderson, from Nagasaki, which arrived at New York on Nov. 19, had split sails, stove bulwarks, sprung rudder, and had been on her beam ends during a typhoon in the Pacific Ocean from June 23 to 25.

The Java, Mann, from Batavia, which arrived at Texel on Nov. 29, had encountered heavy gales in the North Sea from Nov. 25 to 27, and had sustained much damage to sails and rigging.

Some spars, rigging, and chain have been saved from the Elizabeth, Muller, from Batavia to Rotterdam, which was wrecked near Brouwershaven, Nov. 27.

BANK of HINDUSTAN, CHINA, and JAPAN (Limited).

NOTICE IS HEREBY GIVEN, that at an EXTRAORDINARY GENERAL MEETING of the Shareholders in the Bank of Hindustan, China, and Japan (Limited), held (by adjournment) at the London Tavern, Bishopsgate-street, in the city of London, on MONDAY, the 10th day of December, 1866, an extraordinary resolution, that it has been proved to the satisfaction of the meeting that the Bank of Hindustan, China, and Japan (Limited), cannot, by reason of its liabilities, continue its business, and that it is advisable to wind up the same, and also another extraordinary resolution, that the company be wound up voluntarily, were unanimously passed and signed by the chairman of the meeting. At the same meeting resolutions were also unanimously passed and signed in favour of such voluntary winding up being placed under the supervision of the Court of Chancery, and that the following persons be appointed liquidators of the company, that is to say, William Fernley Allen (Alderman), Archibald Kintrea, George Macnair, John Ralph Engledue, and David Chadwick.

Dated this 10th day of December, 1866.

By order of the Board,

R. SWIRE TOMLIN, Secretary.

1, Bank-buildings, Lothbury.

THE CHINA STEAMSHIP and LABUAN COAL COMPANY (Limited).

NOTICE IS HEREBY GIVEN, that a CALL of £1 per Share on Shares of this Company has THIS DAY been made by the Board of Directors PAYABLE on the 20th December, 1866, at the National Provincial Bank of England, 112, Bishopsgate-street Within, London.

Interest at 10 per cent. per annum will be charged on the amount overdue if the call be not paid by the day named, and interest at 6 per cent. per annum will be allowed on all calls paid in advance.

The Transfer Books of the Company will be closed until payment of the call.—By order of the Board,

JAS. TAIT, Acting Secretary.

Ethelburga House, Nos. 70 and 71, Bishopsgate-street, London, Nov. 28, 1866.

CORNER OF MINORIES AND ALDGATE LONDON

PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power, ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer and a Blacksmith. Dry, Godowns for the reception of vessels, stores, &c., when requiring to discharge them.

"CHINA MAIL" OFFICE.

No. 2 WYNDHAM-STREET (back of the Club) :—

1.—THE EVENING MAIL,

A DAILY PAPER.

PRICE.—2 dols. per month.

TERMS OF ADVERTISING.—First insertion, Ten lines and under, 1 dol.; each additional line, 10 cents. Subsequent insertions, per week, 50 cents and 5 cents—"Auction" Notices are excepted, for which only One Charge per week is made).

2.—THE CHINA MAIL,

AN ORIGINAL WEEKLY PAPER.

(Every Thursday Night.)

PRICE.—15 dols. per annum; Single Copies, 44 cents.

ADVERTISING.—First insertion, Five lines, 1 dol.; each additional line, 20 cents. Subsequent insertions, 50 cents. and 10 cents.

The "China Mail" has been permanently enlarged in size, namely, from 4 to 6 full pages. It is the only weekly paper published in China which contains a complete summary of Hong Kong news as well as that from the treaty ports of China and Japan, and from Manila, Australia, India, and the Straits. Its circulation, which has of late considerably increased, extends throughout the coasts of those countries as well as to various parts of Europe. Great facilities are thus afforded to advertisers in this newspaper.

3.—OVERLAND CHINA MAIL.

Containing 8 FULL PAGES, and consisting of a reprint of the articles in the EVENING and CHINA MAILS, with Summary of News and Commercial Summary.

ONCE A FORTNIGHT.

(The Morning of the Mail's despatch.)

PRICE.—To Subscribers to the Weekly issue, 8 dols to Non-subscribers, 12 dols. Single copies, 50 cents.

ADVERTISING.—The same as in the Weekly. All "Notices of Firms" appearing in the Weekly will be inserted in the *Overland*, and charged for, unless otherwise ordered.

And sold throughout the world by all respectable Chemist

CAUTION.—See that "Dinneford & Co." is on each bottle and red label over the cork.

HOLLOWAY'S PILLS.—Important to the Sick.

—Though the mind be downcast and the body enfeebled by continued indisposition, the sufferer should at this season make a last effort to regain health by taking Holloway's purifying Pills, which, by cleansing the blood, will search out the hidden cause of mischief and expel the seeds of most diseases. No invalid is too much reduced to undergo this very gentle treatment with safety and advantage. Neither youth nor old age need fear any injury to the system from a regulated course of these Pills. They are infallible in stomach complaints, bilious affections, sickness, want of appetite disordered bowels, constipation, and the annoyances which spring from derangement of the digestive and assimilating organs.

Prize Medal 1862.

HARMONIUMS.

Prize Medal 1862.

W. E. EVANS,

THE ORIGINAL INVENTOR AND MANUFACTURER OF HARMONIUMS IN ENGLAND,

RESPECTFULLY draws the attention of intending purchasers to his Unrivalled Instruments, in which he has recently introduced several important patented improvements. Amongst which may be specially mentioned the "double-action expression wind movement," by means of which the wind is supplied with half the usual exertion, and the most perfect expression realised; thus superseding the use of the "Expression Stop," so difficult of management in all Harmoniums. The advantage to purchasers is obvious, in selecting an instrument of a manufacturer whose whole life has been devoted to perfecting the Harmonium, and who finishes with his own hand every Instrument that leaves his Manufactory; whilst the prices charged are no higher than those of other makers. Every Instrument is Warranted. The undermentioned, SPECIALLY PREPARED FOR INDIA, are recommended:—

No. 1.—With One Stop, in Oak or Mahogany... ... ... 11 Guineas.
(Tinned Packing-case, and delivery at any home port, 35s. extra).
No. 3.—With Four Stops, in Oak or Mahogany ... ... 21 Guineas.
(Tinned Packing-case, and delivery at any home port, 40s. extra).
No. 5A.—With Twelve Stops, in Oak or Mahogany ... ... 29 Guineas.
Tinned Packing-case, and delivered at any home port, 42s. extra).
No. 6A.—With Fifteen Stops, in Oak or Mahogany ... ... 43 Guineas
(Tinned Packing-case, and delivery at any home port, 45s. extra).
No. 9.—With Nineteen Stops, and Two Rows of Keys, in Oak or Mahogany... ... ... 80 Guineas
(Tinned Packing-case, and delivery at any home port, 63s. extra).

THE "EVANS" IMPROVED HARMONIUMS

Are remarkable for the entire absence of the nasal and reedy tone which has hitherto been the great impediment to the general adoption of the Harmonium in private houses whilst the sluggishness of speech, another great defect in most Harmoniums, has been entirely overcome by W. E. EVANS' improvements, without any MECHANICAL appliances. Fully detailed Price List, with Testimonials from the most eminent Musicians, &c., may be obtained of the Sole Manufacturer and Patentee,

W. E. EVANS, 2B, MARKET-PLACE, GREAT PORTLAND-STREET, LONDON, W.

Mr. Evans is in no way connected with any other House in London.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

DR. J. COLLIS BROWNE'S CHLORODYNE. Vice-Chancellor Sir W. Page Wood stated publicly in Court that Dr. J. Collis owne was undoubtedly the Inventor of Chlorodyne; that the whole story of the endant Freeman was deliberately untrue, and he regretted to say it had been sworn —See *The Times*, July 13, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of any service in Cholera was Chlorodyne.—See *Lancet*, Dec. 31, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. Extract from *Medical Times*, Jan. 12, 1866.—"Is prescribed by scores of orthodox medical practitioners. Of course it would not be thus singularly popular did it not supply a want and fill a place."

DR. J. COLLIS BROWNE'S CHLORODYNE is the best and most certain remedy in COUGHS, COLDS, ASTHMA, CONSUMPTION, NEURALGIA, RHEUMATISM, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE is a certain cure in CHOLERA, DYSENTERY, DIARRHŒA, COLICS, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE. EXTRACT *from the* GENERAL BOARD OF HEALTH, *London, as to its efficacy in Cholera*—"So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. MONTGOMERY, Esq., *late Inspector of Hospitals, Bombay*.—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health after eighteen months' severe suffering, and when all other remedies had failed."

DR. J. COLLIS BROWNE'S CHLORODYNE. CAUTION.—None genuine without the words "Dr. J. Collis Browne's Chlorodyne" on the Government Stamp. Overwhelming medical testimony accompanies each bottle Sole Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury, London The immense demand enables the proprietors to reduce the price; it is now sold in bottles, 1s. 1½d., 2s. 9d., 4s. 6d., and 11s.

AGENT: Hong Kong, Mr. A. S. WATSON.

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor

HUBBUCK'S PATENT WHITE ZINC PAINT.

THE most durable and beautiful paint known, is cheaper than White Lead, and is proved to be superior for all purposes than the pernicious Lead Paint, and equally adapted for all climates.
Its whiteness is unaffected by bilge water, boiling sugar, or noxious gases.
It is free from any poisonous ingredient, and suited in all respects to the use of the painter.
Each Cask of Pure White Zinc is Stamped "HUBBUCK, LONDON PATENT."
Inferior Zinc Paint, so marked, having been sold in Foreign Markets, the Patentees offer a Reward of FIFTY POUNDS for information which will lead to the conviction, in an English or Colonial Court, of those who have pirated their Mark. Both Exporters and Retailers are liable for its sale.

THOMAS HUBBUCK AND SON,
WHITE LEAD, OIL, PAINT, AND VARNISH WORKS,
24, LIME-STREET, LONDON.

HUBBUCK'S ANTI-CORROSIVE PAINTS

Are very durable, and the most valuable protection to Iron Roofs, Bridges, Piers, Ships and Buildings, exposed to stormy weather and scorching sun; they soon become extremely hard, and do not blister.
They are made of Stone, Slate, Copper, White, Blue, Green, or any other Colour that is desired.

HUBBUCK'S ANTI-OXIDATION COMPOSITION,

For Coating Iron and Wood Ships' Bottoms; a preservative against fouling and corrosion. This Composition is ready or immediate use, and obviates the waste of carrying unmixed Paints, Oils, Driers, &c. It is also applicable to all the purposes of other Paints.

HUBBUCK'S PALE BOILED OIL

Masless colour than Raw Linseed Oil, is a quick, hard and certain drier for White and Light Coloured Paints.

PAINTS AND OILS PROPERLY PACKED FOR EXPORTATION.

PEACOCK AND BUCHAN'S COMPOSITIONS FOR KEEPING OFF BARNACLES, WEEDS, &c.

THIS is now established as the BEST and CHEAPEST known for protecting ships bottoms from galvanic action or fouling. It is used on the ships of the "Peninsular and Oriental," "Royal West India" "Panama and New Zealand," "Pacific Steam," and other Royal Mail Companies; also on foreign ships of war, and in H.M.'s Royal Dockyards. Apply to the Manufacturers direct, SOUTHAMPTON, or to their accredited Agents at all the seaports of the world.

Extract from the "Standard" of October 18th, 1866.

"COMPOSITION FOR IRON SHIPS' BOTTOMS.—It appears that the iron turret ship 'Huascar,' on Captain Cowper Coles' plan, and fitted with his patent tripod masts, &c., belonging to the Chilian Government, before leaving England was coated on her bottom with Messrs. PEACOCK and BUCHAN'S last Improved Composition for protecting the plates and rivets, and keeping off shell fish, &c., and which has given such entire satisfaction that they, the said Government, have just ordered *five* tons of the material to be sent out to the Arsenal at Valparaiso for the use of their Iron Fleet in the Pacific. The Spanish Government have also ordered a considerable quantity of this composition for the use of their Iron Fleet."

Extract from the "Greenock Advertiser" of October 11th, 1866.

"ANTI-FOULING COMPOSITION.—The ship 'Ceres,' of Greenock, lately reached this port after a two years' voyage, and has been put into Dock to receive a fresh coating of Messrs. PEACOCK and BUCHAN'S (of Southampton) Patent Composition. The vessel was coated with it at London, in 1863, and sailed thence to Melbourne, Calcutta, Bombay, and Greenock, and on her arrival here the copper was quite clean and clear of barnacles, and has thus saved a very heavy per centage of wear and tear. We understand that the local agents, Messrs. Macallister and Syfe, have received a letter from Captain M'Kenzie, of the "Hooyland," of Glasgow, stating that on his ship's return from a voyage to Surinam the copper, which had also been coated with this Composition, was perfectly clean."

ENGLISH GARDENS IN THE EAST.

THE Fourth Season has now confirmed the complete success of MR. CHRISTY'S Cases for conveying Fruit Trees, Vines, Plants, Flowering Shrubs, and Seeds, to the East, when shipped in the holds of Steamers like ordinary Case Goods. Mr. John Waterer, junr., the American Nursery, Bagshot, Surrey, or Mr. Christy, 28, Pall Mall, London, are prepared to execute orders for gentlemen in the East, and beg to call attention to the list of prices and conditions. FRUIT TREES, including PEARS, APPLES, PLUMS, CURRANTS, GOOSEBERRIES, PEACHES, NECTARINES, APRICOTS, CHERRIES, and QUINCES, per case, 10 Guineas.

	Guineas.
20 FRUIT TREES, with Ten vines, per case	14
ROSES of the best kinds	15
RHODODENDRONS and AZALIAS, &c.	15
GARDEN SEED (various)	5 upwds.

The number depends on the size of the roots; the cases average 30 plants each.
All the above prices include freight, insurance, and all charges to any port where the P. and O. steamers call. The season for shipment commences about September and ends in January. All orders must be accompanied by a remittance or orders for payment. The name of the agent at the port of arrival must be furnished, to prevent delay in fowarding.

COUGHS, ASTHMA, and INCIPIENT CONSUMPTION are EFFECTUALLY CURED by
KEATING'S COUGH LOZENGES.
JUDGED BY THE IMMENSE DEMAND, this UNIVERSAL REMEDY now stands the first in public favour and confidence; this result has been acquired by the test of fifty years' experience. These Lozenges may be found on sale in every British Colony, and throughout India and China they have been highly esteemed wherever introduced. For Coughs, Asthma, and all affections of the Throat and Chest, they are the most agreeable and efficacious remedy.
Prepared and Sold in Boxes, Tins, and Bottles of various sizes, by THOMAS KEATING, Chemist, &c., 79, St. Paul's Churchyard, London. Sold Retail by all Druggists and Patent Medicine Vendors in the World.

Testimonial from Colonel HEWETT, J.P. and D.L., 3rd Brigade, Cardiff Artillery Volunteers.
Ter. Mab. Ellis, Ponty-Pridd, Glamorgan, May, 1866.
DEAR SIR,—I was attacked with a severe cough, which your Lozenges removed in a few days. My servants, also, by taking your Lozenges, were soon cured.
I feel it a duty (to the public) to offer my testimony to their efficacy, which you are at liberty to publish.—Yours truly, W. HEWETT.
To MR. THOMAS KEATING.

CHILDREN'S WORM TABLETS (KEATING'S).
The great remedy for these disorders in children can now be administered IN THE FORM OF A PURELY VEGETABLE SWEETMEAT, at once agreeable and effective.
Prepared and sold in tins and bottles by THOMAS KEATING, Chemist, &c., 79, St. Paul's Church-yard, London, E.C. and retail by all druggists and patent medicine vendors in the world.
Observe the words "KEATING'S WORM TABLETS" are engraven on the Government Stamp of each tin, without which none are genuine.

TESTIMONIAL.
Loughton, November 28, 1865.
DEAR SIR,—I write to inform you I purchased a box of your Worm Tablets, and they have brought no less than 30 worms, some 3 or 4 inches in length, from my child, two-years-and-a-half old. I feel it my duty to make this public, as others who may be similarly afflicted may derive benefit.—I am, your obliged,
EDWARD BUSH.

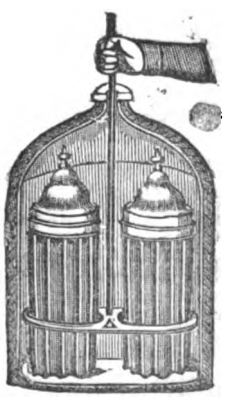
IMPORTANT
TO PERSONS RESIDING IN HOT CLIMATES.



ASH'S PATENT "PISTON" FREEZING MACHINE AND WINE COOLER is the FIRST REALLY EFFECTIVE APPARATUS for TROPICAL CLIMATES.
It will produce PURE BLOCK ICE, FREEZE and MOULD DESSERT ICES, and ICE WINES in any temperature. It is remarkably simple, will not corode or get out of order, and can be worked (with or without Ice) by the most ignorant servant. The Freezing Salts employed are indigenous to most hot climates, easily and cheaply obtained. A *bona fide* Receipt for preparing them given with each Machine. It is not too much to say that the "Piston" Freezing Machine is rapidly becoming indispensable to all European residents in India and China.

PRICES:—For 1 Bottle, 1 Block of Ice, 1 Dessert Ice... ... ... £4 0 0
For 2 Bottles, 2 Blocks of Ice, 2 Dessert Ices 6 10 0
For 4 Bottles, 4 Blocks of Ice, 4 Dessert Ices 11 5 0
If without fittings (merely as Wine Coolers.)
For 1 Bottle £2 0 0
For 2 Bottles 3 0 0
For 4 Bottles 4 5 0
When Dessert Ices are never required, these Wines Coolers can be fitted with BLOCK ICE MOULD at 30s. for each Mould so fitted.

For terms of Freight or Passage apply to MCDIARMID GREENSHIELDS, and Co., Liverpool.

To sail 15th December.

HONG KONG and WHAMPOA. —Warranted First Ship.—The clipper barque DORA, A 1 ten years, 379 tons, C. BROWN, Commander; West India Docks. This fast sailing vessel (having made her last passage from Colombo in 94 days (offers a favourable opportunity to shippers, and will shortly be despatched.

Apply to JOHN C. CAMPBELL 22, or to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, E.C.

FOR SHANGHAI, to sail, on the 31st December, from Greenock, the very superior new Clyde-built China clipper TITANIA, A 1 14 years, 878 tons register, ROBERT DEAS, Commander. This most beautiful vessel has been expressly built by Messrs. R. STEELE and Co., of Greenock, for the China trade, and is expected to be the fastest clipper afloat.

For Freight or Passage apply to THOMAS SKINNER and and Co., Glasgow; or to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

To Sail on the 10th of January.

FOR SHANGHAI, the well-known clipper FALCON, A 1 13 years, 793 tons register, J. J. GUNN, commander, lying in the East India Docks. Has excellent accommodation for passengers.

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

FOR SHANGHAI Direct, the magnificent China clipper ship LAUREL, A 1 thirteen years, 638 tons register, GEORGE MOODIE, Commander; lying in the East India Docks. This well-known ship (owned by Messrs. John Willis and Son) is strongly recommended to shippers fine of goods.

For Freight or Passage apply to GELLATLY, HANKEY, SEWELL, and Co., of 27, Leadenhall-street, E.C.

SHANGHAI Direct, with quick despatch, the magnificent China clipper ship LAUDERDALE, A 1 thirteen years, 851 tons register, C. W. H. HUTCHINS, Commander; loading in the East India Docks. This splendid ship, owned by Messrs. John Willis and Son, is well known in the China trade, and strongly recommended to shippers of fine goods.

For Freight or Passage apply to GELLATLY, HANKEY, SEWELL, and Co., 27, Leadenhall-street, E.C.

With quick Despatch.

FOR CALCUTTA, the celebrated China clipper MELBREK, A 1, fourteen years, 870 tons register, JOHN TAGGART, Commander; lying in the London Docks. This ship has proved to be one of the fastest afloat, and is strongly recommended to shippers of fine goods.

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

SADASHIGUR, CANNANORE, CALICUT, BEYPOOR, and COCHIN. —The well-known clipper ABDUL MEDJID, A A 1, 402 tons register, will receive goods in the West India Docks until Wednesday next, the 19th inst.

Apply to LIVINGSTON, HOLDING and BRIGGS, 31, or to JOHN C. CAMPBELL, 22, Great St. Helen's, E.C.

COLOMBO Direct.—To sail positively on the 22nd inst. (last shipping day the 20th), the well-known China clipper ship SPIRIT OF THE NORTH, A 1, 663 tons register, now rapidly loading in the East India Docks.

Apply to LIVINGSTON, HOLDING, and BRIGGS, 31, or to JOHN C. CAMPBELL, 22, Great St. Helen's, E.C.

FOR COLOMBO, CEYLON, Direct, has room for light measurement goods only.—Will have immediate despatch the beautiful clipper ship CAPE CITY, A 1 12 years, 423 tons register, JAMES BAWDEN, Commander; loading in the West India Docks This magnificent vessel, built under special survey, offers an unusual opportunity to shippers of fine goods, and has a capacious and lofty cabin, replete with every accommodation for the comfort and convenience of passengers.

For Freight or Passage apply to F. TALLACK, 23, Birchin-lane, Cornhill, E.C.

Printed for the Proprietors by WOODFALL and KINDER Milford-lane, Strand, W.C., and published by JOHN ELLISON, at the Office of the "LONDON AND CHINA TELEGRAPH," 12, George-yard, Lombard-street, E.C., in the parish of St. Edmund the King.—Thursday Dec. 13, 1866.

The French mail with dates from Hong Kong to Nov. 28 is expected on the 5th prox. Telegrams have been received from Hong Kong viâ Galle to Dec. 1, and from Shanghai via Kiachta to Nov. 26 (the latter received 17th Dec.).

List of Passengers.

PASSENGERS INWARD.

By this mail, to Marseilles, per P. and O. steamer Ripon, arrived Dec. 25.—From Yokohama: Mr. Peller, Mr. Wigand, Mr. Martina. From Shanghai: Mr. J. S. Boorsdeile, Mr. L. R. Goldsmith, Mr. J. C. Kirkham. From Hong Kong: Mr. J. M. Fenwick. From Ceylon: Mr. A. Stewars, Mr. J. Richardson, Mr. W. Pollock

To Gibraltar, per P. and O. steamer Pera.—From Hong Kong: Mr. de la Maiza and child, Mr. Pelaiz.

To Southampton, per P. and O. steamer Pera, expected to arrive Jan. 2.—From Hong Kong: Mr. Young.

PASSENGERS OUTWARD.

Per P. and O. steamer, Nyanza, from Southampton, Dec. 20.—To Yokohama: Mr. H. J. Hooper. To Hong Kong: Mr. Webb, Mr. A. E. Cooper, Mrs. Aitken. To Ceylon: Mr. L. P. Thomas, Mr. Colin Macinlay, Mr. Sidney Fuller, Mr. Harry Maule Finch, Mr. Christopher Wren, and three second-class passengers. To Singapore: Capt. Furoge-R.E. To Penang: Mr. A. Eaglesham. To Calcutta: Miss E. Cunningham, Mrs. Graime, Ensign Reid, Capt. A. C. Bruce, Mrs. Raymond and three children, Miss Dennis, Mr. Sevestre, Mr. T. Horsford, Capt. and Mrs. Arbuckle, Miss A. Macpherson, Mrs. Richard, son, Miss Elton, Mr. R. D. E. Spottiswoode, Mr. J. Ditmas, Mr. J. Man, Mr. H. Grav, Staff-Asst. Surgeon Fergusson, Mr. T. H. Gould, Mr. and Mrs. Mosley and child, and one second class passenger. To Madras: Dr. and Mrs. Morton, child, and ayah, Mrs. Plowden, Miss Hayne, Lieut.-Col. Forde, Mr. Waters, the Rev. J. H. Walton, Mr. A. M. Jones, Mr. G. J. Curran, Mr. J. W. Vas, Mr. J. J. Roberts, and three second-class passengers.

From Marseilles, Dec. 28.—To Hong Kong: Mr. C. Morgan. To Yokohama: Mr. and Mrs. Thorel. To Penang: Sir W. and Lady Hackett. To Singapore:—Mr. A. J. Spottiswoode. To Calcutta: Miss Freer, Dr. T. B. Farncombe, Rev. Mr. and Mrs. Phelps, Lieut. W. Grant, Mr. and Mrs. T. C. Hersey, Mr. R. L. Upton, Capt. Swinton, Mr. and Mrs. W. Smith, Mr. D. Lucy, Mr. and Mrs. Parry, Mr. Elliot and one second class passenger. To Madras: Mr. C. A. Ainslie, Major and Mrs. Marsach, Mr. and Mrs. R. B. Swinton and child, Major Cannon, Mr. Vertue.

Per P. and O. steamer, from Southampton, Jan. 4.—To Yokohama: Mr. J. S. Barber, Mr. and Mrs. Jaquenot, Mrs. Dissez. To Ceylon: Mr. and Mrs. G. Vetch, Mr. and Miss Allen, Mr. L. P. Thomas, Miss Williford, Mrs. Allen and child, Mr. T. Holland. To Hong Kong: Mr. Ridgway, Mr. Mahon, Mr. W. J. Hooper, R.N., Rev. C. Chapman, R.N. To Singapore: Miss Gale, Mr. G. T. and Mrs. Ricketts.

From Marseilles, Jan. 12.—To Ceylon: Mr. & Mrs. Boustead, Mr. E. Byrde. To Hong Kong: Mr. Still, Mr. S. L. Prior, Mr. T. J. Gardner, Mr. J. B. Taylor, Mr. H. C. Low.

Per P. and O. steamer, from Marseilles, Jan. 20.—To Hong Kong, via Bombay: Mr. Hitchcock.

Per P. and O. steamer, from Southampton, Jan. 20.—To Ceylon: Lieutenant and Mrs. A. Hansard, Miss Adams, Mrs. Wormald. To Singapore: Mr. W. H. Newman.

From Marseilles, Jan. 28.—To Shanghai: Dr. and Mrs. C. Powles. To Singapore: Sargeant-Major J. Rose. To Hong Kong: Mr. and Mrs. J. Cromton.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

From this port we have advices to the 1st November. The London mails of 10th September had not arrived out.

The remains of the late Shiogoon were consigned to the tomb on Oct. 31st. His obsequies have occupied many days, and are not yet concluded. The war is stopped for the present by order of the Mikado. Choshiu obeys the order, and declares that he has never fought against the Mikado, but against the party unjustly opposed to him.

The great council of Daimios, reported by us as about to be called, is actually summoned. It is believed that it will take a considerable time to discuss the various questions brought before it; but the strongest hopes are entertained that it will be the means of defining exactly the relative position and power of the Mikado, the Shiogoon and the Daimios themselves. The latter complain that for many years they have not had the voice in the Government that they are entitled to, and both the Mikado and the Daimios consider that the Shiogoon has been arrogating too much absolutism. The council will probably settle this matter, and be the means of putting foreign relations on a proper footing. It is not known exactly when it is to meet.

Subjoined is the official notification of the death of the late Shiogoon. It is worth preserving, perhaps, as an illustration of Japanese ceremonials. The *Japan Times*, from which we copy it, remarks that "the orders to the public would seem to imply that disturbances were feared:"—

"Kubosama having fallen sick and the remedies used having failed of success, he departed this life at Osaka, on the 29th August, at six o'clock in the morning; all building and use of musical instruments are therefore to be intromitted. Shotsubashi Chiunagon, who had previously been appointed heir, is from the 28th of August styled Uyesama. This decree having been issued you will take note thereof, and communicate it to all householders without exception. Given at the Government office, Tobe."

"In consequence of the intromission thus decreed, the ward-gates will be shut from six o'clock in the evening, and the side gates will be left open for passengers. The nanushi and landlords will patrol day and night. In unoccupied lands, and where there exist no war gates, such are to be provided at once. In all the streets the shop curtains are to be taken down, the shutters on the left and right to be let down, and perfect order to be kept. In the lands held of the Government, water-buckets, numbers corresponding to the length of frontage, are to be placed before the houses. Bath houses, medical and ordinary, buckwheat shops and other places, where business requiring large fires is carried on, must close at six o'clock in the evening. Fights, quarrels, and other noisy proceedings, must be carefully avoided. The above orders having been issued, you are requested to affix your seal in acknowledgment and return the circular after it has gone the round.—October 5. 6 P.M."

During the fortnight there have been meetings of the land renters to consider a code of land regulations for the municipality, and a meeting of the general public upon the question of the present state of the dollar currency,—or more properly

Digitized by Google

speaking uncurrency—subjects of very deep importance to the community. There has been already, however, an appearance of opposition to the proposed land regulations in the matter of taxation and franchise, and another meeting was to be called after the departure of the mail steamer to discuss these things. With regard to the "dollar" difficulty, the meeting was called in consequence of the impossibility of passing more than a very small proportion of really good dollars. The Japanese Custom-house rejected them in the most indiscriminate manner, and it followed as a natural consequence that the bank compradores rejected them, then all schroffs refused to take what they could not pay into the banks, and business seemed to come to a dead lock. The immediate effect of the first meeting was that the next day the Japanese Custom-house authorities received cheques and bank-notes in payment of duties, which they had hitherto refused to do, but the general public are as yet suffering as much as ever.

In social matters there is to report a return cricket match between the civilians and garrison, in which the garrison won the victory, and a rifle match on a grand scale for Yokohama, under the auspices of the Swiss Rifle Club. In diplomatic affairs there is perfect rest.

The rice riots in Yedo continue, and are giving much uneasiness to the officials. Lately, an affair took place which might have led to very important results, but for the good sense of the American Minister. It appears that his Excellency and party visited the temples at Oogee, and on returning passed through the district called Asakusa, where they met large bands of rice rioters blocking up the street. The guard in endeavouring to clear the way for the party elicited the ill-feeling of the crowd, who began to call them names. Stones were thrown, some of which fell among the party, without, however, injuring any one. The officers got somewhat excited and edged their horses towards the crowd, and were attacked with pieces of lumber. The captain of the guard immediately detailed four yaconins to keep the mob back, and the general and party passed on without molestation. Two of the yakonins left in charge were severely cut by the stones thrown, and one of them was so hard pressed that he had to seek refuge in a Daimio's compound. It was reported at the Legation that two of the rice rioters were killed and several more or less injured. General van Valkenburg and party admired the judicious conduct of the captain of the guard and the praiseworthy effort of those under him to appease the irritated mob.

We hear of parties of Japanese performers being about to leave for San Francisco and Europe. One troupe, under the superintendence of Professor Risley, is composed of upwards of twenty persons, and embraces all the most eminent in their line that can be found in Yedo. The last performance of the Japanese, in presence of the English and United States Ministers, the naval and military officers, and indeed all Yokohama, showed the extraordinary feats of several of those engaged to the great delight of all present; but in addition to these there are added one or two more clever still, and a series of acrobatic, top-spinning, balancing and other feats will be seen such as will surprise our countrymen at home, as much as it has ourselves in the native land of the performers. All the dresses, appointments and paraphernalia required are being got up in the most splendid and perfect style at Yedo. The woodwork lacquered, the dresses silk of the best Japanese fabric, and every minute thing being of the utmost finish. The party leaves by the *Archibald* in about a fortnight. Another troupe has already sailed for San Francisco, and we hear of a third destined for London direct, and in each case the appurtenances are perfect. When these three parties have gone there will be upwards of fifty Japanese who have taken advantage of the permission to travel; but it will be observed, that all who have gone as yet have done so under the direction and at the expense either of their own daimios or of foreigners. The great expenses stand in the way of most, or we should see Japanese in Europe and America as a common thing. There are, however, several merchants who have determined on visiting the Paris Exhibition next year.

A notable feat was lately performed by some Yokohama gentlemen. They started at midnight one Thursday and rode upwards of eighty miles by two A.M. on Thursday. They were twenty-six hours only from their departure to their return, having each used two ponies in the journey. In the course of the jaunt they had to ford a river thrice, besides doing some heavy hill work, in which they were obliged occasionally to lead their ponies. Considering the state of ease and luxuriousness in which all live, more or less, in the East, the feat is certainly worthy of record.

A late telegram announces the sale of the steamer *Fe-Loong* to the Japanese for $75,000.

CHINA.

SHANGHAI.

The P. and O. mail of 10th September arrived out on the 29th, and the French mail of 17th on the 4th Nov.

The community has been intent on amusement of various kinds since the departure of the last mail, and we have consequently little local news to record. The boat races held on the 26th and 27th October were tolerably successful; but one event, the eight-oar international match, between English and Americans, completely overshadowed the rest. The defeat sustained by the former will, no doubt, stimulate the boating portion of the English community to improve their style and condition next year, in the hope of retrieving their lost laurels. The races which followed immediately on the regatta were successful as regards ponies, but a lamentable failure as regards horses. In fact, so great disgust was expressed at the utter absence of competition for the various prizes, and a very shady transaction connected with the Bachelors' Cup, that we anticipate a change in the programme for next meeting, in favour of ponies and to the partial exclusion of horses. The following are the winners at the Shanghai races:—

FIRST DAY.—Maloo Plate, Fleur de Lis; Cathay Cup, Sir William; Maiden Stakes, Peep o'day Boy; Eastern Cup, Ramornie; Wangpoo Stake, Brick Tea; Flyaway Stakes, Anecdote; Celestial Cup, Fleur de Lis.

SECOND DAY.—Northern Cup, Fleur de Lis; Champagne Cup, Lawyer; Selling Stakes, Omnia in Omnibus; Bachelors' Cup Sir William; Champion's Plate, Fleur de Lis; Autumn Vase, Exeter; Farmers' Plate, Birdlime.

THIRD DAY.—Yang-king-pang Handicap, Birdlime; Lee-ching Handicap, Exeter; Consolation Plate, Mammon; Farewell Cup, Exeter; Steeple Chase, Kangaroo; Helter Skelter, Tulips.

The Viceroy has left to take the field against the northern Nien-fei, in conjunction with Tsenkwofan. The latter is to march against them from the east, while Li attacks them from the south, and a third army assails them from the north-west. It is hoped thus effectually to crush them, though they are reported to be in considerable strength. Not content, however, with internal quarrels, his Excellency is said to contemplate a struggle with the Americans, on some imaginary quarrel of which the United States authorities ignore the existence. Certain it is, however, that he has armed his batteries and concentrated his troops in favourable positions to oppose a force coming up the river should such an one arrive. We imagine, however, that the expected enemy is a spectre conjured up in Li's imagination, and is likely to dissolve as suddenly as it has arisen.

The returns of trade for the month of September have been issued by the Imperial Customs. The most noticeable feature in that for Shanghai again consists in the large increase in the import of Grey Shirtings over the same month last year, there being an excess of no less than 200,000 pieces; while the returns for August showed an increase of 100,000 pieces. The quantity of Grey Shirtings imported in September is 236,000 pieces against 20,000 pieces in 1865. Of T-Cloths 37,282 pieces were imported against none in September last year; 20,000 pieces of Grey and 4,000 pieces American Drills appear this year also against nil in same month of 1865; and 12,000 pieces of Camlets in 1866, against 8,000 in 1865; while the quantity of Long Ells is noteworthy, being 24,380 pieces in September, 1866, against 7,000 in September, 1865. Of rice, only 3,000 piculs are imported during September this year, against 47,000 piculs last year. The re-exports of Grey Shirtings for September amount in all to 144,578 pieces, thus making the increase by import to the stock during that month about 91,000 pieces, from which has to be deducted the local consumption for Shanghai. Of the re-exports 84,798 pieces go to Tientsin, 39,080 to Hankow, 13,550 to Chefoo, and the balance to other ports. In T-Cloths 22,000 pieces are re-exported against 37 000 imported. Of the re-exports 10,000 go to Hankow and 5,000 to Tientsin. Long Ells 15,700 pieces are re-exported of which 12,760 go to Hankow and 2,588 to Kiukiang.

At the meeting of creditors in the estate of Rowley Miller, Mr. Myburgh, who appeared on behalf of the petitioners, stated that the creditors did not desire to appoint an assignee, if the official assignee would undertake the management of the estate. Mr. Lawrence, who appeared as attorney for the official assignees

Digitized by Google

of the Commercial Bank, handed in claims for sundry promissory notes, aggregating taels 88,179.35, which were admitted, with the exception of taels 25,000, for which the bankrupt pleaded that no consideration had been received, he having put his name to the note merely as a favour to the late Mr. Wiggins. The question was held over for decision by the Court.

We are glad to hear that the first instalment of the money for the purpose of erecting a lighthouse has been received by the Commissioner of Customs; and that a meeting between the Treaty Consuls and the Taoutai with reference to the selection of a site will be shortly convened. We believe there is little doubt that the Amherst Rocks will be selected, and we understand that the lighthouse is to be purchased in England under the auspices of Mr. Hockly, the Harbour Master, at present there on leave.

The ratified copies of the Belgian Treaty have been exchanged by H. E. Baron Kint de Roodenbock, on the part of H.M. the King of the Belgians, and H.E. Kwo, acting Futai at Keangsoo, on the part of H.I.M. the Emperor of China; Dr. Winchester, H.B.M. Consul, Mr. Morel, and Messrs. Stronach and King, of H.M. Consular service, attending. The exchange was followed by a banquet at which some very eloquent speeches were made.

The most interesting announcement in the report by the Finance Rate and Appeal Committee of the Shanghai Municipality is that a step has been made towards reducing the municipal debt. The recommendation that tls. 1,526 be written off as a bad debt, and tls. 2,160 carried to suspense account, pending the institution of legal proceedings, is less satisfactory. The two principal defaulters appear to be Mr. E. M. Smith and H.I.C.M. Customs; the claim against whom amounts, in the aggregate, to tls. 3,030 out of the tls. 3,686 in arrear. Mr. Smith, we believe, refuses payment on account of alleged illegal action by the Council in 1864, in collecting gambling house and brothel licences, and injury which, he avers, he sustained thereby. The Custom's object on the ground that the Emperor of China should not be taxed on his own soil; but appear to overlook the fact that the police protect the Haequan bank; and that the Customs officers have all the advantages of draining, lighting and other municipal arrangements. The Council have apparently resolved to abandon a portion of this claim, and to sue for the remainder. Much more to be regretted, however, is the statement that five Prussian subjects decline to contribute towards an institution of which they, notwithstanding, claim all the advantages. We are not told the ground of defalcation; but presume they rely on the judgment delivered by Mr. Tettenborn in December last, denying the liability of householders. His Prussian Majesty's Consul-General, it will be remembered, upheld Messrs. Oppert and Co. in a similar resistance to a municipal claim, on the ground that the Land Regulations empowered the land-renters to tax themselves only, and applied in no way to tenants of houses. On the land-renters, he ruled, "rests the responsibility of paying the taxes, which they have no right to levy on tenants of houses who are in no other connection and under no other obligation as regards their landlords than are contained in their deeds and mutual agreements." This decision may be logical, and in accordance with the wording of Article X. of the regulations; but it is little to the credit of the gentlemen named that they avail of its support. Clearly, however, as the Municipal Council imply, if householders are not liable to taxes, they cannot claim the benefits arising from their expenditure; and the gentlemen who have taken up this position will be fitly punished, in case of burglary, by being left to their own resources.

HONG KONG.

The mail of 26th September arrived out on the 7th November. Latest dates are to the 15th.

(FROM OUR OWN CORRESPONDENT.)

No event of special importance has disturbed the tenor of the past fortnight, not even in the piracy or murder line. His Excellency the Governor continues earnest in the endeavours he has given such plentiful evidence of exerting for the amelioration of the local Government, and is understood to be anxiously awaiting the arrival of sanction for the introduction of the new ordinances for the better government of the colony, including the Stamp Act, the excitement respecting which is already half forgotten. Hong Kong residents in England will doubtless take interest in the trial of the great "hotel case," as it is called, of which the newspapers will take home full reports. The decision of the Supreme Court (under the presidency of the newly-appointed Chief Justice, Mr. Smale), by which the action of Mr. Douglas Lapraik's attorney, John S. Lapraik, in subscribing for certain shares in the new Hotel Company on behalf of his principal, is held binding, will have the effect of giving new life to the scheme—so long in abeyance—which is to furnish Hong Kong at length with a decent hotel, and which, if kept free of jobbery and gross mismanagement, ought to prove a paying speculation. No remark is more frequently made by strangers here than an expression of surprise at the utter absence of an hotel at which transitory visitors can get a comfortable lodging. The want will be largely increased next year on the opening of the steamline to San Francisco; which, by the way, will undoubtedly affect in a very noticeable manner the receipts from passenger-traffic on the part of the existing lines. The announcement recently made in the Indian newspapers that the P. and O. Company intend putting on only one "through" steamer monthly between Hong Kong and Suez, leaving the intermediate mail to be transhipped at Galle as heretofore, has been unfavourably discussed here; and it appears incomprehensible that the company should be content to see the Messageries line establish itself so firmly as the favourite for shippers as well as for passenger traffic. That the Pacific Mail Company will get a large and very important share of the business in this respect cannot be doubted, whilst, as regards Japan, their direct line between Yokohama and Hong Kong is likely to ensure to them something like the monopoly of the goods traffic which is at present carried round *via* Shanghai by the existing lines.

Apropos of steam-lines, a trick peculiarly characteristic of Brother Jonathan is reported in connection with the competition on the Canton River, which recently ceased on the retirement of the American house of Russell and Co., who sold their steamers to the Hong Kong, Canton, and Macao Steamship Company, and entered into an engagement to refrain from farther opposition during a period of six years. Scarcely was this signed, sealed, and delivered, however, than (it is said) one of the partners in the firm proceeded to Shanghai and made active efforts there for the formation of a new company in order to commence anew the ruinous game of competition; but the times are unfavourable to the risking of money on such very doubtful ground, and the project has remained unaccomplished. The Steamship Company are netting fair receipts by their daily line between Hong Kong and Canton, and also between this place and Macao, but their shares remain depressed, with no prospect of a speedy dividend.

A very curious proposition has been brought forward, I hear, by the French Consul at Canton, who has endeavoured to obtain from the Chinese authorities there an authorisation for some French or Swiss subjects to establish a silk weaving factory near the city, to be supplied with machinery from France and worked by natives who would, of course, require to be instructed in the handicraft. Considering the anxiety always manifested by the French Government to foster the interests of the silk weaving population of Lyons, Mulhouse, &c., it seems strange that an official attempt should be made towards establishing a competition with home industry. The Chinese authorities are reported, however, to have declined to accede to M. de Trenqualye's request.

The notification of the blockade of the River Saoul in Korea is just published, as is also an account of the proceedings of the French squadron, which gives even a more decided idea of the utter poverty of the country than was before entertained.

I must not omit to mention the arrival here of the speculative Dr. McGowan, not unknown to many of your China readers, who turned up recently from San Francisco with a pocketful of plans, &c., for telegraphs and railways "to everywhere" in China. Everybody is a commissioner for something nowadays, and the reverend doctor is commissioner for the Eastern Asia Telegraph Company of New York, on whose behalf he is to negotiate concessions for all sorts of things. As a U.S. citizen, there is a strong probability that he may succeed. The Yankees have been 'cute enough to adopt the *Civis Romanus sum* policy which their admirers in England have grown too enlightened to approve any longer.

Macao continues to batten on the iniquitous coolie traffic, and it is reported that some 20,000 victims have already been despatched to Havana. The newly arrived Governor, Mr. Horta, made a *pro forma* visit to the coolie ships the other day, and was much taken aback when upwards of one hundred poor wretches, in despite of the careful preparatory drilling from the crimps, declared their unwillingness to be sent abroad. The

Digitized by Google

cream of the story is that, after being landed, these poor wretches were (instead of being liberated) sent to *work in the chain-gang* on the plea of having deceived the coolie-brokers! The force of ingenuity could surely no farther go!

The residents of Hong Kong, both European and Chinese (but especially the latter), have to deal with a determination on the part of the Governor which seems to bewilder them. The energetic steps taken to suppress piracy, and to mitigate the notorious filth of the Chinese portion of the town, have formed the subject of another memorial to Sir Richard MacDonnell from the Chinese residents, but couched, this time, in most respectful and even deprecatory language. The memorial commences with a free acknowledgment that the strong opposition offered to the late ordinances was, in effect, childish and ridiculous, and that so far from being "obstructive and obnoxious" the said ordinances cannot fail to be eventually beneficial to the colony. At the same time, the petitioners pray for certain modifications of them. They complain that in the "Harbour and Coasts Ordinance," no distinction is made in favour of passenger or provision junks either as to licensing, or regulations on arrival and departure; and represent that restrictions which are perfectly necessary with regard to other vessels, as a check on piracy, ought to be relaxed in favour of these, as they make as many as 120 short trips in the year. They also represent that it is unjust that a breach of certain laws by a junk-master should entail forfeiture of the vessel, as the master is only a paid servant, for whose transgression the owners, they say, ought not to suffer. Passing on to the "Health ordinance," the petitionsrs complain of the inconvenience and loss of time entailed on native householders by the rule compelling them to register all occupants of their houses, which rule they assert is rendered especially onerous by the migratory character of the population. They also consider it unjust that householders should be held responsible for the sins of their tenants in the way of illegal sales of spirits, prostitution, and gambling. Lastly, the regulation authorising the seizure of adulterated, tainted or unwholesome food has roused the apprehensions of the memorialists regarding the safety of certain "condiments" which are, they say, necessary to themselves, although their peculiar odour might caused them to be regarded with suspicion by European inspectors. The memorial winds up with a somewhat constrained assent to the justice of the Stamp Act, and an apparently hearty tribute to the wisdom and good intentions of the Governor.

The "Memorandum" issued by Sir Richard in reply effectually demolishes the difficulties of the petitioners, *seriatim*. It points out that the frequency of the voyages made by passenger and provision boats is no reason for excepting them from dues, as the more trips they make the larger must be their profits. With regard to the penalties entailed by infringements of the law, it is shown that if the owners and masters are honest, they can easily obey the law; besides, where the ordinance bears hardly, there is always an appeal to the Governor. Native householders are informed that as they must necessarily possess a list of their occupants, by which to collect the rents, it can be no hardship to have to furnish a copy of it to the registrar. As to the offences for which they are held responsible, they can, if they choose, easily prevent them. And as to the various sorts of nastiness which they dignify by the name of "condiments," these will be exempted from the category of nuisances. So it is to be hoped the native residents will accustom themselves to the new order of things as quickly as possible; for his Excellency evidently means to be firm, and what they doubtless lament over as "the good old times," are gone—for ever.

The *Overland China Mail* has the following in reference to a new line of steamships, which it states is about to be established between Panama and Hong Kong, by some French capitalists:—"Each new steam line established appears to be only the herald of another. Before the Japan and China steamers from San Francisco are even started, it is announced that the French are planning a new line across the ocean, from Panama to Hong Kong, and there, doubtless, to effect a junction with the Messageries Imperiales steamers from Japan and Shanghai. It is clear to see that this route, if established, will prove the shortest between France and China, and probably the most comfortable for travelling in the world. The steamers will run across the ocean, avoiding the extremes of cold and heat. The competition for the China and Japan trade, which is increasing every year, will lead to rival lines ere many years and none will promise greater success than that proposed by French capitalists."

The new swimming bath was opened on the 2nd November in the presence of a very large number of people. The Governor came down shortly after four and was received by the committee at the entrance. He was then shown into the east waiting room which was immediately afterwards wedged as full as it could be, the visitors crowding outside round the door at both ends. To an address read by Mr. William Gibb, the Governor replied:—

"Gentlemen,—Having been much occupied all day till within the last hour, I confess I was much embarrassed, when I suddenly came to reflect on the part which I had undertaken—to open a bathing establishment! It has fallen to my lot in the course of the various Governments which I have had the honour to administer, to open various public institutions, to turn the first sod for railways, lay the foundation of docks, and even open a skating rink, but I admit I was greatly at a loss to know what was expected of me on this occasion. I hardly supposed you could have looked forward to my plunging headlong in the tide, like Horatius Cocles when he had hewn down the bridge that offered the enemy a safe road to Rome. On the contrary, when I reflected on the great exertions of my friend, Mr. William Gibb, to promote the construction of this useful and almost ornamental addition to our institutions, I felt that such special distinction should be reserved for him—and such is my opinion of his merits, that I venture to prophecy if we now fling him in, and if there be room for improvement in his appearance, you will find that *merses profundo pulchrior evehit*. Seriously, however, it is a gratification to mark the energy with which the citizens of Hong Kong, when they set their minds on any especial object, carry it out."

The Convict-hulk at Stonecutters' Island has been broken up, and the place now ceases to be prison territory. Victoria Gaol is now the only penal establishment for China, and it is certainly one of the finest to be found in any country. The number of prisoners accommodated within its walls yesterday evening was about 750, with wards still unoccupied. Altogether, we believe, the number now in gaol, including warders turnkeys, &c. is over 800 persons.

We learn that the licence hitherto held by certain persons in Hong Kong to engage coolies for emigration to Surinam, has been resigned by the holders to the Dutch Consul.

By the *Sea Serpent* from San Francisco, Dr. McGowan arrived as agent of the East India Telegraph Company (recently incorporated in New York), who comes to China empowered to open telegraph lines throughout China, so far as the consent of the Government can be obtained. The *Sea Serpent* also brings an agent of the Pacific Steam Navigation Company, who comes out to establish the China line of steamers and the *New York Herald's* correspondent Mr. Westfall.

The steamer *Catherine Apcar*, on her voyage from Singapore to Hong Kong, ran on the "Royal Charlotte" shoal, where she remained 24 hours, and was obliged to throw overboard about 2,000 bales of cotton to enable her to float off.

FRENCH EXPEDITION TO KOREA.

The French expedition to Korea, of which the surveying party whose operotions were described last mail was merely the *avant courier*, has now reached Kanghoa. At the latest date there seemed hopes that the native King was about to attempt some resistance, the futility of which might lead him to make arrangements with his visitors which would be beneficial to commerce generally, and the spread of civilisation; but though the French were in possession of the town of Kanghoa, they had not, up to the latest dates received, come in contact with any person of sufficient importance to treat. The expedition sailed on the morning of October 11th from Chefoo, and included seven vessels large and small. After anchoring amongst the Jenieres islands the fleet weighed on the 13th, and on the afternoon of that day anchored at the entrance of the Kanghoa river. Here the three large vessels, the *Guerriere*, *Primaguet*, and *Laplace* remained, while the other four, towing the landing party in the barges, went up the river on the 14th, the gunboat *Tardif* leading the way, and another gunboat, the *Breton*, bringing up the rear. Before reaching the town the expedition had to pass eleven small forts, but these appeared to have been deserted, and there seemed so little danger that one of the vessels, the *Kienchan*, which went ashore on a sand bank, was left to follow the others at her leisure. At the appointed place

Digitized by Google

400 men were landed, no resistance being offered and only a few natives, attracted by curiosity, alone being in sight. The invaders took possession of some heights overlooking the town of Kanghoa, and destributed themselves about amongst the scattered hamlets in the neighbourhood. While thus encamped they were visited by an old Mandarin, who being apparently a person of importance was taken to the Admiral's ship. His behaviour, however, is said to have been defiant and unbecoming, and he is said to have defended the murder of the missionaries. The priest, Father Ridel, was the interpreter on this occasion, and may possibly have rendered the Mandarin's language in an unfriendly spirit; but whether this was so or not, the French Admiral would not listen to anything from so untamed an emissary, and "abruptly dismissed" him at once, giving orders for an attack on the town.

Next day the troops forced an entrance into Kanghoa, a walled town, apparently where some resistance was offered by the Korean guard of the gate which was attacked. Only three of the natives were killed, however, and none of the French even wounded. The officer in command of the attacking party surveyed the city, destroyed some defensive works, and returned to head-quarters on the heights. During the night the inhabitants disappeared, taking with them to the hills as much of their property as they could carry. The next day, the 16th, the Admiral made a formal entry into the city, the only natives seen besides some who were made prisoners, being a few men, who, when the principal gate was burst open were seen running away in the distance. At the Yamun the prisoners were questioned, and stated that the Mandarin had persuaded the inhabitants to fly. Very little general plunder was obtained by the French soldiers, though they seemed to have received permission to go about looting; but the Government money chest, containing 190,000 francs worth of silver ingots, was discovered after a prolonged search, and seized by the commanders of the expedition. The town is in fact a small and miserable place, capable of holding only about 10,000 inhabitants. On the 19th a deputation was seen on the river banks, making signs to the ships; and on being brought on board the flagship proved to have a letter from the "Viceroy and Military Commandant of the Korea," who wrote on behalf of the King, and proposed that the Admiral should come to the capital and negotiate. In reply, the Admiral wrote, stating that he required the punishment of the three principal Ministers who had instigated the murder of the missionaries, and that a person should be sent to him with full powers to treat. Up to the latest advices no answer had been received from the native Government, but it was rumoured that an army of 15,000 men was coming down from the capital to attack the expedition. Meanwhile the inhabitants of the town and the country people were gradually returning, and the French apparently waiting for something to take place.

Later intelligence by telegram announces the defeat of the French and their return to Shanghai.

SIAM.

BANGKOK.

The 7th October was the day fixed for renewing the oath of allegiance to the King of Siam. All Siamese princes, lords, nobles, petty magistrates in and about the city, had then to go with each his retinue, numbering from ten to fifty, and drink water and sprinkle their faces with that in which stood swords, daggers, spears, guns, etc., with which the King executes vengeance upon them who rebel against him. The priests are all excused from this service by virtue of the sanctity of their office. Many thousands were out in their best attire on that day.

After the ceremony his Majesty left Bangkok for the city of Nakawn Sawan, where he remained six days and carefully ascertained the exact latitude and longitude before returning to Bangkok. It appears that the King spends a considerable portion of his time in thus "measuring the sun," as the Siamese term it.

The 18th October was the sixty-second anniversary of his Majesty's birth. On the evening of that day the resident consuls and clergy were invited to dine at the palace. The invitation to the foreign merchants and the missionaries was deferred until the next day, the King being desirous of imitating European customs in every particular, and considering it inconsistent with the etiquette of the Western nations for the higher and lower ranks to mix together at the same table.

From the *Bangkok Recorder* we learn that gas has been introduced into the city for the first time, and is at present in operation at the rice mill of Messrs. Scott and Co. The same journal goes on to say:—"It is said that gas light can be made much less expensive for large establishments in this city than oil light. This consideration, aside from many others in its favour, is a weighty one, since we have to pay $3 for twenty catties of cocoanut oil. We beg to inquire again, is there no relief from the oppression we suffer in the article of lamp oil? How is it that petroleum cannot be imported with profit to the importer and with advantage to those who have long been paying exorbitant prices for cocoanut oil?"

MALACCA STRAITS.

SINGAPORE.

The London mail of the 10th October arrived out on the 12th November, and the French mail of Oct. 17 on the 22nd, the day on which the present homeward mail left.

The *Straits Times* says:—"The past fortnight has been barren of any events of interest if we may except the Autumn Races which commenced on the 13th November, and occupied three days, furnishing some very excellent sport as well as affording a very pleasant break in the routine of business. Although many horses during their training for the races succumbed, nevertheless the sport exhibited fully realised the most sanguine expectations. A meeting of the Agri-Horticultural Society took place in the Exchange Rooms on the 19th current, on which occasion H.H. the Governor presided. It is satisfactory to know that these gardens, which form one of the chief attractions in Singapore; have been, and are still, well supported by the public, and a not less praiseworthy feature is that Government—which is not generally noted for its liberality—has on this occasion handsomely acceded to the request of the committee, and been pleased to grant an increased monthly allowance towards the keeping up of these gardens, and have also allowed the free services of a number of prisoners from the House of Correction.

"Politically speaking there is no news of importance. It is just possible that ere long our Government may make an effort to increase our territories in the Malayan peninsula by annexing Kassang—which is famous for its tin mines—to Malacca. A rumour is prevalent here at present that efforts are being made to dispose of Kassang to the Tumongong of Johore, and unless Government take the matter in hand at once and make some arrangements for the purchase of it—the Sultan being badly off for funds—it is very probable that they may lose the chance and be as easily deprived of Kassang as they were of Johore some years ago."

The *Singapore Free Press* says:—"We believe that the Hon. the Governor is now the senior colonel of the Indian army, and by every mail from India we expect to see him gazetted a major-general. We understand that the Governor is intending at the beginning of next year to take a trip home for six months. Colonel Man, we believe, is to officiate as Governor during the absence of Colonel Cavenagh. The following changes no doubt will take place:—Colonel Macpherson will be Resident Councillor at Penang, Major Burn, Resident Councillor at Singapore, and Captain Playfair Resident Councillor at Malacca.

The Prussian schooner *Ceres* had arrived at Singapore totally dismasted. It appears that she left Hong Kong for Ningpo on the 6th October with a cargo of rice, and on the 19th experienced a very heavy typhoon in the China sea, which totally dismasted her; she bore up for Singapore under jury-masts, and was drifted by the force of the current some miles to the westward of Singapore, and was ultimately towed into port by the tug steamer *Enterprise*.

The "Bon Accord" dock has been opened; and a salute was fired from the *Bintang* which has had the honour of being the first boat admitted. We are sorry to record, however, that the captain's son was slightly wounded during the firing of the salute.

The first and second mates, and part of the crew of the British ship *Ellen Rodger*, which was wrecked a short time since north of Gaspar Straits, arrived at Singapore on the night of the 19th of November, in the Dutch steamer *Vice-President Prince*.

HONG KONG, DEC. 1.—It is currently reported that the French expedition to the Korea has been beaten off at Kunghan, with the loss of 45 men. The fleet had returned to Shanghai. No change in above quotations.

(VIA KIACHTA, RECEIVED DEC. 25.)

French evacuated Korea. Expedition total failure. Natives elated. European prestige much injured.

ADMIRAL KEPPEL'S FLAGSHIP.—The *Rodney*, 78, 500-horse power, fitting in the steam basin at Sheerness for the flag of Vice-Admiral the Hon. Sir Henry Keppel, K.C.B., Commander-in-Chief in the China squadron, is complete in her rigging, but there is a considerable amount of work still remaining to be finished on board before she is ready for the pennant.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

ANTROBUS—On the 17th Dec., at 65, Eaton-square, the wife of H. Lindsay Antrobus, of a daughter.
BOLTON—On the 14th Nov., at Singapore, the wife of C. J. Bolton, Esq., of a son.
GEIGER—On the 18th Nov., at Singapore, the wife of H. W. Geiger, Esq., of a daughter.
LIND—On the 15th Dec., at 16, Somerset-street, the wife of J. B. Lind, Esq., Capt. and Brevet-Major, 31st Regt., of a son.
MOSES—On the 13th Nov., at Singapore, at his residence, Hill-street, the wife of C. Moses, Esq., of a son.
TOWSE—On the 19th Dec., at The Limes, Eldon-park, South Norwood, the wife of William Wrench Towse, Esq., of a son.

MARRIAGES.

JAMIESON—NOTMAN.—On the 26th Oct., at the British Consulate, Ningpo, by the Rev. Jarvis D. Valentine, William B. Jamieson, Esq., to Jeanie Mery Simpson, second daughter of David Notman, Esq., late of Edinburgh. No cards.
MCCABE—LEDGER.—On the 18th Dec., at All Souls' Church, Langham-place, by the Rev. C. Mearer Powell, B.A., John Langdon, only son of Mr. John McCabe, Marquis-road, Canonbury, to Eliza, elder daughter of Mr. Frederic Ledger, proprietor of the *Era* newspaper, and of Camden-road-villas. No cards.
STEAINS—BOUSFIELD.—On the 18th Dec., at St. Bartholomew's, Sydenham, by the Rev. W. H. Harke, cousin of the bridegroom, assisted by the Rev. Charles English, incumbent of St. Bartholomew's, and the Rev. Henry Stevens, incumbent of Holy Trinity, Sydenham, Arthur Steams, jun., of Springfield, Dulwich, eldest son of Arthur Steams, Esq., the Mount, Forest hill, to Mary, youngest daughter of Thomas Bousfield, Esq., of the Elms, Itfield, Sussex, and Summerfield-house, Forest-hill, Kent.

DEATHS.

BONNEY—On the 1st Nov., at Shanghai, Alexander Bonney.
BOYD—On the 28th Oct., at Shanghai, suddenly, Mr. J. G. Boyd, late of Singapore, aged 43 years.
CONDAMINE—On the 4th Nov., Henry de la Condamine, aged 29 years.
FRASER—On the 28th Oct., at the Government Civil Hospital, Hong Hong. George Fraser, seaman unemployed.
HALKET—On the 23rd Dec., at Newcastle-upon-Tyne, Richard Forbes, twin son of Richard Webb Halket, Esq., of Hankow, China, aged nine months.
HOWARD—On the 13th Aug., on his passage from Shanghai to Australia, of a sunstroke, Chasem re Howard, Commander of the ship Bridgetown, second son of Fred. Robt. Howard, of Ardingly, Sussex.
PEASE—On the 4th Nov., at Shanghai, Mr. Edwin J. Pease, of Massachusets, United States.
SCHMIDT—On the 26th Oct., at Hong Kong, drowned while working aloft on board the Hamburg barque Bravo, Adolf Schmidt, aged 21 years.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents and is divided into decimal parts of ten.

COMMERCIAL REPORT.

CHINA AND JAPAN EXPORTS.

TEA.—The teamen are still obstinately bent upon obtaining prices which merchants, in the face of advices from home, cannot possibly agree to, and the trade during the fortnight has been cramped. At Foochow the native dealers have shown a greater readiness than those of the other ports to accommodate themselves to the market, and transactions have been going forward freely, but at Shanghai scarcely anything has been done, except in Greens for the American market.

CANTON.—Country Congous: The stock has increased to 33 chops or 21,819 packages, with no settlements whatever to report; how long the teamen will be enabled to hold out is a question hereafter to be solved, but any offers of intending purchasers that exist at present certainly rule about 4 to 5 taels under teamen's present ideas. Country Greens: 5 chops or 3,800 packages have arrived, but musters as yet have not been put on the market. Among these are the well known chops Eu-Thie and Teen-Hing; reports are contradictory at present as to the quantity of leaf likely to come to the market this year. Canton-made Teas: Settlements of Scented Orange Pekoe for the fortnight are estimated at 3,000 boxes, costing 22 to 28 taels, and Scented Capers 3,500 boxes 19 to 26 taels. Some 2,500 boxes Gunpowder have been taken, the bulk at 20 to 22½ taels, and 100 boxes at 27 taels; the only other settlement is 200 chests

Digitized by Google

Imperial for the Continent at 19 to 22 taels. In Canton packed Congou there is nothing doing. Sales, &c., are reported as follows:—Country Congous, none; Scented Orange Pekoe, 3,000 boxes, at 22 to 28 taels; Scented Caper, 3,500 boxes, at 19 to 26 taels; Gunpowder, 2,500 boxes, at 20 to 27 taels; Imperial, 200 chests, at 19 to 22 taels; Country Greens, none.

AMOY.—Congou: This season's, crop is now exhausted. The few chops which remained in the hands of the teamen having been nearly all settled at prices slightly in favour of buyers.

FOOCHOW.—Oolong: About 23,000 half-chests have been taken for the New York market at taels 16 to 21 for inferior to fair cargo, and taels 22 to 26 for good cargo to superior grades. The settlements reported are 27,293 chests, 20,008 half-chests and 2,929 boxes at from taels 6.5 to 22.5; say 1,764 chests and 2,179 half-chests at taels 6.5 to 12, for Dust and Broken Leaf, 3,478 chests and 4,283 half-chests at tls. 12 to 15 for Common to Good Common, and 22,051 chests 13,546 half-chests and 2,929 boxes at tls. 16 to 22.5 for Flavoury to Good Flavoury. Souchong: Common to fair, 890 chests at tls. 17 to 22; Good to 2nd class (1st crop), 2,053 chests at tls. 26.5 to 30. Oolong:—Inferior to fair cargo, 21,000 half-chests at tls. 16 to 21; Good cargo to superior, 2,928 half-chests at tls. 22 to 28.

SHANGHAI.—Black Teas: The continued disastrous advices received from home, and the large stock at present on offer here, have caused an entire cessation of business in Congous. Only two chops have been settled since last mail, and they at rather lower prices. The stock is chiefly composed of common Oonams and Ningchow, for which 17 to 21 tls. (Lomion value) has been bid; holders, however, refuse to part with them except at 2 or 3 tls. above these rates. Settlements for the fortnight have been as follows:—663 chests fair Hohow, at 17 tls. per picul; 150 chests fair Oopack, at 23 tls. per picul; total, 813 chests. Green Teas: There is again a fair business in Fychows and Moyunes to report, solely for the American market. Prices have been very irregular, in some instances even above last quotations, but at the close of business fair to medium grades may be quoted one tael lower, whilst all good to finest chops are held for previous rates. These latter will no doubt be scarce throughout the season, for it is a noticeable fact that the favourite chops yet received are much smaller than in ordinary years. One chop of Pingsuey is the only settlement for the London market. Settlements have been as follows:—15,100 half chests common Fychow to finest Teenkai and Moyune at taels 33½ to 45 proportion; 1,200 half-chests fair Pingsuey, at taels 34 proportion; 1,100 half-chests local packed Fychow, at taels 28½ to 33 proportion; total, 17,400 half-chests.

HANKOW.—The market had continued very dull, settlements only amounting to 5,800 chests, 4,200 chests of which were taken for Russia, at 14 to 14.6.0 tls. per picul. Holders were storing their teas in foreign godowns, and seemed unwilling to accept any material reduction in prices.

KIUKING.—Black Teas: The only settlement is a small lot of 300 chests Hohow, at tls 20, the other arrivals going forward to Shanghai on native account. Quotations can only by nominal. Green Teas: 33,000 pkgs. had arrived, but holders of fine teas remaining firm the settlements, comprising nearly 11,000 half-chests, showed no general decline; 4,500 half-chests had been shipped to Shanghai on owner's account. Quotations were:—Moyunes, fine to finest, 35 to 39 tls.; common to medium, 30 to 35 tls.

YOKOHAMA.—There has been a very large business done in the Tea market, and prices have risen considerably, showing in several instances an advance of fully $2 to $3 per picul on the quotations given in the last report. The purchases have all been made for America, and consist principally of good medium to fine grades. Settlements are estimated at about 4,400 piculs. The quotations and stocks are as follows;—Good Common, $18 to 26, 800 piculs; Medium, $28 to 32, 4,000 piculs; Good Medium, $32 to 36, 1,000 piculs; Fine, $37 to 46, 1,000 piculs.

RAW SILK.—SHANGHAI.—A fair business has been done in China Silk, holders of anything but the very best chop Tsatlees being anxious sellers at a slight reduction in price. Arrivals from the country have been on a large scale, but were mostly composed of very inferior silk. The quotations are as follows:—Tsatlees, Chops No. 1, tls. 635 to 645 per picul; 2, tls. 615 to 625; 3, tls. 595 to 605; Market 3, 560 to 575; 4, 530 to 550; 5 and com., 475 to 520. Taysaams, Chops No. 1, 545 to 550; 2, 520 to 530; 3, 490 to 500; 4, 5, and com., 430 to 470. Yuenfas, No. 1, 570 to 580; 2, 540 to 550; 3, 510; 4 and com., 470 to 490. Hainins, 470 to 570; Hangchow Tsatlee, 500 to 510; Sewhings, 400 to 450; Laeyongs, 415 to 420.

YOKOHAMA.—There is no improvement in the quality of the supplies to report, and prices close at from $10 to 40 lower than last quotations. The really superior hank silks are not to be found at all, and the very few parcels that comparatively come under the head of best are held at extreme prices; in fact, the standard of quality is lower then it used to be. The settlements of the fortnight amount to about 700 piculs, and consist chiefly of the medium and inferior grades in hank silk, Oshio, Koshio, and Sodai. The arrivals have been about equal to the settlements, and the unsold stock consists of 450 or 500 piculs. It includes some Ida, Echezan, and Mashta, which have just arrived, and will be quoted in the next report. Arrivals of silkworms' eggs have been gradually decreasing during the fortnight, and holders have been eager to get rid at prices ranging from ½ boo upwards, of the inferior goods they had in hand. The season may be considered as virtually closed, and total settlements now fully amount to 800,000 cards. The quotations are:—Mybash and Sinchu, best, 900 to $950 per picul; do., medium, 820 to $880 per picul; do., inferior, 750 to $810 per picul.

DRUGS, &c.—Cassia Lignea is again rather dearer holders being firm at $19.25, and stocks are now reduced to 2,000 piculs. Settlements comprise 1,500 piculs for shipments to Germany with a smaller portion to New York. Cassia Buds firm at $41 to 42 but no business done; stock 30 piculs. China galls $13.50 to 13.75 with 100 piculs on offer, Vermilion $39 to 40 per box of 50 catties for prime quality. Gamgal $1.80, stock 300 piculs, but no demand whatever. Rhubarb is offering only in very inferior qualities, and is kept at prices far above the average of those ruling in London. Essential oils and Star Anniseed: None in the market.

CAMPHOR.—HONG KONG.—No sales reported and no supplies arrived. Nominal quotation $26 per picul.

CHINA GRASS.—SHANGHAI.—Some little demand for shipment to Ningpo has caused holders to continue extremely firm. Best Long White is extremely scarce, and is worth fully tls. 14.0.0 per picul; No. 2, tls. 11.5.0 to 12.0.0; Green, tls. 9.0.0 to 10.0.0. At Hankow the market was bare of best quality, and tls. 12.0.0 per picul demanded for second and third crop.

CHINA AND JAPAN IMPORTS.

SHANGHAI.

The more favourable advices received by telegram of the position of the Cotton Market in England caused more firmness on the part of importers, and for 8¼ lbs. Grey Shirtings an advance of 5 candareens has been established upon last quotations; 7 lbs. are as last quoted. For White Shirtings and T-Cloths the market is very dull, and prices drooping.

WOOLLENS.—Long Ells have further given way in value. Camlets and Spanish Stripes are also lower. Lastings are as last quoted, but sales are most difficult to effect.

At Hankow the demand for imports has continued to improve, but prices for plain cottons show no quotable change. Dyed fancy goods are wanted, but for woollens and worsteds the demand is still small. At Yokohama Grey Shirtings have been in active demand, at slightly higher rates, and deliveries have been unusually large; in other descriptions of manufactured goods there is no change for the better to record.

METALS.—Lead has continued in small request for shipment to Japan, but quotations exhibit no change. For iron the inquiry has been small excepting nail rod, which has met with fair attention at quotations. Quicksilver maintains its value

COALS.—The market has been quiet during the past fortnight. Arrivals have been small: 950 tons Cardiff and 1,090 tons Australians, and owners of cargoes to arrive show no inclination to accept present rates. Sales of Cardiffs have been effected at tls. 10.7.5, of Australian at tls. 8.7.5, of Japan at tls. 6.2.5, and of Formosa at tls. 6.0.0 per ton from godown.

HONG KONG.

An irregular market, showing a demand at some of the ports for imports neglected elsewhere, and a capricious inquiry has been shown by the transactions of the fortnight, but business all round has remained in an unsatisfactory state.

There is very little change in the character of the market to notice, and the only marked improvement which has been shown by the transactions of the fortnight has been an increased inquiry for Cotton Yarn, Nos. 16-24 have been in demand, and been placed to the extent of over 700 bales at prices ranging from $160 to 190 per bale. A small parcel of 38-42 has brought $255 per bale, and 60 bales of 28-32 have been placed at $200 per bale. Grey and White Shirtings have been almost entirely neglected. A large parcel of damaged T-Cloths have been sold by auction, but there is no general inquiry for that description of goods. Long Ells have been placed to a moderate extent at reduced rates, and in Metals a small business has been done at about previous rates.

YOKOHAMA.

We have to report an improved demand for imports. In Grey Shirtings a good business has been done at improved rates. Cotton Yarn is not in quite such active demand. Taffachelass has been rather more inquired for. Black Velvets, Turkey Reds, Dyed Spots, and Brocades are saleable at quotations. Camlets keep depressed, and in the face of large stocks we can hardly anticipate much improvement; we hear of some few transactions in Iron, but Lead is scarcely in such good demand.

Should the war with Choshiu terminate speedily we should hope ere long to see a better demand for most staples, especially as cotton is now so dear in the country. The only arrival from London is the Mere, with a general cargo.

EXCHANGES ON LONDON.

[For dates, see first page.]

		Bank.	Private.
At Yokohama	6 months' sight.	4s. 6¼d.	4s. 7½d. to 4s. 7¾d.
At Shanghai	6 ditto	6s. 2¼d.	6s. 3d. to 6s. 3¼d.
(per Tael.)			
At Canton, At Hong Kong, At Macao	6 ditto	4s. 6¼d.	4s. 6½d. to 4s. 7d.
At Singapore	ditto	4s. 6½d. to 4s. 6¾d.	4s. 6½d. to 4s. 7¼d.
At Manila	ditto	4s. 1d.	4s. 2d.

At Shanghai, bills on India, Rs. 301 per 100 taels. At Hong Kong, Rs. 219½ per $100. Bar Silver at Shanghai, tls. 111·2; at Hong Kong, 11¼ per cent. prem. Mexican dollars at Shanghai, tls. 73 80 per 100; and exchange on Hong Kong, 26 discount. Hong Kong and Shanghai Bank shares, old, 3 per cent. dis., new, 1½ per cent. dis.; Gas Company, 10 per cent. prem.; Hong Kong and Whampoa Dock, 15 to 20 per cent. prem.; Steam Shares, 8 per cent. dis.; Union Dock Company, 17 per cent. dis.; China Traders Insurance, 4 per cent. prem.

The latest telegram, dated Hong Kong Dec. 1, gives exchange at 4s. 6½d. and at Shanghai, 6s. 4d.

The following is from Sharp and Co.'s circular:—

GOLD.—The imports of this bullion to $540,000 and the outward shipments to $490,000, including those per Salsette on the 1st inst., and excluding those to leave to-morrow, which will be about three to four lakhs.

SILVER.—The market has been freely supplied with Bar and Sycee which has notwithstanding been eagerly purchased at advanced rates, the arrivals amount to $1,030,000 worth and the exports to $810,000 excluding the present mail for which many purchases have been made.

DOLLAR CURRENCY.—The imports of Mexicans are $300,000 and the exports $320,000. There will also be considerable shipments to India, the orders thence still prevailing to send nothing but bullion. So long as this demand can be supplied from the North with a profit to Hong Kong as at present, no inconvenience will be felt.

EXCHANGE.—There has been a slight decline from last rates, the amount of business being less than usual especially in rupees.

DISCOUNT AND MORTGAGES.—Money is still wanted at very remunerative rates for lenders, short discount commanding 10, and mortgages 12 per cent.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—From London, Oct. 26, Merse.

At SHANGHAI.—From London, Nov. 6, Albuera; from Liverpool, 5, Kate Carnie; from Cardiff, Oct. 29, Queen of the Ocean; from Sunderland, Nov. 7, Zodiac; from Newcastle, 7, Asphodel; from Hamburg, 5, Japan; (reported by telegram) from London, Peter Denny; from Sydney, Beemah.

At HONG KONG and CANTON.—From London, Nov. 7, Lobelia, Red Riding Hood.

At MANILA.—From Liverpool, Oct. 22, San Fernando.

At SINGAPORE.—From Newcastle, Nov. 10, St. Louis; from Cardiff, 11, Miaca (st.) 14, Samhiri.

At PENANG.—From London, Nov. 15, Algernon; from Liverpool, 22, Achilles (st.).

VESSELS EXPECTED.

From YOKOHAMA.—Thomas Dryden, Conference.

From NAGASAKI.—George, Margaret Campbell.

From HANKOW.—Mary Nicholson.

From SHANGHAI.—Nelly, Illimani, Lansdowne, William Melhuish, Charlgrove, John Paul, Knight of Snowdon, Marquis of Argyle, Trebolgan, Queen of the East, Antipodes, Helen Nicholson, Ann Adamson, Dartmouth, Polmaise, John Bull, Agamemnon, General Caulfield, Sir W. F. Williams, Juanpore, Red Deer, Onsuri, Janet Mitchell.

From FOOCHOW.—Monarchy, Naomi, Veronica, Louisa, Northfleet, Beautiful Star and Scawfell.

From CANTON.—Island Queen, Victoria, The Cedars, Kelso and Solent.

DEPARTURES.

From YOKOHAMA.—None.

From SHANGHAI.—For London, Oct. 30, Scindia.

From FOOCHOW.—For London, Oct. 24, Dunmail; 30, Ellenborough; 31, Fontenaye.

From AMOY.—For New York, Nov. 3, Gresham.

From HONG KONG and CANTON.—For London, Nov. 1, Samuel; for New York, Acapulco.

From MANILA.—For London, Nov. 7, Gilminar; for Cork, Oct. 31, Charlotte; for New York, 23, Arracan.

From SINGAPORE.—For London, (via Penang and Mauritius) 11, Ajax, (st.); 21, for Liverpool, Isabella.

From PENANG.—For London, Nov. 1, Rockliff; 14, Ajax, (st.); York for New York, Nov. 1, Teesdale.

VESSELS LOADING.

At YOKOHAMA.—For London, Corea; for New York, Lorton, Chaa Sze, Banda.

At SHANGHAI.—For London, Elizabeth Nicholson, Southern Cross, Camilla, Cissy, City of Quebec, Charlotte; for New York, Andreas, Antelope, Assyrian, Lady Louisa, Sea Witch, Edith Banfield.

At FOOCHOW.—For London, John Temperley, Banian, Gauntlet, John C. Munro.

At AMOY.—For New York, Florence Nightingale.

At HONG KONG and CANTON.—For London, Cheetah (full), Bankside, Cora Linn; for New York, Albert Victor, Charger, Powhattan.

At MANILA.—For London, Congress; for Cork, Vicksburg; for Cadiz, A Lloret; for New York, Asa Eldrige, Belvedere, Panther.

At SINGAPORE.—For London, John Rennie, Sree Singapura, Edmund Graham; for Liverpool, Bothwell Castle, Chili.

At PENANG.—For London, Amersham; for New York, Elizabeth.

FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London, Cotton and Tea, £2 10s. to £3; Silk, £4 to £4 10s.

At SHANGHAI.—A limited business has been done. An attempt has been made to raise the rate for London to £2, but unsuccessfully; it remains £1 10s. per 50 cubic feet. For New York, £2 per 40 cubic feet. A telegram from Shanghai, however, dated Nov. 24, quotes rates advanced to £2.

At FOOCHOW.—To London, £2 to £2 10s.

At HONG KONG and CANTON.—Very little demand exists for tonnage, especially for coasting purposes. The following settlements, &c., are from the circular of George Holmes:—Victoria (Ham.), 352 tons, Rice Ports to United Kingdom or Continent, at £3 per ton; Caroline (Prussian), 266 tons, Hong Kong to Hamburg, £2. 10s.; to Bangkok and back, 32½c. to 37½c. per picul; Saigon to Hong Kong, 30c.; G. C. Lorenz Meyer (Ham.), 275 tons, Hong Kong to Saigon and back, $620 in full; unemployed vessels in Hong Kong, 55, representing 31,018 tons.

At MANILA.—The only transaction to note, is the engagement by the American ship America, for New York, of 400 tons sugar at $3 per 20 cwt., and hemp at $4 per 4 bales.

For a port in the United Kingdom, £2 for sugar and £2 10s. per 20 cwt., for hemp, could be obtained.

At SINGAPORE.—Freights continue exceedingly dull, tonnage in the harbour much larger then required, vessels on the berth for London and Liverpool, £1 15s. to £2 dead weight, £2 5s. light cargo.

At PENANG.—For London, £2 10s., light freight, £1; for New York' £2 10s. dead weight, £2 17s. 6d. light freight.

CASUALTIES.

FOOCHOW.

A naval Court was held on the 19th October, at Foochow, to inquire into the recent loss of the British barque Fanny, off Haitan Straits. The Court found that the ship drifted on to unsafe ground from the parting of her cables, and from thence on to the rocks, and that no blame is to be attached to the master, John Waters, or to the crew, but that on the contrary every exertion was made to save the ship, they remaining by her until their lives were in danger.

HONG KONG.

Captain Innes, of the steamer Teenchang, arrived at Hong Kong on Nov. 4, having lost his vessel on a passage to Amoy near Kiatsz, at which place he found a junk for Hong Kong, in which he and all his crew arrived safely.

SAIGON.

The Austrian brig Timavo reports having spoken the French ship Eugene and Adele, off Cape St. James, Oct. 14th, which reported having left Macao, Oct. 10th, bound to Havana with coolies, and that on the 11th the coolies revolted, killing the captain and severely wounding the mate and six men—five of the Chinese were killed, and several others jumped overboard. The French Government boats took her in charge, and sent her into Saigon until an inquiry can take place. The Timavo reports having had fine weather all the passage except a typhoon on the 23rd, in which she lost several spars, sails, &c.

VESSELS PASSED STRAITS OF SUNDA.

COMMERCIAL POSTSCRIPT.

ARRIVALS NOT INCLUDED IN THE TABLES.—Dec. 20, off the Lizard, from Rangoon, Sleipner; 21, at Liverpool, from Manila, Benjamin Bangs; from Singapore, River Eden; at Queenstown, from Maulmain, Africa; 20, at Brouwershaven, from Batavia, Æolus; from Maulmain, Amity; at Zierikzee, from Batavia, Stad Delft; 25, at Deal, from China, Blencathra; 24, at London, from Zebu, Ravensbourne; 25, at Liverpool, from Akyab, Edward Oliver; 26, at Deal, from China, Wild Deer, Marion; at Falmouth, from Bassein, Cheribon; 27, at Liverpool, from Manila, Dezwaan.

DEPARTURES.—Dec. 24, from London, for Colombo, Spirit of the North; 21, from Cardiff, for Singapore, Freeland.

SPOKEN.—Joseph Willem, Batavia to Amsterdam, Nov. 8; Susanne, Bordeaux to Batavia, Nov. 18, 11 N., 27 W.; Anna, Newcastle to Batavia, Nov. 3, 9 S., 36 W.; Maria Eliza, Cardiff to Singapore, Oct. 14, 36 S., 16 W.; Sunbeam, London to Shanghai, Oct. 14, 36 S., 16 W.; Oberon, Cronstadt to the Amoor River, 52 N., 3 E.; Nagasaki (Dutch brig), Batavia to Amsterdam, Nov. 26, 28 N., 32 W.; Medea (Dutch ship), Rotterdam to Batavia, Nov. 17, 10 N., 23 W.; Holland (Dutch barque), Batavia to Rotterdam, Nov. 2, off Cape Agulhao; Alcyone (Dutch barque), Batavia to Amsterdam, Nov. 30, 18 N., 31 W.

CASUALTIES.—The Sir Lancelot, Robinson, from London to Shanghai, which put in at Falmouth on the 16th December, dismantled, after collision, has been surveyed, and commenced landing her cargo. The Pauline Constance Eleonor, v. Ingen, which arrived at St. Helena Nov. 22, from Batavia, had made much water during the voyage, but in port was comparatively tight; the master considered the leak to be in the topsides, and it was said that he had had them caulked. The Christina Maria, of Amsterdam, de Veer, from Batavia to Amsterdam, with coffee, sugar, indigo, &c., put into Port Elizabeth, Nov. 4, in a disabled state. On the 24th Oct. she encountered a heavy gale in lat. 32 S., lon. 31 E., which carried away her mainmast, foreyard, and chain plates, and sprung her foremast. Her cargo was being discharged; a small portion of it had been damaged by sea water.

At ST. HELENA.—Nov. 15, Elizabeth, Owen, from Penang, and sailed for London; 16, Marion, Laughton, from Foo-chow-Foo and sailed for London; 17, Holland, Gronbeck, from Batavia, and Aquarius, Altman, from Batavia, and both sailed for Amsterdam; Catherina, Wilhelmina, de Boer, from Batavia, and sailed for Schiedam; 18. Zaanstroom, Driest, from Batavia, and sailed 19 for Amsterdam; Conception, Tuton from Manila, and sailed 20 for Alicante; 22, Pauline Constance Eleonor, v. Ingen, from Batavia, and sailed 24 for Amsterdam; Hendrika, v. d. Valk, from Batavia, and sailed for Rotterdam; 23, Island Queen, Dickson, from Hong Kong, and sailed for London; 25, Scheveningen, Annokke. from Batavia, and sailed 27 for Rotterdam.

The Admiralty have invited tenders for the conveyance of 15 tons hospital bedding from the River Thames to Hong Kong.

*** *Companies omitted in the above list will be included if the particulars are forwarded.*

THE ANGLICAN BISHOPRIC IN CHINA.—We are credibly informed that an unexpected delay has been interposed by our Foreign-office authorities to the creation of a second Anglican bishopric for the North of China, in connection with the proposed subdivision of the diocese of Victoria. Lord Stanley, in reply to the formal application of the Archbishop of Canterbury for the Royal license, has conveyed the intimation that in the view of Her Majesty's Government it is expedient to refer the matter for the opinion of the British Minister at Peking before any final decision be adopted in favour of the proposed scheme.

A PRESENT FROM SIR JOHN BOWRING TO THE QUEEN.—Her Majesty having expressed her gratification at receiving a copy of the German renderings of the poems of Petofi, the popular poet of the Hungarians, which had been sent to her from the Continent, Sir John Bowring has asked for leave to offer to Her Majesty his English version, which has just appeared. To this request he has received the following gracious reply:—"Osborne, Dec. 18, 1865. My dear Sir John,—I have not failed to present your pretty little volume to the Queen, who commands me to return you her best thanks for your kind attention in sending it to her. As time allows, Her Majesty will be much interested in looking over its contents.—Believe me, yours very truly, C. GREY."

EAST INDIA RAILWAYS.—The report of the East Indian Railway Company, to be presented on the 31st inst., is the most important document of the kind yet issued with regard to Indian lines, since it announces for the first time the payment of a dividend in excess of the 5 per cent. interest guaranteed by the Government. The surplus is £108,073, half of which belongs to the India Government, and the remaining half will enable the dividend to be increased from the rate of 5 per cent. per annum to 5¼ per cent., leaving £1,000 to be carried forward, after appropriating £9,166 to a reserve fund to meet a probable loss from the failure of a concern called the Commercial Transport Association at Calcutta. The working expenses for the half-year to the 30th of June last were 41·34 per cent., against 42·30 per cent. in the corresponding half of the previous year; the number of passengers was 2,099,737, against 2,183,319, and the tonnage of goods was 401,305 tons, against 391,951 tons, and the net earnings were £626,218, against £474,083. The vacancy in the board caused by the death of the late Captain Nairne is to be filled up by the nomination of Mr. D. I. Noad, the secretary, to be managing director. The interest paid by Government on the East Indian line from its commencement has amounted to over £4,000,000. When this shall have been paid off by the division of all earnings above 5 per cent., the whole of the net revenue will go to the shareholders.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, DEC. 13

Amidst the political struggles at home the Cabinet is brought into a very critical position by the steps of the Belgian Government with regard to the Scheldt question. These are described by the *Independance* in the following terms: "When in the middle of last August there was a question of naming a committee of Dutch-Belgian engineers to examine the affairs of the weirs in the Scheldt, Belgium proposed to add to that body a French, an English, and a Prussian engineer, in order to arrive at an arbitration. The Cabinet of the Hague, finding itself already exposed to the reproaches of the Chamber for having consented to the nomination of Belgian engineers, refused the admission of any foreigners. The Belgian Cabinet, on its side, finding itself on the eve of interpellations on the subject in the Chamber of Representatives, addressed itself directly to England, France, and Prussia, begging them to appoint engineers to examine how far the judgment given by the Dutch-Belgian Committee in their report of September 15 was well or ill founded. It is known that, according to the conclusions of the Belgian engineers, the weirs would be prejudicial to the navigation of the Scheldt, not up the river, but below. The Dutch Government has just been officially informed of this step taken by the Belgian, and has sent instructions in consequence to its diplomatic agents at Paris, Berlin, and London. It is obvious that if the international committee is constituted after the pleasure of the Belgian Government, it will have no power to proceed to the examination of the question on the Dutch territory, without having obtained the preliminary authorisation of the Cabinet at the Hague."

I can officially add to these comments of the Belgian paper, that our Government has most positively refused to give the said authorisation, and that it has declined in any way to meddle in the question.

The Government will not take any notice of the foreign engineers should they be sent to make a local inspection.

Again we have to regret the loss on our coasts of an East Indiaman, the *Gebroeders*, Captain L. van Duin, which with a full and valuable cargo on account of the Dutch Trading Company, had arrived in the Bight of Katwyk, where the ship stranded. The crew and cargo were totally lost. Amongst the bodies washed ashore were those of the East India official, Mr. W. H. Willemse, his wife and four children, who were on their return home, and took passage on board of this ship. His valuable papers were washed on shore. H.M.'s steamer *Heldin* arrived at Texel on the 7th, from the East Indies.

The capital wanted for constituting the Scheveningen Harbour Company is all subscribed. Within a short time the shortest possible communication between England, Holland and Germany, will be established.

Again I have to convey bad news with regard to the spreading of the rinderpest. According to the last official returns not less than 7,162 head of cattle were attacked in the week ending the 1st of December, against 3,257 and 1,595 in both the previous weeks.

The King has bestowed on Mr. J. W. Blanken, ex-Minister of War, a pension of 4,000f. per annum.

I beg to correct some printers' errors that appeared in my letter. The deficit of Mr. Heshuizen was mentioned as being 9,000,000f. and by the other account 2,000,000f. In both these sums there is one 0 too much, likewise in the amount for which the *Elizabeth* was insured. This was only one-half million of guilders instead of 5,000,000f.

In the Hague, a new independent daily paper will be published as soon as the capital of 500,000f. is subscribed. A great many *hommes de lettres* have already enrolled themselves as collaborateurs of the future "*Dagblad van Nederland.*" I do not think however that it is very probable, that the capital will be found; it is but too well known that a daily paper, of large size, incurs in this country heavy pecuniary losses.

De Tyd has collected in behalf of the Pope, 16,200f. The contributions are very small; a sign which is not without significance.

COMMERCIAL.

COFFEE.—The market is firm, but without transactions. Good ordinary Greenish Java is paid with 41½ to 42c.; White, 44 to 46c. The quotations however are literalty nominal.

SUGAR (RAW).—Holders decline to sell floating cargoes or their stock at the actual prices, whilst the refiners do not make haste to buy because it is very difficult to sell the refined sugars.

TEA.—A very inactive market in waiting for the cargo ex Monarchy, from Foo-chow-Foo.

RICE.—1,000 b. Java ex Robert Dixon were sold at 10½f. The quotation now is 1a Java Table 16 to 18f.; 2a 13 to 14f.; White, 11 to 12f. Cargo, 7 to 8f. There is want of stock in the first hand.

TOBACCO (JAVA LEAVES).—The market is very active in consequence of the result of the last auctions, on which the whole quantity (17,616 b.) was sold. Very remarkable was the price paid for the 189 P.v.d. A, from Sumatra, being in average 148c. The auction of the 9,000 b. on the 20th is delayed.

SAPANWOOD.—A few little parcels of Bimas were sold from 7⅛ to 7¼f.

BANCA TIN.—1,000 slabs only were sold at the improved price of 47¼f.

ARRACK.—The 35 casks Alcohol ex St. Jan from Pekalongan were sold at prices that did not transpire; likewise 25 casks Batavia ex Tweelingen; but the 36 casks Batavia ex Advance offered by inscription were also sold at secret prices.

CAMPHOR.—Japan, 78, China, 75 cents. The market is duller.

JAPAN WAX.—Without transactions by want of stock.

RATTANS.—50 piculs ex Margaretha Simonetta, and 75 piculs ex County of Renfrew, were sold.

SPICES.—The market is very firm notwithstanding the transactions are of little importance in consequence of the season. Mace with more demand, and 98 cents were willingly paid for D, 94 to 95 for E, so that now nothing can be bought under 99 to 100 cents. Nutmegs without any speculative demand; the quotations however are maintained. Cloves: No. 2 firm at 30 cents. Cinnamon: Java, firm, but the market was inactive; China, 70 cents, without stock.

MONEY.—The Dutch funds have shown somewhat greater firmness, but there is for the moment nothing either politically or financially to cause alteration; nor, to every appearance, can any important change, worthy of notice, be looked for until after the close of the year. The foreign market continues quiet and inactive by want of any speculative demand. Dutch Two-and-a-Half per Cents., 53½; Three per Cents., 63¾; Four per Cents., 86⅝. Trading Co., 135½d. Spanish Two-and-a-Half per Cents., 31¼. Portuguese Three per Cents., 41. Russian Five per Cents., 91½. Austrian Five per Cents., 43¼.

SHIPPING.—ARRIVALS.—Dec 6, at Brouwershaven, from Sourabaya, van Artevelde; at Texel, from Batavia, Henrietta Geertrude; Dec. 7, at Hellevoet, from Batavia, Vyf Vrienden; at Texel, from Batavia, H.M.'s war-steamer de Heldin; Dec. 9, at Brouwershaven, from Batavia, Noach.

PASSENGERS INWARD.—From Java, per Noach, Messrs. de Lange, Herkewrath; Schieke and family, Nederburgh; Arnold and family.

ROTTERDAM, DEC. 22.

The section report upon the first chapter of the Budget, in which is communicated the political considerations, was published yesterday. The expectation that it would contain a formal declaration of war against the Cabinet is not fulfilled. The majority thought it neither necessary nor advisable to discuss again what was done by the former dissolved Chamber and a good many of the members protested against the endeavour of the Cabinet to limit the Ministerial responsibility, and deprecated the Roya proclamation being sent to the electors, by which the liberty of the electors was attacked. The Ministerial speech by which this sitting was opened has been severely criticised. Perhaps a treaty of peace will be now signed by the parties and maintained until a favourable opportunity presents itself to overturn the Cabinet. Of course the Ministerial papers have reasons to applaud this report, which is only somewhat embittered by the opposition shown to the Minister of Finance, whose system of management was condemned by the majority, because of increased expenditure as regards the departments of War and Marine, notwithstanding the Minister himself had always talked about the very deplorable condition of our Treasury. The majority, however, was convinced that there should be still a considerable surplus from the public service of 1866, and therefore condemned the measure of this Minister because he did not spend the amount of 6 500,000f. for the redemption fund, which amount was voted for this purpose. The members, however, thought it prudent that this amount should remain in reserve for possible deficiencies in following years, when the favourable balance of our colonies may be enormously decreased, as the construction of railways will take a large sum of money, and very important expenses will be required for the system of defence and the marine. These members were of opinion that we should then be obliged to contract loans, instead of being able to keep the balance in our expenses and receipts. It was also highly condemned in this Minister that he used all possible means to raise the sum which our Treasury receives from the Far East (the Tory system); whilst the Liberals did all they could to spend as much as possible of that favourable balance for the welfare of our colonies. The Ministerial answer to this report of course cannot be of much importance, and till the 9th of February, when the Second Chamber, which has taken its Christmas leave, will meet again, our political situation will remain very calm. It may, however, be that in the meanwhile our political relations with foreign countries will produce some difficulties; the important diplomatic question with Prussia is still unsettled, whilst Belgium does its utmost to give an international character to the Scheldt question, which by that treatment may create a great deal of trouble. The attitude of the Minister for Foreign Affairs in both these diplomatic subjects was severely condemned in the sections, and the wish was expressed that negotiations might be opened with the English Government about an extradition treaty. Some members expressed their fears that our commercial relations with Japan were much prejudiced by the inland war there, and they were of opinion that the Dutchmen residing in Japan were not so much protected by our Government as they ought to be; likewise they said they held a firm conviction that the indemnification paid by the Japanese Government to the allied European Powers, in consequence of the expenses of the war against the Prince of Nagato, was not divided amongst those Powers in an equitable way. The indemnification received by the Dutch Government was said to be much too small.

Before the Second Chamber separated the credit laws were approved of, while a discussion took place about a very deplorable fact. Some days ago scandalous disturbances took place at the Military Academy at Breda. One of the cadets was so ill treated that being unable to defend himself any longer against these attacks, he committed suicide by taking poison. The Minister said that the reports published by the papers about this affair were correct, and promised that not only the ringleaders should be punished severely according to the military laws, but that the academy should be reorganised within the shortest time, in order to guard against such occurrences again. This event has caused a good deal of sensation in our country. It is rumoured that the Minister for the Home Department will suspend those professors who signed the declaration that the Cabinet acted contrary to the fundamental law when it dissolved the Second Chamber, in consequence of the last constitutional question.

Professor Simon Thomas, from Leiden, has been named honourable member of the Obstetrical Society of London. Since this society was founded only eleven foreigners have been honoured with this title.

The Belgian Court of Commerce at Brussels has given a verdict in favour of the *Societe de Commerce et d'Industrie*, from Amsterdam, against the well-known banker Mr. Langrand Dumonceau. This gentleman is condemned to pay to the company a sum of one million of francs.

His Majesty the King has returned from his seat "Het Loo" to the Hague.

A great part of our country is inundated by the heavy rains that have fallen during the last week, by which much damage has been done to the fields.

COMMERCIAL.

COFFEE.—The market is inactive; but there is a good demand for ord. qualities from the last auctions, so that for some parcels an advance is paid. The nominal quotation for good ord. Java is 41 to 41½ cents.

SUGAR.—In consequence of the important contracts for deliveries of refined, there was more demand for raw sugar. 1,543 mats Java, No. 14¾, were sold floating at 34¾f.; 405 mats, Passaroean, No. 14¾, good to fine, at 35f.; and 2,000 mats Java, No. 12, at 13 to 13½f. above November value, which price is now the nominal quotation.

RICE.—Java without stock.

SPICES.—Prices unaltered, but very firm.

TOBACCO (JAVA LEAVES).—A good business was done in those parcels sold in the last auction, and for fine quality there is still a good demand. On the 23rd of January about 10,000 bales will be sold in auction.

CAMPHOR.—The market was extraordinarily active, and about 2,600 Colli Japan and China were sold, amongst which 771 tubs Japan of the Trading Company. The prices varied for Japan from 78 to 84 cents, and for China from 74 to 80 cents. The latter quality cannot now be bought under 82 cents, and the Japan sorts not under 85 cents.

HIDES to-day were sold by inscription, 1,650 p. Java Rinder.

JAVA INDIGO.—With some transactions; since our former report 75 chests were sold.

BANCA TIN.—The market closes very firm, and an advance is still paid on the last quotation. The transactions included 200 slabs at 47¾f., 600 slabs at 48f., 700 do. at 48¼f., 1,000 do. at 48½f. and 300 do. at 48¾f.

ARRACK.—25 casks Sourabaya ex Tweelingen were sold at secret prices.

RATTANS.—11,703 bundles and 400 piculs ex Englishman, were sold.

SAPANWOOD.—200 piculs Bhimas were sold by inscription by the Trading Co.

In general, the trade is very unfavourably influenced by the advanced season.

MONEY.—In my last report I had to chronicle the fact of continued depression in the stock-market; now and again occasional gleams of a return of confidence appeared, but they having been invariably followed by setting in of deeper distrust, the market closes again very heavily, as well in Dutch as foreign stocks. Perhaps after New Year's-day the business will revive. Notwithstanding the favourable Bank returns, it is not likely that any alteration of the rate of discount will take place, because the very important financial and commercial engagements of this year are not yet liquidated. The charge is still 5 to 5½ per cent. Dutch Two and a-Half per Cents., 54⅛; Three per Cents., 64⅜; Four per Cents., 86¾. Rotterdam Bank, 94; Central Railway Company, 49; Two and a-Half per Cents., Spain, 31½; Three per Cents., Portugal, 41½; Russian Five per Cents., 91⅛; Five per Cents., Austria, 43¼.

'CHANGE,—London: 3 mo., f.11.67½, 2 mo., f.11.70½; short, f.11.78. Paris: 3 mo., f.46.37½; 2 mo., f.46.50, short, f.46.80. Antwerp: 3 mo., f.46.30; short, f.46.65; Hambro': 3mo., f.34.75; 2 mo., f.34.87½; short, f.35.20.

SHIPPING.—ARRIVALS.—Dec. 24, at Brouwershaven, from Passaroean, Willem Kroonprins der Nederlanden; Dec. 18, at Texel, from Batavia, Jacoba and Christina; from Passaroean, Kykduin

PASSENGERS INWARD.—From Java, per Willem, Kroonprins der Nederlanden, Mr. Uhlman.

The following troopships are ready to sail:—St. Jan, with 125 soldiers, Ægidia and Pauline, with 125; Willemina and Clara, with 124; and the Argo, with 125 soldiers, for Java.

RUSSIA, GERMANY, &c.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, DEC. 14.

Several more voluntary contributions are announced in the local papers here as having been received for the alleviation of the sick and wounded soldiers of the late war. Among others are the following:—£145, producing 1,933 marks banco, from about thirty Germans at Manila, remitted by Mr. S. Baer, of that place; $133, producing 392 marks 12 sch. banco, from Germans resident at Foochow, and German captains of vessels in the harbour, remitted by Mr. Kruger, the Hamburg Consul at that port; from the Germans at Shanghai, 80 marks banco "for the widows and orphans of German soldiers who fell during the war," remitted by Mr. W. Hulse, of that port; and 100 marks banco from Messrs. Pickenpack, Thies, and Co., of Bangkok, Siam. The total of the contributions hitherto received by the Hamburg Committee in money and clothing, wine, fruit, cigars, and other gifts *in natura*, are announced as amounting to 112,644 marks 4 sch. banco.

At the last sitting of the Chamber of Commerce at Vienna a despatch was read from Herr Heinsen, the Austrian Consul at Shanghai, to the Minister for Commerce, giving a very full account of the manufactured articles most saleable in that market for consumption in China. He states that there is one item of Austrian industry that stands already so high in the estimation of the public there as to be generally preferred to similar articles made in other countries. He refers to the lucifer saloon matches manufactured by A. M. Pollak, at Vienna, and packed in circular card boxes of 150 each. They are not only in great favour, but fetch the highest prices.

What importance the Swiss attach to the commercial relations with the Far East may be gathered from the frequent reports of their Consuls, which are regularly published by the Federal Diet of the Republic. Among those that have created the greatest interest are the annual reports of the Swiss Consul-General at Batavia, and of the Consul at Manila for the year 1865, published at full length in No. 45 of the official organ of the Federal Diet, from which it appears that a considerable number of Swiss citizens have settled in both these Consular districts. The Dutch military service induced the greater part of them to go out to the Indian Archipelago, and after the expiration of their engagement they settle as civilians in different branches of trade and industry.

The correspondent of the *Cronstadt Messenger*, writing from Blagowessensk on the Amoor, announces the departure of the steamer *Admiral Korsakow* towing two vessels with 150 emigrant families (mostly lately arrived from the shores of the Wolga) from Charabowka, for the Ussuri district. The banks of the Ussuri, he adds, are extremely picturesque and diversified, the mountains densely covered with forests of cedars, whilst the soil of the valleys is fertile and rich, capable of producing in abundance everything grown in the temperate zone; but there are unfortunately too few inhabitants, and their means are too limited to benefit much by these natural advantages. The mountains and forests abound with furred animals, and their skins are so cheap that the best sables sell for four roubles each. The majority of the settlers are Russians, and they make but a scanty living by the chase and a little agriculture.

Digitized by Google

COMMERCIAL.

COFFEE.—The market is calm, and there is no alteration in quotations. Sales of the week, 10,000 bags.

SUGAR.—In the raw article there is more animation than has been observable for a long time, and prices are much firmer. Among the transactions of the week 23,950 bags Unclayed Manila and 300 kranjangs of Brown Java were bought by refiners. Refined is also firmer, but the sales were on a very limited scale, as there is but little in the market.

RICE.—There is a continued good demand for cleaned grain, and the prices are higher and firmer.

SPICES.—Cassia Lignea commands an easy sale, being still in demand for the interior of Germany at former rates. Ginger is more inquired for, and Pepper is rather cheaper.

SPELTER.—At the beginning of the week 2,000 centners were sold for January delivery at 14.2½ and 2,600 centners loco at 14.3, since which there were no transactions. The market, however, is in a firm condition,

DISCOUNT.—Money continues plentiful, and discount is lower; good bills can be done at 3½ per cent.

HAMBURG, DEC. 23.

The following tables are extracted from the official returns of the commerce of Hamburg in 1865, published by the Board of Trade in this city, casually mentioned in one of my last letters:—

1.—*Direct Imports from China.*

	Value in Marks Banco.
Tea, 15,766 chests 461 packages	740,970
Raw sugar, 9,660 bags	78,500
Cigars, 74,000	7,840
Cassia lignea, 25,734 chests 106 packages	893,650
Cassia flores, 211 chests	20,600
Candied ginger, 2,715 chests 5 casks	44,920
Soy, 80 tubs 1 chest	2,210
Galls, 332 chests	18,600
Vermillion, 50 chests	4,950
Galangal root, 425 chests	5,540
Star annis, 764 chests	77,240
Raw camphor, 400 chests	28,120
Oil of Cassia, 133 chests	42,250
Oil of star annis, 245 chests	73,610
Graphit, 25 chests	4,980
Walking-sticks, 270,668 No.	15,320
Mats, 1,025 packages	22,210
Porcelain, 136 chests	7,890
Fireworks, 674 chests 1,159 packages	46,100
Other enumerated articles	48,040
Total marks banco	2,183,640

2.—*Direct Imports from the Philippine Islands.*

Coffee, 158 bags	8,440
Raw sugar, 42,144 mats	361,390
Cigars, 82,000	1,840
Sapanwood, 802 centners	6,560
Hemp, 1,100 bales	50,180
Other goods	5,440
Total marks banco	433,850

3.—*Direct Imports from Singapore.*

Coffee, 939 bags	55,570
Tea, 135 chests	1,680
Sago, 9,182 chests	151,760
Pepper, 17,492 bags	845,780
Cassia lignea, 500 chests	16,260
Terra Japonica, 7,188 bales	277,630
Cubebs, 165 bags	6,250
Raw camphor, 111 chests	6,490
Buffalo horns, 14,068	10,770
Rattans, 31,462 bundles	24,480
Canes, 75,713	9,240
Other articles	7,830
Total marks banco	913,740

4. *Direct Imports from Netherlands India.*

Rice, 7,299 bags	118,900
Sapanwood, 224 centners	2,240
Gum Damar, 600 chests	22,940
Indiarubber, 158 bags	16,150
Buffalo hides, 170	1,000
Rattans, 26,950 bundles	23,550
Canes, 60,000	10,800
Other articles	840
Total marks banco	196,420

5.—*Total Imports of the following Articles.*

	Quantity in Centners.	Value in Marks Banco.
Coffee*	983,059	42,100,220
Tea*	25,233	2,429,670
Raw sugar*	447,265	6,759,990
Refined sugar	70,071	1,442,690
Candy	1,104	26,920
Rice	264,032	2,180,170
Sago*	17,467	240,470
Pepper*	28,147	611,940
Cassia lignea*	21,802	1,246,700
Cassia flores*	331	52,320
Cinnamon	848	98,560
Cardamoms	430	175,490
Cloves	4,081	94,180
Mace*	731	63,970
Nutmegs*	799	60,190
Ginger*	7,145	156,200
Soy*	57	2,700
Terra Catechu	5,607	96,390
Terra japonica*	20,931	314,240
Vermilion*	1,862	35,670
Galangal root*	879	10,970
Gentian*	739	11,850
Cassia vera	274	9,730
Star annis*	1,063	96,530
Cubebs*	231	13,680
Camphor, raw	1,802	117,700
Do. refined	27	2,820

At the last sitting of the Association for Natural History in this city, your notice, in a late impression of the LONDON AND CHINA EXPRESS, on the alleged invention of M. Trocol for extracting silk from mulberry leaves was read amidst a roar of laughter from the assembled members, who are otherwise grave and steady-going scientific men. The general impression was either that it was a simple hoax or that the alleged inventor of the process was *non compos mentis*. One gentleman remarked that the learned Theban appeared never to have heard of the law of nature called the transmutation of matter in the stomachs of all animals; another supposed he would next attempt to extract honey direct from flowers without the assistance of bees; a third said the discovery was fully equal in importance to that of the celebrated Yankee who had invented a machine for making deal boards out of sawdust; and a fourth was heard to grumble something about "Baron Munchausen."

COMMERCIAL.

Coffee.—The market continues remarkably firm, with a fair amount of business doing. Sales of the week 16,000 bags.

Sugar.—Raw is calm, but a better feeling prevails. Among the transactions was a sale of 7,600 bags of unclayed Manila. Refiners are rather more willing to sell for short delivery.

Rice.—In this market there is no alteration in values. Clean grain moves off quietly. The only sale of rough was 6,000 bags of Bassein per *Fuchs* for a local steam mill.

Spices.—There has been a very lively demand for cassia lignea from various quarters, so that prices are well supported. Ginger commands more attention. Pepper dull of sale.

Spelter.—A good deal of business has been done at rising prices. Among the sales were—

5,000	centners	Loco	at 14 mks. 3 sh. Bco.	
2,000	,,	W.H.	14 ,, 8	,,
6,000	,,	Spring delivery	14 ,, 5½	,,

ROTTERDAM, DEC. 22.

The section report upon the first chapter of the Budget, in which is communicated the political considerations, was published yesterday. The expectation that it would contain a formal declaration of war against the Cabinet is not fulfilled. The majority thought it neither necessary nor advisable to discuss again what was done by the former dissolved Chamber and a good many of the members protested against the endeavour of the Cabinet to limit the Ministerial responsibility, and deprecated the Roya proclamation being sent to the electors, by which the liberty of the electors was attacked. The Ministerial speech by which this sitting was opened has been severely criticised. Perhaps a treaty of peace will be now signed by the parties and maintained until a favourable opportunity presents itself to overturn the Cabinet. Of course the Ministerial papers have reasons to applaud this report, which is only somewhat embittered by the opposition shown to the Minister of Finance, whose system of management was condemned by the majority, because of increased expenditure as regards the departments of War and Marine, notwithstanding the Minister himself had always talked about the very deplorable condition of our Treasury. The majority, however, was convinced that there should be still a considerable surplus from the public service of 1866, and therefore condemned the measure of this Minister because he did not spend the amount of 6 500,000f for the redemption fund, which amount was voted for this purpose. The members, however, thought it prudent that this amount should remain in reserve for possible deficiencies in following years, when the favourable balance of our colonies may be enormously decreased, as the construction of railways will take a large sum of money, and very important expenses will be required for the system of defence and the marine. These members were of opinion that we should then be obliged to contract loans, instead of being able to keep the balance in our expenses and receipts. It was also highly condemned in this Minister that he used all possible means to raise the sum which our Treasury receives from the Far East (the Tory system); whilst the Liberals did all they could to spend as much as possible of that favourable balance for the welfare of our colonies. The Ministerial answer to this report of course cannot be of much importance, and till the 9th of February, when the Second Chamber, which has taken its Christmas leave, will meet again, our political situation will remain very calm. It may, however, be that in the meanwhile our political relations with foreign countries will produce some difficulties; the important diplomatic question with Prussia is still unsettled, whilst Belgium does its utmost to give an international character to the Scheldt question, which by that treatment may create a great deal of trouble. The attitude of the Minister for Foreign Affairs in both these diplomatic subjects was severely condemned in the sections, and the wish was expressed that negotiations might be opened with the English Government about an extradition treaty. Some members expressed their fears that our commercial relations with Japan were much prejudiced by the inland war there, and they were of opinion that the Dutchmen residing in Japan were not so much protected by our Government as they ought to be; likewise they said they held a firm conviction that the indemnification paid by the Japanese Government to the allied European Powers, in consequence of the expenses of the war against the Prince of Nagato, was not divided amongst those Powers in an equitable way. The indemnification received by the Dutch Government was said to be much too small.

Before the Second Chamber separated the credit laws were approved of, while a discussion took place about a very deplorable fact. Some days ago scandalous disturbances took place at the Military Academy at Breda. One of the cadets was so ill treated that being unable to defend himself any longer against these attacks, he committed suicide by taking poison. The Minister said that the reports published by the papers about this affair were correct, and promised that not only the ringleaders should be punished severely according to the military laws, but that the academy should be reorganised within the shortest time, in order to guard against such occurrences again. This event has caused a good deal of sensation in our country. It is rumoured that the Minister for the Home Department will suspend those professors who signed the declaration that the Cabinet acted contrary to the fundamental law when it dissolved the Second Chamber, in consequence of the last constitutional question.

Professor Simon Thomas, from Leiden, has been named honourable member of the Obstetrical Society of London. Since this society was founded only eleven foreigners have been honoured with this title.

The Belgian Court of Commerce at Brussels has given a verdict in favour of the *Societe de Commerce et d'Industrie*, from Amsterdam, against the well-known banker Mr. Langrand Dumonceau. This gentleman is condemned to pay to the company a sum of one million of francs.

His Majesty the King has returned from his seat "Het Loo" to the Hague.

A great part of our country is inundated by the heavy rains that have fallen during the last week, by which much damage has been done to the fields.

COMMERCIAL.

COFFEE.—The market is inactive; but there is a good demand for ord. quantities from the last auctions, so that for some parcels an advance is paid. The nominal quotation for good ord. Java is 41 to 41½ cents.

SUGAR.—In consequence of the important contracts for deliveries of refined, there was more demand for raw sugar. 1,543 mats Java, No. 14¾, were sold floating at 34¾f.; 405 mats, Passaroean, No. 14½, good to fine, at 35f.; and 2,000 mats Java, No. 12, at 13 to 13¼f. above November value, which price is now the nominal quotation.

RICE.—Java without stock.

SPICES.—Prices unaltered, but very firm.

TOBACCO (JAVA LEAVES).—A good business was done in those parcels sold in the last auction, and for fine quality there is still a good demand. On the 23rd of January about 10,000 bales will be sold in auction.

CAMPHOR.—The market was extraordinarily active, and about 2,600 Colli Japan and China were sold, amongst which 771 tubs Japan of the Trading Company. The prices varied for Japan from 78 to 84 cents, and for China from 74 to 80 cents. The latter quality cannot now be bought under 82 cents, and the Japan sorts not under 85 cents.

HIDES to-day were sold by inscription, 1,650 p. Java Rinder.

JAVA INDIGO.—With some transactions; since our former report 75 chests were sold.

BANCA TIN.—The market closes very firm, and an advance is still paid on the last quotation. The transactions included 200 slabs at 47¾f., 600 slabs at 48f., 700 do. at 48¼f., 1,600 do. at 48½f. and 300 do. at 48¾f.

ARRACK.—25 casks Sourabaya ex Tweelingen were sold at secret prices.

RATTANS.—11,703 bundles and 400 piculs ex Englishman, were sold.

SAPANWOOD.—200 piculs Bhimas were sold by inscription by the Trading Co.

In general, the trade is very unfavourably influenced by the advanced season.

MONEY.—In my last report I had to chronicle the fact of continued depression in the stock-market; now and again occasional gleams of a return of confidence appeared, but they having been invariably followed by setting in of deeper distrust, the market closes again very heavily, as well in Dutch as foreign stocks. Perhaps after New Year's-day the business will revive. Notwithstanding the favourable Bank returns, it is not likely that any alteration of the rate of discount will take place, because the very important financial and commercial engagements of this year are not yet liquidated. The charge is still 5 to 5½ per cent. Dutch Two and a-Half per Cents., 54⅛; Three per Cents., 64⅜; Four per Cents., 86¾. Rotterdam Bank, 94; Central Railway Company, 49; Two and a-Half per Cents., Spain, 31½; Three per Cents., Portugal, 41⅜; Russian Five per Cents., 91⅛; Five per Cents., Austria, 43½.

'CHANGE.—London: 3 mo., f.11.67½, 2 mo., f.11.70½; short, f.11.78. Paris: 3 mo., f.46.37½; 2 mo., f.46.50, short, f.46.80. Antwerp: 3 mo., f.46.30; short, f.46.65; Hambro': 3mo., f.34.75; 2 mo., f.34.87½; short, f.35.20.

SHIPPING.—ARRIVALS.—Dec. 24, at Brouwershaven, from Passaroean, Willem Kroonprins der Nederlanden; Dec. 18, at Texel, from Batavia, Jacoba and Christina; from Passaroean, Kykduin

PASSENGERS INWARD.—From Java, per Willem, Kroonprins der Nederlanden, Mr. Uhlman.

The following troopships are ready to sail:—St. Jan, with 125 soldiers, Ægidia and Pauline, with 125; Willemina and Clara, with 124; and the Argo, with 125 soldiers, for Java.

RUSSIA, GERMANY, &c.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, DEC. 14.

Several more voluntary contributions are announced in the local papers here as having been received for the alleviation of the sick and wounded soldiers of the late war. Among others are the following:—£145, producing 1,933 marks banco, from about thirty Germans at Manila, remitted by Mr. S. Baer, of that place; $133, producing 392 marks 12 sch. banco, from Germans resident at Foochow, and German captains of vessels in the harbour, remitted by Mr. Kruger, the Hamburg Consul at that port; from the Germans at Shanghai, 80 marks banco "for the widows and orphans of German soldiers who fell during the war," remitted by Mr. W. Hulse, of that port; and 100 marks banco from Messrs. Pickenpack, Thies, and Co., of Bangkok, Siam. The total of the contributions hitherto received by the Hamburg Committee in money and clothing, wine, fruit, cigars, and other gifts *in natura*, are announced as amounting to 112,644 marks 4 sch. banco.

At the last sitting of the Chamber of Commerce at Vienna a despatch was read from Herr Heinsen, the Austrian Consul at Shanghai, to the Minister for Commerce, giving a very full account of the manufactured articles most saleable in that market for consumption in China. He states that there is one item of Austrian industry that stands already so high in the estimation of the public there as to be generally preferred to similar articles made in other countries. He refers to the lucifer saloon matches manufactured by A. M. Pollak, at Vienna, and packed in circular card boxes of 150 each. They are not only in great favour, but fetch the highest prices.

What importance the Swiss attach to the commercial relations with the Far East may be gathered from the frequent reports of their Consuls, which are regularly published by the Federal Diet of the Republic. Among those that have created the greatest interest are the annual reports of the Swiss Consul-General at Batavia, and of the Consul at Manila for the year 1865, published at full length in No. 45 of the official organ of the Federal Diet, from which it appears that a considerable number of Swiss citizens have settled in both these Consular districts. The Dutch military service induced the greater part of them to go out to the Indian Archipelago, and after the expiration of their engagement they settle as civilians in different branches of trade and industry.

The correspondent of the *Cronstadt Messenger*, writing from Blagowessensk on the Amoor, announces the departure of the steamer *Admiral Korsakow* towing two vessels with 150 emigrant families (mostly lately arrived from the shores of the Wolga) from Charabowka, for the Ussuri district. The banks of the Ussuri, he adds, are extremely picturesque and diversified, the mountains densely covered with forests of cedars, whilst the soil of the valleys is fertile and rich, capable of producing in abundance everything grown in the temperate zone; but there are unfortunately too few inhabitants, and their means are too limited to benefit much by these natural advantages. The mountains and forests abound with furred animals, and their skins are so cheap that the best sables sell for four roubles each. The majority of the settlers are Russians, and they make but a scanty living by the chase and a little agriculture.

Digitized by Google

COMMERCIAL.

COFFEE.—The market is calm, and there is no alteration in quotations. Sales of the week, 10,000 bags.

SUGAR.—In the raw article there is more animation than has been observable for a long time, and prices are much firmer. Among the transactions of the week 23 950 bags Unclayed Manila and 300 kranjangs of Brown Java were bought by refiners. Refined is also firmer, but the sales were on a very limited scale, as there is but little in the market.

RICE.—There is a continued good demand for cleaned grain, and the prices are higher and firmer.

SPICES.—Cassia Lignea commands an easy sale, being still in demand for the interior of Germany at former rates. Ginger is more inquired for, and Pepper is rather cheaper.

SPELTER.—At the beginning of the week 2,000 centners were sold for January delivery at 14.2½ and 2,000 centners loco at 14.3, since which there were no transactions. The market, however, is in a firm condition,

DISCOUNT.—Money continues plentiful, and discount is lower; good bills can be done at 3½ per cent.

HAMBURG, DEC. 23.

The following tables are extracted from the official returns of the commerce of Hamburg in 1865, published by the Board of Trade in this city, casually mentioned in one of my last letters:—

1.—*Direct Imports from China.*

	Value in Marks Banco.
Tea, 15,766 chests 461 packages	740,970
Raw sugar, 9,660 bags	78,500
Cigars, 74,000	7,840
Cassia lignea, 25,734 chests 106 packages	893,650
Cassia flores, 211 chests	20,600
Candied ginger, 2,715 chests 5 casks	44,920
Soy, 80 tubs 1 chest	2,210
Galls, 332 chests	18,600
Vermilion, 50 chests	4,950
Galangal root, 425 chests	5,540
Star annis, 764 chests	77,240
Raw camphor, 400 chests	28,120
Oil of Cassia, 133 chests	42,250
Oil of star annis, 245 chests	73,610
Graphit, 25 chests	4,980
Walking-sticks, 270,668 No.	15,320
Mats, 1,025 packages	22,210
Porcelain, 136 chests	7,890
Fireworks, 674 chests 1,159 packages	46,100
Other enumerated articles	48,040
Total marks banco	2,183,640

2.—*Direct Imports from the Philippine Islands.*

Coffee, 158 bags	8,440
Raw sugar, 42,144 mats	361,390
Cigars, 32,000	1,340
Sapanwood, 802 centners	6,560
Hemp, 1,100 bales	50,180
Other goods	5,440
Total marks banco	433,350

3.—*Direct Imports from Singapore.*

Coffee, 939 bags	55,570
Tea, 135 chests	1,680
Sago, 9,182 chests	151,760
Pepper, 17,492 bags	345,780
Cassia lignea, 500 chests	16,260
Terra Japonica, 7,188 bales	277,630
Cubebs, 165 bags	6,250
Raw camphor, 111 chests	6,490
Buffalo horns, 14,068	10,770
Rattans, 31,462 bundles	24,480
Canes, 75.713	9,240
Other articles	7,830
Total marks banco	913,740

4. *Direct Imports from Netherlands India.*

Rice, 7,299 bags	118,900
Sapanwood, 224 centners	2,240
Gum Damar, 600 chests	22,940
Indiarubber, 158 bags	16,150
Buffalo hides, 170	1,000
Rattans, 26,950 bundles	23,550
Canes, 60,000	10,800
Other articles	840
Total marks banco	196,420

5.—*Total Imports of the following Articles.*

	Quantity in Centners.	Value in Marks Banco.
Coffee*	983,059	42,100,220
Tea*	25,233	2,429,670
Raw sugar*	447,265	6,759,990
Refined sugar	70,071	1,442,690
Candy	1,104	26,920
Rice	264.032	2,180,170
Sago*	17,467	240,470
Pepper*	28,147	611,940
Cassia lignea*	21,802	1,246,700
Cassia flores*	331	52,320
Cinnamon	843	98,560
Cardamoms	430	175,490
Cloves	4,081	94,180
Mace*	731	63,970
Nutmegs*	799	60,190
Ginger*	7,145	156,200
Soy*	57	2,700
Terra Catechu	5,607	96,390
Terra japonica*	20,931	314,240
Vermilion*	1,862	35,670
Galangal root*	879	10,970
Gentian*	739	11,850
Cassia vera	274	9,730
Star annis*	1,063	96,530
Cubebs*	231	13,680
Camphor, raw	1,802	117,700

At the last sitting of the Association for Natural History in this city, your notice, in a late impression of the LONDON AND CHINA EXPRESS, on the alleged invention of M. Trocol for extracting silk from mulberry leaves was read amidst a roar of laughter from the assembled members, who are otherwise grave and steady-going scientific men. The general impression was either that it was a simple hoax or that the alleged inventor of the process was *non compos mentis*. One gentleman remarked that the learned Theban appeared never to have heard of the law of nature called the transmutation of matter in the stomachs of all animals; another supposed he would next attempt to extract honey direct from flowers without the assistance of bees; a third said the discovery was fully equal in importance to that of the celebrated Yankee who had invented a machine for making deal boards out of sawdust; and a fourth was heard to grumble something about "Baron Munchausen."

COMMERCIAL.

Coffee.—The market continues remarkably firm, with a fair amount of business doing. Sales of the week 16,000 bags.

Sugar.—Raw is calm, but a better feeling prevails. Among the transactions was a sale of 7,600 bags of unclayed Manila. Refiners are rather more willing to sell for short delivery.

Rice.—In this market there is no alteration in values. Clean grain moves off quietly. The only sale of rough was 6,000 bags of Bassein per *Fuchs* for a local steam mill.

Spices.—There has been a very lively demand for cassia lignea from various quarters, so that prices are well supported. Ginger commands more attention. Pepper dull of sale.

Spelter.—A good deal of business has been done at rising prices. Among the sales were—

5,000 centners	Loco	at	14 mks.	3 sh. Bco.
2,000 ,,	W.H.	at	14 ,,	8 ,,
6,000 ,,	Spring delivery	at	14 ,,	5½ ,,
5,000 ,,	,,	at	14 ,,	7 ,,
3,000 ,,	,,	at	14 ,,	8 ,,
2,000 ,,	,,	at	14 ,,	9 ,,
2,000 ,,	January	at	14 ,,	5½ ,,
1,000 ,,	Loco	at	14 ,,	5 ,,
1,000 ,,	,,	at	14 ,,	6 ,,
500 ,,	,, W.H.	at	14 ,,	12 ,,
7,500 ,,	Spring delivery	at	14 ,,	8 ,,

Since which no transactions, as holders have raised their demands.

Discount.—Money market easy; discount 2½ to 3 per cent.

(No Shipping to report.)

REMOVAL OF OFFICE.

NOTICE.--On the 1st of January next the Office of the LONDON AND CHINA EXPRESS and LONDON AND CHINA TELEGRAPH will be removed to No. 2, Cowper's Court, Cornhill (over the JERUSALEM).

NOTICES TO CORRESPONDENTS

No notice can be taken of anonymous correspondence. Whatever is intended for insertion must be authenticated by the name and address of the writer, not necessarily for publication, but as a guarantee of good faith.

A REGISTER is kept of the addresses of all persons connected with the FAR EAST, and reference can be made to the same by personal application at the office or by letter.

Any information required by Subscribers, in reference to Commercial or General matters in CHINA, JAPAN, SINGAPORE, *and other parts of the* FAR EAST, *will be supplied on application at the Office, where files may be seen of the Journals published in those countries.*

THE LONDON AND CHINA EXPRESS.

PUBLISHED on the departure of the Mails *via* Marseilles on the 10th, 17th, and 26th, contains a Summary of European, American, and General News; Commercial and Shipping Reports, and Special notices of Trade with the FAR EAST.

Subscription 54s. per annum, including Postage. Export Supplement 12s. extra.

The London & China Telegraph.

LONDON, THURSDAY, DEC. 27, 1866.

FRANCE AND KOREA.

THE first telegram published in our columns, announcing the commencement by the French Admiral of hostilities against Korea, was met by an almost official denial in the *Moniteur*, and even in this country was received with some degree of suspicion. It has, however, turned out to be substantially correct, for notwithstanding the statements in the French organs to the effect that no active operations would be undertaken at present, we now hear that a second collision has already taken place, and this time with disastrous consequences to the invaders. The first intimation of this was conveyed in a telegram, via Galle, dated Hong Kong, 1st December, which says:—"It is currently reported that the French expedition to Korea has been beaten off at Kang-hoa, with the loss of 45 men. The fleet has returned to Shanghai." And this is corroborated by a telegram via Kiachta, received yesterday, worded thus:—"French evacuated Korea; expedition a total failure. Natives elated. European prestige much injured." How far the French Admiral was acting on his own responsibility in continuing offensive operations does not yet appear, but we doubt whether his acts will be viewed with very great disfavour by the Imperial Government. So far the events that have transpired in Korea present an exact repetition of the Annam affair. The prompt resentment of an outrage on French subjects; the immediate adoption of reprisals by the Admiral, without waiting orders from home; and the despatch of pacific instructions, so timed as to arrive just too late to prevent a hasty attack almost certain to lead to a reverse, thereby pledging the French to a war that will necessarily be one of conquest—all form a natural sequence of events which bear a striking resemblance to those immediately preceding the "colonisation" of Saigon.

THE P. AND O. COMPANY'S SERVICE.

IN another column we give some extracts from the report of the P. and O. Company in reference to the speed of their vessels, in which it must be allowed they have vindicated themselves from the major portion of the attacks made on them from time to time. In addition to this, they have really conferred a benefit on the public generally, and themselves in particular, for it must be extremely irritating and a great waste of time to be constantly answering these allegations, which we editors are almost compelled to insert, or we come under the suspicion of being P. and O. organs. The Committee of Investigation on Postal Services, in this year arrived at the conclusion that the company performed its contracts with very creditable accuracy. This was no doubt meant to convey that "on the whole" their service was well executed. We must confess that we have often been struck with the unfairness of selecting any one particular voyage; the service must be considered in its length and breadth, especially with the example we have before us of the failure of so many steam companies which have attempted ocean navigation under mail contracts. The truth is the P. and O. Company are the very first people with whom the young cadet or mercantile clerk comes in contact in going to India and China, and from that moment and during the whole time of his connection with the East, his comforts are very much dependent on their service, and it is no wonder that it forms a fruitful source for an Englishman's known propensity, "growling."

THE SAN FRANCISCO AND CHINA LINE.

THE wooden steamship *Celestial Empire*, a consort to the *Great Republic*, of the new line between San Francisco and China was launched at New York on the 8th. She is 4,000 tons burden, 376ft. long and 50ft. breadth of beam, and is divided into four water-tight compartments. Two other vessels for this line, the *Niphon* and the *America*, making four in all, are now building. We learn that the steamer *Hermann* will be despatched from San Francisco to Yokohama to serve as a reserve vessel for stores, &c. The San Francisco Chamber of Commerce has memorialised Congress for a modification of the present contract for this line. By the original agreement the steamers were required to touch at Honolulu, but in June last the company was released from this obligation by the United States Government, on condition of performing thirteen trips to China and back each year, instead of twelve. The memorialists now represent that this arrangement will not only entail on the company an unnecessary additional outlay of some $130,000 per annum, but will inflict great inconvenience on the public, as it will change the day of departure from the 1st of each month to irregular dates, thus preventing uniformity and precision. It is therefore urged that the obnoxious condition be forthwith rescinded, and the company be allowed to run the mails regularly once a month without touching at Honolulu, for which port a separate service is recommended, with a subsidy of $100,000 per annum. It is to be hoped Congress will acquiesce in this very reasonable demand.

THE CEYLON COMPANY.

THE half-yearly meeting of the Ceylon Company was held on the 18th, and the report, given in our last issue, recommending a dividend of 10 per cent. per annum, was duly passed. The Chairman in moving the adoption of the report, observed that the £437,000 raised by debentures was £38,000 less than they were authorised to raise. It was not intended to increase that amount until a call had been made on the A shares, which had been delayed by the state of the money market, anything now received on debenture account would go to pay off some of those already issued. At the last meeting a resolution, proposed by Mr. Baker, was passed, asking for a more detailed profit and loss account of the company; but as that resolution was carried by only twenty-one shareholders, and the board felt that it was undesirable that all the affairs of the company should be exposed, the resolution had not been acted upon. In the report presented to the next annual meeting as much information would be given as the board considered expedient having regard to the interests of the company. In reply to a shareholder, the Chairman said no advances were ever made on estates in the Mauritius without proper documents and securities; that a call not exceeding £3 would be made on the A shares within three months. The last report shows the manner in which the property of the company is invested, and it is invested in very much the same manner now. It shows that the investments in Ceylon and the Mauritius were £259,295; in mortgages, £319,000; and advances against produce, £339,944. With respect to the sales of the coffee crop, we may say that it has been nearly all sold, and has realised very fair prices; the sugar crop is being sold, and the prices in the Mauritius this year have been high. The crop is about the same as last year, but the prices have been much better.

It will be seen in our legal intelligence that the Court of Chancery has confirmed the resolution of the shareholders in the Bank of Hindustan, passed at the meeting held on the 10th inst. It was the impression that the National Bank, the chief creditors, wished for an official liquidation, but it appears that their objection to the voluntary liquidation was confined to Mr. Kintrea, one of the shareholders. In order to remove this obstacle Mr. Kintrea resigned, and the liquidation will now proceed under the charge of Mr. Chadwick, an official accountant, Alderman Allen, one of the directors, Mr. MacNair, and Captain Engledue, shareholders. We understand that the attempt to resuscitate this bank will be persevered in.

Digitized by Google

The hearing of the case of the Agra and Masterman's Bank was concluded on the 18th, and ended by the Judge confirming the resuscitation agreed on by the shareholders. The opposing creditors were complimented by the Judge for pointing out what appeared to them to be an injustice, but the approving body being so largely in excess of the malcontents, he thought that was sufficient warranty for his decision in their favour. The new institution is therefore free to make its arrangements for business, which will be commenced in London forthwith, and Mr. Balfour proceeds by the next Bombay mail to establish the branches in India and China. The successful completion of the measures elaborated by Messrs. Chadwick and Co., accountants, Messrs. Ashurst, Morris, and Co., solicitors, and Mr. Thomson, one of the directors, reflects great credit on these gentlemen, and the shareholders have now a fair opportunity of recovering their capital, which would in all probability have been swallowed up had the bank been allowed to die.

The delay in the receipt of telegraphic messages to and from India and Galle continues to be the subject of serious complaint. The messages latterly have occupied ten and twelve days from Galle. Mr. Reuter writes to *The Times* on the 24th, stating that the line will never be worked properly until we obtain the privilege from the Turkish Government of wires devoted solely to the Anglo-Indian messages. Mr. Reuter has been refused this concession, and asks the British Government to negotiate for it. The service via Kiachta continues to work well, telegrams dated Shanghai, November 26, having been received on the 17th inst. Before next winter arrangements will no doubt be completed for working during that period.

Two Italian ships of war are now fitting out for the Far East. One of them will carry out the ambassador appointed by the King of Italy to reside at Yedo, in accordance with the stipulations of the treaty lately concluded with Japan.

Legal.

THE AGRA AND MASTERMAN'S BANK.—This was an application, before Vice-Chancellor Sir W. P. Wood, for the sanction of the Court to a proposed arrangement for the resuscitation of the bank. Sir Roundell Palmer stated the case on behalf of the applicants, General Sir George Pollock and others, who had been appointed at a general meeting of shareholders to submit the proposal for the above purpose to the consideration of the Court. Sir R. Palmer said that the importance of the matter he had to submit to the Court could hardly be exaggerated. The temporary failure of the Agra and Masterman's Bank had been brought about by the irresistible influences of a money panic, and the machinations of unprincipled persons, and the suspension had in truth taken place when the bank was in a state of perfect solvency. The shareholders subsequently arranged to have a voluntary winding-up of the concern, but they did so with the view of bringing about a revival of the business, in which so large a portion of the Indian and English communities were deeply concerned. An investigation into the affairs of the bank showed that its assets exceeded its liabilities by the sum of £1,150,000. In order to accomplish the resuscitation, it was now proposed that new capital to the amount of one million should be subscribed, and that the new company should guarantee the discharge of the liabilities of the old company. Nearly all the 5,799 creditors of the bank in the United Kingdom, with the exception of fifteen, assented, and so far as information could be obtained of the opinions of the Indian creditors, it appeared that their assent was given to the proposal. Whilst the debts of the assenting creditors in the United Kingdom amounted to the sum of £2,208 993, the debts of the fifteen non-assenting creditors did not exceed £80,000. No shareholder had expressed his dissent. But he could not state what opinion was entertained by the official liquidator with reference to the scheme.—Mr. Roxburgh, who appeared for the official liquidator, here stated that he did not oppose but only desired that his honour should become acquainted with all the facts.—Sir R. Palmer observed that this statement relieved him of much anxiety, and proceeded to read a quantity of evidence, which had been adduced to show the desirableness of the project, and the support that had been given to it in the United Kingdom and India. The official liquidator, Mr. Cannan, stated in an affidavit that the assets of the bank sufficed for the payment in 1867, or early in 1868, of all the liabilities without any call being made. It was, therefore, clearly to be inferred that there was no risk in the revival of the bank.—Mr. Druce, Q.C., and Mr. A. G. Marten, for Mr. Shipman, the creditors' representative, stated his desire to facilitate the arrangement, subject to the following observations and suggestions: (a) The order confirming the agreement should provide that the arrangement shall not prejudice or affect the rights of the creditors, as against any sureties or person not bound by the order; (b) the order also should provide that as between the purchasers and the creditors the purchasers should be principal debtors in respect of the instalments, and accordingly, shall not be discharged by their being given to the vendors, or by any other act which if the purchasers were sureties only would discharge them; (c) the cash and notes for the instalments ought to be handed over to the liquidator or creditors' representative before possession was given of any of the vendors' property, with provision by covenant, before completion of the sale, in cases of disputed claims, or claims not capable of being expressed as an immediate debt; (d) the purchasing company should enter into a covenant with the liquidator or creditors' representative, and with all the creditors (as in the case of a common deed for securing payment of a composition under the Bankruptcy Act 1861), for the due performance of the terms of the agreement. Subject to the insertion of these provisions for the protection of the general body of creditors, they did not oppose the arrangement.—Mr. Giffard, Q.C., and Mr. Bedwell, for the Chartered Bank of India, Australia, and China, creditors for £111,000, opposed the application, and vindicated their right to do so without having the odium cast upon them of selfishly opposing that which had been assented to by the large majority of creditors. They did not seek to enforce any extreme rights, or to claim their pound of flesh; but what they wished, and what appeared to be wholly wanting, was some proposal that at present would inspire confidence, and satisfy the managers of the Chartered Bank, as reasonable men of business, that the proposal was to the advantage of their shareholders, whose interests they were bound to protect. In the first place, the dividends were not to be paid in such a beneficial manner as was intended by the official liquidator. The capital proposed was insufficient, and if, as was admitted, the official liquidator would have difficulty in realising the assets, how were the promissory notes of the new company to be paid? Then, again, the position of the parties would render it necessary for the new bank to deal more tenderly with debtors, so as not to lose their custom, than the interests of the creditors required. Upon the whole, the plan was premature, had not been sufficiently investigated, and was not such as to inspire confidence or claim adoption by the Court, especially as it was open to grave objections under the Companies Act, 1862.—His Honour, after an elaborate consideration of the position of the company, both with regard to the interest of the creditors and shareholders, said that his judgment must necessarily be greatly influenced by the entire absence of hostility on the part of the shareholders of the company to the scheme and the consent of all but fifteen of the creditors. No reflection could be made on the character and honesty of those who had conducted the affairs of the bank which had so unfortunately failed, nor could the motives of those who opposed the scheme be impeached, because it was important that all the facts of the case should be inquired into. The comparatively narrow doctrines of the Court with regard to the conduct of trustees ought not to be applied to a case of this kind. The shareholders were better judges of their own interests than he could be, and as they had without dissension concurred, he thought that he should be favouring the interests of all parties by approving of the scheme. The Attorney-General, Sir R. Palmer, Mr. Cole, Mr. W. M. James, Mr. G. W. Giffard, Mr. Roxburgh, Mr. Druce, Mr. Ferrers, and Mr. A. G. Martin appeared.

THE AGRA AND MASTERMAN'S BANK.—EXPARTE WARING AND ANOTHER.—The point involved in this summons from chambers was one of very serious interest to a great number of customers of the branches of the Agra Bank abroad. The bank, it will be remembered, stopped payment on the 7th of June 1866, but their branch at Calcutta did not stop till the 13th of June. At some time, but at what hour did not appear, on the 13th, a telegraphic message arrived at Calcutta announcing the stoppage in England, and in the course of the day the Calcutta branch stopped. Messrs. Waring and Hunt, on the 13th, and, as they contended, after the branch had received the telegraphic message, paid £25,000 in rupees into the Calcutta branch by way of a cheque, and they now claimed to have this sum paid out to them in full and in preference to other creditors. Mr. G. M. Giffard and Mr. Langworthy supported the claim. The principle for which they contended was that the property in the cheque never left them. It was paid in for a purpose that failed. When it was paid the branch could not be said to have received it as bankers; and if they could not honestly receive it, they could not honestly use it in payment of their debts.—Mr. Dickinson and Mr. Roxburgh for the liquidators of the bank: Our contention upon the evidence is that the cheque was paid in and carried to Waring and Hunt's account before the news arrived, and of course before the stoppage took place. But in any event the only relation between these gentlemen and the bank was that of debtor and creditor. There was no specific appropriation of the money.—Mr. Giffard in reply.—The Vice-Chancellor said that when people pay cash into a bank the money becomes the property of the banker, and he gives an acknowledgment that he will repay them when and how they please. He is simply a debtor, and his customers are creditors; he is not a trustee. If a man pays £10,000 into a bank, and he knows that next day the banker is about to invest the £10,000 in some hazardous speculation, he nevertheless cannot obtain an injunction to restrain his doing so. Cases may arise in which a bill will lie against a banker in respect of moneys paid in for a specified purpose. But a direction that money shall be carried to a man's private account is not a specific purpose. His Honour said he must take it on the evidence that this cheque was paid in some hours before the message was received. When the message came the bank stopped, and these gentlemen were in the unfortunate position of any other debtor to the concern. His Honour thought he ought not to direct an inquiry as to whether or not the cheque was cashed before the message came, because he was not satisfied that it would make any difference in the result; but the claim would be refused without prejudice to any application that the customers might make if they found that the cheque was not cashed till after the message was received, and also without costs. The official liquidator would have his costs.

THE ASIATIC BANK.—Vice-Chancellor Wood had before him on the 11th December the case of the Agra and Masterman's Bank. In the winding-up of the affairs of this bank the Asiatic Banking Corporation claimed to be creditors in respect of some bills of exchange, which they had bought from Messrs. Dickson, Latham and Co., of Ceylon, on the faith of an open letter of credit given by the Agra and Masterman's Bank to that firm. It was contended on the part of the Agra and Masterman's Bank that they were not liable in respect of the bills, because they were not drawn till after the writing of the letter of credit, and at law a promise to accept a non-existing bill of exchange was not binding, and also because the letter of credit did not constitute a contract between the Agra and Masterman's Bank and the Asiatic Banking Corporation. The Vice-Chancellor, after stating the points, observed that it had never been the subject of actual decision; although it was clearly laid down as law since Lord Mansfield's time that a promise to accept an undrawn bill of exchange is no acceptance. It was, therefore, quite clear that the contract in this case did not amount to an acceptance, so that the holder could recover in that respect; but the claim had been put in argument as if founded on a

Digitized by Google

contract between the negotiator of the bills and the person giving the undertaking, through the medium of the person holding this open letter of credit. Now there was no evidence of such a transaction as this being supported by the custom of merchants, and the absence of decision on the point was a reason for believing it to form no part of the lex mercatoria. If the claim had any validity, it could only rest on that question of agency which had required some consideration. His Honour referred to the case of "The Bank of Ireland v. Archer," reported in the 11th vol. of Meeson and Welsby, and said that in the absence of any authority exactly in point, he thought he should be introducing a great novelty into the lex mercatoria if he were to admit the claim. It would be in fact giving the effect of an acceptance to these undrawn bills, which was the very doctrine that was exploded in the case referred to. If the case had been that of an agency, by which the person holding the instrument was empowered to authorise the dedication of a sum of money on the part of the giver of the instrument to the person advancing money the case would have been different; as it was the negotiator of the bills took them, subject to all inquiries between the holder and the giver of the instrument. His Honour must refuse the summons, but if the applicants liked he would give them leave to bring an action.

THE BANK OF HINDUSTAN, CHINA, AND JAPAN.—Vice-Chancellor Stuart made an order on three petitions to continue the voluntary winding-up of this company under the supervision of the Court. The winding-up is to be conducted by four out of the five present liquidators, (who were named in our last) Mr. Kintrea retiring.

WHISTLER v. STEAINES.—This action was brought (before Mr. Justice Blackburn) in respect of the non-delivery by the defendant of 25 chests of tea. In December, 1863, the plaintiff purchased 61 chests of tea from the defendant, and an invoice was sent in, describing the chests as "ex *Vanguard*," and as marked "J. R. W. J." The invoice also gave the numbers of the chests. In July, 1864, an order was sent to the defendant, directing him to forward the warrants for delivery of the tea to Messrs. Littledale and Co. Warrants were accordingly sent—one for 13 chests, with the proper mark, and others for 48 chests, 23 of them with the proper mark, and the remaining 25 with the mark "S. W. J." The warrants relating to these latter chests contained, however, the number of the chests corresponding with those in the invoice; and it appeared that the difference in the mark arose from the fact that when the invoice was drawn out, the mark "S. W. J.," which was upon 25 of the chests, was by mistake omitted. Messrs. Littledale, on receiving the warrants, put them away without noticing that the marks relating to 25 chests did not correspond with the contract. The chests in question were warehoused at Beale's wharf in London, and were destroyed by a fire which broke out there in October, 1865. In March, 1866, the plaintiff resold the tea, and then, for the first time, discovered that the warrants did not correspond with the invoice, and that the tea for which he held the warrants had been burnt. He therefore sought to recover from the defendant for the non-delivery of the chests thus destroyed. Under these circumstances, the learned Judge ruled that the plaintiff was entitled to recover, and a verdict was entered accordingly.

SCHROFF v. PALLONJER.—This was an action in the Court of Exchequer by a Parsee merchant, carrying on business at Bombay, to recover £14,105 10s. 3d. on a consignment of cotton from that place to England. Mr. Hannen and Mr. Cohen for plaintiff; the Solicitor-General and Mr. Philbrick for the defendant. The defendant, a native of India, had been a member of the firm of Dadabai, Naooroji, and Co., in the City of London, who in a balance of accounts in January last, owed the plaintiff the sum now claimed. Two other members of that firm became insolvent, and compounded with their creditors under a deed of inspectorship. The question now raised, in a very complicated state of facts, was whether the plaintiff had agreed simply to discontinue the action he had brought against the firm for his debt, reserving his right to recover the money from any one of its members, or whether he had consented to discontinue it in the sense that the debt was to be entirely extinguished as regarded all the parties liable. It appeared that the plaintiff had received in the shape of dividends a sum of £2,197, and the balance was in reality the sum sought to be recovered in this action. The jury, after having been locked up a considerable time, returned a verdict for the plaintiff—Damages, £11,807 12s. 2d., with leave to move the Court above on a point of law.

JONES v. JUST.—The plaintiff in this case is a ropemaker at Liverpool and the defendant a merchant carrying on business in London. In October, 1865, the plaintiff purchased 1,000 bales of Manilla hemp, equal to 126 tons, to arrive from Singapore, at £38 10s. per ton. The hemp arrived in four ships during the month of November, and when surveyed was pronounced unmerchantable. The evidence showed that it must have been wrecked before it got to Singapore, and dried and repacked there. It appeared that hemp had risen in price after the contract was made, and that at the time the hemp arrived it would, if in good merchantable condition, have been worth £6 per ton beyond the contract price. The hemp was resold by the plaintiff after its arrival and realised somewhat less than the contract price. The learned judge left it to the jury to say whether it was reasonably merchantable Manilla hemp, and, if not, what loss the plaintiff had sustained by the defendant's non-performance of his contract. The jury returned a verdict for the plaintiff for £756.

BANKRUPTCY CASE.—IN RE RUDOLPH JUNG.—Mr. Reed appeared for the assignees, and Mr. Laurance for the bankrupt. At this sitting for discharge the bankrupt was opposed on the ground that he had contracted debts at a period when he could have had no reasonable expectation of payment The bankrupt upon examination said: I have been in business for a period of 25 years. In 1858, when I had an establishment in Paris, I became a bankrupt. I then owed £300,000 to creditors, and my estate paid a dividend of 7s. in the pound. From 1861 to 1865 I carried on business in London as a silk merchant. At the time of my obtaining goods from Mr. Hemsley I had dishonoured bills given to Messrs. Peat and Co., but there was an agreement between us that the paper should be renewed. I have been very largely engaged in the silk trade, and I had a very extensive connection. My friends assisted me with capital to start with, and I thought I had a reasonable prospect of success. I left Paris without any imputation upon my character. During the panic of 1857 my partners and I lost between £400,000 and £500,000. His Honour, after a careful investigation of the facts, held that the bankrupt had not brought himself within the penal clauses of the statute, and granted an immediate order of discharge.

THE NICARAGUA RAILWAY.

A preliminary division of the engineering staff of the Nicaragua Railway was despatched by the West India mail steamer on the 17th, under the directions of Mr. Collinson, the engineer, for the purpose of commencing the works. Captain Bedford Pim, R.N., and Mr. Collinson went out *via* New York on the 22nd. Captain Pim in a letter says:—

"To-morrow I proceed to New York, where the absolute necessity of such a transit (the right of way over which, with many other privileges, I hold exclusively in my possession) has long been felt, and I am convinced the commercial importance of the project, together with the great value of my concession, will be there fully appreciated.

"As evidence of this fact, I may mention that I have received most tressing overtures from several gentlemen in New York, who are anxious po make my route the great highway between China, Japan, and the United States.

"The American line to China and the East, which commences running on New Year's-day next, consists of some of the largest steamers in the world; the Government of the United States pay a heavy subsidy, and there can be no doubt that by this means a very considerable portion of the trade of the East will be speedily diverted into the warehouses of New York.

"At no distant date also a line of steamships under the American flag will commence running from Panama to New Zealand and Australia, and, owing to the controlling influence which citizens of the United States possess over the only present transit, *via* the Isthmus, they may certainly look forward to carrying off the greater portion of our New Zealand and Australian trade, for it must be borne in mind that in respect to China, Japan, New Zealand, and Australia, New York is eight days ahead of Europe by the Panama route.

"In view of the speedy realisation of the success to which, it must be admitted, the Americans are fairly entitled from their foresight and boldness of enterprise in thus competing for the Eastern and Australian trade, the necessity is more than ever apparent for securing a good and practical route across the isthmus.

"I am most desirous of making the Nicaragua Railway Transit a great highway of nations, as free from political disadvantages as it is from those of a physical character.

"Commerce knows no nationality, but I have felt it a duty to address these few lines to you, for the purpose of placing before our merchants the consequences which must arise should all routes across the isthmus become exclusively American.

"Let Europe and America by every means cordially co-operate in establishing the Nicaragua Transit, so that all of us may have a fair field and no favour in this great commercial contest for the control of the Eastern and Australian trades."

Literature

The long list of new books noticed in our last issue has by no means exhausted the resources of our publishers, who have been far from idle during the last fortnight. Most of the works we now have to announce are, however, of less importance than those published during the early part of the month.

Earl Russell publishes a third volume of his *Life of Charles James Fox*, embracing the stormy period of our rupture with the French Republic and the later years of Pitt's life; Mr. Edward Dicey publishes, under the title of *The Battlefields of* 1866, his letters on the recent war in Germany, written as special correspondent of a London newspaper; Heros Von Borcke (whom our American critics persist in regarding as a fabulous personage) republishes from "Blackwood's Magazine," in 2 vols., his *Memoirs of the Confederate War for Independence*; and we have from Mr. W. Leeke a *History of the 52nd Regiment at the Battle of Waterloo*, in 2 vols.; and from Mr. Wornum, in 1 vol., a life, or as he modestly calls it *Some Account of the Life of Holbein*, with handsome portraits and other illustrations.

In Fiction we have a new story by Miss Annie Thomas, in 3 vols., with the title of *Played Out:* 3 vols. of stories by Mr. Mark Lemon, with the title of *Leyton Hall and other Tales;* and *The Draytons and the Davenants*, a story of the Civil Wars, in 1 vol., by the author of "The Schonberg-Cotta Family."

Some New Editions also require notice, among which are Mr. Arnold's *Manual of English Literature, Historical and Critical, with Appendix on English Metres*, revised and enlarged; a new edition of Fletcher and Kidder's *Brazil and the Brazilians*, which has been rewritten after a recent visit, and forms an almost entirely new work, with numerous illustrations; we have also the first volume of a new edition, entirely revised, of Sir Charles Lyell's *Principles of Geology*, to be completed in 2 vols.; a new edition of Mr. Thackeray's *Paris Sketch-Book*, one of his earliest works, which has been long out of print and is little known; a cheaper one-volume edition of Victor Hugo's *Toilers of the Sea*, with two full-page illustrations by Gustave Doré done expressly for the English edition; and lastly a re-issue, in oblong quarto, of Seymour's *Humorous Sketches, with a Memoir*, and the original letterpress.

Among mercantile works of reference there is nothing more useful than the *Banking Almanack and Directory*, the new volume of which, for 1867, is just issued by Messrs. Groombridge and Sons. This work, edited by Mr. D. Morier Evans, contains a diary, calendar, official and banking directories of unexampled completeness, and a vast quantity of other matter, valuable to the merchant, but indispensable to the bankers, and is published at the low price of 7s. 6d.

The new volume of *Temple Bar* to commence with the new year will contain, among other things, a new serial story by the author of "Archie Lovell," and another from the pen of Mr. Le Fanu, the author of "Uncle Silas."

The original drawings of Gustave Doré, in illustration of Tennyson's *Elaine*, together with a set of proofs and photographs, are now on view at Messrs. Colnaghi's, Pall Mall East.

Digitized by Google

Works of special interest in the East are not numerous, though a few are advertised. Messrs. Nimmo (Edinburgh) publish *The Martyr Missionary; or, Five Years in China*; by the Rev. Charles P. Bush, A.M. The hero of this not ill-written biography is William Aitchison, an American missionary, who died in China, of dysentery, a few years since. Mr. Aitchison was an intimate friend of Mr. John S. Burdon, of the English Church Missionary Society, who, after losing two wives at the scene of his evangelical labours, recently came back to his native country to refit a constitution which arduous exertion in a trying climate had greatly injured and almost broken. Not only has Mr. Burdon returned to China, but he has found an English lady brave enough to accompany him as his third wife. Mr. Bush's memoir of Aitchison mentions Mr. Burdon in terms of appropriate respect.

Mr. Murray has published a two-and-sixpenny edition of the *Works of Lord Byron*, which is a marvel of good printing, elegance and cheapness, and, is entitled to the best praise. We have also received a handsome Christmas book, entitled *Off Land's End, Homeward Bound*, an illustrated collection of tales, published by Charles Griffin and Co.; *The Cloud and the Beam*, also a pretty Christmas tale, published by Lothian and Co., and *Warne's Christmas Annual*, consisting of miscellaneous stories by good authors, edited by Tom Hood. *Life Among the Zulus* and *A Visit to British Kaffraria* are the title of two works just issued by the Society for Promoting Christian Knowledge. These are descriptive of a visit to South Africa, neatly illustrated with wood-cuts and most interesting reading.

We have received the yearly volumes for 1866 of the *Band of Hope Review* and the *British Workman*, both published by Mr. S. W. Partridge, and both excellent works of their kind.

ROYAL ASIATIC SOCIETY.—On the 17th inst., at the ordinary meeting of the Royal Asiatic Society, Sir T. E. Colebrooke, Bart., M. P., occupied the chair. Among the members present were Major-General Sir Henry Rawlinson, K.C.B., the Right Hon. Viscount Strangford, Professor E. Goldstucker, General A. Cunningham, Sir F. Halliday, K.C.B., Sir C. Nicholson, Bart., Messrs. O. De B. Priaulx, N. B. E. Baillie, E. B. Cowell, J. Dickinson, E. C. Ravenshaw, E. Norris, and others. Sir Henry Rawlinson briefly noticed the recent death of Dr. E. Hincks, of Killyleigh, Down, Ireland, a member of the society, noted for his skill in deciphering hieroglyphical and cuneiform inscriptions, and who showed wonderful ability in unravelling the most difficult ciphers without any previous clue to their contents or plan of formation. Suggestions and arrangements were made that his unpublished writings should be collected and printed. Dr. S. Birch, of the British Museum, then read a translation of an inscription 700 years old, cut in Chinese and Sanscrit characters upon an ancient pillar in a Chinese temple, giving a history of the construction of the building. The meeting then closed.

THE RIOTS IN CEYLON.—Ceylon, usually so quiet (says the *Pall Mall Gazette*), has just been the scene of serious food riots. The Governor seems to think the fault is with the chetties (grain dealers), who, armed with cudgels and blunderbusses, formed an efficient special police to defend their property. But with rice at thrice its ordinary price, holding back grain must be pretty well at an end. No account has yet come in of the cause of the scarcity. Its occurrence confirms what we remarked some time ago, that the famine in Orissa is exceptionally severe solely because the Bengal authorities have been exceptionally negligent. Distress has undoubtedly been felt more or less over the whole continent south of the twenty-third parallel. Meanwhile the Hon. R. S. Ellis has been visiting the distressed parts of Madras, especially Salem and North Arcott, and reporting with a view to preventive measures on a large scale. "Irrigate, irrigate," is the burden of his message, as it is the cry of every one who looks beyond his own immediate surroundings. Why the work has not been done long ago it is only too easy to tell:—"There are (says Mr. Ellis) in the records of the Board of Revenue and Public Works Department plans of irrigation which, *if they had been executed*, would not only have been highly remunerative, but would have done much to save the crops during this year's drought. . . . There was scarcely a village through which I passed (adds Mr. Ellis) where there was not the same complaint of breached tanks and channels out of repair; while in many places great natural reservoirs were pointed out to me which only need a small outlay to bring large waste tracts into cultivation. Rivers, again, are allowed to flow into the sea, carrying away the drainage of thousands of square miles, which, if retained by a careful system of dams in the valleys, with connected channels, might store water sufficient to carry the crops through even so severe a season as this last."

THE "GOLDEN FLEECE" FOR HONG KONG.—A report has been circulated regarding the *Golden Fleece* transport, which has reached the Transport-office at Somerset-house, and which has also been circulated at Lloyd's. It appears that a piece of paper in a bottle was picked up by a Coastguardman at Rock-end, Isle of Wight, on the 10th of December, containing these words:—"Please send something, for the *Golden Fleece* has gone down with 100 soldiers and 52 men, at a little past Portreath" (this word not plainly written). This must be a wicked hoax. The bottle could only have been thrown overboard during the voyage made by the *Golden Fleece* from Portsmouth to Cork on the 17th of November. This voyage was accomplished in safety, and the men landed at Cork on the 21st of November. The *Golden Fleece* has since then embarked a regiment, with more than 700 men, women, and children, and sailed from Cork on the 24th of November direct to China. She could not have been near Portreath, which is on the north-west coast of Cornwall, on her voyage to China, except intentionally, and must in such case have been seen and spoken by many vessels.

THE MORTALITY AT HONG KONG.—A long letter appears in the *Standard* with the signature "Confucius" in defence of General Guy, After reviewing the evidence addressed before the committee of inquiry. the writer says:—"There can be no shadow of doubt that the only man to blame for the removal of the 99th to Kowloon was the then Governor of Hong Kong, who demanded its removal; a demand which the commandant had no power to refuse." "Confucius" disclaims any personal knowledge of General Guy, or any prejudice in his favour, and grounds his views on the statement of Dr. Rennie, as published in the *London and China Express*.

PIRACY IN CHINA.—The *Pall Mall Gazette* says, alluding to the *Lubra* case:—"Seafaring men in the China seas are naturally somewhat disturbed at the prospect before them of reprisals such as this, but Hong Kong has no reason to be surprised at the serpent it has nourished in its bosom, turning round and biting when an attempt was made to scotch it. Moreover, the attempts which have been made in that happy island to suppress piracy have been singularly well fitted to aggravate the evil. The records of the Supreme Court, the reports of special commissioners appointed by Her Majesty, the statements of missionaries, and the reclamations of the Chinese Government abundantly prove that our dealings with Chinese pirates has been of the most haphazard kind. The innocent have often been mistaken for the guilty, and there has been a tendency to drive honest traders to desperation rather than to bring pirates to book who are possessed of intelligence or capital. Vessels have been attacked, and not a few men have been hanged, on the information of Chinese who turned out to be pirates themselves; and on one occasion a zealous gunboat commander actually 'pitched into' some mandarin boats that were engaged in apprehending smugglers running cargoes of salt. If the Chinese authorities and people were left to settle the matter in their own way, as they do on other parts of the coast, where piracy hardly exists at all, the evil would at least be greatly mitigated, and so would it be also if British cruizers were at liberty to insist on a general disarmament of seagoing boats; but for a complete suppression of the piratical system which has existed for so long in the south of China, it is necessary that there should either be united action between the Chinese and the foreign authorities, or that the former should be induced to employ a small fleet of armed steam vessels for the police of their own coast."

THE CHINESE IN MELBOURNE.—Early in October Melbourne was visited by heavy rains and by floods, nearly as severe as those of the month of December, 1862. In Gipps Land some of the farmers and market gardeners have suffered severely. A short time back a lady and her servants, living near the township of Sale, were looking out from an elevated and secure position at a great sheet of water below them, beneath which lay much cultivated ground. All at once they observed swimming towards them an object which they were quite unable to make out to be either fish, flesh, or fowl. It swam, however, vigorously, and in a few minutes reached the shore. It was a Chinese market gardener, with a copy of *Confucius*, and a lot of wooden gods—his Penates—strapped to his back, all he could save of his little possessions. Addressing his observers, all he could say in broken English was, "No more cabbish, no more potata, no more callots, all gon—all gon along a flood," and away he went (with his *De consolatione philosophiæ* on his back) to more pleasant fields and pastures new. By the way a curious application was made to the Government the other day on behalf of the Chinese at Emerald-hill, one of the Melbourne suburbs. At this place the Celestials have lately erected a joss house, and as the new building is, or purports to be, a place of worship, they claim exemption from all municipal rates in common with other places of worship; and as our local law allows this exemption to all sects indifferently, the Attorney-General may find that "State aid to religion" will comprehend Paganism itself.

FOREIGN OFFICE, DEC. 21.—The Queen has been pleased to approve of M. Louis van der Spar as Consul at Point de Galle for his Majesty the King of Prussia.

EXTRACTS FROM THE P. AND O. CO.'S REPORT.

It appears to be the belief of newspaper writers in India and Australia that the average rate of speed attained by the Cunard steamers is 13 and 14 knots per hour, and the general rate of the P. and O. steamers has, with equal inaccuracy, been set down at 8 knots. The company are also constantly twitted with the alleged superiority of the West India and French steamers in point of speed. The performances of the steamers of the Cunard, West India, and Messagerie companies are so good in reality that the directors of those undertakings can scarcely feel complimented when detractors of the P. and O. Company endow their ships with fictitious qualities, and give them credit for a very high *average* rate of speed because that high rate has been once or twice attained under exceptional circumstances. In dealing with this as with the subject of passage rates, the directors are not unmindful of the saying that "comparisons are odious," but they are especially odious when made on false premises, and as this has been done to the prejudice of the P. and O. Company, they feel assured that the directors of the other services referred to will not misunderstand their object when they make the following use of the materials at their command for the purpose of arriving at more correct results:—

In the cases of the Royal Mail and French Companies the averages are reproduced from their own recent reports; in the case of the Cunard Company the average had been calculated upon a Parliamentary return extending from January, 1862, to April, 1866, or four years and a quarter, the distances from Liverpool to the American ports being those adopted by the Post-office, and the time of stay at the intermediate port (Queens, town) being deducted. The distances are taken from the same source and the stoppages are dealt with in a similar manner in commuting the averages of speed of the P. and O. Company's steamers given further on.

The following appears to be the average of the Cunard steamers:—

LIVERPOOL AND BOSTON LINE.

	Knots.	Fath.
109 voyages outwards, average speed	9	2
112 „ homewards „	10	2

LIVERPOOL AND NEW YORK LINE.

	Knots.	Fath.
109 voyages outwards, average speed	11	1
113 „ homewards „	11	7

It will be remarked that on the Boston line a difference of one knot, and on the New York line a difference of six-eighths of a knot, exists between the average of speed outwards and homewards, and this proves that even the magnificent and full-powered steamers employed in those services are affected by the circumstance that the prevailing winds of the Atlantic are from west to east.

The official returns also exhibit another result—a considerable difference exists between the highest and lowest rate of speed recorded for a voyage,

Digitized by Google

this difference being brought about by adverse weather as regards the slowest run, and by favouring winds as regards the quickest.

If a difference of two days exists between the duration of a fine and rough weather voyage in the run of 3,000 miles across the Atlantic, the same rate of difference applied to this company's complete voyages of 15,000 to 20,000 miles would account for any variation that can be discovered between the most and least successful of their performances, accidents, of course, being excepted in both cases.

The average speed of the Royal Mail Company's steamers was stated in their last report as follows:—

	Knots.	Fath.
Between Southampton and the West Indies ...	10	5
Between Southampton and the Brazils	9	5

The average speed of the steamers of the French Company, and finer vessels do not exist, is stated by their directors in the report dated 10th June, 1865, to have been, for the two previous years 9 4

"which," they add, "is, for a general average, rather high."

The average performances of the P. and O. Company's steamers, from the commencement of 1862 to the present time, are as follows:—

	Knots.	Fath.
On the Australian Line	9	7
On the Calcutta and Suez Line	9	7
On the Bombay and Suez Line	9	2
On the Southampton and Alexandria, and Marseilles and Alexandria Lines	10	0

It is constantly assumed that a postal contract is all profit, and that it confers the character and advantages of monopolists on those who hold it, whereas the execution of it frequently entails losses, risks, delays, and annoyances from which ordinary traders and trading companies are exempt.

That the execution of a postal service may be attended with loss is exemplified by the fact that the company have recently had to abandon the contract which they held for the line between Mauritius and Suez, notwithstanding the circumstances that it was paid for at the liberal rate of 8s. 2d. per mile, and that it was worked by two very inexpensive vessels. It was at no time a very profitable line, but after the Messageries Imperiales Company entered upon it it became a losing one; and although that company are now in sole possession of the traffic, and receive a subsidy of 22s. 6d. per mile, they state in their last report that if the improvement on their Indo-China lines is not so decided as in the general proceeds of the enterprise, "the fact must be more especially attributed to the opening of the Mauritius line;" which therefore appears to be a losing concern with them, as it was with the P. and O. Company.

A more exacting and uncompromising document than a transmarine Postal Service Contract does not exist. There is no rest for those who undertake it, and carry it out faithfully. The season for passengers may be slack; the transmission of specie may have ceased for a time; shipments of cargo may have fallen off in consequence of commercial difficulties, but the mail steamer must be ready to the day and hour, and the expenses attending her navigation are more likely to be augmented than decreased by the failure of the usual sources of revenue. The last two years have exemplified this; the company's general trade has been exceptionally dull, and the cost of coals, stores, labour, &c., has been exceptionally high. The directors of the Messageries Imperiales Company had occasion to refer to this part of the question in their last report to their shareholders. They had been denounced as monopolists (as the P. and O. and other English companies have been), because they held a postal contract with the Government, and received a "subvention" from the State; they put the case as follows:—

"The object of the subvention is not to guarantee the success of the commercial speculation, but the complete and permanent execution of the postal service. The subvention is merely a payment for service rendered to the State.

"The carrying of the mails requires speed and regularity. It can only be accomplished by the aid of able officers and the most perfect appliances. Now all this talent, speed, and regularity, cannot be secured at a low rate of payment. The expenses of a service having to satisfy all these requirements are far greater than those of ordinary navigation, even when under the most favourable circumstances. No instance has yet occurred of the regular trading profits being sufficient to cover the additional expenses inherent to the postal service.

"The absolute regularity is not only an obstacle to the realisation of profits; it may cause serious losses by compelling departures in all weathers, during political or commercial crises, or when an intense epidemic is raging. This year the cholera has cost us 1,500,000f."

Notwithstanding that the rate of this Government subsidy is four times as much per mile as that received by the P. and O. Company, the directors further declare, in the same report, that "When they take into consideration the numerous and onerous charges imposed by the requirements of the service of the State, on navigation in those distant waters, they are justified in asserting that the subvention you receive has been prudently and equitably calculated. It is far from being excessive. It is only sufficient so long as the commercial traffic produces the larger portion of your receipts.

The mail contract imposes a very heavy penalty for not having a steamer ready to start to her day from the terminal and principal ports. During the last twenty five years the company have never once incurred that penalty, although since the commencement of India and China contracts, they have had to start on those lines alone upwards of 4,000 steamers.

INCREASED BULK OF THE MAILS.

The enormous bulk of the mails has now become a matter for serious consideration. In the early, and even in some of the current contracts of the company, the mails were described as "Her Majesty's Mails" (in which "designation all despatches and bags of letters are agreed to be comprehended)." The directors understood the mails to mean letters, despatches and newspapers only, and tendered in conformity; but since that time the "book and pattern posts" have been established, and in more recent contracts the designation clause runs thus: — "All her Majesty's mails (in which term 'mails' all boxes, bags or packets of letters, newspapers, books or printed papers, and all other articles transmissible by the post, without regard either to the place to which they may be addressed, or to that in which they may have originated, and all empty bags, empty boxes, and other stores and articles used or to be used in carrying on the Post-office service, which shall be sent by or to or from the Post-office, are agreed to be comprehended) which shall be at any time and from time to time by the Postmaster-General or any of his officers or agents, be required to be conveyed." Notwithstanding this enlargement of the designation the directors have never refused to carry the articles comprised in it, although clearly not contemplated in those contracts which contain the more limited definitions of the term mails, and which are still current. Her Majesty's Postmaster-General has started as a carrier, both by land and sea, of articles of all kinds, and the arrangement has operated in a twofold manner to the prejudice of the company. The number and bulk of the mail boxes have been greatly increased, the mail-rooms have been found too small, and the company have lost the freight previously paid by the public for the conveyance of the very books, parcels and samples now shipped as mails by the Post-office.

From the year 1858 to the present time careful records have been kept of the number of boxes, with their weight and measurement, comprising each mail shipped by the company's steamers. A tabular statement extending over the years 1864-1865 excited much surprise when submitted in evidence by the company to the Parliamentary Committee of 1866. The table has since been made up for six years. It is too long for production here, but it will be sufficient to take the first month of each year to support the foregoing statements.

The number of packages of mails shipped at Marseilles by the steamers corresponding with those leaving Southampton on the 20th of each month, for the six years included in the above return, has been on the average 477.

It will be seen that the number of packages shipped by the steamer which left Southampton on the 20th January, 1861, was	733	
The number shipped by the corresponding steamer from Marseilles was	443	1,176
The number by the steamer which left Southampton on the 20th January, 1866, was	1,271	
The number shipped by the corresponding steamer from Marseilles was	585	1,856
Increase in number of packages ... ... or 58 per cent. in six years.		680

The combined Marseilles and Southampton mails shipped at, or brought to, Suez, would thus form a cargo for a small ship.

The mode in which what is called the cost of the Mail Service is paid for, gives rise to much misconception. The House of Commons, in committee of supply, is asked every year to vote so much for the "Post-office Packet Service." Last Session the vote was for £821,164.

The consequence is, a large majority of the public believe that they are taxed to that extent for the maintenance of the service, and representatives of the agricultural interest within the walls of Parliament have been heard to complain that their constituents are compelled to contribute to the support of enterprises useful only to the commercial part of the community, while it rarely happens that the representative of the Government on the Treasury Bench reminds those who oppose the vote that the greater part of the money comes back in the shape of postage.

The whole sum is charged by the Postmaster-General against the revenue of the department in his yearly account, and notwithstanding this, the Post-office showed a profit for the year 1865 of £1,482,522.

The real state of the case as between the mail companies and the public would be more fairly represented if the House of Commons were asked to vote the difference only between the sum paid to the contractors and the postage received; and there does not, in fact, appear to be any reason why Parliament should be applied to for a separate vote for the money required to meet this particular item of the Post-office expenditure (after the contracts are once agreed to by it and the Government), seeing that it is not asked to vote separately the cost of conveyance of mails by railway (£763,462), the salaries of officials and letter-carriers, or any other sums which make up the expenditure of the department, which are all included in one vote, amounting last session to £2,436,016.

The Post office has of late years exhibited a strong desire to take rank among the revenue producing departments of the Government, and it struggles hard to show a good balance of profit at the end of the year. That balance for the year 1865 amounted, as stated above, to £1,482,522. The late Postmaster-General, Lord Stanley of Alderley, defends this policy in his annual report (for 1866) in the following words:—

"So long as the net revenue of the Post-office continued to be either a little less or a little more than half-a-million, the statement, so frequently made, that the Post-office *ought not* to be a source of revenue, did not demand immediate or careful examination, but under the strong probability that this net revenue may, at no very distant date, attain the proportions which I have anticipated for it, it is well to point out that it would be difficult, if not impossible, to devise any mode of raising a public income less burdensome or more equitable in its operation than that which exacts no payment without giving a service in return, and which is not open to the appellation of a tax."

This is no place to discuss the question whether the Post-office ought or ought not to endeavour, as a department of the Government to emulate the "Excise," and the "Stamps," or the "Income-tax;" but it should be borne in mind that the mail companies, like the Post-office, "exact no payment, without giving a service in return," and it has frequently been made apparent that the mode in which the vote is taken keeps the public very much in the dark upon the important fact that the ocean Postal Service is nearly paid for in postage stamps, and would perhaps be so paid entirely on many lines—those worked by the P. and O. Company particularly—if the postage were given to the contractors as payment for their services.

As stated at page 17, the Commission of 1853 established the fact, that while the company received £199,600 per annum under the India, China and Australian Contract, the annual gross postage reached £188.466; from this sum £35,902 was deducted as "repayable to foreign countries," and "for British and Foreign Inland rate," leaving "the difference between the subsidy and estimated earnings of the packets" £47,036 only.

The returns put before the Committee of 1866 exhibited an increase of this "difference" or "loss," it being therein computed at £82,000 per annum, but it was elicited that during the examination of Mr. F. Hill, that in the interval the postage of the half-ounce letter *via* Southampton had been reduced from 1s. 3d. to 6d., and that *via* Marseilles from 2s. 11d. to 10d. (*see replies to questions* 96 *and* 97), thus affording the strongest ground for the assumption that, if the public had not received the boon of a very large reduction of postage, the service would long ago have been self-supporting.

One important item (and it is precisely that which concerns the P. and O. Company) appears to have been overlooked in making this statement, inasmuch as the tables show a large decrease in expenditure under the head of "Conveyance of mails by packets under contract with the Admiralty and Post-office," for

In 1864 this item stands at	£900,610	0	0
In 1865 „ „	796,399	0	0
Decrease	£104,211	0	0

After stating that the net revenue of the department was rather less than £600,000 in 1856, and that it bordered closely upon £1,500,000 in 1865, the Postmaster-General "declares, both for his predecessors and himself, that this satisfactory result has not been brought about by any special effort to produce a revenue from the Post-office." The experience of the directors as contractors for the conveyance of the mails by sea does not enable them to endorse this declaration, and they have shown above that the Postmaster-General has entered into direct competition with them as carriers of parcels for the public, and has so diverted much freight from the holds to the mail rooms of the steamers. In the returns placed before the Committee of 1866, by Mr. F. Hill, the proceeds of the "book post" alone on the company's lines (without including Australia) are set down at £8,702 for the ending 31st March last.

When before the Committee of 1866 the able Assistant Secretary of the Post-office, Mr. F. Hill, always referred to this difference between the cost of a particular line and its yield in postage as so much "loss." No exception can of course be taken to this mode of dealing with the subject in a purely departmental point of view; but the Government and the community at large would probably attach some value to a service such as that now existing with the East, apart from the consideration that the company undertake the functions of letter carriers as part of their general business.

The opinions of the Committee of 1866 in this matter are expressed in the following paragraph:—

"Your Committee cannot assent to the doctrine that interests so important from every point of view, whether political, social, or commercial, as those which connect the United Kingdom with the largest and most valuable possessions of the Crown, should be prejudiced by an insufficient Postal Service, because the establishment of an efficient service might leave an apparent loss of no great magnitude to be borne by the two countries. They submit that a question of profit or loss, within reasonable bounds, is a consideration entitled to little weight in the case of so important a Postal Service as that between England and India. They concur in the views expressed on this subject, in a letter addressed by the India-office to the Assistant Secretary to the Post-office, on the 5th October, 1865, in which it was said 'Sir Charles Wood cannot, however, regard the question as one merely affecting the charge on the Imperial revenues. It has been the perception of the bearing of increased postal communication on the wealth and progress of a country that has induced statesmen of late years to consent to fiscal sacrifices for the purpose of obtaining it. There can be no doubt that increased postal communication with India implies increased relations with that country, increased commerce, increased investment of English capital, increased settlement of energetic middle-class Englishmen; and from all these sources the wealth and prosperity of England are more greatly increased than that of India.'"

Reverting to the Postmaster-General's report for 1866, he states:—"The foregoing tables show that, with a view to meet the just requirements of the public for increased accommodation, all parts of Post expenditure have been augmented."

Monetary and Commercial.

At the meeting of the General Credit and Finance Company of London (Limited), held at the London Tavern, the resolution for the reconstruction of the company and reduction of the liability, which was passed on 27th November, was confirmed with only six dissentients. The business of the company will, therefore, henceforth be carried on under the name of the General Credit and Discount Company (Limited).

The dividend of 4s. on the estate of Overend, Gurney and Co. will be made before the 31st inst.

At the meeting of creditors of Messrs. James Barber and Co., East India merchants, whose suspension was announced in our last, a statement was presented showing assets estimated at £72,000, against debts for £60,000, even after treating the claim of the firm upon Gordon, Stuart, and Co., of Calcutta, for £36,000, as a total loss. Under these circumstances it was resolved unanimously:—

"That Messrs. James Barber and Co. be authorised to continue their business as heretofore, and to realise their estate and pay dividends from time to time, as they may find to be practicable and convenient.

"That this meeting desire to express their deep sympathy with, and confidence in, the members of the firm, and trust that they will be enabled to preserve their long-established business."

Messrs. Abraham Troost and Son, of Manchester, have convened a meeting of their creditors, and the balance-sheet submitted showed a dividend of 18s. 9d. in the pound, contingent upon the debts of the New York house being realised in full It is arranged that the firm shall continue their business.

In reference to the failure of Messrs. Mitchell and Aspinall, tea brokers, it is stated that a new firm will be founded styled Aspinall, Cumming and Perceval. A composition will be paid. on the old firm's debts.

The biddings for £350,000 in bills on India took place on the 18th at the Bank of England. The proportions allotted were—to Calcutta, £71,500; to Madras, *nil;* and to Bombay, £58,500. The *minimum* price was fixed, as before, at 1s. 11d. per rupee on all the Presidencies, and tenders at the *minimum* will receive in full. These results show a further diminution in the demand for means of remittance to the East.

The applications to the Crown Agents for the Colonies for bills on Ceylon for Rs. £250,000 were considerably in excess of the amount required, but the tenders accepted—at and about the minimum, which was fixed at 1s. 10⅝d.—only reached 186,000 rupees. The balance was withdrawn.

A meeting of the subscribers to the Shareholders' Defence Association of the Blakely Ordnance Company was held on the 19th, when resolutions were passed instructing the solicitors, Messrs. George Lawrence and Co., to adopt the proceedings already advised by counsel to obtain the decision of the Court of Chancery as to the shareholders' right to have their mes removed from the register.

The claim of the Asiatic Bank to rank on the Agra for bills drawn by Dickson, Tatham, and Co., Colombo, for £6,000 under a credit granted by them was decided against them. This decision is to be regretted, although it may be logical for Vice-Chancellor Wood to hold that the open credit of £15,000 contained no special assignment or dedication for the exact amount of the bills drawn, and that the bank was not liable by this instrument on a contract between third parties. The undertaking to accept a future draft was not an actual acceptance, and to decide that it was such would introduce an entirely new principle in English law. This is quite opposed to the spirit of equity. The failure of the Agra should not remove the liability of their acts while solvent.

We regret to announce the suspension of James Barber and Co., London, and of Grant, Murdoch and Co., Liverpool, well known in the India and China trade. The failure of James Schofield and Sons, Manchester, is also announced. There have been some difficulties with other firms, but no actual suspensions, and it is believed that they will be arranged.

The following circular has been sent to the creditors:—

Sir,—It is with feelings of the deepest regret that we have to announce our suspension. The stoppage of our Singapore friends, Messrs. Middleton, Harrison, and Co., in which firm our Mr. Murdoch was a partner, and the breaking off of arrangements that we had contemplated would have relieved us from our engagements on behalf of said Singapore house, have compelled us reluctantly to adopt this course for the interests of all concerned. We shall have a statement of our affairs drawn up with all despatch, when we trust that we shall be able to make such proposals as will insure their acceptance. Meanwhile, soliciting your forbearance,—We are &c., GRANT, MURDOCH, and Co.

The amount of bullion by the P. and O. Company's steamer *Nyanza*, from Southampton on the 20th inst., was—in silver, to Yokohama, £2,450.

MANCHESTER MARKETS.

ENORMOUS EXPORTS.

The export of Shirtings to Shanghai for the month ending 16th Nov. reached the enormous total of over 19 million yards, and the export for the month ending the 16th December reaches 11,430,999, according to the circular of Sam Mendel; the total for the twelve months being 122,354,646 against 82,566,906 in 1865, and 34,518,925 in 1864. The prices at these periods we find to be, December, 1864, 7lb. Grey Shirtings, 16s. 6d. to 17s.; December, 1865, 14s. 9d. to 15s. 3d.; and December, 1866, 10s. 6d. to 11s. The decrease in price of course accounts partly for the increase of exports, but it is to be feared that the quantity will be found far in excess of the demand, and a heavy fall in prices in China must ensue, leaving a loss, which might have been with a lighter export, a profitable venture. It is believed that a large portion of the present shipments have been made on account of the manufacturers and Manchester houses, and the merchants in the China trade are not the means of destroying the markets, so that it is scarcely fair that they should have to contend against such an unexpected flood of shipments brought in contact with their own purchases.

The export to Hong Kong and Whampoa for the month is 4,648,593 yards, and for the twelve months 40,708,077, against 35,161,504 in 1865; and 21,105,189 in 1864.

To Japan the export during the month has been 1,066,425, and for the twelve months 23,460,228, against 16,224,904 during 1865, and 2,679,997 in 1864.

The export to Singapore during the month has been 5 211,552, and for the year 48,053,318, against 32,161,925 in 1865, and 21,074,316 in 1864.

To Batavia, Samarang and Sourabaya the month's export was 1,472,209, and the twelve months 35,010,863, against 14,464,910 in 1865 and 7 996,535 in 18 4.

The export to Manila for the month was 1,794,427, and for the twelve months 12 078,512, against 13 222,995 in 1865, and 8,245,292in 1864.

To Ceylon the total export for the month is 2,184,202, and for the yeav 19,559 438, against 12 516 223 in 1865, and 9,100 926, in 1864.

In COTTON YARN the export for the twelve months to Hong Kong and Whampoa is 4,6' 9,638 lbs., against 1,184 030 in 1865, and 1,505,410 in 1864. To Shanghai for the twelve months 70,800 lbs., against 99,000 in 1865, and 135 249 in 1864. To Singapore 1,817,777 lbs. against 1,144,785 in 1865, and 1,211,392, in 1864. To Japan 1,480,260 lbs., against 499,700 in 1865 and 50,650 in 1864. To Batavia, Samarang and Sourabaya 744 416 lbs. were exported, against 496,310 in 1865, and 258,355 in 1864. To Manila 89,318 lbs., against 104 502 in 1865, and 117,580 in 1854. To Ceylon 812,922 lbs., against 311,090 in 1865, and 261,472 in 1864.

ARTICLES OF IMPORT.

TEA.—Business has been again on a limited scale, but with rather more steadiness, importers generally showing more disposition to support prices, whilst the public sales have been very small. Prices on the whole show but little alteration, and business may now be considered almost closed for the year. Congous.—Siftings show no material alteration. Broken-leaf kinds maintained former value, as also common Teas free from dust. Fair to good common quoted 11d. to 11½d. per lb. Fair flavory kinds, of old import, remain as before. Fair to good Kaisows show but little change, the demand being moderate. Fine to finest are firmly held. Pak Lings are in fair request at previous prices. Common to fair black-leaf kinds remain quoted at from 10½d. to 1s. 1d. per lb. Fair to good qualities have sold to a fair extent at about former prices. Fine to finest are firmly supported, with a moderate business doing. Monings have sold at 1s. 9d. to 1s. 10d., some of which cost 2s. 8d. laid down from Hankow. New-made Canton kinds are dull of sale. In Oolongs there is nothing new; a few good to fine have been sold at former prices. Souchongs meet with a fair sale at about previous prices. Flowery Pekoes continue difficult to move. Scented Capers have been saleable to a fair extent, but prices have given way about ½d to 1d. per lb., the quantity on offer being large. Foo Chow kinds of Orange Pekoe have been saleable at the decline last quoted. Canton-make, except the finest kinds, are heavy of sale, even at the low rates current. In uncoloured Japans there has been nothing doing; nominally quoted 1s. 2d. to 1s. 5d. Green Teas: There has not been so much doing in these as for some time past. Prices for the finer kinds of Moyune and Ping Suey are steady, but the coarse Fychow kinds remain difficult of sale at lower prices; some parcels of Hyson have been taken for export at full prices. Some sales of Canton Gunpowder from recent arrivals have been made at extreme prices. The public sales comprised only 5050 packages, of which 4857 packages were sold, the whole being without reserve. The arrivals are the Valdivia, Challenger, Napoleon III., and Philomela.

SILK.—Soon after the departure of last mail an active demand for silk sprang up, which completely changed the tone of the market. In China silk the transactions during the fortnight have been large, and resulted in an improvement of 6d. per lb. on good silk, and 1s. to 1s. 6d. per lb. on ordinary and inferior descriptions. The deliveries show a considerable improvement on those we have recently been accustomed to. Japans have not sold so readily as Chinas, there being but little demand from the Continent at the moment for this class of silk. Deliveries from 1st to 22nd inclusive:—China, 2,426 bales; Japan, 346 bales. Total, 2,772 bales.

COTTON.—The improvement in this market reported in our last issue, has continued. Prices for all descriptions have advanced ¼d. to ⅜d., and in some instances 1d. per lb. Parcels sold for arrival have also advanced ¼d. per lb. The total sales in London during the week ended 22nd inst. has been 13,610 bales on the spot, and 3,220 bales to arrive. Of the quantity sold on the spot, 560 bales China realised as follows:—for middling fair, 9¼d.; fair to good fair, 10¼d. to 10½d.; good and fine, 11d. Of Rangoon the sales reached 520 bales, and of Dhollerah 150 bales, for which the following prices were paid:—Rangoon, middling fair, 8¼d.; fair to good fair, 9d. to 9¼d.: good to fine, 9¾d. to 10d. per lb. Dhollerah, middling fair, 11¼d.; fair to good fair, 12d. to 12¼d.; good to fine, 12¾d. to 12¾d. At Liverpool the sales to the trade have amounted to 62,390 bales, and to speculators and exporters 48,860 bales; fair Dhollerah is quoted 12d., and mid. Orleans 14¼d per lb. Telegraphic advices from New York to the 22nd Dec. place middling Uplands at 34 cents.

COFFEE.—The only sales of importance were effected late in the week, when the heaviness experienced at the previous sales disappeared, and for the comparatively small quantity placed on offer the demand was brisk. Some competition was displayed, especially for the coloury sorts of Plantation Ceylon, which resulted in an advance of 1s. to 1s. 6d. per cwt. for that quality and 6d. to 1s. for the commoner qualities being established. The sales of Plantation amounted to 932 casks 45 barrels and 670 bags, which realised as follows:—Triage, 30s. to 52s.; gray, ordinary to good ordinary, 63s. 6d. to 68s. 6d.; fine fine ordinary to middling, 70s. to 77s.; pea-berry, 75s. to 80s.; coloury, small, 74s. 6d.; low middling to middling, 78s. 6d. to 82s.; good middling, 85s.; pea-berry, 86s. to 87s. 6d. Prices for Native Ceylon have also advanced 6d. to 1s., the quotations being:—Very common, 59s. 6d.; good ordinary, 63s. to 64s.; fine ordinary, 67s.; bold, 70s. to 71s. per cwt. The sales at these prices have been 51 casks, 5 barrels, and 1,103 bags. The only other offer at the auctions was of 617 bags fine ordinary pale Manila, which realised 68s. to 68s. 6d. per cwt.

DRUGS.—Camphor: The market is extremely quiet, and no business has been done worth reporting. Dragon's Blood: One case in reeds was bought in at £12, and 2 cases lump were withdrawn.

GALLS.—A more ready sale has been effected at higher rates than were previously obtainable. At auction 50 boxes China sold at 59s 6d., and 42 boxes Japan were disposed of at 56s. to 57s. per cwt. An offer was also made of 51 bags Japan, which were sold at 55s. per cwt.

HIDES AND SKINS.—At the fortnightly sales ending 20th, the offers of East India Hides amounted to 109,797, of which quantity 91,184 sold. Messrs. Dyster, Nalder, and Co.'s report on these sales is as follows:—"There was a good demand for East India Hides, and the greater part of the moderate quantity offered found buyers at an advance generally of ¼d. to ½d. per lb. on the best qualities, and at fully last sale prices for lower descriptions. Of Manila Buffalo, 200 Hides sold, 1st Heavy at 4¾d. per lb. Of Singapore and Penang Buffalo, 657 Hides sold, Best, 5¼d. to 6d.; Seconds, 5⅜d.; Light, 5⅜d. per lb.

JAPAN WAX.—Firm rates have been realised, and 1221 boxes of recent import chiefly sold—good saucer slightly mixed, 87s. to 89s.; ordinary mixed, 59s. 6d.; very ordinary mixed, 54s. to 56s. 6d.; very low and stained, 45s.; good block, 90s. to 91s.; middling, partly mixed, 82s. to 85s.; rather more mixed, 77s. to 80s. per cwt. The remainder offered, which consisted of very ordinary mixed, was bought in at 72s. 6d. per cwt.

MANILA HEMP.—Small business only has been done at the cheaper rates given in our last report. Of 854 bales offered about half sold. Sorsagon at £48 to £48. 5s., and good roping at £47 per ton.

PEPPER.—Black: This market remains very quiet, and only small quantities have been taken at the public sales on previous terms. Privately 2,200 bags have sold. Penang at 3d. to 3 1-16th, and Singapore at 3¼d. to 3⅜d. per lb. White: A less demand has been experienced, and 310 bags Penang at auction was all bought in, good at 6d., rather dark at 5¾d. Of the latter quality, 130 bags afterwards sold at 5⅝d. per lb. No private business has been done in white.

RATTANS.—During the week 7,219 bundles Rangoon have been sold at 2s. 6d. to 2s. 11d. and 5,468 bundles sea damaged Singapore; middling at 3s. 9d. to 4s., common at 1s. 7d. to 2s. 7d. per hundred.

SUGAR.—Since our last report the demand has considerably lessened, and the business done has been of extremely small extent. The market is, however, firm, and former prices have been fully maintained. Of Penang 3,197 bags were offered at auction, which sold as follows: low to middling yellow, 31s. 6d. to 33s.; good bright yellow, 31s. 6d. to 33s. 9d.; low middling to fine brown, 28s. 6d. to 31s. 6d. per cwt. Privately 500 bags sold at 31s. 6d. No sales either by auction or privately have taken place in Manila descriptions.

SPICES.—Cloves: No East India offering. Mace: Of Penang 3 cases were bought in at 2s. Nutmegs: At auction out of 106 cases Penang offered 60 cases, averaging 111 nuts to the lb., sold at 1s. 2d. to 1s. 3d. per lb. The remainder was bought in at the following prices:—80 to the lb., 2s.; 90 and 91 to the lb., 1s. 8d. to 1s. 9d.; 116 and 113 to the lb., at 1s. 3d. per lb.

SAGO.—At auction the offers were 798 boxes fine small medium Borneo, which realised 18s. to 18s. 6d., and 60 boxes ordinary dark Singapore which was withdrawn.

RICE.—buyers still refuse to operate on former terms, and holders decline a reduction. The business done has consequently been of small importance, the only offer at auction being 12,000 bags soft grain, chiefly Rangoon, which realised 12s. 3d. to 12s. 6d., a portion sea damaged 11s. 6d. to 12s. 3d. per cwt.

TERRA JAPONICA.—In consequence of a reduced stock, especially of the better qualities, prices are ruling a trifle higher. No business worth reporting has been done in Cutch. The common descriptions of Gambier continue steady at 20s. 6d., and 356 bales at auction were nearly all sold at that price per cwt. In addition, 538 baskets good pale cubes were offered and bought in at 29s. 6d. to 30s. per cwt.

Digitized by Google

TIN.—Good business is still doing in foreign descriptions at a general further advance of 10s. per ton. About 120 tons fine Straits have been sold during the week on the spot at £83 10s. to £84, with short prompt, and 60 tons for arrival on the same terms. Banca is firmly held at £85 per ton.

MISCELLANEOUS.—Aloe Fibre: Of Manila, 79 bales for the most part sold. A quality, £36. 15s.; B quality, £31. 15s. The remainder of C quality was bought in at £32 per ton.

BLACKLEAD.—Small sales of Ceylon have taken place, consisting of 293 barrels ordinary mixed lump and dust at 13s. 6d. to 15s., and 230 barrels dust at 9s. 6d. per cwt.

SAPANWOOD.—All the Ceylon offered (3 tons) was bought in at £9. 10s. per ton. No offers of Manila.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars 6s. to £6 10s.; nail rod, £8 5s to £8 15s.; hoops, 9 10s. to £10; sheets, single, £10 10s. to £10 15s.; Staffordshire bars, £8 7s. 6d. to £8 15s.; rails, £6 to £6 10s.

STEEL.—Swedish keg, £15 15s. to £16.

COPPER.—Sheet and Sheathing, £86 per ton; yellow metal, 7d. to 7¼d. per lb.

TIN.—£85 for block; £86 for common bars. Tin plates, best charcoal I.C., 32s. 6d. to 34s.

LEAD, &c.—English pig, W.B., £22 10s. to £22 15s.; shot, patent £23 10 to £24; sheet, £21 5s.; spelter, £22 2s. 6d.; zinc, Englh, sheet, £28; quicksilver, £6 17s. 6d. to £7.

The following is from the circular of Messrs. French and Smith:—We have had a better demand the past fortnight for both copper and tin, with rather improved prices. For copper the smelters have had more inquiry; Burra and Wallaroo is 83. Tin: English is firmer; Banca, 84; Straits, 83. In Holland the price is quoted 48½ guilders. Tin Plates continue in demand. Lead: Firm, but not much doing. Spelter: Without change.

Threadneedle-street, London, 1866.

TO IMPORTERS.

The undersigned beg to remind Importers of Wearing Apparel, and Boots and Shoes, of the many advantages which their long experience as Manufacturers and Shippers, their vast resources, and their intimate knowledge of the requirements of Foreign and Colonial Markets enable them to offer.

ASSORTED SAMPLE CASES FORWARDED ON RECEIPT OF REMITTANCE OR ORDER ON LONDON AGENT.

E. MOSES AND SON,
CORNER OF MINORIES AND ALDGATE LONDON

ENGLISH GARDENS IN THE EAST.

THE Fourth Season has now confirmed the complete success of MR. CHRISTY'S Cases for conveying Fruit Trees, Vines, Plants, Flowering Shrubs, and Seeds to the East, when shipped in the holds of Steamers like ordinary Case Goods. Mr. John Waterer, junr., the American Nursery, Bagshot, Surrey, or Mr. Christy, 28, Pall Mall, London, are prepared to execute orders for gentlemen in the East, and beg to call attention to the list of prices and conditions. FRUIT TREES, including PEARS, APPLES, PLUMS, CURRANTS, GOOSEBERRIES, PEACHES, NECTARINES, APRICOTS, CHERRIES, and QUINCES, per case, 10 Guineas.

	Guineas.
20 FRUIT TREES, with Ten vines, per case	14
ROSES of the best kinds	15
RHODODENDRONS and AZALIAS, &c.	15
GARDEN SEED (various)	5 upwds

The number depends on the size of the roots; the cases average 30 plants each.

All the above prices include freight, insurance, and all charges to any port where the P. and O. steamers call. The season for shipment commences about September and ends in January. All orders must be accompanied by a remittance or orders for payment. The name of the agent at the port of arrival must be furnished, to prevent delay in forwarding.

PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power, ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer and a Blacksmith. Dry Godowns for the reception of vessels, stores, &c., when requiring to discharge them.

Amoy, March, 1865.

THE CHINESE COMMERCIAL GUIDE.

CONTAINING Treaties, Tariffs Regulations, Tables, &c., useful in the trade of China and Eastern Asia, with an Appendix of Sailing Directions for those Seas and Coasts, by S. WELLS WILLIAMS, LL.D. Fifth Edition.

Hong Kong, SHORTREDE and Co.; London Agent, F. ALGAR, 11, Clement's-lane, E.C. Price Two Guineas.

"CHINA MAIL" OFFICE.

No. 2 WYNDHAM-STREET (back of the Club) :—

1.—THE EVENING MAIL,

A DAILY PAPER.

PRICE.—2 dols. per month.

TERMS OF ADVERTISING.—First insertion, Ten lines and under, 1 dol.; each additional line, 10 cents. Subsequent insertions, per week, 50 cents and 5 cents—"Auction" Notices are excepted, for which only One Charge per week is made).

2.—THE CHINA MAIL,

AN ORIGINAL WEEKLY PAPER.

(Every Thursday Night.)

PRICE.—15 dols. per annum; Single Copies, 44 cents.

ADVERTISING.—First insertion, Five lines, 1 dol.; each additional line, 20 cents. Subsequent insertions, 50 cents. and 10 cents.

The "China Mail" has been permanently enlarged in size, namely, from 4 to 6 full pages. It is the only weekly paper published in China which contains a complete summary of Hong Kong news as well as that from the treaty ports of China and Japan, and from Manila, Australia, India, and the Straits. Its circulation, which has of late considerably increased, extends throughout the coasts of those countries as well as to various parts of Europe. Great facilities are thus afforded to advertisers in this newspaper.

3.—OVERLAND CHINA MAIL.

Containing 8 FULL PAGES, and consisting of a reprint of the articles in the EVENING and CHINA MAILS, with Summary of News and Commercial Summary.

ONCE A FORTNIGHT.

(The Morning of the Mail's despatch.)

PRICE.—To Subscribers to the Weekly issue, 8 dols to Non-subscribers, 12 dols. Single copies, 50 cents.

ADVERTISING.—The same as in the Weekly. All "Notices of Firms" appearing in the Weekly will be inserted in the *Overland*, and charged for, unless otherwise ordered.

A. SHORTREDE & CO.

Hong Kong, May 17, 1866.

REVUE ORIENTALE,

Conducted by M. LEON DE ROSNY,

DINNEFORD'S FLUID MAGNESIA

THE Medical Profession for Thirty Years have approved of this pure solution of Magnesia as the best remedy for Acidity of the Stomach, Headache, Heartburn, Gout and Indigestion, and as a mild aperient it is especially adapted for ladies and children. Prepared by

DINNEFORD & CO.,
CHEMISTS, &c.,
172, NEW BOND-STREET, LONDON

And sold throughout the world by all respectable Chemist

CAUTION.—See that "Dinneford & Co." is on each bottle and red label over the cork.

HOLLOWAY'S OINTMENT.—Youth's Friend.—This excellent Ointment is so innocent in its nature, so cooling in its properties, and so healing in its action, that it is invaluable in skin diseases, scald head, tetter, tooth rash, chafings, and the many varieties of rashes and eruptions well-known and deeply dreaded in the nursery. Trivial maladies may, by it, be met and conquered at their outset, and all future mischief overcome before it has gained hold upon the constitution, and endangered future health. Full directions are wrapped round each pot of Ointment. Holloway's unguent may be applied with the best results in many diseases to which the sufferer silently submits, because the task of investigating them would be both difficult and delicate.

Prize Medal 1862.

HARMONIUMS.

W. E. EVANS,

THE ORIGINAL INVENTOR AND MANUFACTURER OF HARMONIUMS IN ENGLAND,

Prize Medal 1862.

RESPECTFULLY draws the attention of intending purchasers to his Unrivalled Instruments, in which he has recently introduced several important patented improvements. Amongst which may be specially mentioned the "double-action expression wind movement," by means of which the wind is supplied with half the usual exertion, and the most perfect expression realised; thus superseding the use of the "Expression Stop," so difficult of management in all Harmoniums. The advantage to purchasers is obvious, in selecting an instrument of a manufacturer whose whole life has been devoted to perfecting the Harmonium, and who finishes with his own hand every Instrument that leaves his Manufactory; whilst the prices charged are no higher than those of other makers. Every Instrument is Warranted. The undermentioned, SPECIALLY PREPARED FOR INDIA, are recommended:—

No. 1.—With One Stop, in Oak or Mahogany... ... ... 11 Guineas.
(Tinned Packing-case, and delivery at any home port, 55s. extra).
No. 3.—With Four Stops, in Oak or Mahogany ... ... 21 Guineas.
(Tinned Packing-case, and delivery at any home port, 40s. extra).
No. 5A.—With Twelve Stops, in Oak or Mahogany ... ... 29 Guineas.
Tinned Packing-case, and delivered at any home port, 42s. extra).

No. 6A.—With Fifteen Stops, in Oak or Mahogany ... ... 43 Guinea
(Tinned Packing-case, and delivery at any home port, 45s. extra).
No. 9.—With Nineteen Stops, and Two Rows of Keys, in Oak or Mahogany... ... ... 80 Guineas
(Tinned Packing-case, and delivery at any home port, 63s. extra).

THE "EVANS" IMPROVED HARMONIUMS

Are remarkable for the entire absence of the nasal and reedy tone which has hitherto been the great impediment to the general adoption of the Harmonium in private houses whilst the sluggishness of speech, another great defect in most Harmoniums, has been entirely overcome by W. E. EVANS' improvements, without any MECHANICAL appliances. Fully detailed Price List, with Testimonials from the most eminent Musicians, &c., may be obtained of the Sole Manufacturer and Patentee,

W. E. EVANS, 2B, MARKET-PLACE, GREAT PORTLAND-STREET, LONDON, W.

Mr. Evans is in no way connected with any other House in London.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

DR. J. COLLIS BROWNE'S CHLORODYNE. Vice-Chancellor Sir W. Page Wood stated publicly in Court that Dr. J. Collis Browne was undoubtedly the Inventor of Chlorodyne; that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See *The Times*, July 13, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of any service in Cholera was Chlorodyne.—See *Lancet*, Dec. 31, 1864.

DR. J. COLLIS BROWNE'S CHLORODYNE. Extract from *Medical Times*, Jan. 12, 1866.—"Is prescribed by scores of orthodox medical practitioners. Of course it would not be thus singularly popular did it not supply a want and fill a place."

DR. J. COLLIS BROWNE'S CHLORODYNE is the best and most certain remedy in COUGHS, COLDS, ASTHMA, CONSUMPTION, NEURALGIA, RHEUMATISM, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE is a certain cure in CHOLERA, DYSENTERY, DIARRHŒA, COLICS, etc.

DR. J. COLLIS BROWNE'S CHLORODYNE. Extract *from the* GENERAL BOARD OF HEALTH, *London, as to its efficacy in Cholera*—"So strongly are we convinced of the immense value of this remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. MONTGOMERY, Esq., *late Inspector of Hospitals, Bombay*.—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health after eighteen months' severe suffering, and when all other remedies had failed."

DR. J. COLLIS BROWNE'S CHLORODYNE. CAUTION.—None genuine without the words "Dr. J. Collis Browne's Chlorodyne" on the Government Stamp. Overwhelming medical testimony accompanies each bottle. Sole Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury, London. The immense demand enables the proprietors to reduce the price; it is now sold in bottles, 1s. 1½d., 2s. 9d., 4s. 6d., and 11s.

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.

AGENT: Hong Kong, Mr. A. S. WATSON.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor

HUBBUCK'S PATENT WHITE ZINC PAINT.

THE most durable and beautiful paint known, is cheaper than White Lead, and is proved to be superior for all purposes than the pernicious Lead Paint, and equally adapted for all climates.
Its whiteness is unaffected by bilge water, boiling sugar, or noxious gases.
It is free from any poisonous ingredient, and suited in all respects to the use of the painter.
Each Cask of Pure White Zinc is Stamped "HUBBUCK, LONDON PATENT."
Inferior Zinc Paint, so marked, having been sold in Foreign Markets, the Patentees offer a Reward of FIFTY POUNDS for information which will lead to the conviction, in an English or Colonial Court, of those who have pirated their Mark. Both Exporters and Retailers are liable for its sale.

THOMAS HUBBUCK AND SON,

WHITE LEAD, OIL, PAINT, AND VARNISH WORKS,

24, LIME-STREET, LONDON.

HUBBUCK'S ANTI-CORROSIVE PAINTS

Are very durable, and the most valuable protection to Iron Roofs, Bridges, Piers, Ships and Buildings, exposed to stormy weather and scorching sun; they soon become extremely hard, and do not blister.
They are made of Stone, Slate, Copper, White, Blue, Green, or any other Colour that is desired.

HUBBUCK'S ANTI-OXIDATION COMPOSITION,

For Coating Iron and Wood Ships' Bottoms; a preservative against fouling and corrosion. This Composition is ready for immediate use, and obviates the waste of carrying unmixed Paints, Oils, Driers, &c. It is also applicable to all the purposes of other Paints.

HUBBUCK'S PALE BOILED OIL

Has less colour than Raw Linseed Oil, is a quick, hard and certain drier for White and Light Coloured Paints.

PAINTS AND OILS PROPERLY PACKED FOR EXPORTATION.

ELLWOOD'S NEW PATENT AIR-CHAMBER HAT

Combines the lightness of the Pith Hat and the softness of a Turban, with the durability, comfort, and numerous other good qualities for which ELLWOOD'S PATENT Air-Chamber Hats have so long been celebrated.

Hats, Caps, and Helmets of every description Manufactured at the Works of

J. ELLWOOD & SONS,

GREAT CHARLOTTE-STREET, S., LONDON

CAUTION.—No Air-Chamber Hats or Helmets are genuine unless they bear the above stamp, with either "ELLWOOD & SONS," or the seller's name in the Shield.

*** Orders through Mercantile Houses carefully shipped.

MESSRS. COLLARD & COLLARD

FIND it NECESSARY to CAUTION the Public against the EXTENSIVE FRAUDULENT USE of their NAMES in the COLONIES, and urge on Purchasers the necessity of Examining very Carefully the NAME-BOARD of any INSTRUMENT they may be Buying; but especially they recommend that in all cases Respectable DEALERS or PROFESSORS of MUSIC should be CONSULTED for GUIDANCE.

A Certificate of Authenticity accompanies every Instrument sent abroad by Messrs. COLLARD and COLLARD.

16, GROSVENOR-STREET, and 26, CHEAPSIDE, LONDON.

SMITH'S PATENT DISINFECTING CLEANSING POWDER

FOR

SCRUBBING, WHITENING, & PURIFYING SHIPS' DECKS (SURPASSING HOLYSTONE), CLEANSING PAINT, FLOORS, CABINS, &c.

NO Soap or Soda required; is a preventive of fever and contagious diseases, and effectually destroys insects. In use by the Army and Navy (by special appointment), and all the Hospitals and Asylums in England, and forwarded to the Naval Stores abroad for the use of H.M.'s Ships. It is far superior to Soft Soap or any other article yet introduced. To be had in any sized packages.

Also SMITH'S PATENT DEODORISING POWDER, under distinguished Medical patronage, is the cheapest and most efficacious remedy in removing offensive smells and preventing disease. Is much cheaper and more effective than Chloride of Lime. Parish and other authorities are ordering its use for foul drains, streams, alleys, and houses.

J. M. SMITH.
HAMPTON WORKS,
FRANCIS-STREET, NEWINGTON BUTTS, LONDON.

GELLE FRERES PERFUMERY.

CHIEF ESTABLISHMENT, 35, RUE DES VIEUX AUGUSTINS, à PARIS.

THE house of GELLE FRERES, celebrated for the superiority of its Perfumery, addresses itself to the fashionable world as much for its essentially hygeianic, refreshing, and tonic preparations as for its delicate and distingué perfumes.

COUGHS, ASTHMA, and INCIPIENT CONSUMPTION are EFFECTUALLY CURED by

KEATING'S COUGH LOZENGES.

JUDGED BY THE IMMENSE DEMAND, this UNIVERSAL REMEDY now stands the first in public favour and confidence; this result has been acquired by the test of fifty years' experience. These Lozenges may be found on sale in every British Colony, and throughout India and China they have been highly esteemed wherever introduced. For Coughs, Asthma, and all affections of the Throat and Chest, they are the most agreeable and efficacious remedy.

Prepared and sold in Boxes, Tins, and Bottles of various sizes, by THOMAS KEATING, Chemist, &c, 79, St. Paul's Churchyard, London. Sold Retail by all Druggists and Patent Medicine Vendors in the World.

Testimonial from Colonel HEWETT, J.P. and D.L., 3rd Brigade, Cardiff Artillery Volunteers.
Ter. Mab. Ellis, Ponty-Pridd,
Glamorgan, May, 1866.

DEAR SIR,—I was attacked with a severe cough, which your Lozenges removed in a few days. My servants, also, by taking your Lozenges, were soon cured.

I feel it a duty (to the public) to offer my testimony to their efficacy, which you are at liberty to publish.—Yours truly, W. HEWETT.

To Mr. THOMAS KEATING.

CHILDREN'S WORM TABLETS (KEATING'S).

The great remedy for these disorders in children can now be administered IN THE FORM OF A PURELY VEGETABLE SWEETMEAT, at once agreeable and effective.

Prepared and sold in tins and bottles by THOMAS KEATING, Chemist, &c., 79, St. Paul's Church yard, London, E.C. and retail by all druggists and patent medicine vendors in the world.

Observe the words "KEATING'S WORM TABLETS" are engraven on the Government Stamp of each tin, without which none are genuine.

TESTIMONIAL.
Loughton, November 28, 1865.

DEAR SIR,—I write to inform you I purchased a box of your Worm Tablets, and they have brought no less than 30 worms, some 3 or 4 inches in length, from my child, two-years-and-a-half old. I feel it my duty to make this public, as others who may be similarly afflicted may derive benefit.—I am, your obliged,
EDWARD BUSH.

12, LITTLE BRITAIN, LONDON, E.C.

PEACOCK AND BUCHAN'S COMPOSITIONS FOR KEEPING OFF BARNACLES, WEEDS, &c.

THIS is now established as the BEST and CHEAPEST known for protecting ships bottoms from galvanic action or fouling. It is used on the ships of the "Peninsular and Oriental," "Royal West India" "Panama and New Zealand," "Pacific Steam," and other Royal Mail Companies; also on foreign ships of war, and in H.M.'s Royal Dockyards. Apply to the Manufacturers direct, SOUTHAMPTON, or to their accredited Agents at all the seaports of the world.

Extract from the "Standard" of October 18th, 1866.

"COMPOSITION FOR IRON SHIPS' BOTTOMS.—It appears that the iron turret ship 'Huascar,' on Captain Cowper Coles' plan, and fitted with his patent triaod masts, &c., belonging to the Chilian Government, before leaving England was coated on her bottom with Messrs. PEACOCK and BUCHAN'S last Improved Composition for protecting the plates and rivets, and keeping off shell fish, &c., and which has given such entire satisfaction that they, the said Government, have just ordered *five* tons of the material to be sent out to the Arsenal at Valparaiso for the use of their Iron Fleet in the Pacific. The Spanish Government have also ordered a considerable quantity of this composition for the use of their Iron Fleet."

Extract from the "Greenock Advertiser" of October 11th, 1866.

"ANTI-FOULING COMPOSITION.—The ship 'Ceres,' of Greenock, lately reached this port after a two years' voyage, and has been put into Dock to receive a fresh coating of Messrs. PEACOCK and BUCHAN'S (of Southampton) Patent Composition. The vessel was coated with it at London in 1863, and sailed thence to Melbourne, Calcutta, Bombay, and Greenock, and on her arrival here the copper was quite clean and clear of barnacles, and has thus saved a very heavy per centage of wear and tear. We understand that the local agents, Messrs. Macallister and Fyfe, have received a letter from Captain M'Kenzie, of the "Hooyland," of Glasgow, stating that on his ship's return from a voyage to Surinam the copper, which had also been coated with this Composition, was perfectly clean."

IMPORTANT ANNOUNCEMENT.

JOSEPH GILLOTT,
Metallic Pen Maker to the Queen,

BEGS to inform the Commercial World Scholastic Institutions, and the Public generally that, by a novel application of his unrivalled Machinery for making Steel Pens, he has introduced a NEW SERIES of his useful productions, which, for EXCELLENCE OF TEMPER, QUALITY OF MATERIAL, and above all, CHEAPNESS IN PRICE, must ensure universal approbation, and defy competition.

Each Pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with label outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition J. G. has introduced his WARRANTED SCHOOL and PUBLIC PENS, which are especially adapted to their use, being of different degrees of flexibility and with fine medium, and broad points, suitable for the various kinds of Writing taught in Schools.

Sold Retail by all Stationers and Booksellers. Merchants and Wholesale Dealers can be supplied at the Works, Graham-street, Birmingham; at 91, John-street New York; and 37, Gracechurch-street, London.
